DEPARTMENT OF INFORMATION TECHNOLOGY

INTRODUCTION TO COMPUTER PROGRAMMING

160112 / 230102

| L | T | P | Total Credits |
|---|---|---|---------------|
| 2 | 1 | 2 | 4 |

COURSE OBJECTIVES

- To familiar with program readability/understanding including program style/formatting and self-documenting code.
- To familiar with debugging process.
- To design and implement basic programming solutions including statements, control structures, and methods.

Unit I

Introduction to Programming, Machine Level Languages, Assembly Level Languages, High Level Languages, Program Execution and Translation Process, Problem solving using Algorithms and Flowcharts. Introduction to C Programming: Data Types, Constants, Keywords, Operators & Expressions, Precedence of operators and input/output functions.

Unit II

Control Statements and Decision Making: The goto statement, The if statement, The if-else statement, Nesting of if statements, The conditional expression, The switch statement, The while loop, The do...while loop, The for loop, The nesting of for loops, The break and continue statement.

Unit III

Arrays, Strings & Pointers: One dimensional Arrays, Passing Arrays to Functions, Multidimensional Arrays, Strings, Basics of Pointers & Addresses, Pointer to Pointer, Pointer to Array, Array of Pointers, Types of pointers, Pointer to Strings.

Unit IV

Functions & Structures: Function Basics, Function Prototypes, Passing Parameter by value and by reference, Passing string to function, Passing array to function, Function returning

Handwritten signatures and marks:
A large signature: "Dr. Sanjiv Kumar" with a flourish.
Other smaller signatures and initials: "B", "M", "4", and a checkmark.

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to RGPV, Bhopal)

DEPARTMENT OF INFORMATION TECHNOLOGY

address, Recursion, Structures & Union, Pointer to Structure, Self-Referential Structures, Dynamic memory allocation by malloc/calloc function, Storage Classes.

Unit V

File Handling: Defining and Opening a file, Closing Files, Input/output Operations on Files, Predefined Streams, Error Handling during I/O Operations, Command Line Arguments.

RECOMMENDED BOOKS

- Brian W. Kernighan and Dennis M. Ritchie, The C Programming Language, Prentice Hall of India.
- Paul Deitel and Harvey M. Deitel, How to Program, Pearson Publication.
- Yashavant Kanetkar , Let Us C, BPB publication.
- E. Balagurusamy, Programming in ANSI C, Tata McGraw-Hill.
- Byron Gottfried, Schaum's Outline of Programming with C, McGraw-Hill.

COURSE OUTCOMES

After completion of the course students would be able to:

- CO1. identify situations where computational methods and computers would be useful.
- CO2. describe the basic principles of imperative and structural programming.
- CO3. develop a pseudo-code and flowchart for a given problem.
- CO4. analyze the problems and choose suitable programming techniques to develop solutions.
- CO5. design, implement, debug and test programs.
- CO6. design computer programs to solve real world problems.

INTRODUCTION TO COMPUTER PROGRAMMING

(160112/230102)

LIST OF EXPERIMENTS

1. Write a C program to add two numbers and display its sum.
2. Write a C program to input two number from the user and display the multiplication of these numbers.
3. Write a Program to calculate and display the volume of a cylinder for height and radius parameters to be input from the user.
4. Write C program to realize the following expressions:
 - a. $V = u + at$
 - b. $S = ut + \frac{1}{2}at^2$
 - c. $T = 2*a + \sqrt{b} + 9c$
5. Write a program to take input of name, rollno and marks obtained by a student in 5 subjects of 100 marks each and display the name, rollno with percentage score secured.
6. Write a program to swap values of two variables with and without using third variable.
7. Write a program to illustrate the use of unary prefix and postfix increment and decrement operators.
8. Write a program to find the largest of three numbers using ternary operators.
9. Write a program to find the roots of quadratic equation.
10. Write a Program to Check Whether a Number is Prime or not.
11. Write a program to compute grade of students using if else ladder as per MITS norms.
12. Write a program to check whether the entered year is leap year or not (a year is leap if it is divisible by 4 and divisible by 100 or 400.)
13. Write a program to print the sum of digits of a number using for loop.
14. Write a program to display the following pattern using for loops.

INTRODUCTION TO COMPUTER PROGRAMMING
(160112/230102)

LIST OF SKILL BASED MINI PROJECT

1. Write a program to obtain the sum of the first two even digit and last two add digits of integer number given by user .Number has at least 8 digit.
2. Write a program to obtain a number N and increment its value by 1 if the number is divisible by 4 otherwise decrement its value by 1 until we get a prime number.

3. Consider the following 4×4 pattern:

1 2 4 7
3 5 8 11
6 9 12 14
10 13 15 16

You are given an integer N. Write a program to print the N×N pattern of the same kind (containing integers 1 through N^2).

4. Following conditions are given based on three subjects marks
 - a. Physics marks must be greater than 50
 - b. Chemistry marks must be greater than 80
 - c. English marks must be greater than 70

Students is awarded grade 10 if all three conditions are met. Grade 9 is given if conditions a and b are met. Grade 8 is given if conditions b and c are met. Grade 7 is given if a and c are met. Grade is 6 if only one condition is met . Grade is 5 if none of the three conditions are met. Write a program to display the grade of students , based on the values of physics , chemistry and English , given by user.

5. Ram and Shyam are playing a game. Ram initially has the number A and Shyam has the number B. There are a total of N turns in the game, and Ram and Shyam alternatively take turns. In each turn the player whose turn it is, multiplies his or her number by 2. Ram has the first turn. Suppose after all the N turns, Ram's number has become C and Shyam's number has become D. Write a program to calculate the integer division of the maximum number among C and D by the minimum number among C and D.

Handwritten signatures and initials:
A, Nir, Ay, Sang, Ashish, [Signature], [Signature]

DEPARTMENT OF INFORMATION TECHNOLOGY

6. An array A of N positive numbers is given. Write a program to find the number of subarrays for which the sum and product of elements are unequal.
 7. There's an array A consisting of N non-zero integers A_1, \dots, A_N . A subarray of A is called alternating if we take any two adjacent elements in it, then one of them should be even and the other should be odd. For each x from 1 to N , write a program to compute the length of the longest alternating subarray that starts at x - that is, a subarray $A_{x..y}$ for the maximum possible $y \geq x$. The length of such a subarray is $y-x+1$.
 8. Given an array A_1, A_2, \dots, A_N , count the number of subarrays of array A which are non-decreasing. A subarray $A[i..j]$, where $1 \leq i \leq j \leq N$ is a sequence of integers A_i, A_{i+1}, \dots, A_j . A subarray $A[i..j]$ is non-decreasing if $A_i \leq A_{i+1} \leq A_{i+2} \leq \dots \leq A_j$. Write a program to count the total number of such subarrays.
 9. Two strings A and B are given, each consisting of lower case alphabets.
Write a program to find whether it is possible to choose some non empty strings s_1 and s_2 where s_1 is a substring of A , s_2 is a substring of B such that $s_1 + s_2$ is a palindromic string. Here '+' denotes the concatenation between the strings. And if there are such strings S_1 and S_2 then print S_1+S_2 .
 10. There are N students standing in a row and numbered 1 through N from left to right. You are given a string S with length N , where for each valid i , the i -th character of S is 'x' if the i -th student is a girl or 'y' if this student is a boy. Students standing next to each other in the row are friends. The students are asked to form pairs for a project work. Each pair must consist of a boy and a girl. Two students can only form a pair if they are friends. Each student can only be part of at most one pair. Write a program to find the maximum number of pairs that can be formed.

DEPARTMENT OF INFORMATION TECHNOLOGY

IT WORKSHOP

(160111)

| L | T | P | Total Credits |
|---|---|---|---------------|
| - | - | 4 | 2 |

COURSE OBJECTIVES:

- To make use of computers for various purposes like surfing the net, sending/ receiving emails, preparation of various documents and presentations, preparing small databases, maintenance of accounts.
- To acquire the knowledge of computer system, mother board and its processing unit.
- To be aware of different memories, windows installation, hardware and software troubleshooting.

Unit-I

Computer Hardware: Introduction to Hardware Peripherals like RAM, ROM, Keyboard, Hard disk drive, Mouse, Processors, Generation of processor, Working of SMPS, Study of various ports, Assembly and Disassembly of Computer, Study of Networking Cable and its types, Installation and Partition of Hard Disk, Troubleshooting & Fault finding.

Unit-II

Operating System and software installations: Introduction to Operating System, Types of Operating System (Windows and Linux), Evolution of Operating System, Introduction of Software, Types of Software, Installation steps for Operating System (Windows, Linux etc), Creating Virtual Machine using VMware/ VirtualBox.

Unit-III

Word & Excel Orientation: Overview of Microsoft office word / Excel, New Features of Microsoft Office, Working with Documents in Microsoft Word /Excel, Saving the File, Formatting the Text, Alignment of Text, Applying Fonts, Spell Checking, Inserting Header and Footer, Charts and Graphics in Microsoft Word/Excel, Working with Tables, functions and Macros in Microsoft Word/Excel, Validating Data in Microsoft Excel, Using formulae in Excel, Creating project/certificates/Newsletter using Word.

[Handwritten signatures and initials]

MADHAV INSTITUTE OF TECHNOLOGY & SCIENCE, GWALIOR

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to RGPV, Bhopal)

DEPARTMENT OF INFORMATION TECHNOLOGY

PowerPoint Presentation: Introduction to Microsoft PowerPoint, Use of Standard Formatting toolbar, Working with Charts and Tables, Editing slides, Changing templates, Slide Layouts, Inserting clipart & Pictures into slide, Slide Transitions, Animation, Inserting sound and movies into slides, Create & Deliver dynamic presentation.

Unit-IV

Computer Application: Microsoft Disk Operating System (MS-DOS): Internal Commands, External Commands, Batch File etc. Overview of Linux, Common Linux Features, **Essential Linux commands**, Advantage of Linux, Creating E-mail Account, E-mail Writing, Blog Writing, Net Surfing and Chatting, Customize Web Browser with the LAN proxy setting, Bookmarks, Search Toolbars and Pop up Blockers, Install Antivirus Software, Configure personal firewall and Window update, Customize browser to block pop ups, Cyber Hygiene.

Unit-V

Internet: Introducing the Networking concept using LAN & WAN, Introduction, Evolution and Uses of Internet, Concepts of Web Browser, Web Page and Web Site, Study of various Internet based services like Email, Social Network, Chat, Introduction to Cyber Security and Cyber Laws.

Server: Introduction to Server, Difference between server and normal desktop, Evolution of servers, Study of various servers. Web designing using HTML/CSS.

RECOMMENDED BOOKS

- Comdex Information Technology course tool kit Vikas Gupta, WILEY Dreamtech
- The Complete Computer upgrade and repair book, 3rd edition Cheryl A Schmidt, WILEY Dreamtech.
- Introduction to Information Technology, ITL Education Solutions Limited, Pearson Education.
- PC Hardware and A+ Handbook - Kate J. Chase PHI (Microsoft)

COURSE OUTCOMES

After completion of the course student would be able to:

CO1. understand the basic concept and structure of computer hardware and networking.

CO2. demonstrate installation of windows and connections through ports at basic level.

[Handwritten signatures and initials at the bottom of the page]

MADHAV INSTITUTE OF TECHNOLOGY & SCIENCE, GWALIOR
(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to RGPV, Bhopal)

DEPARTMENT OF INFORMATION TECHNOLOGY

- CO3. identify the existing configuration of the computers and peripherals.
CO4. apply the knowledge about computer peripherals to identify/rectify problems onboard.
CO5. explain the concept of Memory, Motherboard, Bus and SMPS.
CO6. manage data backup and restore operations on computer and update application software.
-

[Handwritten signatures and initials]

MADHAV INSTITUTE OF TECHNOLOGY & SCIENCE, GWALIOR
(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to RGPV, Bhopal)

DEPARTMENT OF INFORMATION TECHNOLOGY

**IT WORKSHOP
(160111)
LIST OF PROGRAMS**

1. Design Resume on Word.
 2. Prepare powerpoint presentation on one latest technology.
 3. Write a request and apology email.
 4. Run MS-DOS commands/Linux commands.
 5. Study of Computer Hardware (RAM, ROM, Keyboard, Hard disk drive, Mouse, processors, hard disk etc).
 6. Installation and partition of hard disk.
 7. Installations of OS (Windows/Linux etc).
 8. Disassemble and assemble the PC.
 9. Study of PC troubleshooting.
 10. Creating Virtual Machine using VMWARE.
 11. Design Webpage using HTML & CSS.
-

Handwritten signatures and initials:
Nir, Sush, Jyoti, P, M, K, A, C

DEPARTMENT OF INFORMATION TECHNOLOGY

**IT WORKSHOP
(160111).**

LIST OF SKILL BASED MINI PROJECT

1. Using UCI Heart Disease Data perform a multivariate numerical data analysis using correlation on 25 out of 76 attributes in excel workbook. Present your results using various charts and graphs available in MS Excel workbook.
 2. Demonstrate and compile a script (in dos/C/bash shell/terminal) to send a file from one system to another using LAN and ftp protocol.
 3. Use C language to implement a payroll system for MITS employees. The system should prompt a list to input the data, view list of employees and display annual estimated tax @10% per annum of the total salary. Input employee details including name, emp no, dob, monthly basic salary, Gross Pay, DA and HRA. Save the details in a file and retrieve the data as needed.
 4. Use C language to implement a Railway reservation system. The system should prompt a list to print number of passengers and the train they are travelling, option to input data of passenger and train.
 5. Use excel workbook to predict to predict students' end-of-term performances using the Higher Education Students Performance Evaluation Dataset from Kaggle.
 6. Use excel workbook to implement inner joins and outer joins on multiple tables to demonstrate its use.

DATA STRUCTURES

160211/230202

| L | T | P | Total Credits |
|---|---|---|---------------|
| 2 | 1 | 2 | 4 |

COURSE OBJECTIVES

- To be familiar with the use of data structures as the foundational base for computer solutions to problems.
- To understand various techniques of searching and sorting.
- To understand basic concepts about stacks, queues, lists, trees and graphs.

Unit-I

Introduction to Data Structures: Algorithms & their characteristics, asymptotic notations. arrays and its representations, index to address translation. **Link list:** Introduction, implementation of linked list, operations, circular link list, doubly linked list, polynomial manipulation using linked list.

Unit-II

Stacks: Concepts and implementation of stacks, operations on stack, conversion of infix to postfix notation, evaluation of postfix expression, recursion.

Queues: Concepts and implementation, operations on queues, dequeue, priority queues, circular queues and application.

Unit-III

Trees: Types, terminology, binary tree -representations, traversal, conversion of general tree to binary tree, binary search tree, threaded binary tree and height balanced tree.

Unit-IV

Graphs: Background, graph theory terminologies, representation of graphs- sequential & linked representation, path matrix, graph traversals- BFS, DFS, spanning trees, applications of graph.

[Handwritten signatures and marks at the bottom of the page]

DEPARTMENT OF INFORMATION TECHNOLOGY

Unit-V

Searching & Sorting: Linear search, binary search, bubble sort, selection sort, insertion sort, quick sort, merge sort, radix sort and heap sort, comparison between sorting techniques, hashing and collision resolution techniques.

RECOMMENDED BOOKS

- Data Structures, Algorithms and Applications in C++, Sartaj Sahni, 2nd Edition.
 - An Introduction to Data Structures with Applications, Jean-Paul Tremblay, Mcgraw hill.
 - Data Structures & Algorithms, Aho, Hopcroft & Ullman, original edition, Pearson Publication.
-

COURSE OUTCOMES

After completion of this course, the students would be able to:

- CO1. outline the basics of Algorithms and their performance criteria's.
 - CO2. explain the working of linear/Non Linear data structures.
 - CO3. identify the appropriate data structure to solve specific problems.
 - CO4. analyze the performance of various Data Structures & their applications.
 - CO5. evaluate the time/space complexities of various data structures & their applications.
 - CO6. design the optimal algorithmic solutions for various problems.
-

Handwritten signatures and initials:

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to RGPV, Bhopal)

DIGITAL LOGIC DESIGN

| L | T | P | Total Credits |
|---|---|---|---------------|
| 2 | 1 | - | 3 |

- To understand the fundamental operating components of Digital Computers
- To learn various number systems, boolean algebra employed in digital computers
- To understand the concept of counters, latches and flip-flops.

Introduction to Digital Electronics, Needs and Significance, Different Number System: Binary Numbers, Octal and Hexadecimal Numbers, Conversions, Complement's, Signed Binary Numbers, Binary Arithmetic's, Binary Codes: BCD, ASCII Codes.

Basic Theorems and Properties of Boolean Algebra, Boolean Functions, Boolean Relations, Digital Logic Gates, De Morgan's Theorem, Karnaugh Maps and simplifications.

Combinational Circuits, Half Adder, Full Adder, Binary Adder-Subtractor, Binary Multiplier, Comparator, Decoders, Encoders, Multiplexers, Programmable Devices: Programmable Logic Array (PLA), Programmable Array Logic (PAL).

Sequential Circuits, Latches, Flip-Flops: RS Latches, Level Clocking, D Latches, Edge-triggered D Flip-flop, Edge-triggered JK Flip-flop, JK Master-slave Flip-flop; Registers, Shift Registers, Counters, Ripple Counters, Synchronous Counters.

Introduction to Memory, Memory Decoding, Error Detection and Correction,
Programmable Logic Array, Programmable Array Logic, Sequential (or simple)

DEPARTMENT OF INFORMATION TECHNOLOGY

programmable logic device (SPLD), Complex programmable logic device (CPLD), Field-programmable gate array (FPGA), Digital Logic Design: **Sequential Programmable Devices** RTL and DTL Circuits, TTL, ECL, MOS, CMOS, Application Specific Integrated Circuits.

RECOMMENDED BOOKS

- Digital Design, Morris Mano M. and Michael D. Ciletti, IV Edition, Pearson Education.
- Digital Electronics: Principles, Devices and Applications, Anil K. Maini, Wiley.

COURSE OUTCOMES

After completion of the course students would be able to:

- CO1. explain the basic components and functional units to define computer architecture
 - CO2. explain different number systems and basic operations employed at machine level.
 - CO3. develop the understanding of combinational circuits.
 - CO4. analyse the basic concept of sequential circuits.
 - CO5. compare and differentiate various memories used in Computers.
 - CO6. reduce the Boolean functions to mitigate hardware complexity issues.

OBJECT ORIENTED PROGRAMMING AND METHODOLOGY

160212 /230203

| L | T | P | Total Credits |
|---|---|---|---------------|
| 3 | - | 2 | 4 |

COURSE OBJECTIVES

- To study about the concept of object oriented programming.
- To create C++ programs that leverage the object oriented features of the C++ Language.
- To apply object oriented or non-object oriented techniques to solve bigger computing problems.

Unit-I

Introduction to C++ and Object Oriented Concepts: Basics of C++, Tokens, I/O Statements, Structure of Program, Operators and Expressions, Flow of Control, Arrays, Structures, Functions and its type, Function Prototyping, Pointers, Pointer Variables, Pointers and Arrays, Array of Pointers, Pointers and Structures, Dynamic Memory Allocation.

Programming Techniques: Unstructured & Structured Programming, Object Oriented Paradigm, Features of OOPS, Comparison with Procedural Oriented Programming & Object Oriented Programming, Abstract Data Types, Reference Variable, Scope Resolution Operator.

Unit-II

Classes & Objects: Specification of Class, Visibility Modes: Private, Public, Protected, Defining Member Functions, Creating of Objects, Characteristics of Object, Static Data Member, Static Member Function, Array of Objects, Object as Arguments, Inline Function, Default Arguments, Friend Function, Recursion.

Constructors and Destructors: Introduction, Types of Constructors- Default Constructor, User Defined Constructor, Parameterized Constructor, Copy Constructor, Constructor with Default Arguments, Rules of Constructor Definition and Usage, Destructors.

Unit-III

Polymorphism: Introduction, Type of Polymorphism: Compile Time Polymorphism & Run Time Polymorphism, Function Overloading, Operator Overloading: Binary

A series of handwritten signatures and marks in blue ink. From left to right: a stylized signature, a signature with 'N' and 'D' below it, a signature, a signature, a signature, and a large checkmark with a box around it. There is also a small 'A' mark on the far left.

DATA STRUCTURES
(160211/230202)
LIST OF EXPERIMENTS

1. Write a program for implementing the following sorting methods to arrange a list of integers in ascending order:
 - a. Selection sort
 - b. Quick sort
 - c. Merge sort
 2. Write a program to implement Stack using array.
 3. Write a program to count the number of nodes in the binary search tree.
 4. Write a program to implement stack using linked list.
 5. Write a program to implement AVL Tree.
 6. Write a program to implement Breadth First Search and Depth First Search.
 7. Write a program to implement graph using array.
 8. Write a program to implement Spanning Tree.
 9. Write a program to implement Heap Sort.
 10. Write a program to implement binary search algorithm.
-

[Handwritten signatures and initials]

[Handwritten mark]

1. Write a program to implement King Travails on the standard 8x8 chess board. (The king moves one square in any direction, horizontally, vertically, or diagonally.)

2. Write a program to implement Queen Travails on the standard 8x8 chess board. (The queen may move in any straight line, horizontal, vertical, or diagonal.)

3. Implement the Phone directory application using doubly-linked lists.
4. Design and solve any puzzles with only one solution, such as mazes. (DFS can be adapted to find all solutions to a maze by only including nodes on the current path in the visited set.)
5. Write a program to evaluate any arithmetic expressions using STACK.
6. Write a program to implement priority queue for airport check in process.

[Handwritten signatures and marks]

4

OBJECT ORIENTED PROGRAMMING AND METHODOLOGY

(160212/230203)

LIST OF PROGRAMS

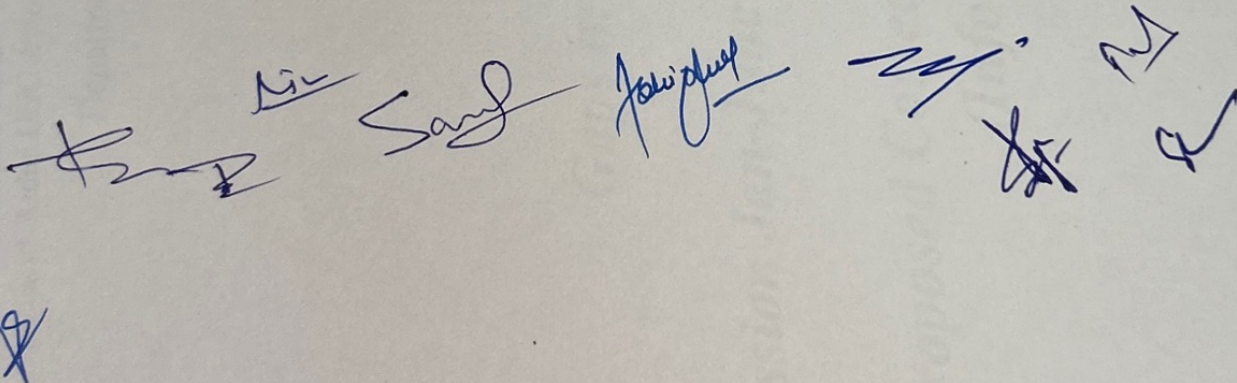

1. WAP to swap two integers without using a third variable. The swapping must be done in a different method in a different class.
 2. WAP that uses a class where the member functions are defined outside a class.
 3. WAP to find the greater of two given numbers in two different classes using friend function.
 4. Create an abstract class Shape which has a field PI=3.14 as final and it has an abstract method Volume. Make two subclasses Cone and Sphere from this class and they print their volume.
 5. Create a class called LIST with two pure virtual function store() and retrieve(). To store a value call store and to retrieve call retrieve function. Derive two classes stack and queue from it and override store and retrieve.
 6. WAP to define the function template for calculating the square of given numbers with different data types.
 7. Design a class to represent a bank account. Which include contains account number, name of the depositor, type of the account, balance amount in the account. Define Methods, to assign initial values, to Deposit an amount, to Withdraw amount after checking balance, to display name and balance.
 8. Create an inheritance hierarchy of Rodent, Mouse, Gerbil, Hamster etc. In the base class provide methods that are common to all Rodents and override these in the derived classes to perform different behaviors, depending on the specific type of Rodent. Create an array of Rodent, fill it with different specific types of Rodents and call your base class methods.
 9. WAP Containing a Possible Exception. Use a Try Block to Throw it and a Catch Block to Handle it Properly.
 10. WAP to raise an exception if any attempt is made to refer to an element whose index is beyond the array size.
-

[Handwritten signatures and marks]

OBJECT ORIENTED PROGRAMMING AND METHODOLOGY
(160212/230203)

LIST OF SKILL BASED MINI PROJECTS

1. Using C++ OOP Program, create a billing system for the book inventory system.
 2. Implement a shopping cart for any shop using C++ OOP Program
 3. Using C++ OOP Program, develop an authentication system for login and registration of system.
 4. Using C++ OOP Program, design a pattern matching mechanism for credit fraud detection system.
 5. Implement the leave management for payroll management Using C++ OOP Program.
 6. Demonstrate the overall mechanism for managing contact in any directory Using C++ OOP Program
 7. Implement the analog and digital clock using C++ OOP Program.
 8. Design a diary for maintaining personal & appointment details using C++ OOP Program.
 9. Develop a module for designing a student report card using C++ OOP Program.
-

A series of handwritten signatures and initials in blue ink, arranged horizontally across the page. From left to right, there is a signature that looks like 'Anand', a signature 'Sandeep', a signature 'Anand', a signature 'Anand', a signature 'Anand', a signature 'Anand', and a signature 'Anand'. There are also some initials and marks scattered around.

| L | T | P | Total Credits |
|---|---|---|---------------|
| 2 | 1 | - | 3 |

COURSE OBJECTIVE

- To provide the fundamental knowledge of a computer system and its processing units.
- To provide the details of input & output operations, memory management and performance measurement of the computer system.
- To understand how computer represents and manipulate data.

Unit -I

Introduction: Von Newman Model, Various Subsystems, CPU, Memory, I/O, System Bus, CPU and Memory Registers, Program Counter, Accumulator, Register Transfer and Micro Operations: Register Transfer Language, Register Transfer, Tree-State Bus Buffers, Bus and Memory Transfers, Arithmetic Micro-Operation, Logic Micro-Operation, Shift Micro-Operation Register Transfer Micro Operations, Arithmetic Micro-Operations, Logic Micro-Operations and Shift Micro-Operations.

Unit- II

Computer Arithmetic: Addition and Subtraction with Signed-Magnitude, Multiplication Algorithm, Division Algorithm, Division Algorithms, Floating-Point Arithmetic Operations.

Central Processing Unit (CPU): General Purpose Register Organization, Stack Organization, Instruction Formats, Addressing Modes, Data Transfer and Manipulation, Program Control, Reduced Instruction Set Computer (RISC), Hardwired and Microprogrammed Control.

Unit -III

Microprocessors: Introduction of 8085 Microprocessor: Architecture, Instruction Set, Addressing Modes, Interrupts and Basic Assembly Language Programming.

Unit -IV

Input-Output Organization: Peripheral Devices, I/O Interface, Asynchronous Data Transfer, Modes of Transfer, Priority Interrupt, DMA (DMA Controller, DMA

Handwritten signatures and marks at the bottom of the page.

DEPARTMENT OF INFORMATION TECHNOLOGY

Transfer), Input-Output Processor (IOP), Data Transfer- Serial/Parallel, Simplex/ Half Duplex/ Full Duplex.

Unit-V

Memory Organization: Memory Hierarchy, Main Memory, Auxiliary Memory, Associative Memory, Cache Memory- Organization and Mappings, Memory Management Hardware, Introduction to Pipelining & Multiprocessors.

RECOMMENDED BOOKS

- Computer System Architecture, Morris Mano, PHI.
 - Microprocessor Architecture, Programming and Applications with the 8085, Gaonkar, Penram International Publishing (India) Pvt.Ltd.
 - Computer Organization, Carl Hamacher, THM.
 - Computer Architecture and Organization, J P Hayes, Mc-Graw Hills, New Delhi.
-

COURSE OUTCOMES

After completion of the course students would be able to:

- CO1. recall the basic building blocks of computer Architecture.
 - CO2. compare different memories.
 - CO3. apply the concept of memory mapping, multiprocessor and pipelining in solving real world problems.
 - CO4. analyze various modes of Input-Output data transfer.
 - CO5. evaluate the arithmetic related to the number system.
 - CO6. develop the skill of writing low level programming.
-

Handwritten signatures and initials are present at the bottom of the page, including names like S.S., A.S., B., C.A., M., K., M., and others.

| L | T | P | Total Credits |
|---|---|---|---------------|
| 2 | 1 | 2 | 4 |

COURSE OBJECTIVES

- To introduce the topic of algorithms as a precise mathematical concept.
- To study the techniques like recursion, divide and conquer, dynamic programming, greedy approach, backtracking and branch and bound.
- To practice their skills on many well-known algorithms and data structures designed to solve real-life problems.

Unit-I

Introduction to Computational Model: Algorithms and its Importance, Recurrences and Asymptotic Notations, Mathematical Analysis of Non-Recursive and Recursive Algorithm, Review of Sorting & Searching Algorithms, **Basic Tree and Graph Concepts:** B-Trees and Traversal Techniques, Topological sort.

Unit-II

Divide and Conquer Method: Introduction and its Examples such as Finding the Maximum and Minimum, Binary Search, Merge Sort, Quick Sort and Strassen's Matrix Multiplication and Additional Real World Problems on Divide and Conquer.

Unit-III

Greedy Method: Introduction, Characteristics, Examples of Greedy Methods such as Single-Source Shortest Paths, **Minimum Cost Spanning Trees :** Prim's and Kruskal's Algorithm, Knapsack Problem, Dijkstra's Single Source Shortest Path Algorithm, Optimal Storage on Tapes.

Unit-IV

Dynamic Programming: Introduction, The Principle of Optimality, Examples of Dynamic Programming Methods such as – 0/1 Knapsack, Traveling Salesman Problem, Floyd's All Pairs Shortest Path, Longest Common Subsequence and Reliability Design, Matrix Chain Multiplication.

[Handwritten signatures and marks at the bottom of the page]

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to RGPV, Bhopal)

Unit-V

RECOMMENDED BOOKS

- CO1. demonstrate a familiarity with major algorithms and data structures.
- CO2. identify important algorithmic design paradigms and methods of analysis.
- CO3. analyze the performance of algorithms.
- CO4. compare various algorithm design techniques.
- CO5. select the design technique to solve any real world problem.
- CO6. design efficient algorithm using various design techniques.

COURSE OBJECTIVES

- To understand the different issues involved in the design and implementation of a database system.
- To study the physical and logical database designs, database modelling, relational, hierarchical and network models.
- To understand and use data manipulation language to query, update and manage a database.

Unit-I

DBMS: Database Approach v/s Traditional File Approach, Advantages of Database System, Database Users and Administrator, Database System Environment, Application Architectures, Schemas, Instances, Data Independence, Data Models: Hierarchical Data Model, Network Data Model & Relational Data Model, Comparison between Models.

Entities and Relationship Model: Entity types, Entity sets, Attributes and Keys, Relationship Types and Sets, Constraints, Design issue, E-R Diagram, Weak Entity Sets.

Unit-II

Relational Model: Structure of Relational Databases: Relation, Attribute, Domain, Tuples, Degree, Cardinality, Views, Database Relations, Properties of Relations, Attributes, Keys, Attributes of Relation, Domain Constraints, Integrity Constraints.

Relational Algebra: Concepts and Operations: Select, Project, Division, Intersection, Union, Division, Rename, Join etc.

Relational Calculus: Tuple Relational Calculus, Domain Relational Calculus

Unit-III

SQL: Purpose of SQL, Data Definition Language (DDL) Statements, Data Manipulation Language (DML) Statements Update Statements & Views in SQL, Data Control Language (DCL), Triggers.

[Handwritten signatures and initials at the bottom of the page]

| 2 | 1 | - | 3 |

COURSE OBJECTIVES

- To provide basic knowledge of computer operating system structures and functioning.
- To compare several different approaches to memory management, file management and process management.
- To understand various problems related to concurrent operations and their solutions.

Unit I

Basics of Operating System: Generations, Types, Structure, Services, System Calls, System Boot, System Programs, Protection and Security.

Unit II

Process Management: Process Concepts, Process States, Process Control Block, Scheduling-Criteria, Scheduling Algorithms and their Evaluation, Threads, Threading Issues.

Unit III

Process Synchronization: Background, Critical-Section Problem, Peterson's Solution, Synchronization Hardware, Semaphores, Classic Problems of Synchronization, Monitors.

Deadlock: System Model, Deadlock Characterization, Deadlock Prevention, Detection and Avoidance, Recovery from Deadlock.

Unit IV

Memory Management: Main Memory, Swapping, Contiguous Memory Allocation, Paging, Structure of Page Table, Segmentation, Virtual Memory, Demand Paging, Page Replacement Algorithms, Allocation of Frames, Thrashing.

Unit V

Storage Management: Mass-Storage Structure, Overview, Disk Structure, Disk Attachment, Disk Scheduling.

[Handwritten signatures and initials at the bottom of the page]

DEPARTMENT OF INFORMATION TECHNOLOGY

File System Interface: The Concept of a File, Access Methods, Directory Structure, File System Structure, Allocation Methods, Free-Space Management.

RECOMMENDED BOOKS

- Operating System Concepts, Silberschatz, Ninth Edition, Willey Publication.
- Operating Systems, internals and Design Principles, Stallings, Seventh Edition, Pearson Publication.
- Modern Operating Systems, Tanenbaum, Fourth Edition. Pearson Publication.

COURSE OUTCOMES

After the successful completion of this course, the student will be able to:

- CO1. tell the basic concept of operating systems.
 - CO2. explain the working procedure of the operating system.
 - CO3. analyze the various operating system problems and issues.
 - CO4. develop the solutions for various operating system problems and issues.
 - CO5. measure the performance of various scheduling and allocation techniques.
 - CO6. test the working of various scheduling and allocation techniques.
-

[Handwritten signatures and initials]

DEPARTMENT OF INFORMATION TECHNOLOGY

JAVA PROGRAMMING LAB

160315

| L | T | P | Total Credits |
|---|---|---|---------------|
| - | 1 | 2 | 2 |

COURSE OBJECTIVES

- To understand fundamentals of object-oriented programming in Java, including defining classes, invoking methods, using class libraries, etc.
- To acquire the ability to write a computer program to solve specified problems.
- To be able to use Java SDK environment to create, debug and run simple Java programs.

Unit-I

Introduction to Java programming: Overview and Characteristics of Java, The Java Virtual Machine, Installing Java, Java Program Development, Java Source File Structure, Compilation, Executions. Packages, Package access, Variables and data types, Conditional and looping constructs, Arrays.

Unit-II

Object-oriented programming with Java Classes and Objects: Fields and Methods, Constructors, Overloading methods, Nested classes, Overriding methods, Polymorphism, Making methods and classes final, Wrapper classes.

Unit-III

Extending Classes and Inheritance: Types of Inheritance in Java, Abstract classes and methods, Interfaces, use of 'super', Polymorphism in inheritance. Garbage collection in JAVA.

Exception handling: Try- Catch, Throw, Throws, Finally constructs, The Exception class.

Unit-IV

String Package and Multithreading: Operation on String, Mutable & Immutable String, Tokenizing a String, Creating Strings using String Buffer class.

Understanding Threads: Needs of Multi-Threaded Programming, Thread Life-Cycle, Thread Priorities and Synchronizing Threads.

[Handwritten signatures and initials at the bottom of the page]

DEPARTMENT OF INFORMATION TECHNOLOGY

Unit-V

The I/O Package: Input Stream and Output Stream classes, Reader and Writer classes, Basics of AWT, Swing and Applets: Layout Managers, Event Handling, Classes for various controls, such as label, choice, list, checkbox, etc., Dialogs and frames using menus.

Basic concepts of networking: Working with URLs, Concepts of URLs and Sockets. Basics of database connectivity with JDBC.

RECOMMENDED BOOKS

- Programming with JAVA: A Primer, E. Balagurusamy, Tata McGraw Hill.
- JAVA: The Complete Reference, Herbert Schildt, McGraw Hill Education.
- JAVA-2: The Complete Reference, Patrick Naughton, Herbert Schidt.

COURSE OUTCOMES

After completion of this course, the students would be able to:

- CO1. tell the available features in Java programming language.
 - CO2. illustrate Java programming concepts for solving problems.
 - CO3. make use of the Java programming methods for connecting the various databases.
 - CO4. test for bugs in a software application written in the Java programming language.
 - CO5. determine different ways for handling exceptions, memory management, file handling, i/o management and internet based application development.
 - CO6. build a project for application development using Java programming language.
-

DEPARTMENT OF INFORMATION TECHNOLOGY
DESIGN & ANALYSIS OF ALGORITHMS
160312/230301/240301

LIST OF PROGRAMS

1. WAP to implement the following using array as data structure and analyze its time complexity.
a. Insertion sort b. Selection sort c. Bubble sort d. Quick sort e. Merge sort
f. Bucket sort g. Heap sort
 2. WAP to implement Linear and Binary Search and analyze its time complexity.
 3. WAP to implement Strassen's Matrix Multiplication.
 4. WAP to implement Matrix Chain Multiplication and analyze its time complexity.
 5. WAP to implement Longest Common Subsequence Problem and analyze its time complexity.
 6. WAP to implement Optimal Binary Search Tree Problem and analyze its time complexity.
 7. WAP to implement 0/1 knapsack using dynamic programming.
 8. WAP to implement Dijkstra's Algorithm and analyze its time complexity.
 9. WAP to implement Bellman Ford Algorithm and analyze its time complexity.
 10. WAP to implement DFS and BFS and analyze their time complexities.
 11. WAP to implement Travelling Salesman Problem using backtracking.
 12. WAP to implement Topological sort algorithm and analyze their time complexities.
-

COURSE OUTCOMES

After completion of this course, the students would be able to:

- CO1. relate the principles of algorithm design in solving problems.
 - CO2. demonstrate basic algorithms and different problem solving strategies.
 - CO3. build creativeness and confidence to solve non-conventional problems.
 - CO4. analyze running times of algorithms using asymptotic analysis.
 - CO5. compare various algorithm design approaches for solving real world problems.
 - CO6. design and implement optimization algorithms in specific applications.
-

[Handwritten signatures and initials]

LIST OF SKILL BASED MINI PROJECT

1. Implement tree traversal techniques like pre-order, post-order and in-order.
 2. Implementation of divide and conquer based merge sort algorithm, quick sort algorithm.
 3. Implementation of divide and conquer based matrix multiplication algorithm.
 4. Implement the greedy approach for single source shortest path.
 5. Design a program for finding minimum cost tree for traversing all nodes of a graph.
 6. Implement the Knapsack problem and 0/1 Knapsack problem.
 7. Implement the travelling salesman problem using dynamic programming.
 8. Implement matrix chain multiplication using dynamic programming.
 9. Design a program for 4 and 8 queen problem.
 10. Implement a program for polynomial reduction.
 11. Implement a phone directory application using doubly-linked lists.
 12. Implement the movement of knight in chess game.
-

Nm

Sof

Handwritten scribbles and marks, including a large 'X' and several smaller marks.

Handwritten marks, including a large 'X' and several smaller marks.

Handwritten scribbles and marks.

Handwritten mark, possibly a signature or initials.

Handwritten mark, possibly a signature or initials.

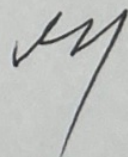

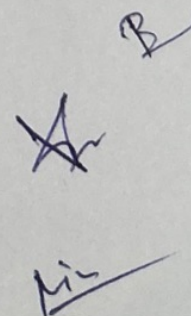

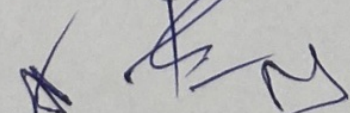

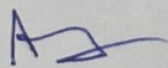

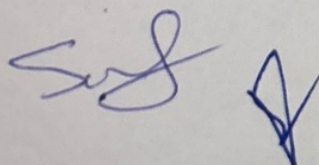

Handwritten mark, possibly a signature or initials.

LIST OF PROGRAMS

While creating tables, databases the name should have a prefix of your roll number.

Ex. If your roll number is 55 then every table name must start with 55 TABLE_NAME. 1. Write program name 2. Write description of command used for executing the query. 3. Write commands in bold letters. 4. Take the screenshot of the output.

1. Implementation of DDL commands of SQL with suitable examples.
 - a. Create table
 - b. Alter table
 - c. Drop Table
2. Implementation of DML commands of SQL with examples.
 - a. Insert
 - b. Update
 - c. Delete
3. Implementation of different type of function with suitable example
 - a. Number function
 - b. Aggregate function
 - c. Character function
 - d. Conversion function
 - e. Data function
4. Implementation of different type of operators in SQL.
 - a. Arithmetic operators
 - b. Logical operators
 - c. Set operator
 - f. Comparison Operator
 - g. Special operator
5. Implementation of type of joins.
 - a. Inner Join
 - b. Outer Join
 - c. Natural Join etc.
6. Study and implementation of
 - a. Group by & having clause
 - b. order By clause
 - c. Indexing
7. Study of Implementation of
 - a. Sub queries
 - b. Views
8. Study & implementation of different type of constraints.
9. Study & implementation of database backup & recovery command.
10. Study & implementation of Rollback, commit, savepoint.

DEPARTMENT OF INFORMATION TECHNOLOGY

11. Creating Database /Table Space
a. Managing Users: Create User, Delete User
b. Managing roles: Grant, Revoke.

COURSE OUTCOMES

After completion of this course, the students would be able to:

- CO1. construct database schema for a given problem domain.
CO2. apply integrity constraints on a database schema using a state-of-the-art RDBMS.
CO3. apply SQL queries using DDL and DML to design and access database systems.
CO4. make use of operators and functions used in query.
CO5. distinguish Tables and Views for database systems.
CO6. develop a small project for a real world scenario.

NW

SJS

Handwritten signatures and initials at the bottom of the page, including a large signature in the center and several smaller ones to the right and bottom.

DEPARTMENT OF INFORMATION TECHNOLOGY

DATABASE MANAGEMENT SYSTEM

160313/ 230304/240304

LIST OF SKILL BASED MINI PROJECT

- Design, develop, and implement the specified queries for the following problems using Oracle, MySQL, MS SQL Server, or any other DBMS under LINUX/Windows environment.
- Design ER-Diagram, Create Schema and insert at least 5 records for each table. Add appropriate database constraints

Mini Skill Project 1

Consider the following schema for a Library Database:

BOOK (Book_id, Title, Publisher_Name, Pub_Year)
BOOK_AUTHORS (Book_id, Author_Name)
PUBLISHER (Name, Address, Phone)
BOOK_COPIES (Book_id, Programme_id, No-of_Copies)
BOOK_LENDING (Book_id, Programme_id, Card_No, Date_Out, Due_Date)
LIBRARY_PROGRAMME (Programme_id, Programme_Name, Address)

Write SQL queries to

1. Retrieve details of all books in the library – id, title, name of publisher, authors, number of copies in each Programme, etc.
2. Get the particulars of borrowers who have borrowed more than 3 books, but from Jan 2017 to Jun 2017.
3. Delete a book in BOOK table. Update the contents of other tables to reflect this data manipulation operation.
4. Partition the BOOK table based on year of publication. Demonstrate its working with a simple query.
5. Create a view of all books and its number of copies that are currently available in the Library.

Mini Skill Project 2

Consider the following schema for Order Database:

SALESMAN (Salesman_id, Name, City, Commission)
CUSTOMER (Customer_id, Cust_Name, City, Grade, Salesman_id)
ORDERS (Ord_No, Purchase_Amt, Ord_Date, Customer_id, Salesman_id)

Write SQL queries to

1. Count the customers with grades above Bangalore's average.
2. Find the name and numbers of all salesman who had more than one customer.
3. List all the salesman and indicate those who have and do not have customers in their cities (Use UNION operation.)
4. Create a view that finds the salesman who has the customer with the highest order of a day.
5. Demonstrate the DELETE operation by removing salesman with id 1000. All his orders must also be deleted.

[Handwritten signatures and marks at the bottom of the page]

DEPARTMENT OF INFORMATION TECHNOLOGY**Mini Skill Project 3**

Consider the schema for Movie Database:

ACTOR (Act_id, Act_Name, Act_Gender)

DIRECTOR (Dir_id, Dir_Name, Dir_Phone)

MOVIES (Mov_id, Mov_Title, Mov_Year, Mov_Lang, Dir_id)

MOVIE_CAST (Act_id, Mov_id, Role)

RATING (Mov_id, Rev_Stars)

Write SQL queries to

1. List the titles of all movies directed by 'Hitchcock'.
2. Find the movie names where one or more actors acted in two or more movies.
3. List all actors who acted in a movie before 2000 and in a movie after 2015 (use JOIN operation).
4. Find the title of movies and number of stars for each movie that has at least one rating and find the highest number of stars that movie received. Sort the result by movie title.
5. Update rating of all movies directed by 'Steven Spielberg' to 5.

Mini Skill Project 4

Consider the schema for College Database:

STUDENT (USN, SName, Address, Phone, Gender)

SEMSEC (SSID, Sem, Sec)

CLASS (USN, SSID)

COURSE (Subcode, Title, Sem, Credits)

IAMARKS (USN, Subcode, SSID, Test1, Test2, Test3, FinallA)

Write SQL queries to

1. List all the student details studying in fourth semester 'C' section.
2. Compute the total number of male and female students in each semester and in each section.
3. Create a view of Test1 marks of student USN '1BI15CS101' in all Courses.
4. Calculate the FinallA (average of best two test marks) and update the corresponding table for all students.
5. Categorize students based on the following criterion:
If FinallA = 17 to 20 then CAT = 'Outstanding'
If FinallA = 12 to 16 then CAT = 'Average'
If FinallA < 12 then CAT = 'Weak'
Give these details only for 8th semester A, B, and C section students.

Mini Skill Project 5

Consider the schema for Company Database:

EMPLOYEE (SSN, Name, Address, Sex, Salary, SuperSSN, DNo)

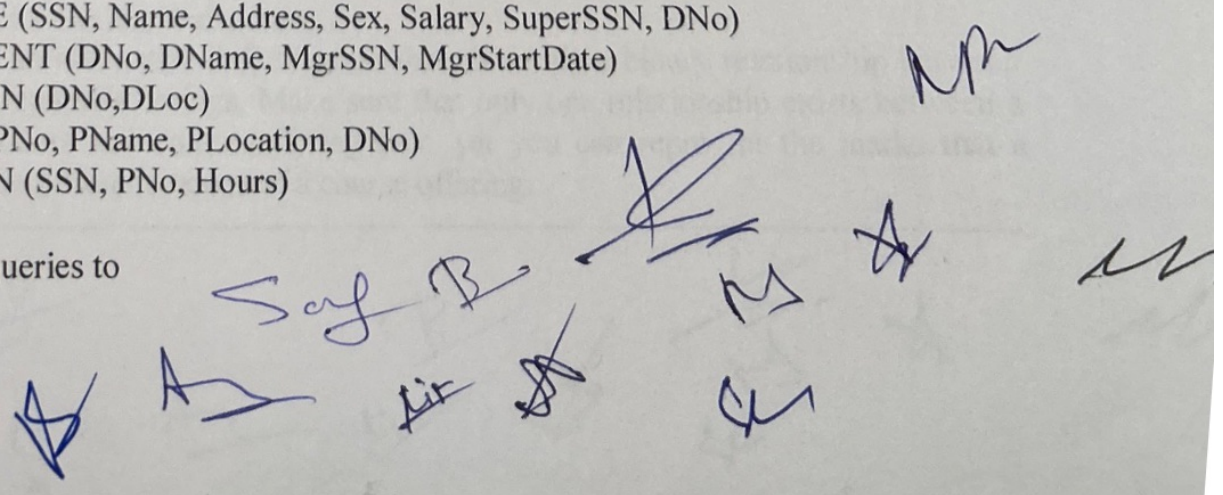

DEPARTMENT (DNo, DName, MgrSSN, MgrStartDate)

DLOCATION (DNo, DLoc)

PROJECT (PNo, PName, PLocation, DNo)

WORKS_ON (SSN, PNo, Hours)

Write SQL queries to

DEPARTMENT OF INFORMATION TECHNOLOGY

1. Make a list of all project numbers for projects that involve an employee whose last name is 'Scott', either as a worker or as a manager of the department that controls the project.
2. Show the resulting salaries if every employee working on the 'IoT' project is given a 10 percent raise.
3. Find the sum of the salaries of all employees of the 'Accounts' department, as well as the maximum salary, the minimum salary, and the average salary in this department.
4. Retrieve the name of each employee who works on all the projects controlled by department number 5 (use NOT EXISTS operator).
5. For each department that has more than five employees, retrieve the department number and the number of its employees who are making more than Rs. 6,00,000.

Mini Skill Project 6

A university registrar's office maintains data about the following entities:
(a) courses, including number, title, credits, syllabus, and prerequisites;
(b) course offerings, including course number, year, semester, section number, instructor(s), timings, and classroom;
(c) students, including student-id, name, and program; and
(d) instructors, including identification number, name, department, and title. Further, the enrollment of students in courses and grades awarded to students in each course they are enrolled for must be appropriately modeled.
Construct an E-R diagram for the registrar's office. Document all assumptions that you make about the mapping constraints.

Mini Skill Project 7

Construct an E-R diagram for a car-insurance company whose customers own one or more cars each. Each car has associated with it zero to any number of recorded accidents.

Mini Skill Project 8

Construct an E-R diagram for a hospital with a set of patients and a set of medical doctors. Associate with each patient a log of the various tests and examinations conducted.

Mini Skill Project 9

Design an E-R diagram for keeping track of the exploits of your favourite sports team. You should store the matches played, the scores in each match, the players in each match and individual player statistics for each match. Summary statistics should be modeled as derived attributes.

Mini Skill Project 10

Consider a database used to record the marks that students get in different exams of different course offerings.

- a. Construct an E-R diagram that models exams as entities, and uses a ternary relationship, for the above database.
- b. Construct an alternative E-R diagram that uses only a binary relationship between students and course-offerings. Make sure that only one relationship exists between a particular student and course-offering pair, yet you can represent the marks that a student gets in different exams of a course offering.

Handwritten signatures and initials at the bottom of the page.

160315

1. Write a program to accept two numbers (int) as command line arguments and print their Sum.
2. Write a program to find the average and sum of the N numbers Using Command line argument.
3. Write a program to Demonstrate Type Casting.
4. Write a program to find the number of arguments provide at runtime.
5. Write a program to print Fibonacci series without using recursion and using recursion.
6. Write a program to check prime numbers and palindrome numbers.
7. Write a program to sort an array of elements using bubble sort algorithm.
8. Write a program to sort an array of elements using insertion sort algorithm.
9. Write a non-static function in java that prints the sum of two numbers.
10. Create an abstract class Shape which has a field $PI=3.14$ as final and it has an abstract method Volume. Make two subclasses Cone and Sphere from this class and they print their volume.
11. WAP to handle the Exception using try and multiple catch block.
12. Write a Java program that works as a simple calculator. Use a grid layout to arrange buttons for the digits and for the +, -, *, % operations. Add a text field to display the result. Handle any possible exceptions like divide by zero.
13. Develop an Applet that receives an integer in one text field & compute its factorial value & returns it in another text field when the button "Compute" is clicked
14. Write a Java program that implements a multi-thread application that has three threads. First thread generates a random integer every first second and if the value is even, the second thread computes the square of the number and prints. If the value is odd, the third thread will print the value of the cube of the number.

CO3. make use of the Java programming methods for connecting the various databases.

LIST OF SKILL BASED MINI PROJECT

1. Design and implementation of Registration page for a system.
2. Design and implementation of Currency Converter.
3. Design and implementation of Number Guessing Game.
4. Design and implementation of Snake Game in Java.
5. Design and implementation of tic-tac-toe game.
6. Design and implementation of User name- password page for a system.
7. Design and implementation of database connectivity using JDBC with SQL.
8. Design and implementation of database connectivity using JDBC with MS Access.
9. Update, deletion and search of items in a database using a web page/front end.
10. Display of Database table in a webpage.
11. Design of dynamic web pages with backward and forward functions.
12. Display of a video file in a web page.
13. Display of Graph Representation in a web page.
14. Email notification using Java Library.

|---|---|---|---------------|
| 2 | 1 | 2 | 4 |

COURSE OBJECTIVES

- To become familiar with computer graphics techniques and display devices.
- To enhance the proficiency in image representations, 2D and 3D graphics transformations.
- To develop awareness with various illumination, color models and multimedia system.

Unit-I

Introduction to Computer Graphics: Interactive Computer Graphics, Application of Computer Graphics, Random and Raster Scan Displays, Storage Tube Graphics Display, Calligraphic Refresh Graphics Display, Flat Panel Display, Refreshing, Flickering, Interlacing, Resolution, Bit Depth, Aspect Ratio etc.

Unit-II

Scan Conversion Technique: Image representation, Line drawing: DDA, Bresenham's Algorithm. Circle Drawing: Mid-Point, DDA, Bresenham's Circle Generation Algorithm, Ellipse Generation Algorithm, Curves: Parametric Function, Bezier Method, B-Spline Method.

Unit-III

2D & 3D Transformations: Translation, Rotation, Scaling, Reflection, Shearing, Inverse Transformation, Composite Transformation, World Coordinate System, Viewing Transformation, Representation of 3D object on Screen, Parallel and Perspective Projections.

Unit-IV

Clipping: Point clipping, Line Clipping, Simple Visibility Line Clipping Algorithm, Polygon Clipping, Hidden Surface Elimination: Z- Buffer algorithm and Painter's Algorithm, Area Filling. **Basic Illumination Models:** Diffuse Reflection, Specular Reflection, Phong Shading, Gouraud Shading, Color Models: RGB, YIQ, CMY, HSV.

Handwritten signatures and marks at the bottom of the page.

DEPARTMENT OF INFORMATION TECHNOLOGY

Unit-V

Multimedia System: An Introduction, Multimedia hardware and software, Multimedia System Architecture, Multimedia Applications and evolving technologies, Multimedia Authoring. Data & File Format standards, Sampling; Compression standards, Compression through spatial and temporal redundancy.

RECOMMENDED BOOKS

- Donald Hearn and M.P. Becker : Computer Graphics, PHI Publication
 - FoleyVandam, Feiner, Hughes : Computer Graphics principle and Practice
 - Rogers : Principles of Computers Graphics, TMH
 - Sinha and Udai : Computer Graphics, TMH
 - Prabhat K. Andleigh, Kiran Thakrar : Multimedia Systems Design, Prentice Hall PTR
-

COURSE OUTCOMES

After completion of the course students will be able to:

- CO1. explore various display devices and applications of computer graphics.
 - CO2. illustrate various scan conversion techniques like line, circle, curve and shape drawing algorithms.
 - CO3. apply 2-dimensional, 3-dimensional transformations and projections on images.
 - CO4. classify methods of image clipping and various algorithms for line and polygon clipping.
 - CO5. apply appropriate filling algorithms, hidden surface elimination algorithm on images.
 - CO6. summarize various color models, shading methods and multimedia system.
-

COURSE OBJECTIVES

- To understand the nature of software development and software life cycle process models, agile software development, SCRUM and other agile practices.
- To understand project management and risk management associated with various types of projects.
- To know basics of testing and understanding concept of software quality assurance and software configuration management process.

Unit - I

Introduction to Software Engineering: Definition, Software Engineering-Layered Technology, Software Characteristics and Components, **Software Model:** Software Development of Life Cycle Model (SDLC), The Waterfall Model, Iterative Waterfall Model, Prototyping Model, Spiral Model, RAD Model. **Selection Criteria of Model:** Characteristics of Requirements, Status of Development Team, Users Participation, Type of Project and Associated Risk.

Unit - II

Requirement Engineering: Definition, Requirement Engineering Activity, **Types of Requirement-** Functional and Non-functional Requirements, User and System Requirements, Requirement Elicitation Methods, Requirement Analysis Methods, Requirement Documentation (SRS), Requirement Validation, Requirement Management.

Unit - III

Design Concept, Principle and Methods: Design Fundamentals, Design Principles, Effective Modular Design, Design Representations, Architectural Design, Procedural Design, Data Directed design, Real Time Design, Object Oriented Design, Coupling and Cohesion.

Software Metrics, Project Management and Estimation: Metrics in Process and Project Domains, Software Measurement, Software Quality Metrics, **Project Management-** Basics-People, Product, Process, Project, **Estimation-** Software Project Estimation, Decomposition Techniques- Function Point Estimation, Line of Code (LOC) Based estimation, Empirical Estimation, COCOMO Model, Project Scheduling Techniques.

Unit - V

Software Testing: Definitions, Software Testing Life Cycle (STLC), , Test Case Design, Strategic Approach to Software Testing- Verification & Validation , Strategic Issues, Criteria for Completion of Testing, Unit Testing, Integration Testing, Validation Testing, System Testing, Black Box Testing Techniques, White Box Testing Techniques, Acceptance Testing.

RECOMMENDED BOOKS

- Software Engineering, Sommerville, Pearson.
- Software Engineering: A Practitioner's Approach, Roger S. Pressman, McGraw Hill.
- Software Engineering, K.K. Agrawal & Yogesh Singh, New Age Publication.
- Software Engineering, Rajib Mall, PHI.

COURSE OUTCOMES

After completion of this course, the students would be able to:

- CO1. explain the various fundamental concepts of software engineering.
- CO2. develop the concepts related to software design & analysis.
- CO3. compare the techniques for software project management & estimation.
- CO4. choose the appropriate model for real life software project.
- CO5. design the software using modern tools and technologies.
- CO6. test the software through different approaches.

COURSE OBJECTIVES

- Familiarize the student with the basic taxonomy and terminology of the computer networking.
- Provide detail knowledge about various layers, protocols and devices that facilitate networking.
- Enable Students to deal with various networking problems such as flow control, error control and congestion control.

Unit-I

Introduction: Computer Network, Types- LAN, MAN & WAN, Data Transmission Modes- Serial & Parallel, Simplex, Half Duplex & Full Duplex, Synchronous & Asynchronous Transmission, Transmission Medium- Guided & Unguided, Cables- Twisted Pair, Coaxial Cable & Optical Fiber, Networking Devices-Repeaters, Hub, Switch, Bridge, Router, Gateway and Modem, Performance Criteria- Bandwidth, Throughput, Propagation Time & Transmission Time, Network Standardization- OSI Reference Model & TCP/IP Reference Mode, X.25.

Unit-II

Physical Layer: Network Topologies- Bus, Ring, Star & Mesh, Line Coding- Unipolar, Polar and Bipolar, Switching- Circuit Switching, Message Switching & Packet Switching, Multiplexing: FDM – Frequency Division Multiplexing, WDM – Wavelength Division Multiplexing & TDM – Time Division Multiplexing.

Unit-III

Data Link Layer: Introduction, Design Issues, Services, Framing, Error Control, Flow Control, ARQ Strategies, Error Detection and Correction, Parity Bits, Cyclic Redundant Code (CRC), Hamming Codes. MAC Sub Layer- The Channel Allocation Problem, Pure ALOHA, Slotted ALOHA, CSMA, CSMA/CD, IEEE 802.3, IEEE 802.4 and IEEE 802.5.

Connection Oriented & Connectionless Service, IP Addressing.

Unit-V

Presentation, Session & Application Layer: Introduction, Design Issues, Presentation Layer- Translation, Encryption- Substitutions and Transposition Ciphers, Compression- Lossy and Lossless. Session Layer – Dialog Control, Synchronization. Application Layer- Remote Login, File Transfer & Electronic Mail.

RECOMMENDED BOOKS

- Data Communication and Networking, Behrouz A. Forouzan, McGraw Hill.
- Computer Networks, Andrew S. Tanenbaum, Pearson Education India.
- Computer Networks and Internets, Douglas E. Comer, Pearson India.

COURSE OUTCOMES

After completion of this course, the students would be able to:

- CO1. explain the fundamental concepts of computer network.
- CO2. illustrate the basic taxonomy & terminologies of computer network.
- CO3. identify various parameter for affecting the performance of computer network.
- CO4. analyze the concepts of communication using various layer of OSI model.
- CO5. evaluate the performance of computer network in congestion and Internet.
- CO6. design the network environment and applications for implementation of computer networking concept.

CYBER SECURITY

100004

| L | T | P | Total Credits |
|---|---|---|---------------|
| 2 | - | - | 2 |

COURSE OBJECTIVES

- To provide an understanding of cyber security fundamentals.
- To analyse various cyber-attacks and their countermeasures.
- To provide basics of Internet and networking.
- To identify various cyber security threats and vulnerabilities.
- To apply forensic science to investigate a cybercrime.

Unit-I

Introduction- Overview of Cyber Security, Cyber Crime, Cyber Warfare, Cyber Terrorism, Cyber Espionage, Cyber Vandalism (Hacking), Cyber Stalking, Internet Frauds and Software Piracy.

Unit-II

Basics of Internet & Networking- Wired and Wireless Networks, Internetworking Devices, Topologies, Web Browser, Web Server, OSI Model, IP Addressing, Firewall, E-Commerce, DNS, NAT, VPN, HTTP & HTTPS.

Unit-III

Cryptography and Network Security- Security Principles, Attacks, Cryptography, Steganography, Cryptanalysis, Symmetric Key and Public Key Cryptography, Digital Signature, Intrusion Detection System, Secure Socket Layer(SSL) & Secure Electronic Transaction(SET).

Unit-IV

Cyber Security Threats and Vulnerabilities- Hacker, Types of Hacker- White, Gray and Black, **Malicious Software's:** Virus, Worm, Trojan Horse, Backdoors and Spywares. Sniffers, Denial of Service Attack and Phishing.

Unit-V

Cyber Crime Investigation and Legal Issues: Intellectual Property, Privacy Issues, IT Act 2000, Basics of Cyber Crime Investigation- Cyber Forensics, Electronic Evidences and its Types.

Ad B J K L M N O P Q R S T U V W X Y Z

DEPARTMENT OF INFORMATION TECHNOLOGY

RECOMMENDED BOOKS:

- Cryptography and Network Security, 4/E, William Stallings, 4th edition, Pearson publication
- Computer Security: Principles and Practice, Stallings William, Pearson publication
- Investigating Network Intrusions and Cybercrime, EC-Council Press
- Network Forensics, Tracking Hackers through Cyberspace, Sherri Davidoff, Jonathan Ham, Prentice Hall.
- Cryptography and Network Security, 3e, Atul Kahate, McGraw Hill publication.

COURSE OUTCOMES:

After completion of the course students would be able to:

- CO1. tell the basic terminologies of cyber security.
- CO2. explain the basic concept of networking and internet.
- CO3. apply various methods used to protect data in the internet environment in real world situations.
- CO4. discover the concept of IP security and architecture.
- CO5. compare various types of cyber security threats/vulnerabilities.
- CO6. develop the understanding of cybercrime investigation and IT ACT 2000.

UNIT-I

Cryptography: Symmetric Key Cryptography, Public Key Cryptography, Principles of Public Key Cryptosystem, Classical Cryptographic Algorithms: DES, RC4, Blowfish, RSA, Distribution of Public Keys and Key Management, Diffie-Hellman Key Exchange.

UNIT-II

Hash Functions: Hash Functions, One Way Hash Function, SHA (Secure Hash Algorithm), Authentication, Commitment Functions, Kerberos, Message Authentication Codes, Message Digest MD5, SSH (Secure Shell), Digital Signatures, Digital Certificates.

UNIT-III

Web Security Overview: SSL (Secure Socket Layer), TLS (Transport Layer Security), SET (Secure Electronic Transaction), IDS (Intrusion detection system).

Handwritten signatures and initials at the bottom of the page, including "Ad", "B", "u", "A", "Lib", "Bulbu", and "u".

|---|---|---|---------------|
| - | 1 | 2 | 2 |

COURSE OBJECTIVES

- Implement an algorithm in Python by using standard programming constructs such as, functions, modules, aggregated data (arrays, lists, etc.)
- Explain the output of a given Python program and identify and correct errors in a given Python program
- Write programs using the features of object-oriented programming language such as, encapsulation, polymorphism, inheritance, etc.

Unit-I

Introduction to Python programming language Data and Expressions: Literals; Variables and Identifiers; Operators; Expressions and Data Types, Logical operator; Boolean operator; Boolean Expressions; Control Structures; Selection Control, Iterative Control. Lists & tuples: List Structures; Lists in Python, Iterating over Lists in Python.

Unit-II

Functions: Arguments in functions; Program routes; Calling Value Returning Functions; Calling Non- value Returning Functions Parameter Passing; Variable Scope; Modular design Modules; Top-Down Design Python Modules; File Handling Operation in file: Reading, Writing and appending in Text Files.

Unit-III

String Processing; Dictionaries and sets operations; Exception Handling: Exceptions Data Collections applying lists etc.

Unit-IV

Introduction to Object Oriented Programming, Class, Objects, Encapsulation, Data abstraction, Inheritance, Polymorphism.

Unit-V

Graphics Programming: Graphics Programming, Using Graphical Objects, Interactive Graphics, Displaying Images, Generating Colors, Graphics Objects, Entry Objects, Test Case: Numpy, scipy; Test Case: panda, Matplotlib.

Handwritten signatures and initials at the bottom of the page.

RECOMMENDED BOOKS

- C. Dierbach, Introduction to Computer Science Using PYTHON: A Computational Problem-Solving Focus (1st ed.), Wiley, 2015. ISBN 978-8126556014.
- Yashavant Kanetkar, Let Us Python (1st ed.), BPB Publishers, 2019. ISBN 978-9388511568

COURSE OUTCOMES

After completion of this course, the students would be able to:

- CO1. solve computational problem using python language
 - CO2. familiar with basics syntax and features of python programming language
 - CO3. hands on experience to online coding tools like colab.
 - CO4. design a program utilizing the features of object oriented concept.
 - CO5. utilize some of the libraries available for solving problems.
-

Unit-I

Introduction: Introduction to microcontroller, embedded system, Microprocessor vs Microcontroller. Common features of Microcontroller. Comparison between different types of microcontrollers.

Unit-II

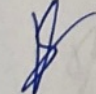

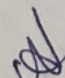

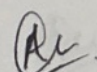

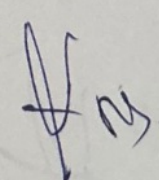

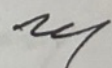

Arduino: Introduction, Pin Configuration and Architecture. Device and Platform Features. Content of Digital and Analog ports. Arduino Interfacing Board, Introduction to Embedded C and Arduino Platform.

Unit-III

Basic Concepts and Functions: Arduino data types, Variables and constants, Operators, Control Statements, Arrays, Functions. Pin Configured as INPUT, Pull-up Resistor, Pin Configured as OUTPUT, pinMode() Function, digitalWrite() Function, delay() Function, Analog Input, Analog Output, Arduino Interrupts.

Unit-IV

Arduino Time and Display: Incorporating Arduino time, delay() Function, delayMicroseconds() function, millis() function, microseconds() Function. Working with Serial Monitor, Line graph via serial monitor, interfacing 3 bit LCD to Arduino, Plotting

LIST OF PROGRAMS

1. WAP to implement line generation using DDA algorithm.
2. WAP to implement line generation using Bresenham's line generation algorithm.
3. WAP to generate a circle using mid-point algorithm.
4. WAP to implement Bresenham's circle generation algorithm.
5. WAP to perform translation, rotation, scaling on 2D transformation.
6. WAP to perform scaling and shearing on 2D transformation.
7. WAP to implement translation of a line and triangle.
8. WAP to implement rotation of a line and triangle.
9. WAP to implement scaling transformation.
10. WAP to fill polygon using seed filling algorithm.
11. WAP to implement 3D rotation about an arbitrary axis.
12. WAP to implement Cohen Sutherland line clipping.

COURSE OUTCOMES

After completion of the course students will be able to:

- CO1. understand the basic concepts of computer graphics.
- CO2. demonstrate scan conversion problems using programming language.
- CO3. implement the concepts of geometric transformation of 2D and 3D objects.
- CO4. apply clipping and filling techniques for modifying an object.
- CO5. understand the practical implementation of modelling and rendering.
- CO6. demonstrate the concept of viewing of 2D objects.

RECOMMENDED TOOLS

- Sketchium
- AutoCAD

DEPARTMENT OF INFORMATION TECHNOLOGY

SOFTWARE ENGINEERING LAB
160412/230403/240403/270403/280403

LIST OF EXPERIMENTS

Experiment 1: Identify the requirements from problem statements

Requirements, Characteristics of Requirements, Categorization of Requirements, Functional Requirements, Identifying Functional Requirements

Experiment 2: Estimation of project metrics using estimation techniques like COCOMO model

Project Estimation Techniques, COCOMO, Basic COCOMO Model, Intermediate COCOMO Model, Complete COCOMO Model, Advantages of COCOMO, Drawbacks of COCOMO, Halstead's Complexity Metrics

Experiment 3: Modeling UML Use Case diagrams and capturing Use Case Scenarios

Use case diagrams, Actor, Use Case, Subject, Graphical Representation, Association between Actors and Use Cases, Use Case Relationships, Include Relationship, Extend Relationship, Generalization Relationship, Identifying Actors, Identifying Use cases, Guidelines for drawing Use Case diagrams

Experiment 4: E-R modeling from the problem statements

Entity Relationship Model, Entity Set and Relationship Set, Attributes of Entity, Keys, Weak Entity, Entity Generalization and Specialization, Mapping Cardinalities, ER Diagram, Graphical Notations for ER Diagram, Importance of ER modeling

Experiment 5: Modeling UML Class diagrams and Sequence diagrams

Structural and Behavioral aspects, Class diagram, Elements in class diagram, Class, Relationships, Sequence diagram, Elements in sequence diagram, Object, Life-line bar, Messages

Experiment 6: Modeling Data Flow diagrams

Data Flow Diagram, Graphical notations for Data Flow Diagram, Explanation of Symbols used in DFD, Context diagram and leveling DFD

Experiment 7: Create flow chart for an algorithm using Raptor

Assignment, Call, Input, Output, Selection and Loop symbols.

Experiment 8: Estimation of Test coverage metrics and structural complexity

Control Flow Graph, Terminologies, McCabe's Cyclomatic Complexity, Computing Cyclomatic Complexity, Optimum Value of Cyclomatic Complexity, Merits, Demerits.

Experiment 9: Designing Test Suites

Software Testing, Standards for Software Test Documentation, Testing Frameworks, Need for Software Testing, Test Cases and Test Suite, Types of Software Testing, Unit Testing, Integration Testing, System Testing, Example, Some Remarks.

RECOMMENDED TOOLS

- Selenium
- Star UML

LIST OF PROGRAMS

1. Write a program to demonstrate different number data types in python.
2. Write a program to perform different arithmetic operations on numbers in python.
3. Write a program to create, concatenate and print a string and accessing substring from a given string.
4. Write a python program to create, append and remove lists in python.
5. Write a program to demonstrate working with tuples in python.
6. Write a program to demonstrate working with dictionaries in python.
7. Write a python program to find the factorial of a number using recursion.
8. WAP to swap two integers without using a third variable. The swapping must be done in a different method in a different class.
9. WAP to find the greater of two given numbers in two different classes using friend function.
10. Write a python program to define a module and import a specific function in that module to another program.

COURSE OUTCOMES

After completion of this course, the students would be able to:

- CO1. write, test, and debug simple Python programs.
 - CO2. solve computational problem using python language.
 - CO3. familiar with basics syntax and features of python programming language.
 - CO4. use Python lists, tuples, dictionaries for representing compound data.
 - CO5. design a program utilizing the features of object oriented concept.
 - CO6. utilize some of the libraries available for solving problems.

Features:
• Booking delivery
• Status of delivery
• Calculation of booking
Output:
• Booking confirmation, if booking is successful
• Reporting delivery status
• Cancellation of booking confirmation

Mini Skill Project #1

Payroll Management System (PMS)

The Employer and Payroll System objective is to provide a system which manages the employer details, the Payroll activity done in a company depending upon the employees attendance and its calculation which is very huge. The users will consume less amount of time through computerized system rather than working manually. The system will take care of all the payroll activities like managing each employee's attendance, the number of leaves taken by that particular employee and calculation in a very quick manner and it avoids data storing in paper. Paper work will be reduced and the company staffs spend more time on maintaining the program. The system is user friendly and easy to use. All the important data's will be stored in the database and it avoids any calculation. The "Employee and Payroll System" is based on maintaining each employee record and calculating his/her salary depending on the workdays. The first activity is based on saving the employee's details where each employee will be given a unique employee ID. Now based on the no. of days an employee attended work,

LIST OF SKILL BASED MINI PROJECT

Note: In every project students must have to

- Design the SRS of the project.
- Draw the various ER diagram, DFD and Use Case diagram of the project.
- Design the test case of the project.

Mini Skill Project 01

Delivery Agent System

There are many online shopping portals such as Flipkart, Amazon, Snapdeal, etc. are active in the Indian market. One major task is to deliver an online books T-shirt to the customers as first as possible in a cost-effective (cheapest) manner. A delivery agent system, which would automatically receive a delivery request from an online portal and identify the couriers, whom the delivery job can be assigned.

Input:

- Shipping details (source and destination) locations
- Couriers' details in different localities.
- Service offering for each courier company.

Functions:

- Booking delivery
- Status of delivery
- Cancellation of booking

Output:

- Booking confirmation, if booking is successful.
- Reporting delivery status
- Cancellation of booking confirmation

Mini Skill Project 02

Payroll Management System (PMS)

The Employee and Payroll Systems objective is to provide a system which manages the employee details, the Payroll activity done in a company depending upon the employees attendance and its calculation which is very huge. The users will consume less amount of time through computerized system rather than working manually. The system will take care of all the payroll activities like managing each employee's attendance, the number of leaves taken by that particular employee and calculation in a very quick manner and it avoids Data storing is easier. Paper work will be reduced and the company staffs spend more time on monitoring the progress. The system is user friendly and easy to use. All the important data's will be stored in the database and it avoids any miscalculation. The "Employee and Payroll System" is based on maintaining each employee records and calculating his/her salary depending on the workdays. The first activity is based on saving the employees details where each employee will be given a unique Employee ID. Now based on the no of days an employee attended per month,

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to RGPV, Bhopal)

DEPARTMENT OF INFORMATION TECHNOLOGY

salary will be calculated by checking the no of workdays of a company and his/her basic salary and a separate salary slip will be provided for reference.

Inputs:

- Employee details (employee no, name, address, designation, department, achievements)
- Accounts details (salary of each employee, deduction, TA, DA, HRA, other allowance, PF)
- Leave information (no of leave taken by each employee)

Output:

- Salary slip
- Detailed salary report
- Deduction details
- Leave information

Mini Skill Project 3

Online Toll Plaza System

Now-a-days, cashless transaction is becoming popular among the users because it is easy to handle, and it does not require to carry cash in hand. Typically, in India, road tolls are collected from cars manually for which the cars need to stop to pay the toll fee. In contrast, the objective is to make the system Online, so that the toll fee is automatically deducted from the user. Therefore, users credit their Online account (consider this as eWallet), and money is automatically deducted when the cars pass the toll system. As a result, the users do not have to wait for manual toll fee payment. Concurrently, administrator can also view all transactions from anywhere. Finally, the administrator can view the total income in a day-to-day basis, and can also analyze the traffic pattern as well.

Inputs:

- User Information (Name, Car Number, Email Address, Password, Money in eWallet)
- Administrator Information (Email Address, Password)

Operations:

- User
 - Log-In
 - Credit in eWallet
 - Check eWallet Balance
 - Log-Out
- System
 - Check the car number
 - Required Fee Available
 - Allow the car to pass
 - Deduct money from eWallet
 - Required Fee NOT Available
 - Do Not Allow the car to pass
 - Fee Payment is done manually
 - Allow the car to pass
 - Total Income is stored in a database
- Administrator
 - Log-In

Ad

SA

Ac

Bulbo

W

M

W

DEPARTMENT OF INFORMATION TECHNOLOGY

- View transactions
- View total income

Outputs:

- Display day-wise transactions to administrator
- User can view his/her own transactions

Mini Skill Project 04

Online Examination System

Now-a-days, Online examination system has become popular for competitive examinations because of its unique features such as auto-evaluation, speed and accuracy. Moreover, it also helps environments by reducing the use of paper. In such a system, students are asked to select answers from multiple options given for a single question. Likewise, there are several questions which appear in the students' systems. The questions and multiple options are saved in a database along with desired answers. Typically, a student can edit an answer after saving it, however, editing cannot be done after submitting the answer. Another user is also there – administrator. The administrator can create, modify and delete questions and accordingly, the question is updated in the system.

Inputs:

- Subject Information with Code, so that all subjects can be identified using unique codes.
- User Information
- If Student- Student Information (Name, Roll No, Email Address, Contact Number, Password)
- If Administrator (Email Address, Password)
- Set of Questions with multiple answers for each stored in a database along with desired answers.

Operations:

- Administrator
 - Log-In
 - CREATE, MODIFY or DELETE questions. Accordingly, the question set must be updated.
 - Log-Out
- Student
 - Log-In (Time starts)
 - Answer the questions – SAVE and SUBMIT
 - Log-Out (Automatically logged out after Timeout)

Outputs:

- Display the result in DESCENDING order according to obtained marks with Roll Number.
- The result is also saved into a database for future use.

Handwritten signatures and initials at the bottom of the page.

Mini Skill Project 5

Online Health Monitoring System

Online health monitoring or Online patient monitoring system (OHMS) is a promising technology to enable patient monitoring outside the conventional clinical system, i.e., the patient can be monitored remotely. Consequently, such system increases the access to care the patients and decreases the delivery cost related to healthcare. Typically, in OHMS, two type of users are there – doctors and patients. Different physiological parameters of the patient are monitored (using sensors), and the monitored data is stored in a server. The stored data is accessible from anywhere through user authentication. On the other hand, doctors can check the health status of a patient registered with the doctor. Therefore, the doctor can only access the physiological data of a patient-if and only if he/she is registered with the doctor. Depending on the monitored values, adequate measures can be taken by the doctors. The patient can also view his/her health status. For authenticity, both the users need to login into the system.

Inputs:

- User Information
- Doctor – (Name, Email Address, Password)
- Patient – (Name, Email Address, Password, DOB)
- Predefined Sensors (such as temperature, blood pressure and heart rate)

Operations:

- Patient
 - Log-In
 - View health status
 - Ask doctor(s) to consult
 - Payment (Consultancy Fee)
 - Log-Out
- Doctor
 - Log-In
 - Monitor health status of registered patients to him/her
 - Ask patient(s) to consult
 - Log-Out

Outputs:

- Display health status
- Consult with doctors/patients

| 3 | 1 | - | 4 |

COURSE OBJECTIVES

- To perceive the knowledge of basic algebra
 - To describe function and its relation
 - To familiarize propositional logic
 - To know about the graph theory and its application in computer engineering
 - To familiarize the discrete numeric function and generating function
-

Unit-I

Finite and Infinite Sets, Mathematical Induction, Principles of Inclusion and Exclusion, Multisets, Functions and Relations, Binary Relations, Equivalence Relations and Partitions, Partial Ordering Relations and Lattices, Chains, Pigeonhole Principle.

Unit-II

Propositional Logic, Syntax, Semantics of ATF (Atomic Formula), WFF (Well Formed Formula's), Validity and Satisfiability of WFF by Quine's Method, Normal and Closure Form of Propositional Calculus.

Unit-III

Introduction and Basic Terminology of Graphs, Planner Graphs, Multi-Graphs and Weighted Graph, Shortest Path in Weighted Graph, Introduction to Eulerian Paths and Circuits, Hamiltonian Paths and Circuits, Introduction to Trees, Rooted Trees, Path Length in Rooted Trees, Spanning Trees and Cut Trees.

Unit-IV

Introduction to Discrete Numeric Functions and Generating Functions, Introduction to Recurrence Relations and Recursive Algorithms, Linear Recurrence Relations With Constant Coefficients, Homogeneous Solutions, Particular Solutions and Total Solutions.

Unit-V

Introduction to Group, Subgroups, Generations and Evaluation of Power, Cosets and Lagrange's Theorem, Group Codes, Isomorphism and Automorphism, Homomorphism and Normal Sub Groups, Ring, Integral Domain and Field.

DEPARTMENT OF INFORMATION TECHNOLOGY

RECOMMENDED BOOKS

- J. Tremblay and Manohar: Discrete Mathematical Structures with Application to Computer science. Narsingh Deo: Graph Theory.
 - Kenneth Rosen: Discrete mathematics and its applications (6th edition).2006. McGraw-Hill
 - C. Liu, D. Mohapatra: Elements of Discrete Mathematics. 2008. Tata McGraw-Hill.
 - T. Koshy: Discrete mathematics with applications.2003. Academic Press.
 - J. Hein: Discrete structures, logic and computability.2009. Jones & Bartlett Publishers.
-

COURSE OUTCOMES

After completion of this course, the students would be able to:

- CO1. explain the basic concept of set theory, propositional logic, graph theory, discrete numeric function and algebraic structure.
 - CO2. illustrate the knowledge of course content and distinguish between them in terms of their applications.
 - CO3. identify the concepts of graph and tree for solving problems in the computer science.
 - CO4. apply the concepts of studied topics with suitable technique faced in engineering problems
 - CO5. analyze the set theory, propositional logic, graph theory, discrete numeric function and algebraic structure to examine the real world problem.
 - CO6. build analytical skill and interpret applications of engineering beneficial in real time troubleshooting.
-

RECOMMENDED BOOKS

- Introduction to linear algebra - by gilbert strang
 - Applied statistics and probability for engineers – by douglas montgomery
 - Data Science and Big Data Analytics: Discovering, Analyzing, Visualizing, and Presenting Data – EMC Education
 - Python for Data Analysis: Data Wrangling with Pandas, NumPy, and IPython – Wes McKinney.
-

COURSE OUTCOMES

After completion of the course students would be able to:

- CO1. define the fundamentals of data science and its importance.
 - CO2. contrast the basics of python and libraries related to data science
 - CO3. classify different types of data analytics
 - CO4. organize the data collected from various sources
 - CO5. analyze pre-processing and data reduction strategies.
 - CO6. create the graphical representation of the data through visualization tool on various applications.

| L | T | P | Total Credits |
|---|---|---|---------------|
| 2 | 1 | 2 | 4 |

COURSE OBJECTIVE

- To understand computability, decidability, and complexity through problem solving.
 - To analyse and design abstract model of computation & formal languages
 - To understand and conduct mathematical proofs for computation and algorithms.
-

Unit-I

Introduction of Automata Theory: Examples of automata machines, Finite Automata as a language acceptor and translator, Moore machines and mealy machines, composite machine, Conversion from Mealy to Moore and vice versa.

Unit-II

Types of Finite Automata: Non Deterministic Finite Automata (NFA), Deterministic finite automata machines, conversion of NFA to DFA, minimization of automata machines, regular expression, Arden's theorem. Meaning of union, intersection, concatenation and closure, 2 way DFA.

Unit-III

Grammars: Types of grammar, context sensitive grammar, and context free grammar, regular grammar. Derivation trees, ambiguity in grammar, simplification of context free grammar, conversion of grammar to automata machine and vice versa, Chomsky hierarchy of grammar, killing null and unit productions. Chomsky normal form and Greibach normal form.

Unit-IV

Push down Automata: example of PDA, deterministic and non-deterministic PDA, conversion of PDA into context free grammar and vice versa, CFG equivalent to PDA, Petrinet model.

Unit-V

Turing Machine: Techniques for construction. Universal Turing machine Multitape, multihead and multidimensional Turing machine, N-P complete problems. Decidability

DEPARTMENT OF INFORMATION TECHNOLOGY

and Recursively Enumerable Languages, decidability, decidable languages, undecidable languages, Halting problem of Turing machine & the post correspondence problem.

RECOMMENDED BOOKS

- Introduction to Automata Theory Language & Computation, Hopcroft & Ullman, Narosa Publication.
 - Element of the Theory Computation, Lewis & Christors, Pearson.
 - Theory of Computation, Chandrasekhar & Mishra, PHI.
 - Theory of Computation, Wood, Harper & Row.
 - Introduction to Computing Theory, Daniel I-A Cohen, Wiley.
-

COURSE OUTCOMES

After completion of this course, the students would be able to:

- CO1. explain the basic concepts of switching and finite automata theory & languages.
 - CO2. relate practical problems to languages, automata, computability and complexity.
 - CO3. construct abstract models of computing and check their power to recognize the languages.
 - CO4. analyze the grammar, its types, simplification and normal form.
 - CO5. interpret rigorously formal mathematical methods to prove properties of languages, grammars and automata.
 - CO6. develop an overview of how automata theory, languages and computation are applicable in engineering application.
-

| L | T | P | Total Credits |
|---|---|---|---------------|
| 3 | - | 2 | 4 |

COURSE OBJECTIVES

- To understand different processors and basic architecture of 16 bit microprocessors.
 - To understand interfacing of 16 bit microprocessor with memory and peripheral chips involving system design.
 - To understand 8051 microcontroller.
-

Unit-I

Microprocessors: Introduction to x86 microprocessors, RISC and CISC processors, 8086 Architecture-Functional Diagram, Register Organization, Memory Segmentation, Programming Model, Memory Address, Physical Memory Organization, Minimum and maximum mode signals, Bus Cycle and Timing Diagrams, Instruction Formats, Addressing Modes, Instruction Set, Interrupts of 8086.

Unit-II

Basic Peripherals and Interfacing: 8212, 8155, 8255, 8755, interfacing with LED's, ADC, DAC, stepper motors and I/O & Memory Interfacing.

Unit-III

Special Purpose Programmable Peripheral Devices and Interfacing: 8253, 8254 programmable interval timer, 8259A programmable interrupt controller and 8257 DMA controllers, Keyboard and Display Interfacing.

Unit-IV

Serial and Parallel Data Transfer: Serial and Parallel data transmission, Types of communication system, Baud rate RS-232C, Modem and various bus standards, USART – 8251A.

Unit-V

Introduction to Microcontrollers: 8051 Microprocessor and its Architectures, Pin Description, Input-Output configurations, Interrupts, Addressing Modes, An overview of 8051 Instruction Set.

DEPARTMENT OF INFORMATION TECHNOLOGY

RECOMMENDED BOOKS

- The Intel Microprocessors, Architecture, Programming and Interfacing, B.B. Brey, PHI.
- Microprocessor 8086: Architecture, Programming and Interfacing, Sunil Mathur, PHI.
- Advanced Microprocessor and Interfacing, D.V. Hall, Mc-Graw Hill.
- Advanced Microprocessor and Peripherals – Architecture, Programming and Interfacing, A.K. Ray & K.M. Bhurchandi, Tata McGraw Hill.
- Interfacing Techniques in Digital Design with Emphasis on Microprocessors, R.L. Krutz, John Wiley.

COURSE OUTCOMES

After completion of this course, the students would be able to:

- CO1. compare the architecture and feature of different 16-bit microprocessor interfacing chips & microcontrollers.
 - CO2. develop programming skills in assembly language of 8086 microprocessor and 8051 microcontroller.
 - CO3. demonstrate the concept of interfacing with peripheral devices.
 - CO4. make use of different interrupts and addressing modes.
 - CO5. design an interfacing for I/O devices.
 - CO6. build a system based on 8086 microprocessor and 8051 microcontroller.

SOFT COMPUTING TECHNIQUES

160515/230505/240505

| L | T | P | Total Credits |
|---|---|---|---------------|
| 3 | - | - | 3 |

COURSE OBJECTIVES

- To provide the student with the basic understanding of neural networks and fuzzy logic fundamentals, Program the related algorithms and Design the required and related systems.
- To understand the fundamental theory and concepts of neural networks, several neural network paradigms and its applications.
- To understand the basics of an evolutionary computing paradigm known as genetic algorithms and its application to engineering optimization problems.

Unit-I

Introduction to Soft Computing: Soft Computing v/s Hard Computing, Basic models of Artificial Neural Networks, Terminologies of ANNs McCulloch-Pitts Neurons, Linear Separability, Hebb Network, Supervised Learning Networks: Introduction, Perceptron Networks, Back Propagation Networks, Radial Basis Function Networks, Hopfield networks.

Unit-II

Fuzzy Set Theory: Fuzzy Sets, Fuzzy Membership Functions, Operations on Fuzzy Sets, Fuzzy Relations, Fuzzy rules, Fuzzy Reasoning, Defuzzification: Lambda-Cuts for Fuzzy sets (Alpha-Cuts), Lambda-Cuts for Fuzzy Relations. Fuzzy Inference System: Introduction, Mamdani Fuzzy Model, Takagi-Sugeno Fuzzy Model.

Unit-III

Evolutionary Algorithm: Traditional optimization and Search Techniques, Basic Terminologies in GA, Operators in Genetic Algorithm, Stopping Condition for Genetic Algorithm Flow, Classification of Genetic Algorithm, Comparison with Evolutionary algorithm, Application of Genetic algorithm.

Unit-IV

Introduction to Nature-Inspired Optimization Algorithms: Particle Swarm Optimization (PSO) Algorithm, Differential Evolution (DE) Algorithm, Artificial Bee

DEPARTMENT OF INFORMATION TECHNOLOGY

Colony (ABC) Algorithm, Ant Colony Optimization (ACO) Algorithm, Cuckoo Search (CS), Firefly Algorithm (FA), Immune Algorithm (IA), Grey Wolf Optimization (GWO), Spider Monkey Optimization.

Unit-V

Hybrid Soft Computing Techniques: Introduction, Neuro-fuzzy Hybrid system, Adaptive Neuro fuzzy inference system(ANFIS), Genetic Neuro Hybrid system, Application of Soft Computing Techniques.

RECOMMENDED BOOKS

- Principles of Soft Computing, S. N. Sivanandam and S. N. Deepa , Wiley Neural Networks, Fuzzy Logic and Genetic Algorithms: Synthesis and Applications- S. Rajasekaran & G.A. Vijayalakshmi Pai, PHI.
- Introduction to Soft Computing Neuro-Fuzzy and Genetic Algorithms, Samir Roy and Udit Chakraborty, Pearson.
- Neural Networks and Learning Machines-Simon Haykin PHI.
- Fuzzy Logic and Engineering Application, Tomthy Ross, TMH.
- Evolutionary Optimization Algorithms, D. Simon (2013), Wiley.
- Fundamentals of Natural Computing: Basic Concepts, Algorithms, and Applications, L. N. de Castro (2006), CRC Press.

COURSE OUTCOMES

After completion of this course, the students would be able to:

- CO1. define basic concepts of neural network and fuzzy systems.
 - CO2. compare solutions by applying various soft computing approaches on a given problem.
 - CO3. develop and train different supervised and unsupervised learning.
 - CO4. classify various nature inspired algorithms according to their application aspect.
 - CO5. compare the efficiency of various hybrid systems.
 - CO6. design a soft computing model for solving real world problems.
-

MADHAV INSTITUTE OF TECHNOLOGY & SCIENCE, GWALIOR

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to RGPV, Bhopal)

DEPARTMENT OF INFORMATION TECHNOLOGY

DATA SCIENCE USING PYTHON

160512/240502/270502/280502

LIST OF PROGRAMS

1. Explore python built-in modules such as os, random, math, scipy and statistics.
 2. Write a python program to perform descriptive statistics such as Central Tendency Measures (Mean, Median and Mode), Measure of Dispersion (Variance, Standard Deviation), Skewness and Kurtosis.
 3. Study of data science libraries such as Numpy, Pandas etc. for Numerical computations and data manipulation.
 4. Explore about data visualization libraries such as Matplotlib, Seaborn etc. in python.
 5. Write a python script to draw Correlation matrix, Box plot (show Outliers), Heat map, histogram and Distribution Plot for any Dataset.
 6. Write a program to implement Simple Linear Regression model for any Dataset in Python.
 7. Write a program to implement Logistic Regression model over any Dataset in Python.
 8. With the help of classification algorithm, classify any suitable dataset available over the trusted repository.
 9. Implementation of Decision tree using sklearn and its parameter tuning
 10. Write a program to implement the naïve Bayesian classifier for a sample training data set stored as a .CSV file. Compute the accuracy of the classifier, considering few test data sets.

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to RGPV, Bhopal)

DEPARTMENT OF INFORMATION TECHNOLOGY

DATA SCIENCE USING PYTHON

160512/240502/270502/280502

LIST OF SKILL BASED MINI PROJECT

List of Micro Projects:

1. Write a python script to demonstrate how to read different types of data sets (.txt, .csv etc.) from website or disk.
2. Write a python program to calculate the Mean, Median and Mode.
3. Write a script to create a Gaussian curve using python.
4. Draw bar plot and pie plot for any dataset.
5. Write a Program in Python to Join Two Data Frames.
6. Write a python program to find NaN and Null value and replace with any number.
7. Write a python program to calculate Interquartile range (IQR).
8. Write a python program to compute correlation coefficient.
9. Write a python program to calculate the Variance, Standard Deviation, Skewness and Kurtosis.
10. Write a program to calculate Z-Score for any data.

List of Macro Projects:

1. Write a program to show how to apply normalization and standardization in a given dataset.
2. Write a program to identify the missing value in any dataset and how to handle and replace it.
3. Write a program to show one hot encoding in any dataset.
4. Write a program to show label encoding in any dataset.
5. Write a python program to count the frequency of occurrence of a word (Frequency distributions) in a body of text.
6. Write a python program to draw correlation matrix.
7. Write a program to draw residual Plot for any data.
8. Write a program to show various distributions of Data over any Dataset.
9. Write a program to compute weighted averages in Python either defining your own functions or using Numpy.
10. Write a program to plot a scatter plot and Pivot table of a given data.

DEPARTMENT OF INFORMATION TECHNOLOGY

List of Mini Projects:

1. Consider any Dataset from online repository to design and implement a Price prediction problem.
 2. Consider any Dataset from online repository to design and implement a problem using Linear Regression and Logistic Regression.
 3. Consider any Dataset from online repository and demonstrate working of various feature selection and normalization techniques.
 4. Design and implement weather forecasting system.
 5. Design and implement customer prediction system.
 6. Design and Implement Movie Recommendation System.
 7. Design and implement House Rent prediction system.
 8. Customer Segmentation- Identify segments of customers to target the potential user base using clustering (i.e. K-means clustering). Divide customers into groups according to common characteristics like gender, age, interests and spending habits. Dataset: Mall_Customers dataset.
 9. Fake News Detection- Fake news is sometimes transmitted through the internet by some unauthorised sources, which creates issues for the targeted person and it makes them panic and leads to even violence. Dataset: fake-news kaggle.
 10. Cab Pickups Analysis- cab pickup and distribution, time, days when pickup happens regularly, Dataset: Uber-Pickups dataset.

DEPARTMENT OF INFORMATION TECHNOLOGY

THEORY OF COMPUTATION 160513/230503/240503/270503/280503

LIST OF PROGRAMS

1. Design a Program for creating machine that accepts three consecutive one.
2. Design a Program for creating machine that accepts the string always ending with 101.
3. Design a program for accepting decimal number divisible by 5.
4. Design a Program for creating machine, which accepts 2 Mod 3.
5. Design a program for creating a machine, which accepts even of 1's and 0's.
6. Design a Program to find 2's complement of a given binary number.
7. Design a Program, which will increment the given binary number by 1.
8. Design a Program to convert NDFA to DFA.
9. Design a program to create PDA to accept $a^n b^n$ where $n > 0$.
10. Design a Program to create PDA machine that accept the well-formed parenthesis.
11. Design a program to create PDA to accept WCWR where w is any string, WR is reverse of that string, and C is a Special symbol.
12. Design a Turing machine that accepts the following language $a^n b^n c^n$ where $n > 0$.

COURSE OUTCOMES

After completion of this course, the students would be able to:

- CO1. judge various computational models.
 - CO2. construct abstract models of computing.
 - CO3. justify the power of abstract models in computing to recognize the languages.
 - CO4. demonstrate analytical thinking and intuition for problem solving in the related areas.
 - CO5. discuss the limitations of computation in problem solving.
 - CO6. follow set of rules for syntax verification.
-

DEPARTMENT OF INFORMATION TECHNOLOGY

THEORY OF COMPUTATION 160513/230503/240503/270503/280503

LIST OF SKILL BASED MINI PROJECT

Note: Use JFLAP (Java Formal Languages and Automata Package) tools.

List of Micro Projects:

1. Study of JFLAP (Java Formal Languages and Automata Package) tools
2. Create Deterministic Finite Automata (DFA)
3. Create Nondeterministic Finite Automata (NFA)
4. Perform Conversion of NFA to DFA
5. Perform DFA Minimization
6. Design a Program for creating machine that accepts three consecutive one.
7. Design a machine that performs DFA to regular grammar conversion.
8. Design a machine that performs DFA to regular expression conversion.
9. Design a machine that performs Regular expression to DFA conversion.

List of Macro Projects:

1. Design DFA which check whether the given unary number is divisible by 5.
2. Design DFA which checks whether the given number is even.
3. Design DFA for the string that always end with 00 using JFLAP tool.
4. Design DFA which accepts only those string which start with 1 and end with 0.
5. Design DFA which accepts even number of 0's and 1's.
6. Design a Moore machine to generate 1's complement of given binary number.
7. Design a Melay machine to generate 2's complement of given binary number.
8. Design a Moore machine which will increment the given binary number by 1.
9. Design a Melay machine for the input symbol 0,1,2 and print residue modulo of 7 of input treated as ternary number.

List of Mini Projects:

1. Design a machine that takes input NDFA and converts it into DFA.
2. Design a Turing Machine that calculate 2's complement of given binary string.
3. Design a Turing Machine, which will increment the given binary number by 1.
4. Design a Turing Machine that's accepts the following language $a^n b^n c^n$ where $n > 0$.
5. Design a Turing Machine to accept WR where w is any binary string and WR is reverse of that string.
6. Construct a machine to recognize signed or unsigned decimal number.

MADHAV INSTITUTE OF TECHNOLOGY & SCIENCE, GWALIOR

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to RGPV, Bhopal)

DEPARTMENT OF INFORMATION TECHNOLOGY

7. Construct a machine to recognize string, which ends with Gwalior or Bhopal.
 8. Design a machine which accept at least single a followed by at least single b followed by at least single c.
 9. Design a machine that will read sequence made up of letter A,E,I,O,U and will give as output the same sequences except that in case where an I directly follows an E, it will be changed to u.
 10. Design a machine for binary input sequence such that if it has substring 101 the machine outputs A if input has substring 110 it outputs B otherwise it Output C.
 11. Design a machine which accepts the string consist of a & b in which number of a's are more than number of b's.
 12. Design a machine which accepts the string consist of a & b in which number of a's are less than number of b's.
 13. Construct a machine for checking the palindrome of the string of even length.
-

DEPARTMENT OF INFORMATION TECHNOLOGY

MICROPROCESSOR & INTERFACEING 160514

LIST OF EXPERIMENTS

1. Write an assembly language program to perform the subtraction of two 8-bit number using 8085/8086 instruction set.
 2. Write an assembly language program to move data block starting at location 'X' to location 'Y' without overlap using 8085/8086 instruction set.
 3. Write an assembly language program to move data block starting at location 'X' to location 'Y' with overlap using 8085/8086 instruction set.
 4. Write an assembly language program to arrange set of 8-bit numbers starting at location in ASCENDING/DESCENDING order. Display the stored vector in address data field using 8085/8086 instruction set.
 5. Write an assembly language program to perform the multiplication of two 8-bit numbers using 8085/8086 instruction set.
 6. Write an assembly language program to perform the division of two 8-bit numbers using 8085/8086 instruction set.
 7. Write an assembly language program to find the larger number in array of data using 8085/8086 instruction set.
 8. Write an assembly language program to convert two BCD numbers in memory of the equivalent HEX number using 8085/8086 instruction set.
 9. Write an assembly language program to convert given hexadecimal number into its equivalent BCD number using 8085/8086 instruction set.
 10. Write an assembly language program to convert given hexadecimal number into its equivalent ASCII number using 8085/8086 instruction set.
 11. Write an assembly language program to convert given ASCII character into its equivalent hexadecimal number using 8085/8086 instruction set.
 12. Write an ALP program to generate a Fibonacci series using 8085/8086 instruction set.
 13. Write an ALP to find the factorial of a given number using recursive procedure using 8085/8086 instruction set.
 14. Write an ALP to separate odd and even numbers using 8085/8086 instruction set.
 15. Write an ALP to separate positive and negative numbers using 8085/8086 instruction set.
 16. Write an ALP to transfer of a string in forward direction using 8086 instruction set.
-

MADHAV INSTITUTE OF TECHNOLOGY & SCIENCE, GWALIOR

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to RGPV, Bhopal)

DEPARTMENT OF INFORMATION TECHNOLOGY

COURSE OUTCOMES

After completion of this course, the students would be able to:

- CO1. differentiate the various types of instructions and addressing modes.
 - CO2. identify the Hex code/ Machine code of instructions in assembly language.
 - CO3. perform interfacing of various peripheral devices and memory with microprocessor.
 - CO4. demonstrate the arithmetic & Logical operation using instruction set of 8086 /8051 microprocessor.
 - CO5. use of 8086/8051 for interfacing with I/O devices.
 - CO6. build the assembly language programs in 8086/8051 to solve real world problems.
-

MADHAV INSTITUTE OF TECHNOLOGY & SCIENCE, GWALIOR

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to RGPV, Bhopal)

DEPARTMENT OF INFORMATION TECHNOLOGY

MICROPROCESSOR & INTERFACEING 160514

LIST OF SKILL BASED MINI PROJECT

1. Traffic light controller using 8085/8086 microprocessor.
 2. Night light saver using 8085/8086 microprocessor.
 3. Interfacing 8085 with Stepper Motor controller.
 4. Interfacing 8085 with DC motor controller.
 5. Interfacing 8085 with keypad.
 6. Interfacing 8085 with LED's.
 7. Interfacing 8085 with switches.
 8. Interfacing 8085 with ADC.
 9. Interfacing 8085/8086 with 8255 PPI.
 10. Interfacing 8085/8086 with 8251.
-
