## Internship Certificate Received from Industry/Company

### Rkhchhit Software Pvt. Ltd.

Birla Rd, near santoshi mata chowk, Bandhavgarh Colony,  
Satna, Madhya Pradesh 485001

## CERTIFICATE OF INTERNSHIP

this certificate is proudly presented to:

Bharat verma

pursuing his b.tech 3rd/4th year has successfully complete summer internship at web development from  
01/01/2022 to 15/05/2022 .

we found him sincere, hardworking, technically sound and result oriented.  
she worked well as part of during her tenure  
we take this opportunity to thank him and all the best for her future

YATHARTH TIWARI (CEO)

AVINASH MISHRA (MENTOR)

**MADHAV INSTITUTE OF TECHNOLOGY & SCIENCE, GWALIOR**  
(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to RGPV, Bhopal)

**CERTIFICATE**

This is certified that Bharat Verma (0901CS181027) has submitted the Internship report titled **Web Development** of the work he has done under the mentorship of Avinash Mishra in partial fulfilment of the requirement for the award of degree of Bachelor of Technology in Computer Science and Engineering from Madhav Institute of Technology and Science, Gwalior.

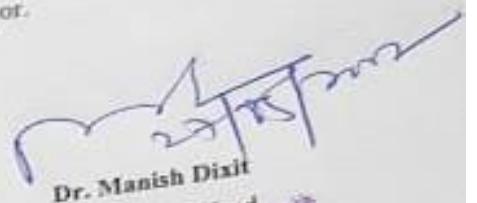

Prof. Jaimala Jha

Faculty Mentor

Assistant Professor

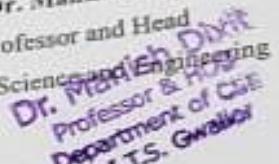

Computer Science and Engineering

Dr. Manish Dixit

Professor and Head

Computer Science and Engineering

Dr. Manish Dixit

Professor & HOD

Department of CSE

M.I.T.S. Gwalior

**MADHAV INSTITUTE OF TECHNOLOGY & SCIENCE, GWALIOR**  
(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to RGPV, Bhopal)

## **DECLARATION**

I hereby declare that the work being presented in this Internship report, for the partial fulfilment of requirement for the award of the degree of Bachelor of Technology in CSE at Madhav Institute of Technology & Science, Gwalior is an authenticated and original record of my work under the mentorship of **Prof. Jaimala Jha, Assistant Professor**, Department of CSE.

I declare that I have not submitted the matter embodied in this report for the award of any degree or diploma anywhere else.

Bharat verma  
0901CS18107  
IV Year,  
Computer Science and Engineering

**MADHAV INSTITUTE OF TECHNOLOGY & SCIENCE, GWALIOR**  
(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to RGPV, Bhopal)

## **ACKNOWLEDGEMENT**

The full semester internship has proved to be pivotal to my career. I am thankful to my institute, **Madhav Institute of Technology and Science** to allow me to continue my disciplinary/interdisciplinary internship as a curriculum requirement, under the provisions of the Flexible Curriculum Scheme (based on the AICTE Model Curriculum 2018), approved by the Academic Council of the institute. I extend my gratitude to the Director of the institute, **Dr. R. K. Pandit** and Dean Academics, **Dr. Manjaree Pandit** for this.

I would sincerely like to thank my department, **Department of Computer Science and Engineering**, for allowing me to explore this internship. I humbly thank **Dr. Manish Dixit**, Professor and Head, Department of Computer Science and Engineering, for his continued support during the course of this engagement, which eased the process and formalities involved.

I am sincerely thankful to my faculty mentors. I am grateful to the guidance of **Prof. Jaimala Jha**, Assistant Professor, Department of Computer Science and Engineering, for his continued support and close mentoring throughout the internship. I am also very thankful to the faculty and staff of the department.

BHARTA VERMA  
0901CS181027  
IV Year,  
Computer Science and Engineering

## ABSTRACT

This internship report describes the internship progress till now at the **Rkhchhit software Pvt. Ltd. Satna (M.P)**. **Rkhchhit software** is a Start-up Organization. **Rkhchhit software** is the leading provider of a unified digital transformation platform with native process automation, content services, and communication management capabilities. Globally, successful enterprises rely on **Rkhchhit's** industry-recognized low code application platform to develop and deploy complex, content-driven, and customer-engaging business applications on the cloud, web development and other different technologies. **Rkhchhit software** simply works with speed and agility. I worked on web development in this internship I learnt how to complete a work with the team. During the internship I learnt many interpersonal and intrapersonal skills. I increased my technical knowledge in the field that I was given by the organization.

**Rkhchhit software** is experienced in managing the systems and workings of global enterprises, we expertly steer our clients through their technical journey. We provide a wide range of services including Software Application development, E-commerce web solutions, Web design, Web development, Mobile Application development, Web hosting, ios development graphic designing, logo designing and digital Marketing Services across the country.

### ● ABOUT THE COMPANY

Rkhchhit Software Services Pvt. Ltd. is a privately held company, a team of ingenious and versatile software professionals. Our always-on learning agenda drives their continuous improvement through building and transferring technical skills, expertise, and ideas from our innovation ecosystem.

**Rkhchhit software** is experienced in managing the systems and workings of global enterprises, we expertly steer our clients through their technical journey. We provide a wide range of services including Software Application development, E-commerce web solutions, Web design, Web development, Mobile Application development, Web hosting, ios development graphic designing, logo designing and digital Marketing Services across the country

### ● OVERVIEW

This report considers several instances of HTML, CSS, JAVASCRIPT, DBMS that arose in the design and implementation of the web programming language Links.

This report contains all the details of what I have learned and practice in this internship. In this, I have learned many new concepts like- Programming languages, HTML, CSS, Java-Script, DBMS, MySQL, PHP, BOOTSTRAP. The first is related to the user interface defined using the HTML form.

In this, I came to know about how Web pages work, how they created and how to link them. In Java Script, I learned about its basic structure, its coding part, how it is using in IT sector, Surprisingly, many existing web systems do not support this simple scenarios. I made Gate practice web application from client side which is helpful in many fields.

### ● OBJECTIVE OF STUDY

More than one target has been taken in this internship report conducted which are given below:-

- ✓ Study the investment model of the people in the various options available
- ✓ Banks, IT Sectors, Bond, Manufacturing Industry Shares etc.
- ✓ To study the investment model of people in Mutual Funds.
- ✓ To find out which type of shares are preferred by investors.
- ✓ Study Factors Responsible for Low Investment in Market
- ✓ To study how companies fundamental work ?

# CHAPTER I: WEB DEVELOPMENT

Website is called web in short form. Development means to make, or to develop, thus webdevelopment means to make any kind of website.

When we search for any information on Google, the information that appears in front of you is published by a person on that website.

This website is made by programmers. The programmers who create websites are called webdevelopers.

Web development is a skill that any student can learn. Even if he is a student of Science, Commerce and Arts.

There are 3 types of web developers.

- ❖ Frontend Web Developer
- ❖ Backend Web Developer
- ❖ Full Stack Web Developer

## 1.1 Frontend Web Developer:-

When we open a website. So whatever things we see in that website . It is designed by Frontend WebDeveloper.

Like whatever we are able to see in this website. All these things have been created by Frontend WebDeveloper.

## 1.2 Backend Web Developer:-

There is an engine inside the website but it is in the coding form. It can also be called softwareengine. You can see the engine of the car. But you cannot see the software engine.

The programmer who creates the software engine running in this background. It is called BackendWeb Developer.

Backend Web Developer manages all the information that is provided by the user.

## 1.3 Full Stack Web Developer:-

When we learn both these skills Frontend and Backend then you are called a Full Stack WebDeveloper.

In this, we have to learn all the programming languages which is used in Frontend and Backend.

## CHAPTER II: TECHNOLOGY USED

### **2.1 HTML**

**HTML** is designed to introduce the basic tags (or elements) and their respective attributes, which are required to create a webpage.

### **2.2 CSS**

CSS used to design and create web pages through fundamental CSS concepts like properties, layout, selectors, pseudo-classes along with advanced CSS concepts using which you will be able to create web applications which have a clean layout, animations and transition effects. You will also learn how to make web pages user-friendly for people with special accessibility needs.

### **2.3 JAVASCRIPT**

JavaScript is a fundamental prerequisite skill in any web developer's repertoire.

Designing a web page with just HTML and CSS is not sufficient, there needs to be a layer that can handle custom validations and business logic that HTML just cannot support.

#### **2.3.1 JSON - JavaScript Object Notation:--**

When two different programs want to pass data to each other, they need a commonly accepted format of passing that data. There are many formats available like plain text, XML, JSON, etc.

JSON stands for JavaScript Object Notation. JSON is a way of formatting the text in such a way that it looks like a JavaScript literal object. JavaScript provides a standard built-in object called **JSON** which has methods for parsing and generating JSON data.

### **2.4 DBMS**

A **Database** is a shared collection of logically related data and description of the data, designed to meet the information needs of an organization.

### **2.5 PHP**

The full form of PHP is "PHP: Hypertext Preprocessor", it is a server side scripting language which is used in web development.

Server side scripting i.e. program written in PHP is always run in the server and whatever is output is converted in the form of HTML page and displayed on the user's web browser.

The HTML and CSS code of a website can be seen but the PHP code cannot be seen by the user because its code always resides in the server and never reaches the client's system.

## **2.6 GIT**

Git is a distributed version-control system for tracking changes in any set of files which is basically designed for coordinating work between programmers collaborating on the source code during software development. Its goals include speed, data integrity, support and non-linear workflows.

## **2.7 MYSQL**

MYSQL is a relational database. A relational database stores the entire data in different tables instead of storing it in a single table. And then identifies the relation between these tables and processes the queries on its basis. To get speed, database structures are organized in the form of physical files.

## CHAPTER III: Requirement Analysis

### **Phase 1: Requirement collection and analysis:**

As a part of the standard protocol, we will create a static prototype of the website which will be non –working. This prototype will give you an idea of how the actual website will look like.

### **Phase 2: Design:**

In this third phase, the system and software design documents are prepared as per the requirement specification document. This helps define overall system architecture. We will appoint a designer to provide a user friendly, eye catchy design to your project. To ensure a top-quality design you can give any reference website or template. This will help us to visualize the requirement and help us to provide the website of your choice.

### **Phase 3: Coding:**

Once the system design phase is over, the next phase is coding. In this phase, developers start build the entire system by writing code using the chosen programming language.

### **Phase 4: Testing:**

Once the software is complete, it will be deployed in the testing environment. The testing team starts testing the functionality of the entire system. This will be done to verify that the entire application works according to your requirement.

During this phase, QA and testing team may find some bugs/defects which they will communicate to our developers. The development team will fix the bug and send back to QA for a re-test. This process will continue until the software is bug-free, stable, and working according to your business needs.

### **Phase 5: Installation/Deployment:**

Once the software testing phase is over and no bugs or errors left in the system then the final deployment process will start.

## CHAPTER IV: SYSTEM REQUIREMENT SPECIFICATIONS

### **4.1 System configurations:**

The software requirement specification can produce at the culmination of the analysis task. The function and performance allocated to software as part of system engineering are refined by established a complete information description, a detailed functional description, a representation of system behavior, and indication of performance and design constrain, appropriate validate criteria, and other information pertinent to requirements.

### **4.2 Software requirements:**

Operating System: Windows  
Coding Language: HTML, CSS, PHP, JavaScript, and Bootstrap.Text  
Editor : Sublime Text3.  
Database : My SQL.  
Package : XAMPP.

### **4.3 Hardware Requirements:**

Processor : Intel core i3  
Memory : 4GB RAM  
Hard Disk : 1TB

## CHAPTER V: TECHNOLOGY

1. PHP
2. CSS
3. BOOTSTRAP
4. HTML
5. MYSQL
6. XAMPP SERVER
7. JS

### **5.1 External Interface Requirements**

You only require some hardware's :-  
a.) A desktop with Internet .  
b.)Website of the store can be reached by using the cell phone as well.

### **5.2 Non-functional Requirements**

These include :-

- a.) Can be accessed by any one.
- b.) Safety – All the details of the registered users is kept safe.
- c.) Quality - Best.

### **5.3 SECURITY MEASURES**

The security measures have been taken in a bid to make the Software full proof in terms of variousactivities: -

1. Authorization of the user as well as administrator
2. Input Validations of the forms
3. Output Validations of the result
4. Login timing to maintain the Session management
5. Logout timing of the user
6. Data Security
7. Software Security

## **ENHANCEMENT OF THE PROJECT DRAWBACKS:**

1. No automatic backup facilities available.
2. To run the application Internet Explorer 5.0 and above is required.
3. High bandwidth is required for as the transaction rate is high and third party gateway.

## **PROPOSED ENHANCEMENT:**

1. Data backup facility will be introduced.
2. Graphical richness is required for the more user interactivity.

## CHAPTER VI: RESPONSIBILITY AND TASKS

### 6.1 TIMELINE

The duration of the internship was 4 months and it started on 01<sup>st</sup>Jan 2022 and till the completion of the project. Office working hours is flexible, we have to give our somehours daily with weekend-off.

### 6.2 Tasks

#### Task I:

- Learning HTML basic syntax and try hands on.
- Experimenting with different HTML tags

#### Task II:

- Box model - how margins, padding, and borders work together.
- CSS units - used for expressing lengths.
- Position - specifies the type of positioning method. It also confuses many peopleso make sure you spend some time on it.

- Variables - or Custom properties are entities that can be reused throughout a document. This is my favorite feature in CSS. They make working with CSS soenjoyable and you can create themeswith just a few lines of code.
- Media query - decides what to show on different screen sizes.They are a keycomponent of responsive design.
- Animation - lets an element change from one style to another. If you know how to use animation correctly, it makes your site standout. Otherwise, it will make your website look unprofessional.
- Flexbox, CSS Grid - used for building Responsive layouts.

#### Task III:

- Learning Concepts on java script, functions in Js.
- Installation of server, how to execute program
- How to connect with DB using MYSQL server.
- Designing of Login page, Registration page using HTML,CSS, JAVA SCRIPT.
- Execute the pages and pages connect with MYSQL database .

Task IV:

- Learning SQL and PHP.

My Learning from this Project:

- HTML
- CSS
- JavaScript
- SQL
- DBMS

## CHAPTER VII: PROJECT DETAILS

### Project 1

#### WEBSITE VISUALS:

Landing page: -

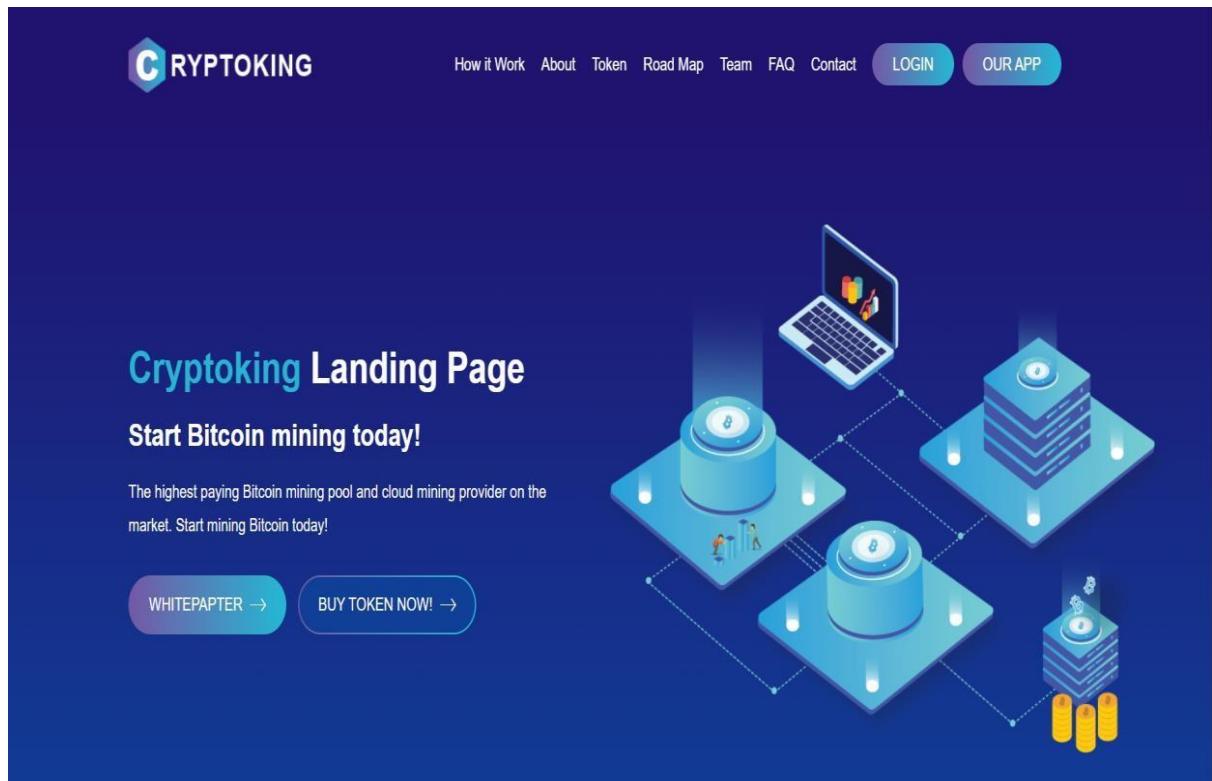

Fig.1: Landing page-1

Fig.2: Landing page-2

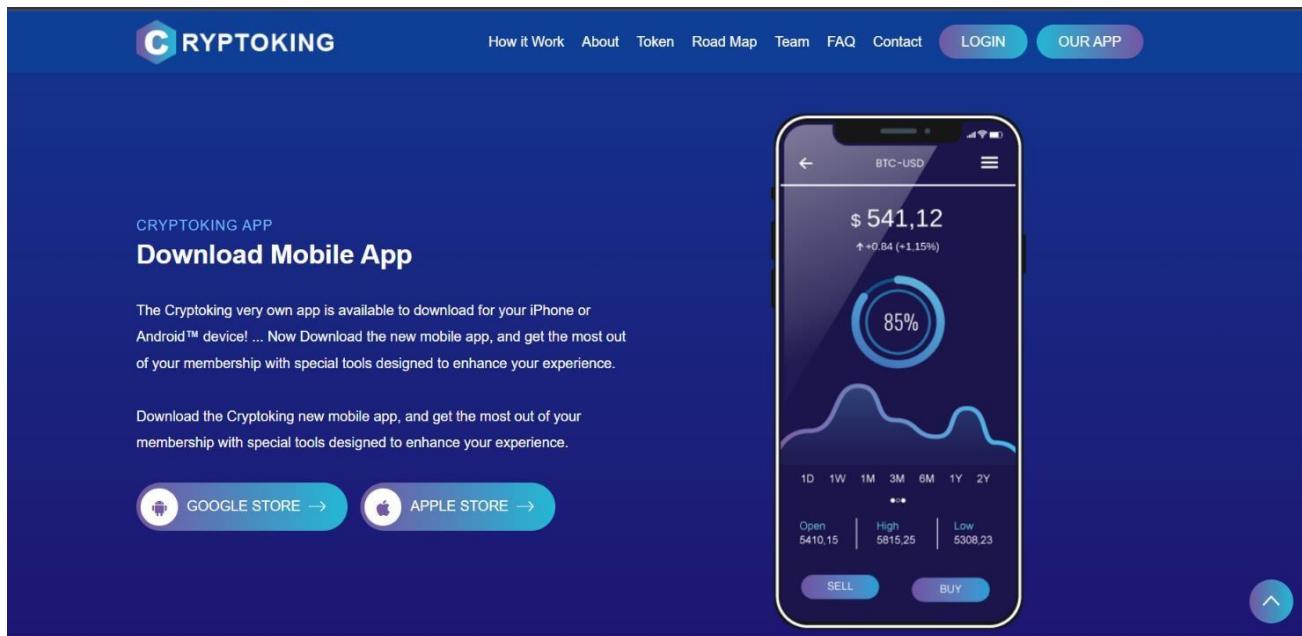

Fig.3: Landing page-3

The screenshot shows the 'Professional Experts' section of the Cryptoking website. At the top, there is a dark blue header with the 'CRYPTOKING' logo and a navigation bar with links: 'How it Work', 'About', 'Token', 'Road Map', 'Team', 'FAQ', 'Contact', 'LOGIN', and 'OUR APP'. Below the header, the section is titled 'OUR CORE TEAM' and 'Professional Experts'. A subtext reads: 'we are proud of our great team. He is one of the most motivated and enthusiastic people we have, and is always ready and willing to help out where needed.' Below this text are four profiles of team members, each with a photo, name, title, and a social media icon bar:

- Walter Mark**  
Director
- Lissa Tero**  
Project Manager
- Kartik Sef**  
Programmer
- Laura Sandel**  
Market Analysis

At the bottom right of the page is a small circular arrow icon with an upward-pointing arrow.

Fig.4: Landing page-4

The screenshot shows the 'Download Whitepaper' section of the Cryptoking website. At the top, there is a dark blue header with the 'CRYPTOKING' logo and a navigation bar with links: 'How it Work', 'About', 'Token', 'Road Map', 'Team', 'FAQ', 'Contact', 'LOGIN', and 'OUR APP'. Below the header, the section is titled 'Download Whitepaper'. A subtext reads: 'A white paper is an authoritative report or guide that informs readers concisely about a complex issue and presents the issuing body's philosophy on the matter. It is meant to help readers understand an issue, solve a problem, or make a decision.' Another subtext reads: 'Marketers create whitepapers to educate their audience about a particular issue, or explain and promote a particular methodology.' Below this text is a button with the text 'DOWNLOAD NOW →' and a small download icon. To the right of the text is a graphic of a white paper with a blue and purple wavy border, featuring the 'C' logo and the text 'Whitepaper' and 'Bitcoin: A Peer-to-Peer Electronic Cash System'. At the bottom, there is a 'CONTACT US' section with a 'Get In Touch!' button. A small circular arrow icon with an upward-pointing arrow is located at the bottom right.

Fig.9: Login page

## CHAPTER VIII: CONCLUSION

The end of this module brought with it new techniques and tools for organizing websites identifying & grouping specific elements within websites including & embedding multi-mediacontent adding metadata to further define our webpages.

Although it can be hard to come up with a design that is well suited to all of the users, there will be a design that is appropriate for most of the audience. The better the page design, the more hits a page will get. That implies an increase in accessibility and a possible increase in business. By interacting with my trainee and classmates I got to learn a lot. It helped me to enhance my communicative skills and represent my work with confidence. It boosted my confidence to design more webpages and create some great designs just for fun.
