DECLARATION

I hereby declare that the work being presented in this Internship report, for the partial fulfilment of requirement for the award of the degree of Bachelor of Technology in CSE at Madhav Institute of Technology & Science, Gwalior is an authenticated and original record of my work under the mentorship of **Prof. Amit Kumar Manjhvar, Assistant Professor, Department of CSE.**

I declare that I have not submitted the matter written in this report for the award of any degree or diploma anywhere else .

Sourabh Atariya
0901CS181105
IV Year,
Computer Science and Engineering

MADHAV INSTITUTE OF TECHNOLOGY & SCIENCE, GWALIOR
(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to RGPV, Bhopal)

ACKNOWLEDGEMENT

The full semester internship has proved to be pivotal to my career. I am thankful to my institute, **Madhav Institute of Technology and Science** to allow me to continue my disciplinary/interdisciplinary internship as a curriculum requirement, under the provisions of the Flexible Curriculum Scheme , approved by the Academic Council of the institute. I extend my gratitude to the Director of the institute, **Dr. R. K. Pandit** and Dean Academics, **Dr. Manjaree Pandit** for this.

I would sincerely like to thank my department, **Department of Computer Science and Engineering**, for allowing me to explore this internship. I humbly thank **Dr. Manish Dixit**, Professor and Head, Department of Computer Science and Engineering, for his continued support during the course of this engagement, which eased the process and formalities involved.

I am sincerely thankful to my faculty mentors. I am grateful to the guidance of **Prof. Amit Kumar Manjhvar**, Assistant Professor, Department of Computer Science and Engineering, for his continued support and close mentoring throughout the internship. I am also very thankful to the faculty and staff of the department.

Sourabh Atariya
0901CS181105

IV Year,
Computer Science and Engineering

ABSTRACT

AN INTERNSHIP REPORT FOR FINAL YEAR EVALUATION

This internship report describes the internship progress till now at the Newgen Software Technologies Limited, Mumbai. Newgen Software is a Product-based organisation. Newgen is the leading provider of a digital transformation platform with process automation, content services, and communication management . Globally, successful enterprises rely on Newgen's industry-recognized low code application platform develop & deploy complex and customer-engaging business applications on the cloud.

About the Organization:

Newgen Software is a recognized provider of Low Code Automation Platform for Digital Transform.

The company has been recognized by many famous analyst firms including Gartner, Forrester, Frost and Sullivan, and IDC. It has been positioned in the Magic Quadrants for iBPM, Enterprise Content Management , Customer Communication Management and BPM-Platform-Based Case Management frameworks.

Newgen is also certified for ISO 9001:2008, ISO 27001:2013, CMMi Development (v1.3) Level 3 and CMMi Services (v1.3) Level 3.

Newgen has wholly owned subsidiaries across many countries such as the United States, Canada, United Kingdom, United Arab Emirates & Singapore.

Internship:

Some of the products I have worked on are OmniDocs, OmniScan, OmniApp, iBPS. These products are used for creation of various applications, storage management, scanning purposes, retrieval and archival, rights management and various other purposes.

Chapter 1: INTERNSHIP OVERVIEW

1.1 Introduction:

The Newgen internship that we joined on 17th January started with a one-week orientation program i.e., NBSO. In NBSO, I interacted with colleagues and seniors who not only taught me about the company but also made me familiar with various aspect of life. I also learnt about newgen policies, work culture, company legacy. It is followed by IEEP training. In this training, I was taught about Newgen Products namely OmniDocs, OmniScan, OmniApp, iBPS, BAM, BRMS etc and how to operate them. After IEEP training, I attended the IBSSW workshop. IBSSW workshop includes a project. It was a team project which gave me good exposure to the products, their usage and their application, and also allowed me to interact with my colleagues and help each other. The team was provided with an SRS. Our task was to transform the SRS into an application using Newgen products.

Following this workshop, I had to go through NQS training which included other newgen policies, about our attendance sheet, where to report to, and how to use newgen services.

1.2 Objectives and Scope:

The Internship Report serves multiple purpose. Help the student develop written communication skills. Serve as a archival record for internship. Give the student an opportunity to reflect on the professional aspect of the internship experience and the skill that we learned. One of the core reasons and purposes of the internship is to give exposure of a specific job, profession, or industry. Internship provides a clear idea of strengths, weaknesses, likes, and dislikes. Knowing that I have hands-on experience will make me more confident in my job.

1.3 Internship Features:

NBSO: It was a one-week long orientation program. We were introduced with Newgen policies, work culture, company legacy. Welcome Session & Interaction with Delivery Leaders, Code of Ethics & Business Conduct, Network of System Support, Goal Setting & Goal Assessment, Learning & Development, CSR Engagement, Newgen Culture and Value System, Campus to Corporate, Position Insight & Interaction with Delivery Leader are some of the sessions organized under NBSO.

IEEP: This program is oriented towards building technical competency for Implementation teams at Newgen around Newgen products (OmniDocs, iBPS, OmniScan). This program includes Blended Learning Methodology encompassing "Teach Me, Show Me, Let Me Try" attained through:

Fusion of agile and practice based dynamic

Self-Paced eLearning [SPeL] Track with multiple Step-by-Step Course Modules

Each Course Module includes learning videos, pdfs, and recordings of live sessions for self-study

Requisite Hands-On under the guidance of Tech Buddy.

IBSSW: The course shall be executed in the workshop mode with assessment / assignments and exposure to simulated project implementation environment. It is designed to benefit the participants by:

- Giving them a feel of real time project execution.
- Enabling them to understand working environment during project implementation.
- Getting hands-on opportunities to explore Newgen products capabilities further.

NQS: The objective of Newgen Quality System Orientation is to get conversant/ refresh the Newgen Quality Standards pertaining to Software Project and bring its entire participant towards a common platform. Following are the parts of this workshop:

- How to fill timesheets.
- Get familiar with THECOMPASS.

1.4 System Requirement:

VM – Virtual Machine is used to work on our project as well as to learn about them. Virtual machine has made things easier for us to understand.

OmniScan - OmniScan is an advanced document scanning solution for a scalable high-volume production environment which goes beyond content capture. It accelerates business processes by capturing data and transforming it into actionable business information.

OmniScan enhances organisation effectiveness by accelerating the three core areas of enterprise level information capture: Scan - Enable organisations to securely capture paper and documents at the point of origin from production level scanners and web desktop.

Streamlines the transformation of documents into structured electronic information through

automatic document classification, separation, data extraction and validation. Ensures that the information captured and processed are quickly and seamlessly delivered to multiple destinations like ECM or BPM platforms, SAP, Folder etc.

OmniApp (IBPS) – Newgen iBPS is a **cloud-based business process management (BPM) solution**, which gives tools to help businesses streamline back or front office operation and manage the entire application development lifecycle. OmniApp is a graphical user interface used to register applications, components, component instances, external applications, and views. It displays component instances associated with the user's view. Every user is associated with a view which contains the list of component instances added to it. When a particular view is loaded, the user is able to see various component instances associated with it in the OmniApp home screen. Using OmniApp, a registered user is able to perform the following operations.

1. Register applications
2. Register components
3. Register component instances
4. Register external applications
5. Register views
6. Change settings
7. Set themes
8. View audit log
9. Register code fragments
10. Manage User's Profile Settings

Assigned IP and Port – Through the assigned IP we were able to access the internet as well as work on VM.

Of services – Servers – This allowed us to connect to different agents i.e., mailing agent to trigger different mails, and some services.

MS SQL - MySQL is an Oracle-backed open source [relational database](#) management system ([RDBMS](#)). Based on Structured Query Language ([SQL](#)). It is used to create database and store all the data that is used in the project.

Chapter 2: PROJECT

2.1 Objective:

The project is about discrepancies that occur in the banking system.

Discrepancy is defined as a difference or inconsistency.

For automation of this, single workflow will be created under Newgen application to raise the discrepancy to RM, with auto mail function.

Discrepancy forms

Discrepancy masters will be created with product mapping.

If Decision is not made in the given time reminder emails will be triggered.

Currently All the branches are sending the Discrepancy by Mails to the RM and sending daily MIS to the Central Team.

Central Team daily merging all Discrepancy data with single file.

It is very time taking process as it is very difficult to track raised discrepancy details.

To automation of this, single workflow will be created under Newgen application to raise the discrepancy to RM, with auto mail function. Also discrepancy masters will be created with product mapping.

It will help to enable easy tracking and TAT monitoring of transactions on daily basis.

2.2 Solution Scope:

Below functionality shall be part of delivery:

1. End to end workflow for tracking purpose
2. Email trigger functionality
3. Master maintenance control through frontend access
4. Reports

Chapter 3: PRELIMINARY DESIGN

3.1 Process Flow: Process Flow is the flow of the process that we will be working on. It includes work desk of multiple variety which are needed to complete one process. BPMN provides a platform to design a process for bridging the gap between business process design and process implementation. BPMN View provides a Toolbox that has all the activities as per the basic BPM notations. This toolbox aids in designing a complete process by the user. Following are the activities in the BPMN View Toolbox: Task Templates are used to create ad-hoc activities or tasks. These tasks can be defined and assigned to users during runtime. The tasks can be made optional or mandatory. Many tasks can be associated with a single work desk indicating where a particular Process will start. Activities are defined as Process flow. Activity is used when the work in the Process cannot be broken down to a finer level of detail.

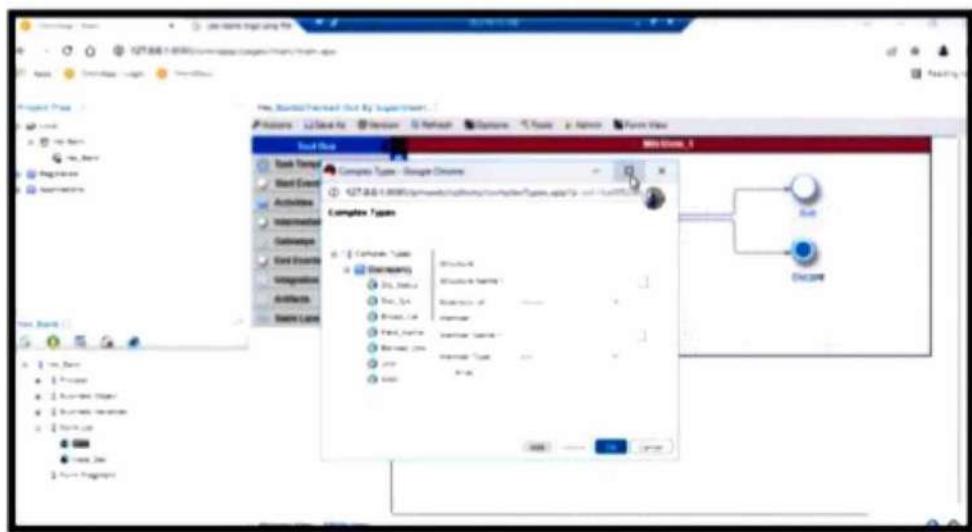

Fig – 1: Process Flow

The process cannot start or end at these steps. Gateways are used to control how the Process flows through Sequence Flow as they converge and diverge within a Process. End Events indicate where a path of a Process will end. Artifacts are to provide additional information about the Process. Swim Lanes is a graphical container for partitioning a set of activities from other activities.

3.2 iForm: Improved user Interface of the Form Builder-Enrich user experience with an intuitive user interface of iForms, the form builder. Create responsive forms by allowing users to group multiple controls and customizable form elements.

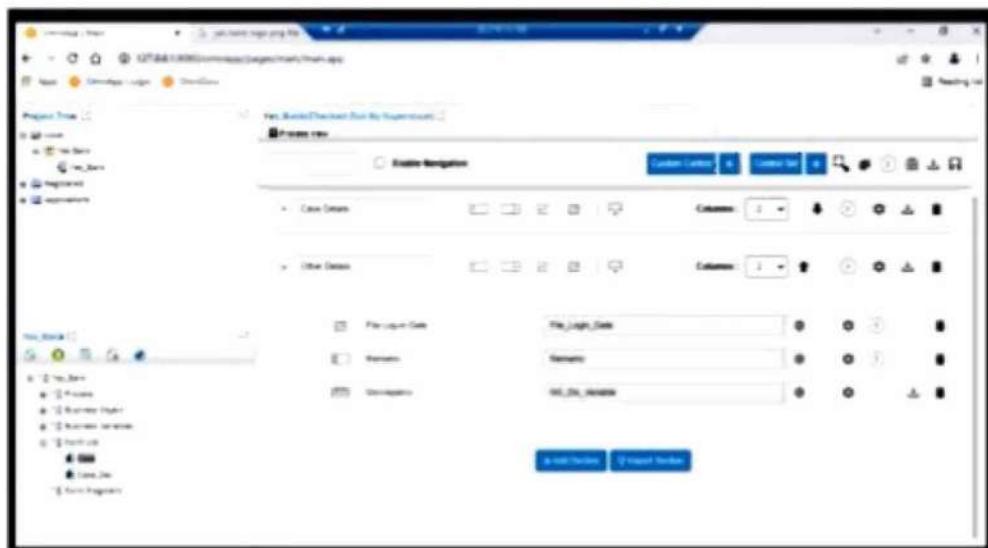

Fig – 2: IFORM SECTION VIEW

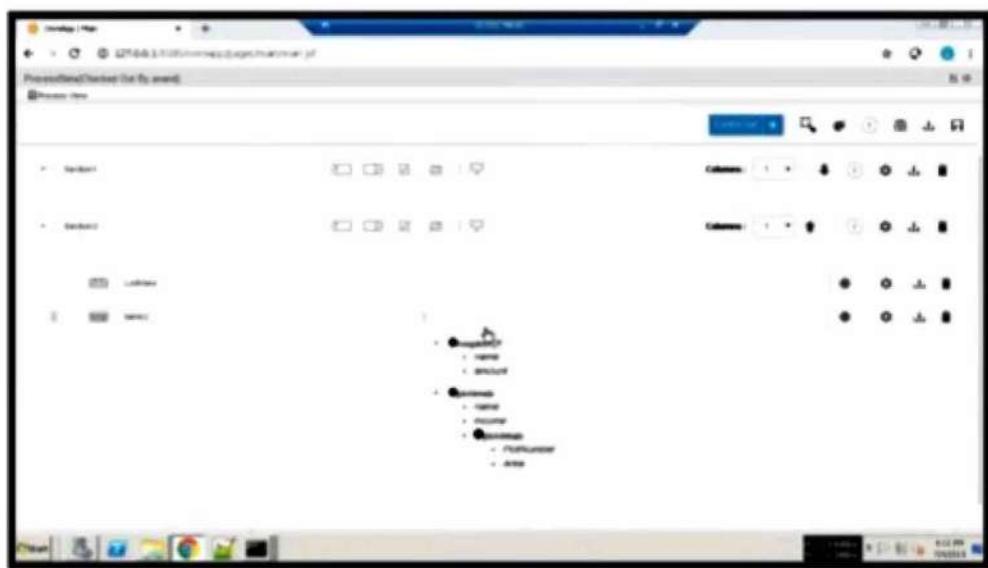

Fig – 3: IFORM COLUMN

3.3 MDM:

The screenshot shows a software interface for 'Master Data Management'. The top navigation bar includes 'Home', 'Logout', 'Business Admin', 'Project Manager', and 'Help/Feedback'. The main area is titled 'Master Data Management' and contains a table with the following columns: 'Name', 'Description', 'Status', and 'Actions'. The table lists several entries, such as 'HDL_00_DOCUMENT_00001', 'HDL_00_PRODUCT_00001', and 'HDL_00_Person_00001', each with a status of 'Submitted' and an 'Actions' column containing a 'View' link.

Name	Description	Status	Actions
HDL_00_DOCUMENT_00001	Document Reference 00001	Submitted	View
HDL_00_PRODUCT_00001	Product Reference 00001	Submitted	View
HDL_00_Person_00001	Person Reference 00001	Submitted	View
HDL_00_DOCUMENT_00002	Document Reference 00002	Submitted	View
HDL_00_PRODUCT_00002	Product Reference 00002	Submitted	View
HDL_00_Person_00002	Person Reference 00002	Submitted	View
HDL_00_DOCUMENT_00003	Document Reference 00003	Submitted	View
HDL_00_PRODUCT_00003	Product Reference 00003	Submitted	View
HDL_00_Person_00003	Person Reference 00003	Submitted	View
HDL_00_DOCUMENT_00004	Document Reference 00004	Submitted	View
HDL_00_PRODUCT_00004	Product Reference 00004	Submitted	View
HDL_00_Person_00004	Person Reference 00004	Submitted	View
HDL_00_DOCUMENT_00005	Document Reference 00005	Submitted	View
HDL_00_PRODUCT_00005	Product Reference 00005	Submitted	View
HDL_00_Person_00005	Person Reference 00005	Submitted	View

Fig – 4: MDM

Ensure data and info. consistency across all channels, apps, and 3rd party systems by curating and managing your master data. Empower users to create, manage, and delete master tables as per their business needs. Manage enterprise data is centrally by enforcing data governance policies across various departments and functions, thereby standardizing critical enterprise data to draw key business insights

3.4 Reports:

Reports are basic reflection or end result of which processes have worked and has moved all their work items from source to destination or not. It is a document that give information in an organized format for a specific audience and purpose.

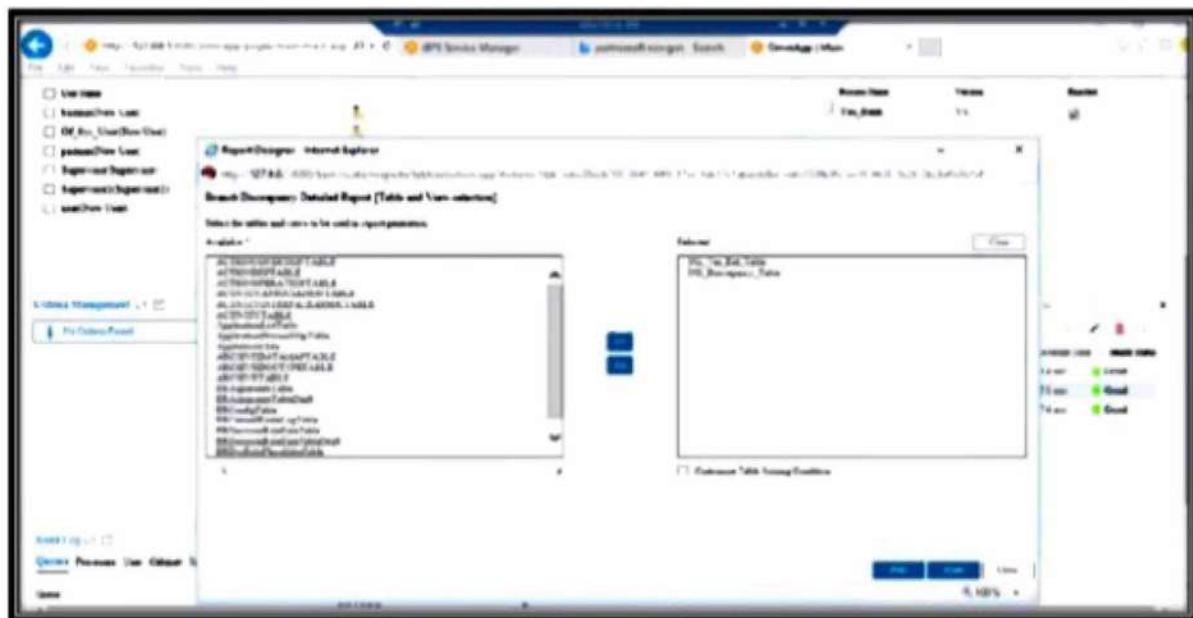

Fig -5 : Report

3.6 Database: The main database which has all the data stored in it. Also has inbuilt parent's tables.

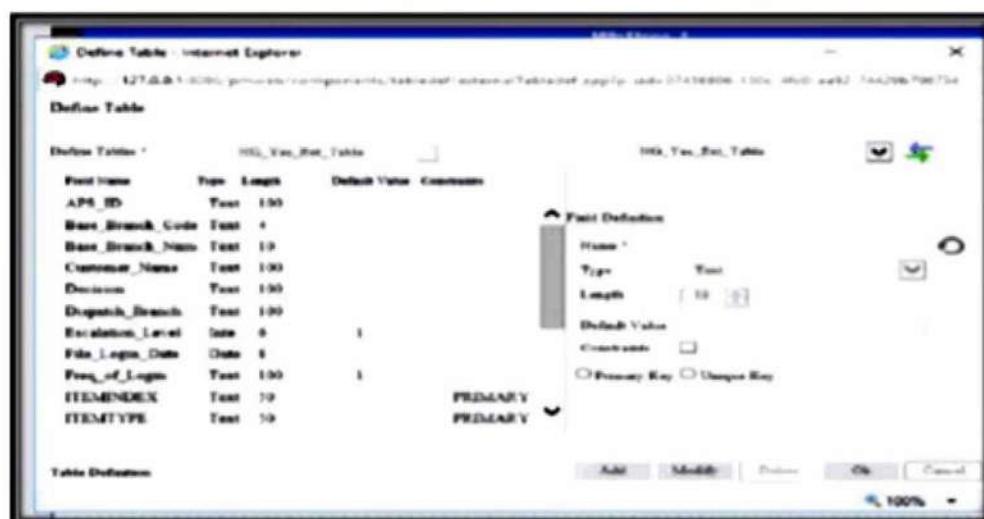

Fig -6 : Table Field to Store

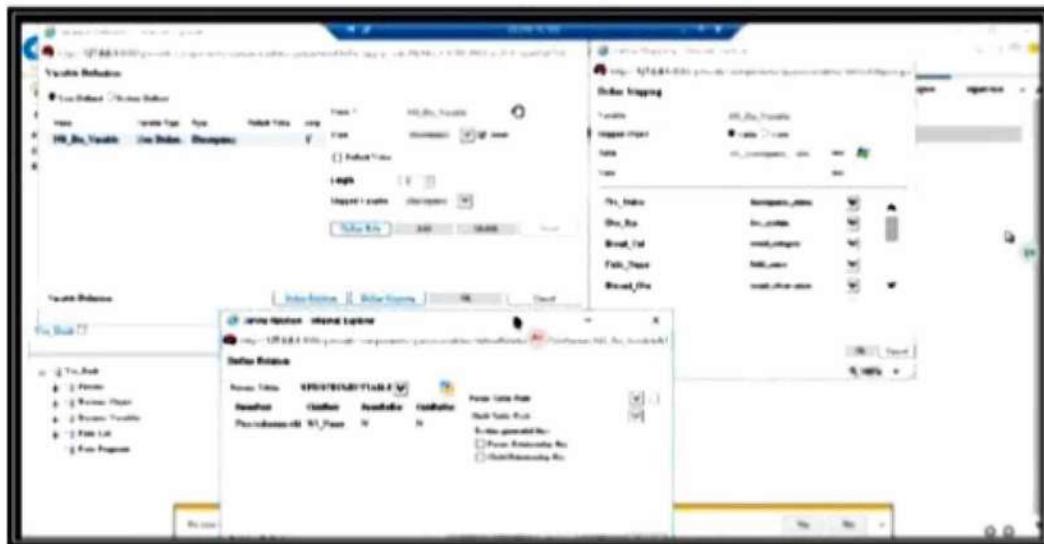

Fig – 7 : Database

3.7 Triggers: Email Triggers are the emails which need to be triggered at a particular time and duration in the condition of any discrepancy or need

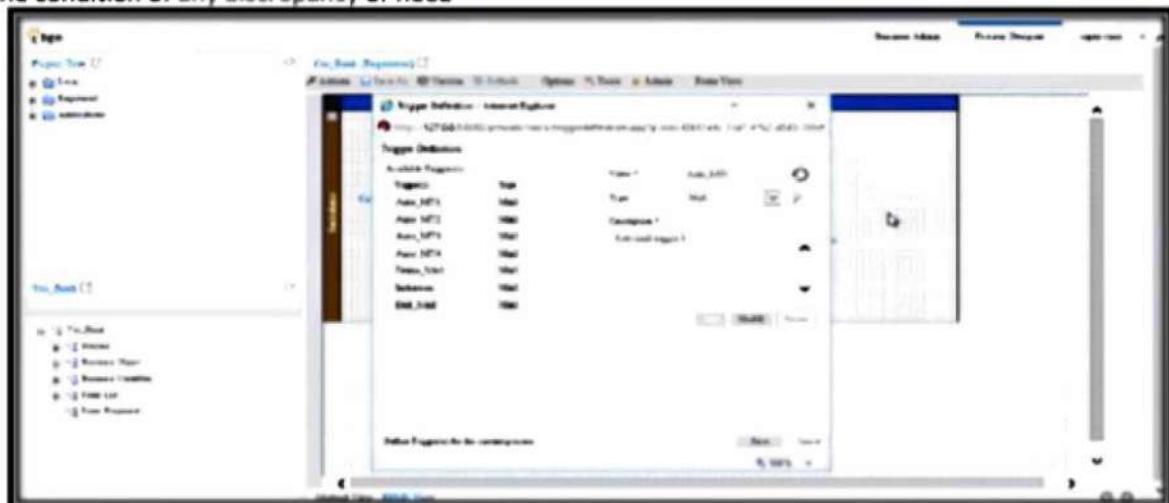

Fig –8: Email triggers

Chapter 4: FINAL ANALYSIS AND DESIGN

4.1 Results:

4.1.1 Work Flow - Integrated Data Management Workflows

- Tight integration for push and pull operations with ERPs and third-party systems

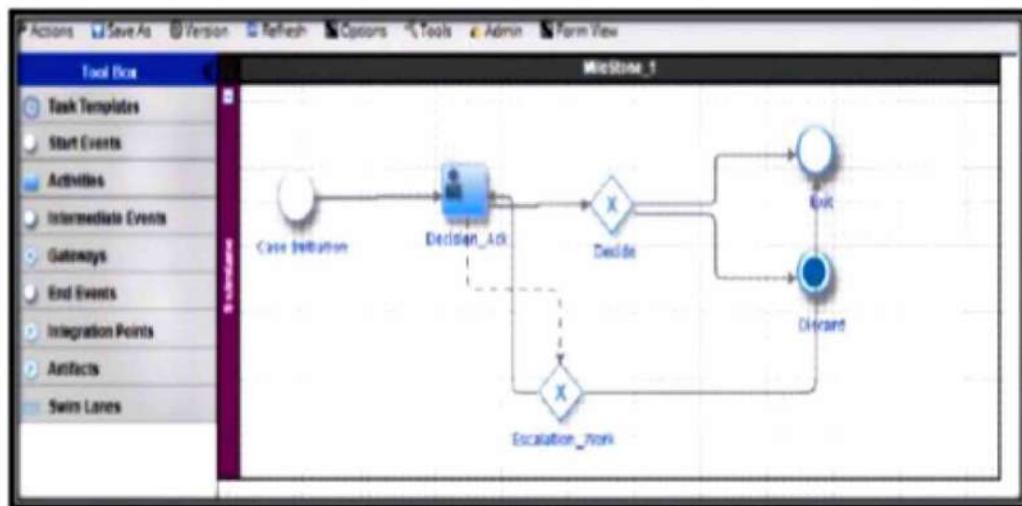

Fig-9 : Workflow

Add, delete, modify, block/unblock, and/or post validations and approvals at any point in the workflow, while simultaneously updating the master to the ERP, CRM, or any other external system

4.1.2 IForm : Improved UI of the Form Builder-Enrich user experience with an intuitive UI of iForms, the form builder. Create responsive forms by allowing users to group multiple controls and customize form elements.

Fig-10 : Iform

Fig-13 : Server

4.2 Application:

Banking System
Account Opening
Discrepancy check
Loan Approval

4.4 Problem Faced:

How to manage mail triggers.
Difficulty in setting conditions for escalating mail triggers.
File-login date field value was not getting stored in the database.
How to map complex types with queue variable.
How can we fetch all fields with APS id and map the data at the same time.
How to upload document of specific size and type.
Database Field deletion and Integrity.

4.5 Limitations:

This project is created specifically for banks which are clients of Newgen. Outside Newgen network it can't be used.
This implementation will be done on top of Newgen OmniFlow product suite; thus, the implementation has dependency on OmniFlow product suite.
Any change in the existing process flow during the development phase is not part of the scope.

4.6 Conclusion:

This document is primarily intended for Yes Bank business & technical users group & Newgen implementation team. The Bank users will provide sign off on this SRS document.

Dear Vikram

The following students have been interning with us in their last semester and their internship will get over by 30th June 2022.
Kindly share this email communication with their departments as the certificate will only be issued post completion of internship.

Warm Regards,

Rohan Kumar Sudan
