## **CERTIFICATE**

This is certified that **Sujal Nigam** (0901CS211117) has submitted the project report titled **Food Delivery Website Using HTML And CSS** under the mentorship of **Mahesh Parmar**, in partial fulfilment of the requirement for the award of degree of Bachelor of Technology in Computer Science and Engineering from Madhav Institute of Technology and Science, Gwalior.

**Mahesh Parmar**

Faculty Mentor

Assistant Professor

Computer Science and Engineering

# **MADHAV INSTITUTE OF TECHNOLOGY & SCIENCE, GWALIOR**

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to RGPV, Bhopal)

## **DECLARATION**

I hereby declare that the work being presented in this project report, for the partial fulfilment of requirement for the award of the degree of Bachelor of Technology in Computer Science and Engineering at Madhav Institute of Technology & Science, Gwalior is an authenticated and original record of my work under the mentorship of **Mahesh Parmar, Assistant Professors** from **Department of Computer Science& Engineering.**

I declare that I have not submitted the matter embodied in this report for the award of any degree or diploma anywhere else.

A handwritten signature in blue ink, reading 'Sujal Nigam', with a horizontal line drawn underneath it.

Sujal Nigam  
(0901CS211117)  
2nd Year,  
Computer Science and Engineering

# **MADHAV INSTITUTE OF TECHNOLOGY & SCIENCE, GWALIOR**

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to RGPV, Bhopal)

## **ACKNOWLEDGEMENT**

The full semester project has proved to be pivotal to my career. I am thankful to my institute, **Madhav Institute of Technology and Science** to allow me to continue my disciplinary/interdisciplinary project as a curriculum requirement, under the provisions of the Flexible Curriculum Scheme (based on the AICTE Model Curriculum 2018), approved by the Academic Council of the institute. I extend my gratitude to the Director of the institute, **Dr. R. K. Pandit** and Dean Academics, **Dr. Manjaree Pandit** for this.

I would sincerely like to thank my department, **Department of Computer Science and Engineering**, for **allowing** me to explore this project. I humbly thank **Dr. Manish Dixit**, Professor and Head, Department of Computer Science and Engineering, for his continued support during the course of this engagement, which eased the process and formalities involved.

I am sincerely thankful to my faculty mentors. I am grateful to the guidance of **Mahesh Parmar, Assistant Professors** from **Department of Computer Science & Engineering**, for his continued support and guidance throughout the project. I am also very thankful to the faculty and staff of the department.

Sujal Nigam  
(0901CS211117)  
2nd Year,  
Computer Science and Engineering

## **ABSTRACT**

The intention behind the project was to build an exceptionally beautiful and responsive website for the advertisement and ordering food from nearest tied up restaurants. If a user wishes to know about the hotel the website allows them to do so.

The website will exhibit different aspects of the food ordering and advertisement such as ordering dishes, desserts, drinks, checking delivery, and will show the clients of the company. Through this website user can contact to the company and restaurant also (**frontend only**).

**Keyword:**

**Advertisement, Ordering food, Contact Us**

# **Chapter 1: INTRODUCTION**

## **1.1 Introduction:**

The proposed “Online Food Delivery System” is developed for handling the food ordering affairs and advertisement of the company and restaurants which were used to be happening through hoardings on roads. To order food we had to go to restaurant but now it is done from home via our system.

Drinks, desserts and food items can be ordered when someone is in a hurry. He/ She can contact to the restaurant to tell any specific detail, and can see the clients of the company.

## **1.2 MOTIVATION:**

The idea behind the whole task was to automatize the procedure of daily affaires of the restaurants and costumers of ordering the food with the help of a waiter. And always there is a chance of human error in listening the requirements and remembering it. So, to increase the accuracy and to fulfill the need of costumer in a hurry and is not able to come to a restaurant due to any issue, we have this website.

## Chapter 3: Website Demonstration

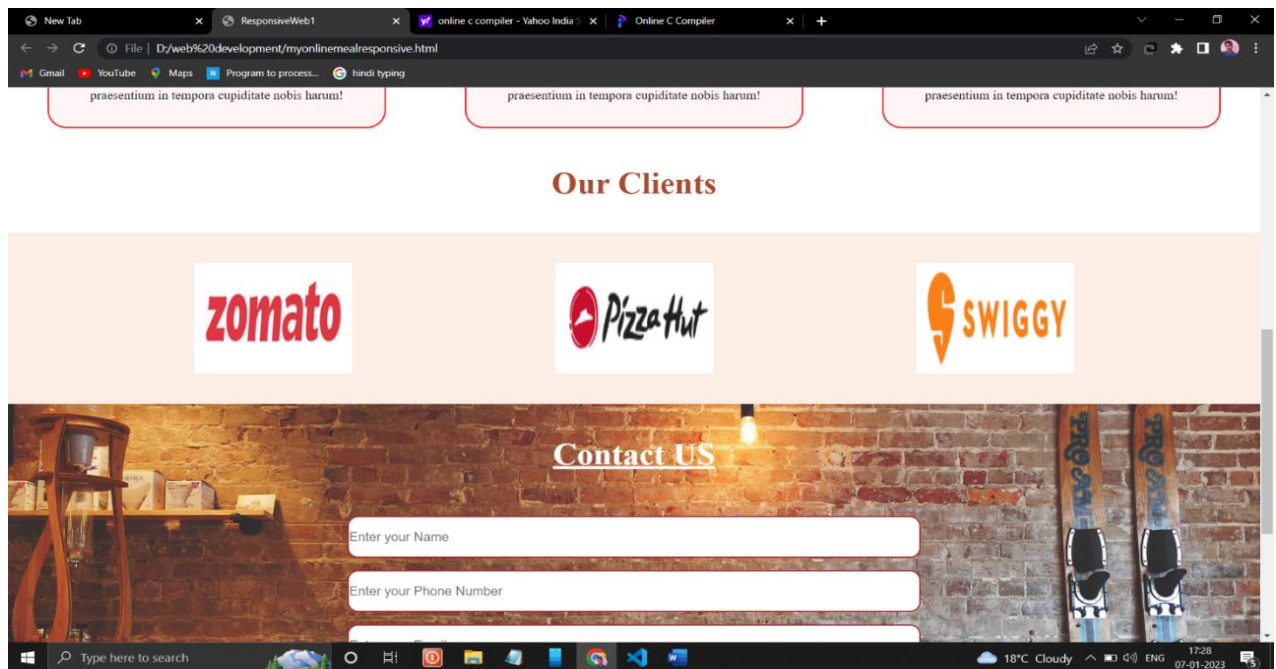

### 3.1: Landing Page(Home)

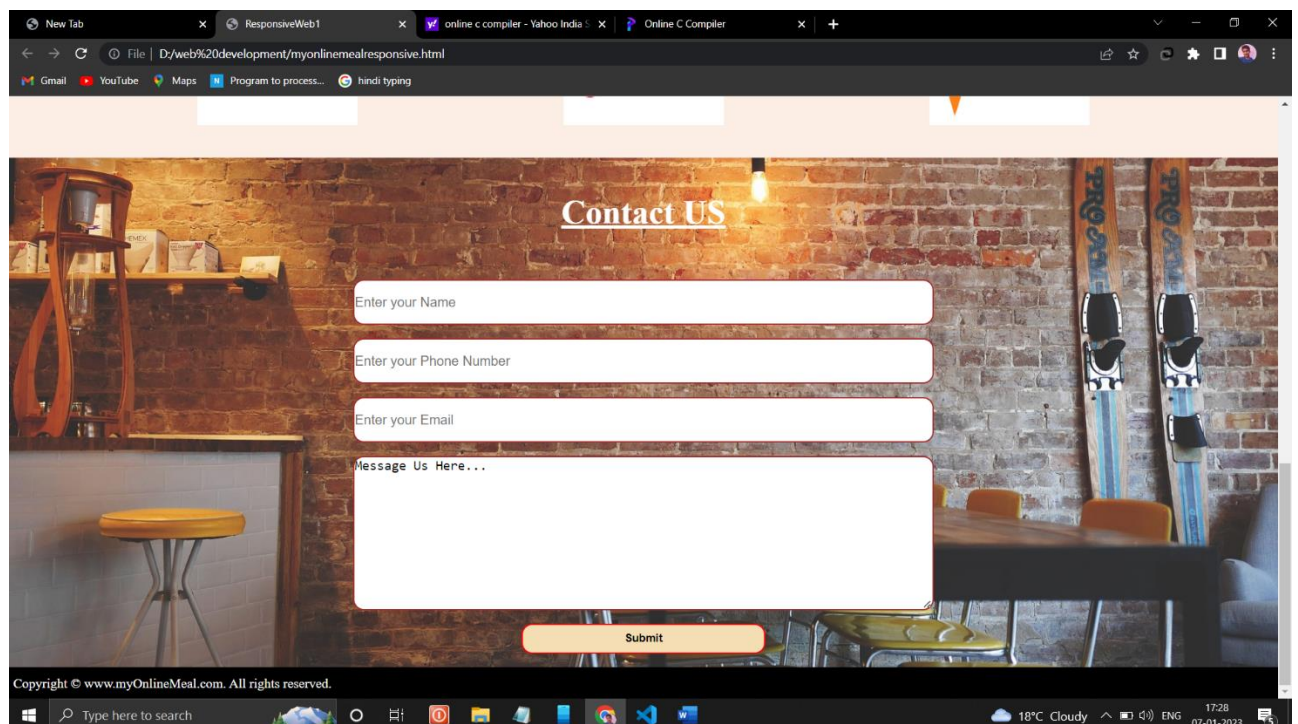

### 3.2 : Services

### 3.3 Our Clients

### 3.4 Contact US

## **Chapter 4: CONCLUSION**

After successfully completing the skill based mini project, a simple conclusion can be drawn that a “Food Ordering Website” is an effective solution for the ordering and advertisement of the food and restaurants respectively. Any waiter is not needed in between the chef and customer. So, direct needs can be forwarded to the chef via website. No hard menu is needed which has to distributed among costumers and due to limitation of hard copy menu sometimes clashes occur. All of the issues like this have been resolved with the help of system like we made.

Payment details, availability of any dish can also be taken care off.

### **FUTURE SCOPE:**

In a nutshell, the future scope of the project could be said to revolve around maintaining the required information through the online system. Seeing the results of this project, a few changes could aid in the enhancement of the proposed methodology, such as:

- Adding a printer in future.
- Hosting the platform on online servers would create its accessibility worldwide.
- Backend can be added to make it work.
