			End Sem	Mid Sem Test	Assignment/ Quiz	End Sem	Studio Work	Assignment/ Quiz	Theory	Practical	
1	AR 101	Architecture Design – I	100	20	10	50	100	20	2	3	5

AIM: The aim of the subject is to introduce to the students the design fundamentals, design vocabulary and order of form and space.

Course Content:

- Primary elements: Point, line, plane, volumetric elements.
- Form: Properties of form (two dimensional) primary solids, variations in forms.
- Surface articulation including importance of colour theories, textures and relationship.
- Form and space: Space defining elements, organisation of form and space.
- Circulation elements, proportion and scale, ordering principles.
- Application of these above to two and three dimensional compositions.
- Indoor and outdoor sketching exercises to develop the skill and understanding of shades, shadows etc. in the nature and man-made objects with the use of different models.
- Study through models of different materials viz paper, clay wax, soap, wires etc.
- The idea is to learn mass and space handling with importance of form, colour and texture.
- Minimum one time problem of 6 hours duration is to be conducted in class other than regular design problems.

Note: The sessionals shall be in the form of drawings, and models along with report. The evaluation will be through review system presented before the Jury.

FIRST YEAR FIRST SEMESTER

S.No	Subject Code	Subject Name	Maximum Marks Allotted								Total credits
			Theory			Practical			Credit Allotted		
			End Sem	Mid Sem Test	Assignment/ Quiz	End Sem	Studio Work	Assignment/ Quiz	Theory	Practical	
2	AR 102	Architectural Materials	50	20	10	-	10	10	2	1	3

AIM: The subject has been designed to impart the knowledge about the traditional natural materials and the proprietary manufactured materials along with their characteristics, manufacturing process and appropriate use as building components and related specifications so that the students can use these materials appropriately.

Course Content:

1. Clay and clay products (bricks, tiles), stones.
2. Cement, lime, sand, aggregate mortar and concrete blocks.
3. Timber types, qualities and defects in timber seasoning etc. complete.
4. Metals- ferrous and non ferrous, glass.
5. Especial functional need and category of building materials abrasives, adhesives, asbestos, asphalt, bitumen, cork, electrical insulators, fuels, gypsum, heat insulation materials, lubricants, rubber sheets, roof coverings, solders, sound absorb materials, tar, turpentine etc.
6. Proprietary building materials:- Paints, Varnishes, distempers wall paper, floor coverings, tiles, vinyl's, polyesters, fittings, furnishing materials for interiors & exteriors polymers, plastics resins etc.
7. Processed materials- plywood, laminates, fiberboards, light weight boards, panels etc. & clay products.
8. Prefabricated and pre-stressed building component: roof slabs, wall units, beams, columns, lintels, shelve etc. of different types, their specification & technique of construction and use in architecture.
9. Low-cost construction techniques and materials, combinations in mud, terra - cotta, bamboo construction etc. Termite protection, sewage protection, fire protection materials etc. of special need.
10. Industrial, agricultural and mineral wastes and their utilization as building materials: Fly ash, blast furnace slag, calcium carbonate, lime kiln rejects, by-product, gypsum, red mud, throw-away packages, rice husk, saw dust, wooden chips, choir waste, wood wool, tailings etc.

			Theory			Practical			Credit Allotted		
3	AR 103	Graphics – I	50	20	10	50	50	20	2	2	4

AIM: The aim of the subject is to introduce the students about the fundamentals of visualization and preparation of architectural drawings.

Course Contents:

1. a) Free hand drawing: Techniques and principles of free hand drawing through sketching various elements of nature and man made objects through various mediums like pencil , pen and ink and colour etc.
b) Graphic codes and symbols for various building elements, Architectural lettering.
2. Scales: Construction of architectural scales and their application to real objects and drawings.
3. Orthographic Projections: From simple point line to simple regular solids to complex solids or hollow objects /geometric objects.
4. Complex Projections: Interpenetration of solids, development of surfaces with or without sections.
5. Angular Projections: Isometric, axonometric and oblique projections.

Note: The sessional is to be done in the form of drawing sheets and sketches on above topics.

AR 103- GRAPHICS-I

1. N.D. BHATT, "Engineering Drawing", Charotar Publishing house.
2. NARAYANAN, "Engineering Drawing".
3. I.H. MORRIS, "Geometrical Drawing". Orient Longman.

4	AR 104	Fundamental of Structural behavior	50	20	10	-	10	10	2	1	3

AIM: The aim of the subject is to introduce the students about the fundamentals of stability of any built structure and various factors of structure designing.

Course Content:

1. Statics of a particle, composition and resolution of forces, moment of a force, parallel forces, couples, general conditions of equilibrium.
2. Center of gravity and moment of inertia of composition and cut out sections, parallel and perpendicular axes theorem, stability of equilibrium.
3. Simple stresses and strains, direct stresses, compound stresses.
4. Shear force and bending moments for strained beams subjected to concentrated load and distributed loadings (Simply supported and cantilever only) support reactions.
5. Stress in beams: Direct, bending and shearing stress in beams.

Note: Sessional work should include design and analysis of simple elements as stated above with drawings.

5	HU 110	English Language (Architecture Appreciation)	50	20	10	-	10	10	2	1	3

Course Title: English Language

Objective:

The course intends to build the required communication skills of the students so as to communicate effectively in real-life situations like starting a talk and be comfortable using English language.

It also aims at teaching students to appreciate English language through the study of literary genres like essays, short stories, and drama. The course is designed to acquaint students with structure of English language used in literature, functional varieties, figurative language, and verbal concomitance. It is intended to use all the four genres that are necessary to teach English language that is prose, poetry, drama, and fiction. The students are expected to enrich their knowledge of language, culture, and ethics through this course.

Part 01: Literature

Prose

- *On the Rule of the Road* — A G Gardiner
- *Shooting an Elephant* — George Orwell

Short Stories

- *Marriage is a Private Affair* — Chinua Achebe
- *The Mark of Vishnu* — Khushwant Singh
- *A Canary for One* — Ernest Hemingway

Novella

- *The Old Man and the Sea* by Ernest Hemingway

Part 02: English Language

- Grammar & Composition: Time and Tense, Agreement, Active-Passive, Narration, Use of Determiners, Prepositions.

MADHAV INSTITUTE OF TECHNOLOGY & SCIENCE, GWALIOR – 474005

(An Autonomous Institute under rajivGandhiProudyogikiVishwavidyalaya, Bhopal)

CBCS SCHEME OF EXAMINATION- BACHELOR OF ARCHITECTURE **WEF 2015**

- Public Speaking, Group Discussion, Presentation, and debate.
- Letter Writing

Part: 03: Laboratory Work:

1. Introduction to Language and Linguistics and Phonetics (08 Lectures)
2. Preparing and delivering Presentation (06 Lectures)
3. Reading and Interpreting a one act play as a suggestive art: J M Synge's — *Riders to the Sea*. (04 Lectures)
4. Drills & Exercise in Listening and Speaking [Group Discussion] (08 lectures)

			End Sem	Mid Sem Test	Assignment/ Quiz	End Sem	Studio Work	Assignment/ Quiz	Theory	Practical	
6	AR 105	Workshop – I	-	-	-	20	50	-	0	2	2

AIM: The aim of the subject is to introduce to the students to the various tools used in carpentry, metal work, masonry painting etc. and get a reasonable skill in handling the materials and tools thereof.

Course Content:

Carpentry - Introduction to the carpentry tools, processes, joints and wood working machines. Preparation of various carpentry joints, fixing of plywood, Blackboards, commercial boards and their application in furniture.

- **Foundry** –Introduction, type of patterns, pattern making, preparation of moulds and moulding equipment details
- **Fabrication** –Introduction to welding equipments, processes and its applications.
- **Painting and polishing**- Classification of paints, varnishes ingredients of paints, painting methods-brush, spray, hot spray etc.

Note: The sessionals will be in the form of different job works and sheet works in each trade and models prepared by using the above methods. An internal viva at the end on all the job works or practical may be carried out.

CBCS SCHEME OF EXAMINATION- BACHELOR OF ARCHITECTURE **WEF 2015**

FIRST YEAR SECOND SEMESTER

S.No	Subject Code	Subject Name	Maximum Marks Allotted								Total credits
			Theory			Practical			Credit Allotted		
			End Sem	Mid Sem Test	Assignment/ Quiz	End Sem	Studio Work	Assignment/ Quiz	Theory	Practical	
1	AR 201	Architectural Design - II	100	20	10	50	100	20	2	3	5

AIM: The aim of the subject is to introduce to the students the design fundamentals, design vocabulary and impact of order of form, space and color scheme on the human psychology.

Course Content:

1. Introduction of Architectural design with an approach of functional understanding and analysis of problems with studies of space requirements for different furniture (objects), activities and circulation. Relationship between occupied and unoccupied spaces.
2. Anthropometric study and analysis. Study of single units Viz / living area, sleeping area, cooking area, study area, toilet etc.
3. Design of small shelters and study of multi units involving max. 3 to 4 functional spaces natural and man made objects of functional and aesthetic value. Aspects of area determination in conjunction with relevant building Bye Laws and area relationship.
4. Colour theories and colour schemes and its effect on the users.
5. Case studies for measured drawing of small buildings and furniture. Introduction to draw presentation drawings. Small views (isometric and perspective) of the studied buildings.
6. Study and design of small structures like ceremonial gates, temporary exhibition stalls, drinking water fountains, milk booths etc.
7. Minimum one time problem of 6 hrs duration is to be attempted in class other than regular design problems.

Note: The sessional will be in the form of drawings and models along with technical report for the design dealt with. The evaluation should be done in intermediate reviews consisting of internal / external experts. There should be regular site visits to the building type dealt in the studio problem for which audio visuals should be prepared.

FIRST YEAR SECOND SEMESTER

S.No	Subject Code	Subject Name	Maximum Marks Allotted								Total credits
			Theory			Practical			Credit Allotted		
			End Sem	Mid Sem Test	Assignment/ Quiz	End Sem	Studio Work	Assignment/ Quiz	Theory	Practical	
2	AR 202	Building Construction - I	50	20	10	20	30	10	2	2	4

Aim: The aim of the subject is to introduce the students about execution of building components with their constructional details presentation of working drawing. Introduction to the subject and its impertinence to the field of architecture and description of various components of a small building envelop from foundation to roof.

Course Content:

Foundation:

- Definition, functions and design factor
- Detail of simple stepped brick and stone foundation.

Excavation:

- Timbering to trenches,
- Tool, plants and equipments for excavation

Masonry:

- Types of bricks and stone and their uses
- Definitions and types of masonry
- Various types of Bonds and detailed study of English, Flemish, double Flemish and rat trap bond and use of these bonds in brick and stone walls of various thicknesses
- Details of right angle, tee and angular Junction,
- Piers and quoins

MADHAV INSTITUTE OF TECHNOLOGY & SCIENCE, GWALIOR – 474005

(An Autonomous Institute under rajivGandhiProudyogikiVishwavidyalaya, Bhopal)
CBCS SCHEME OF EXAMINATION- BACHELOR OF ARCHITECTURE **WEF 2015**

Rubble Work:

- Random rubble, courses rubble & ashlar masonry, Composite Masonry

Opening:

- Different types of arches, lintels and sills in Bricks and stones

Miscellaneous:

- Plastering pointing, corbels,
- Damp Proof Courses & copings
- Introduction to different type of stairs case with their design factors
- Construction details of stone stairs

Note: There should be **regular site visits to buildings under construction or constructed to explain the above topics.** Use of audio-visuals should be stressed. The Sessional shall be in the form of handmade drawings and the continuous evaluation will be through review system presented before the Faculty and Studio In charge.

LIST OF TEXT AND REFERENCE BOOKS:

S.No	Subject Code	Subject Name	Maximum Marks Allotted								Total credits
			Theory			Practical			Credit Allotted		
			End Sem	Mid Sem Test	Assignment/ Quiz	End Sem	Studio Work	Assignment/ Quiz	Theory	Practical	
3	AR 203	Graphics – II	50	20	10	20	50	10	2	2	4

AIM: The aim of the subject is to introduce the students about the fundamentals of three dimensional visualization, realistic expression of ideas and presentation of architectural drawings. And introduce the students the computers as an analytical tool. They shall be introduced about the fundamentals understanding of various architectural software's and their use in designing, drafting of architectural drawings in two dimension forms and three dimensional forms for proper visualization and understanding and also for working and presentation drawings of architectural designs along with project documentation and management etc.

Course content:

PROJECTION & PERSPECTIVE:

1. Projection of Complex geometrical objects to understand Building Elements.
2. Introduction to basic terms, principles, types and techniques of perspective drawing: realistic expression of ideas.
3. Two point perspective of simple objects (drafted & free hand)
4. Presentation of interior and exterior views in one point perspective (drafted and free hand)

SCIOGRAPHY:

1. Introduction to basic principles of sciography and it's application to the field of architecture.
2. Sciography of two dimensional objects in plan and elevation.
3. Sciography of three dimensional objects in plan, elevation and views, (Isometric, Axonometric and Perspective)
4. Sciography of simple building elements.

Computer Aided Graphics

- Introduction to basic understanding of application software, such as Auto cad, Revit, Archicad, Rhino and other project management softwares.

MADHAV INSTITUTE OF TECHNOLOGY & SCIENCE, GWALIOR – 474005

(An Autonomous Institute under rajivGandhiProudyogikiVishwavidyalaya, Bhopal)

CBCS SCHEME OF EXAMINATION- BACHELOR OF ARCHITECTURE **WEF 2015**

- Advance Computer Aided Architecture Drafting (in various projections).
- Architecture or allied project presentation technique.
- Graphical analysis of development project through computer.
- 3-D modeling, animation and advance rendering techniques with the help of computers.

Note: The sessional will be in the form of drawings, sketches and computer aided graphics.

LIST OF TEXT AND REFERENCE BOOKS:

AR 203 - GRAPHICS-II

4	AR 204	Analysis of Structures	50	20	10	-	10	10	2	1	3

AIM: The aim of the subject is to introduce the students about the fundamentals of stability of any built structure and various factors of structure designing. The objective of the course is to develop in the students a feel for structural principles and they relates to building design.

Course Content:

- 1.Fixed and continuous beams: Relation between free B.M. diagram fixed B.M. diagram, slope deflection, fixed beam subjected to couple, continuous beam, Clapeyron's theorem of three moments.
2. Moment distribution methods: fixed and continuous beams only.
3. Study of types of structures: load bearing framed, rigid jointed, pin jointed, determinate, indeterminate.
4. Loads of stresses: Dead load, live load, wind load, earth quake forces, soil and hydrostatic pressure, load combinations, factor of safety, permissible stresses, standard specification and codes of practice.
5. Analysis and stability of retaining walls: rectangular and trapezoidal only.

Note: Sessional work shall include assignments/tests on the above topics along with the drawings.

LIST OF TEXT AND REFERENCE BOOKS:

AR 204 - Analysis of Structures

- C.S. REDDY, "Basic Structural Analysis", Tata McGraw Hill.
- S.B. JUNNARKAR, "Applied Mechanics", Charotar Publications Ananad.

5	AR 205	History Of Eastern Architecture	50	20	10	-	10	10	2	1	3

AIM: The course aims at understanding the influence of Geographical & climatic, cultural and political situation on Architecture in expressing philosophical and aesthetic concepts in built form. This course is studied in order to see how builders in the past solved their structural & functional problems. This study of history gives the student a chance to study the structural basis of great styles, methods of admitting daylight, for planning and so on, as related to structure.

Importance is also attached to the sociological background i.e. political, economic, religious, technical and philosophic ideas and ideals which lie behind all buildings.

COURSE CONTENT:

This will be studied with the help of selected samples of buildings under the various historical civilizations of Indian and Asia in general, in chronological order.

1. Pre historic civilization,
2. Vedic, Indus Valley civilization
3. Buddhist period
4. Jain period
5. Chinese
6. Japanese
7. Pre Colombian
8. Mayan Civilization

Note: Sessionals will be submitted in the form of sketches notes, audio-visuals and reports of site visit to some historical buildings etc. as per programme scheduled by the school per session, Visual & video aided in teaching techniques.

6	AR 206	Theory Of Design	50	20	10	-	10	10	2	1	3

Aim: The aim of the subject is evolve a conceptual frame work for intelligent appreciation of architecture and to develop a vocabulary for discussing design ideas.

Course Content:

- The genesis of indigenous architecture, its geographical and cultural sign posts
- Evolution of ideals and design principles in modern architecture
- Influences governing the formation of attitudes as a prelude to the act of design
- Translation of design ideas into architectural expression
- Architecture as a socially useful discipline
- Design Terminologies – Form, space, order, texture, culture, tendency etc
- Concept of function, style, type, social purpose and ideology
- The relationship of architecture to the sciences, arts, economics and politics
- Study of selected writing, and buildings in monumental and vernacular scales
- Man-made design at all levels including objects of daily use

AIM: The aim of the subject is to explore the artistic qualities and capabilities of each student with the help of practical. Enhancement of creativity and visualization power by model making and other artistic works.

Course Content:

- Use of clay, Plaster of Paris, metal scrap, metal sheets, jute fiber etc. for study of forms through models.
- Development of surfaces of simple and composite forms using paper, thermocole, wire, Wax, acrylic, sheets and similar materials.
- Introduction to metallic sections, joinery tools, joinery processes and working with them.
- Models in appropriate materials for understanding of joinery in wooden construction.
- Bonds in masonry based on the programme of building construction to make the various forms of masonry structures.
- Introduction to photography, use of camera, basic dark room technique in architectural techniques.

Note: Sessionals shall include exercises in block and detail model making of students own design or copy design, made of paper, thermocol, wires, plaster of Paris, cardboards, Acrylic sheets and other soft materials.

8	HU112	Rural Studies	-	-	-	-	50	-	0	1	1

Aim: To understand vernacular architecture as distinct from other historical & modern styles of architecture to appreciate that it is site responsive and an outcome of indigenous techniques and various social, economic and mythical values of the society.

1. Introduction to rural society; concept, characteristics. Rural, urban, tribal and peasant societies. Characteristics of villages and types
2. Rural Demography: Size, Growth and Distribution of rural population. Sex, age, literacy composition of rural population. Migration: Patterns and its impact on development.
3. Rural poverty: Concept and causes of poverty. Dimensions of poverty and its impact on rural development.
4. Management of Rural Development projects. Management concept, process of management, implementation of rural development projects.
5. E-governance and rural development. NREGA, Total Sanitation Campaign and other popular rural Development Programmes of India
6. Rural Infrastructure: Water, Electricity, Road networks and its relevance in rural development
7. Rural Women: Status and development programmes for rural women.
8. Cooperative Institutions and Rural Development: PACS, SHGs
9. Rural Health and Nutrition, Infant Mortality and other child development programmes.
10. Rural Marketing and its impact on rural economy
11. Fundamentals of Statistics. Statistical tools for studying rural development issues
12. Civil Society and Rural Development. Role and relevance of NGOs and peoples participation in rural transformation and development

SECOND YEAR THIRE SEMESTER

S.No	Subject Code	Subject Name	Maximum Marks Allotted								Total credits
			Theory			Practical			Credit Allotted		
			End Sem	Mid Sem Test	Assignment/ Quiz	End Sem	Studio Work	Assignment/ Quiz	Theory	Practical	
1	AR 301	Architectural Design–III	100	20	10	50	100	20	2	3	5

Aim: The aim of the subject is systematic introduction to issues related with the design of human habitat, its components and space standards. The objective of the studio will be on understanding residential spaces in both the urban and traditional contexts, user needs and how they translate into program and manifestation in design in terms of space, materials and construction methodology in both the urban and traditional contexts.

Course Content:

- Design of a simple building for residential use in the immediate or observable environment with a focus on program and use.
- Exercises relating personal experiences to behavioral needs and translating them into architectural program requirements
- Study of vernacular architecture, emerging out of the traditional way of life of the people in a given climatic context and region .
- Understanding how the social and physical environment, climate of the place, materials and methods of construction impact vernacular architecture. This study could be part of a village or part of a small town and would involve measuring buildings and a topographic survey
- The study will be followed by the design of a simple building / adaptive reuse in the context of the study
- Problems aimed at drafting and presentation skills in 2-D and 3D in both manual and electronic format.

Methodology:

- Free hand architectural sketching should be given importance while doing all the exercises
- Minimum 4 problems should be attempted in whole semester in which 2 should be time problems of one week duration.
- Final results can be computer generated also with focus on architectural presentation
- Evolution of design through model making should be in focus
- Weekly assessment of studio work should be done
- Study tour should be done with on-site exercises and daily reviews

Aim: The aim of the subject is to introduce the students about execution of building component of bricks, stone, wood timber or metal with their constructional details.

Course Content:

- Different types of foundation as per structural needs
- Introduction to specialized elements such as staircases, built-in-furniture, show windows, sliding and folding doors, paneling and external paving, gets, grills etc
- Studio exercises related to metal windows, partitions, mezzanines and cabinetry
- Workshop in steel welding and forging
- Shuttering, bar bending and concreting, painting and laminating
- Cavity walls, retaining walls, insulation walls, and diaphragm walls in Brick and stone
- Expansion Joints

Aim: The aim of the subject is systematic introduction to issues related with the design of human habitat, its components and space standards. The objective of the studio will be on understanding residential spaces in both the urban and traditional contexts, user needs and how they translate into program and manifestation in design in terms of space, materials and construction methodology in both the urban and traditional contexts.

Course Content:

- Introduction to the elements of climate and its types with reference to tropical climate and site climate
- Global climatic factors
- Thermal comfort, heat gain and loss, u-values for wall and roofs
- Solar geometry and its application
- Shading devices and its application
- Solar heating and cooling and its application
- Passive systems and its application
- Ventilation and air movement illumination and day lightin
- Response to climate by man and building
- Study of building materials and construction techniques of energy efficient building design for tropical climate

AIM: The aim of the subject is to introduce the students about the fundamentals of stability of built structures in steel sections and various factors of steel structure designing.

Course Content:

1. Steel work connections: Bolted, pinned and Welded connections.
2. Design of Tension members: Types of tension members, permissible stresses, Design of members subjected to axial tensions and bending. Tension splices, lug angles.
3. Design of compression members: Types of compression members, failures, end conditions, effective length, design by I.S. Code800-2007 method. Strength of compression members, splices, encased columns.
4. Design of flexural members: Beams simple and built up, plate girder, criteria of design, design of laterally supported and laterally unsupported Beams, web crippling and web buckling.
5. Design of roof trusses: To determine the forces in members due to various loads, types of roof trusses, components of roof trusses, purling, lateral bracing of end trusses, roof covering.

Note: i) Sessional work should include design and analysis of simple elements as stated above with drawings.
ii) Steel table & I.S. code 800-2007 is permitted in examination.

Aim: This course is studied in order to develop an understanding of the importance of site conditions for the creation of good architectural solutions. To expose the students to the various techniques of site analysis and planning.

Course Content:

- Importance of site analysis ; on site and off site factors; Analysis of natural, cultural and aesthetic factors; topography, hydrology, soils, landforms, vegetation, climate, microclimate. Site selection criteria for housing and institutional projects.
- Contours, slope, grading process; grading criteria; drainage, functional
- Aspects of surveying for the Architect. Surveying instruments classification by function. Useful data and formulae.
- Scales-Plain scale, diagonal scale, comparative scale, shrunk scale, vernier scale.
- Study, test, degree of accuracy, use and care of surveying instruments and accessories.
- Site survey techniques: Chain surveying, compass surveying, plain table, theodolite.
- Leveling and contouring.

Aim: The aim of the subject is to let students explore the artist within themselves by choosing a particular sub-topic and present it at the end of the session.

Course Content:

History of Art, Art through the ages, Architecture as Art, milestones in art from the prehistoric, Paleolithic , neolathic and classical, medieval, renaissance and modern periods, Indian art heritage. Indus valley to present day

Art consciousness- aesthetics, perception, symbolism, expression, style, fashion, appropriateness, values. Critical appraisal of examples from the visual as well as performing arts. Seminar course.

- Painting (Minimum 3 works of art on A1 canvas)
- Sculpture (Minimum 3 works using suitable medium)
- Photography (Minimum 30 photographs on 4-5 themes)
- Motion Art (Minimum 2 {INDIVIDUAL AND GROUP WORK} short films of 1 -2 minutes length)
- Fashion

Aim: The aim of the studio is to introduce students to the site and context as prime generators of design decisions and to grow an ability to interpret site information as a decision-making aid.

Course Content:

- Focus will be on the site and context and their relationship to the built environment.
- Activities, services and construction methods, phenomena of social utilizations, growth and change shall also be studied and analysed.
- Introduction to element of site-planning and landscaping.
- Design of a group of buildings set in the context of the study with a focus on site and context.
- The design of the environment outside the building.

Methodology:

- Free hand architectural sketching should be given importance while doing all the exercises
- Minimum 4 problems should be attempted in whole semester in which 2 should be time problems of one week duration.

2	AR 402	Building Construction – III	50	20	10	20	50	20	2	2	4

Aim: The aim of the subject is to introduce the students about Execution of building component of steel and timber with their constructional details and presentation of working drawing.

Course Content:

Steel Foundation:

- Details of steel grillage foundation, steel column & beams.

Timber and Steel Roof & Floors:

- Lean to; double lean to, collar, couple & closed couple roofs. King & queen post truss, Fixing of tiles, AC & GI gutters & ridges,
- Steel North light truss, Portal frames, space frames.
- Details of steel floors, fire resistant floors
- Jack Arch roofing, Stone roofing system
- Single, double & framed wooden floors, composite floor and fire resistant floors

Steel doors & windows:

- Angle section & pressed steel hollow section door frames with timber, steel, iron door leaf.
- Angle section, 'z' section & pressed steel hollow section windows of different size, shape & combinations.
- Steel side hung, top hung, bottom hung & louvered ventilators.
- Fixing details of glass, ironmongery & hardware

Miscellaneous:

- Different types of steel stairs, railings, main gates and Grills etc.

			End Sem	Mid Sem Test				End Sem	Mid Sem Test		
3	AR 403	Building Services – I (Water & Sanitation)	50	20	10	-	10	10	2	1	3

Aim: The objective of the course is to provide a wide exposure to environmental support systems as they apply to human habitat. The course shall cover the basic aspects of (1) Environmental control (ii) Water and waste management and planning.

Course Content:

A) SANITATION

- Basic principles of sanitation, introduction to modern plumbing system. Study of Indian standards and plumbing bye laws. General introduction to various sanitary fitting & fixtures their placement and functions. Study of internal & external drainage system including study of duct for large verity of buildings including small residences, apartments, block of houses, public buildings etc.
- Study of various types of sanitary pipes, construction of joints and laying of pipes. Study of traps, inspection chamber, man hole, septic tanks, soak pit and public sewage line. Study of various stages of disposal of domestic effluent from fitting to sewer line. Study of “Sulabha” complex & other “CBRI” toilet details.
- Study of storm water disposal in various buildings and road side.
- Importance of sanitary services in the economics of buildings, planning & design disposal of city effluent, various treatment methods of city effluent and recycle of waste water.
- Study of refuse chutes in multi-storeyed buildings and collection of refuse and recycle of city solid wastes.
- Standard Sewage Systems, technologically advanced sewage systems and off the grid sewage disposal systems

B) WATER SUPPLY:

- Study of sources of water and water treatment for city domestic purpose. Study of quality of potable water. Study of Indian standards and water supply network. Architectural approach to plan the domestic water storage facilities and water distribution system in buildings.

4	AR 404	Structures – IV	50	20	10	-	10	10	2	2	4

AIM: The aim of the subject is to introduce the students about the fundamentals of stability of built structures in R. C. C. and various factors of R.C. C. structure designing.

Course Content:

- (1) Introduction to R.C.C., Working Stress method (introduction only), Limit State method
- (2) Design of Beams: - analysis of beams, design of singly, doubly reinforced beam, T-beam, L-beam, (cantilever and simply supported) lintel, chhajjas
- (3) Design of Slabs: - analysis of slabs, design of One way, Two way, Continuous, Cantilever Slabs (simply supported and continuous)
- (4) Design of Columns: - axially loaded, columns with Uni-axial and Bi-axial bending
- (5) Design of Staircases: - dog-legged, and open well only

Note: i) Sessional work should include the analysis of simple elements along with the drawings using limit state method.
ii) I.S. code 456-2000, SP -16 is permitted in examination.

SECOND YEAR FOURTH SEMESTER

S.No	Subject Code	Subject Name	Maximum Marks Allotted							Total credits	
			Theory	Practical				Theory	Practical		
			End Sem	Mid Sem Test				End Sem	Mid Sem Test		
5	AR 405	History Of Modern Architecture	50	20	10	-	10	10	2	1	3

Aim: This course is studied in order to see how builders in the past solved their structural, functional and aesthetic problems. This survey of history gives the student a chance to study the structural basis of great styles, methods of admitting daylight, for decoration, for planning and so on, as related to structure. Importance is also attached to the sociological background i.e. political, economic, religious, technical and philosophic ideas and ideals which lie behind all buildings. This will be studied with the help of selected samples of buildings under the various historical civilizations of Indian and the oriental in general, in chronological order. This subject intends to develop an understanding in Contemporary Architecture in India and abroad.

Course Content:

- The impact of the Industrial Revolution on Architecture. Transformation from Iron to Steel and the demand for a new Architecture.
- The great Exhibition and their contribution to architecture custom entitle and his tower.
- Le Art Nouveau Movements, Horte, Barlage, Wagner
- Ferro Concrete in American Architecture, Plain surfaces in American Architecture Informal Plan.
- The Chicago School, Apartment, Office Building & Departmental Stores of Louis Sullivan & Others.
- F.L. Wright and the American Development, his urge towards organic architecture & his means of architectural expression
- Le Corbusier & his Philosophy, Bauhaus ,Meis Van Der Rohe& the Integrity of Form. Alvar Alto, Irrationality & Eminent Standardization.
- Typical works & philosophy of eminent Architects like – Richard Neutra, JornUtzon, Oscar Neimyer, Lucio Costa, Marcel FreverEeroSerinen, Skidomore Owings & Merril etc.
- Influence of Modern Structural System on Architectural E.G. work of Marti, Canada etc.
- Erie’s Survey & Evaluation of early Architectural work in India.
- Colonial Architecture in India, emerging trends, works of Le Corbusier and Louis Kahn in India and their influence of Indian architecture.
- Meaning and element of vernacular architecture and related terms
- Chronological development of vernacular architecture in India
- Contemporary Indian architects: A. P. Kanvinde, Charles Correa, B. V. Doshi, etc. their philosophies and examples.
- Postmodern architecture in India, examples.

			Theory	Practical				Theory	Practical		
			End Sem	Mid Sem Test				End Sem	Mid Sem Test		
6	AR 406	Site planning & Landscaping	50	20	10	20	50	20	2	1	3

Aim: The aim of the subject is to introduce the students about the aspects of electrical wiring , electrical layout & learning about various equipment and fittings available in the market . The aim is also to introduce various quality of light, glare, factors in considering selection of artificial lighting systems and lighting fixtures

Course Content:

- Definition of landscape, its scope and importance in architecture and planning Levels of landscape planning.
 - Brief outline of development of gardens in history. The principles and design philosophy of Mughal & Japanese gardens Renaissance, 18th century – Brownian 19th century – Botanical gardens with examples. 20th century urban landscape. Roof gardens, Atriums, Roadside plantation, avenues Indoor landscape (general)
 - Landscape design process, information needed for landscape survey. Land, water & plants as landscape elements, their functional & aesthetical considerations in landscape design.
 - Grading its importance, grading process & methods of estimating earth volumes. Slopes for various outdoor functional activities. Surface runoff calculations & design of surface drainage system. Treatment of ground surfaces, kinds of paving materials.
 - Planting Design-Understanding plant material as a design tool. Design characteristics of plants. Selection of plant materials for road side plantation, court yards, parking areas, near water bodies indoor areas etc. Details of establishing & grass lawn. Fertilizers their types & uses. Designing and execution of proposal:
 - a) Analysis of site.
 - b) Identification of functional requirements.
 - c) Site development by applying mutual forms.
 - d) Hard surface - materials
 - e) Elements in landscape design – lawns, hedges and shrubs, trees annuals, and seasonal rockeries.
 - f) Use of street furniture.
- Concept and use of national park.

THIRD YEAR FIFTH SEMESTER

S.No	Subject Code	Subject Name	Maximum Marks Allotted								Total credits
			Theory			Practical			Credit Allotted		
			End Sem	Mid Sem Test	Assignment/ Quiz	End Sem	Studio Work	Assignment/ Quiz	Theory	Practical	
1	AR501	Architectural Design – V	100	20	10	50	100	10	3	3	6

AIM: Design of imaginative forms to develop the creativity in terms of built form. Design with application of principles and theory of architectural design and philosophies of contemporary architects. The attempt is towards developing ones own language and philosophy of architecture to guide towards exploring alternative building forms for different activities which help in understanding the relationship of structure and possibilities in building forms.

Course Content:

Design problems should include problems of simple and complex nature i.e. temple, gathering places, exhibition pavilion, clubs, cafe, community hall, museums, art gallery, pavilion, sport complexes, nursing homes.

Emphasis shall be given more on three dimensional studies to develop an understanding for man and space relationship and also relevant building bye-laws.

There should be variety of problems in the studio work with changing focus for each problem from theory to construction techniques (local) and site lay outs, covering organization and detailing of open spaces with the aim to learn to work with practical limitations.

One group exercise of making measurement drawings of a building for documentation.

Minimum one time problem is to be attempted in class, of 18 hrs duration.

Note: The sessionals will be in the form of drawings and models along with technical report for the design dealt with. The evaluation should be done in intermediate review consisting of internal / external experts. There should be regular site visits to the building types dealt in the studio problems of which audio-visual should be prepared. The range of design problems shall include projects of progressively increasing complexity. The various aspects of the design problem shall be dealt with lectures, group discussions and library research so as to provide the necessary philosophical and attitudinal background to a rational design approach.

Aim: The aim of the subject is to introduce the students about Execution of building component with their constructional details and presentation of working drawing.

Course Content:

R.C.C. Foundation

- Definition, functions, and design factors.
- Details of different types of RCC foundations, strip, isolated, continuous and raft foundation

Joinery works

- Shoring, scaffolding, underpinning.
- Formwork for R. C. C. construction.

R.C.C. works

- Definitions, functions and design factors.
- R.C.C. column, beams, slabs, lintel, chajja, staircase, canopy, coffer slab & pergola.
- R.C.C. retaining wall & construction of basement. Expansion joints.
- Pre stressed R.C. C construction.
- Study of low cost construction systems.

Masonry:

Study of various types of Pre-cast concrete blocks their extensive uses in building construction.

Flooring

- P.C.C., terrazzo, stone (marble, Kota, granite, etc) Ceramic tiles & P.V.C. Flooring.
- Pre-cast paving.

R.M.C. (Ready- Mix Concrete)

- Introduction of R.M.C.
- R.M.C. Properties, techniques

3	AR503	Building Services-II (Electrical & Mechanical)	50	20	10	-	20	10	2	1	3

Aim: The aim of the subject is to introduce the students about the aspects of electrical wiring and air conditioning in a building, learning about various equipment and fittings available in the market and preparing basic design lay out for various services and typical details.

Course Content:

SECTION-A: ELECTRICAL

1. Fundamentals of electricity, Principles of wiring.
2. Fitting and accessories used in electrical installation of buildings including water proof and spark proof installation. Schematic diagrams of installation for different building types, lighting conductors, earthing, distribution & calculation of loads.
3. Brief study of electrical appliances, Sub-station, location and space requirement, relevant electricity board rules for various types of buildings.
4. Illumination: Laws of illumination. Direct, indirect and semi direct lighting, reflectors, decorative lighting. Flood lighting and use artificial lighting as an element in architectural schemes particularly in exhibition, cinemas, theaters, concert, concerts halls and stadiums.
5. Rules and layout for telephone wiring & connection with EPBX.

SECTION - B: MECHANICAL

1. The fundamentals of psychometric and heat transfer. Physiological effects of air conditioning.
2. Air conditioning methods, systems, types and equipment to maintain the atmosphere at required temperature, humidity and cleanliness.
3. A.C. duct designing, detailing and layout. (No calculations required)
4. Lifts, moving walkways and escalators, layout of lifts and or escalators in buildings(Multi storey to high rise).
5. Apparatus and system of alarms, firefighting equipments, fire fighting bye-laws governing various types of public buildings. Fire escape staircases.

Notes: Sessionals will be in the form of notes, home assignments, drawings/layout exercises showing the electrical and mechanical services details and case studies if required.

Aim: The objective is to develop an understanding of disaster and its management at pre and post disaster conditions, knowledge gained through the study of history of various types of disaster and their management. It is seen as a course that addresses issues of disaster and their management.

Course content:

Types of disaster, meanings and related definitions.

Causes and effects of natural hazards.

Disaster profile of India.

Disaster preparedness and response and rehabilitation.

Roles and responsibilities of different agencies.

Note: Sessional will be in the form of report on the above topics and prepare a report for disaster management for a given hypothetical / real site/ building.

6	AR505	Ecology & Environment	50	20	10	-	-	10	2	1	3

AIM: To create awareness for the preservation and protection of the environment, in the planning and construction of building & development projects.

COURSE OUTCOME: After successful completion of this course, student should be able to reflect a general awareness for the preservation and protection of the environment, in the planning and construction of their building / development projects.

COURSE CONTENTS:

Introduction, Structure and Function: Introduction to ecology, its meaning and growing importance in daily life. Basic terms used in ecology and their meanings. Fundamental concepts of ecology. Ecology – Environment relationship. Concept of spaceship as earth. Structure and function of eco- system. Major biomes of the world. Bio-geo-chemical cycles: Energy flows in eco-system. Species diversity, dominance, natural selection, habitat, niche, evolution etc. Eco-system equilibrium.

Importance of micro organisms. Succession and community development limiting factors and other concepts. Ecological cybernetics

Relationship with Nature: Man's relationship with nature in the past: Food-collecting, hunting, fishing, farming and other developmental stages in human civilization. Man's relationship with nature in the present: Industrial activities, urbanization, de-forestation, mining and similar incursions on nature for technological progress. Environmental impacts of these activities. The ecological crisis. Relevant case studies from abroad and India

Importance of Ecology: Relevance and growing importance of ecology in a highly urbanized and technological world with reference to dwindling resources, increasing demands and advancing technology. Adaptation of life-styles, and adoption of alternate technologies to harmonize with the natural environment. Discussion on alternatives available. Guiding environmental principles

Ecological applications to Architecture and Planning: Ecological applications to Architecture and Planning. Preserving and improving the human settlement in harmony with nature. Conservation of natural resource for improving the quality of life on earth and attempting to ensure its continuity for the future of

		1. Graphic Design									
		2. Animation									
		3. Design Thinking									

1. Graphic Design

OBJECTIVES:

To familiarize the student with basic principles and fundamentals in visual art and basic design.

To develop basic skills using tools and theory used in traditional hand skills and computer.

To introduce terminology necessary to communicate concepts and theory in art and design. To create reflective and computer based projects using Adobe Illustrator.

Course Description:

A study of two-dimensional (2-D) design with emphasis on the visual communication design process. Topics include basic terminology and graphic design principles. Introduction to the fundamentals of design that lead to the discovery and comprehension of the visual language. Form, balance, structure, rhythm, and harmony are studied in black and white and in color. Various media will be used. Foundation laid for advanced courses in design.

Objectives:

To familiarize the student with basic principles and fundamentals in visual art and basic design.

To develop basic skills using tools and theory used in traditional hand skills and computer.

To introduce terminology necessary to communicate concepts and theory in art and design.

To create reflective and computer based projects using Adobe Illustrator.

This is not an Adobe Illustrator class. The application Illustrator is used to support your basic design projects only.

TEXTBOOK: GRAPHIC DESIGN BASICS EIGHTH EDITION by David A. Lauer/ Stephen Pentak

MADHAV INSTITUTE OF TECHNOLOGY & SCIENCE, GWALIOR – 474005

(An Autonomous Institute under rajivGandhiProudyogikiVishwavidyalaya, Bhopal)

CBCS SCHEME OF EXAMINATION- BACHELOR OF ARCHITECTURE **WEF 2015**

2. Animation

Course Description

Examination of concepts, characters, and storyboards for basic animation production. Emphasis on creating movement and expression utilizing traditional or electronically generated image sequences. An introduction to traditional animation; course includes design, storyboarding, stop-motion and character animation. Gives students a working knowledge of animation techniques necessary to design animated sequences. Laboratory fee.

Recommended Texts

The following are some books about drawing, animation, and filmmaking you may want to consider adding to your personal library.

Cartoon Animation by Preston Blair Chuck Reducks by Chuck Jones

Disney's Illusion of Life by Frank Thomas and Ollie Johnston

3. Design thinking:

Design thinking is perceived as a crucial means of fostering creativity and innovation when employed as a problem-solving

Design solutions invariably lead to new design problems. Design thinking includes tools for critical assessments of design failures as well as successes.

Course Description:

The design process, visual analysis, design theories, and the socio-cultural implications of design. Students investigate the interactions between humans and their natural, social, and designed environments where purposeful design helps determine the quality of those interactions. Students will learn how design outcomes, whether successes or failures, shape and are shaped by socio/cultural and historical factors. Students of design thinking will learn to critically assess the processes, outcomes and effects of design engagement. During the course, students will have opportunities to test and explore the concepts of design thinking through small-group, hands-on participation in design projects, specifically created to reinforce course content.

Course Objectives:

By the end of the semester, students will be able to:

- Develop an understanding of the interactions and interdependencies between humans and the designed environment.
- Understand that, in addition to the creation of innovative objects and places, design thinking can be applied to the development of new processes, services, interactions, and collaborations.
- Explain design theories and processes that guide and direct design thinking.
- Recognize the interdisciplinary practice of various design professions and the value of design thinking as a means of innovative problem solving across disciplines.

Student Learning Outcomes:

1. Students will learn how designers identify, define and solve problems.

Learning Outcome: Students can identify, define, and solve design-related problems.

1	AR601	Architectural Design – VI	100	20	10	50	100	10	3	3	6

AIM: This program gives special emphasis on role of technology in architecture. The design projects to be dealt in the studio should respond to the importance of structure and services including acoustical treatments.

Course Content:

- The range of design problems shall include projects of progressively increasing complexity.
- Exercises related to public buildings i.e. Commercial centre, hospital, auditorium, cinema, sports complex & educational buildings on sloping/ flat sites.
- Study and incorporation of building bye-laws should be complete in this Sem.
- Simultaneously, stress should be given on the interior treatment of small and large spaces.
- Freedom in design is to be given with preliminary introduction of importance and role of bye laws in building design.

Minimum one time problem of 18 hrs. duration is to be attempted in class, in addition to the major design problems.

Note: The sessionals will be in the form of drawings and models along with technical report for the design dealt with. The evaluation should be done in intermediate review consisting of internal / external experts. There should be regular site visits to the building types dealt in the studio problems of which audio-visual should be prepared. The various aspects of the design problem shall be dealt with lectures, group discussions and library research so as to provide the necessary philosophical and attitudinal background to a rational design approach.

Aim: The aim of the subject is to introduce the students about Execution of building component with their constructional details and presentation of working drawing.

Course content:

Special Doors & Windows

- Sliding, folding, sliding and folding doors, revolving doors.
- Rolling shutters, collapsible doors, iron main gate.
- Bay windows, skylights.

Finishes:

- Partitions and paneling (timber, glass, PVC)
- Cladding - interior & exterior
- Jamb casing, skirting, moldings, architraves & pelmet

Services

- Waterproofing of basement, construction of pools.
- Fire places and flues.
- Heat and sound insulation.
- Fire safety Construction techniques.

Note: There should be regular site visits to buildings under construction or constructed to explain the above topics. Use of audio-visuals should be stressed. The Sessional shall be in the form of handmade drawings and the evaluation will be through review system presented before the Faculty and Studio In charge.

THIRD YEAR SIXTH SEMESTER

S.No	Subject Code	Subject Name	Maximum Marks Allotted								Total credits
			Theory			Practical			Credit Allotted		
			End Sem	Mid Sem Test	Assignment/ Quiz	End Sem	Studio Work	Assignment/ Quiz	Theory	Practical	
3	AR603	Advanced Building Services	50	20	10	-		-	3	-	3

Aim: The aim of the course is to introduce the students about the aspects of acoustics and security systems in a building.

Course content:

SECTION - A

Acoustics:

- Definition of sound. Fundamental characteristics of sound.
- Behavior of sound in enclosed spaces in general and few enclosed functional spaces in particular without involving much of mathematical complexity. Need to study acoustics.
- Development of this science through different periods. Pioneers and their works.
- Properties of sound, its origin propagation and sensation. Behavior of sound with respect to various surfaces, openings and in an enclosed space.
- Study of various sound absorbing materials, single and in combination of various frequencies of sound, panel absorbers, porous materials and cavity resonators.
- Reverberation time, Sabine's formula. Criteria for acoustics environment for reverberation in spaces.
- Sound application systems. Constructional and planning measures for good acoustical design.
- Acoustical defects and remedies. Sound application systems. Case studies for the above aspects.
- Noise and its on man. Physiological and psychological principles of noise control including acoustic lent insulation for various domestic services and industrial fitting and constructions. Structure borne and air borne noise, their effects and control.

SECTION – B

Security Systems:

- Types of security systems and their working.
- Apparatus and system of alarms.
- Firefighting equipments, fire fighting bye-laws governing various types of public buildings, fire escape, fire safety in high rise buildings.

MADHAV INSTITUTE OF TECHNOLOGY & SCIENCE, GWALIOR – 474005

(An Autonomous Institute under rajivGandhiProudyogikiVishwavidyalaya, Bhopal)
CBCS SCHEME OF EXAMINATION- BACHELOR OF ARCHITECTURE **WEF 2015**

Note: Sessional shall be prepared in the form of notes and calculations, drawings etc. as per above topics.

LIST OF TEXT AND REFERENCE BOOKS:

1. R.G.EDKIE, "Architectural Acoustics & illumination", EKWEERA PRAKASHAN, NAGPUR - 12
2. SIRASKAR, "Acoustics in Building Design"
3. S.OMEN & B. J. SMITH, "Acoustics & Noise Control"

THIRD YEAR SIXTH SEMESTER

S.No	Subject Code	Subject Name	Maximum Marks Allotted								Total credits
			Theory			Practical			Credit Allotted		
			End Sem	Mid Sem Test	Assignment/ Quiz	End Sem	Studio Work	Assignment/ Quiz	Theory	Practical	
4	AR604	Specification, Estimating & Costing	50	20	10	-	20	10	2	1	3

AIM: Art of writing specifications of materials along with emphasis on the quality of materials & proper sequence of construction work should be brought out. The students shall be exposed to the various methods of calculating the quantities of various materials / items used in the buildings. This subject will give them an understanding and insight the role of material, construction and cost together for budgeting the project cost.

Course Contents:

SPECIFICATIONS OF MATERIALS:

- Importance of specifications in the building activities, method of writing correct order and sequence of use of materials, use of Indian Standard Specifications and P.W.D. specifications.
- Primary consideration for selection of materials for various applications. Specifications of basic materials required in residential buildings, such as bricks, stones, concrete, RCC, plastering and various finishes, roofing material timber work, flooring materials, glazing, metals such as steel, brass, aluminum etc.

SPECIFICATIONS OF WORKS:

- Specifications of works for a residential building of load bearing type and or RCC/framed type.
- Specifications of works of construction of steel and RCC structures, ceiling and partitions, paneling, insulation and water proofing.
- Specifications for services such as drainage, water supply, electrical installations.

B) Estimating & Costing :

- Introduction to quantity surveying, methods of preparing estimates, data required for framing an estimate, types of estimates.
- Mensuration, standard mode of measurements, schedule of rates commercial abbreviations. Methods and procedure of taking off abstractions, working up and billing. Examples and exercises in taking in all items from excavation to painting including R.C.C. and steel work.

(An Autonomous Institute under rajivGandhiProudyogikiVishwavidyalaya, Bhopal)

CBCS SCHEME OF EXAMINATION- BACHELOR OF ARCHITECTURE **WEF 2015**

3. Rate analysis, cost of materials and labour for various works, detailed rate analysis of important items of construction work. Measurement of work for interim and final certificates of payments to contractors.
4. General terms: Administrative approval technical sanction, competent authority, deposit works, issue rates, payment on accounts, suspense accounts, imprest, indent of stores, muster roll, measurement book, materials site account, stock account, establishment charge etc.
5. Method and contents of technical report for obtaining technical/financial sanction.

Note: Sessionals are to be prepared in the form of exercises and small reports on above mentioned topics.

The sessional work will include notes, tests, and home assignments particularly about proprietary materials along with manufacturer's specification.

LIST OF TEXT AND REFERENCE BOOKS:

1. "Bombay P.W.D. Specification 1962.
2. Specification year book.
3. P.W.D. Hand book.

			End Sem	Mid Sem Test	Assignment/ Quiz	End Sem	Studio Work	Assignment/ Quiz	Theory	Practical	
5	AR605	Town Planning	50	20	10	-	20	10	2	1	3

Aim: The objective of the course is to investigate urban networks and processes. This course requires taking up an area level study and proceed to formulate design guidelines on the issues.

Course content:

- Basic components of urban areas and regions.
- Role of urban & regional planning at national level, metro level concepts. Basic planning, settlements, theories, models etc.
- Socio – cultural and land use planning, general principles, survey techniques, utopian thoughts, models for planning and their relevance in Indian context.
- Planning norms and development norms for urban and regional approaches, techniques of development for existing areas and renewal schemes, conservation and development.
- Transportation modes, planning and development survey techniques etc.
- Review of regional plans.

Note: Sessional will include the report on case studies based on data collection, surveys and other empirical evidences and its presentation in the form of seminars.

LIST OF TEXT AND REFERENCE BOOKS:

1. V.K. BHEDASGAONKAR, “ Handbook of Town Planning”, Amar Mudranalaya.
2. G.K.HIRASKAR, “Fundamentals of Town Planning”, Dhanpt Rai & Sons.
3. PATRICK ABERCROMBIE, “Town and Country Planning”, Oxford univ. Press.
4. KEEBLE, “Principles and Practice of Town and Country Planning”.
5. S.C. RANGWALA, “Town Planning”, Charotar Publishing House.
6. BANDYOPADHYAY, ABIR, “A Text Book of Town Planning”, New Central Book Agency, Calcutta.

THIRD YEAR SIXTH SEMESTER

S.No	Subject Code	Subject Name	Maximum Marks Allotted								Total credits
			Theory			Practical			Credit Allotted		
			End Sem	Mid Sem Test	Assignment/ Quiz	End Sem	Studio Work	Assignment/ Quiz	Theory	Practical	
6	AR606	Elective-II	50	20	10	-	30	10	2	1	3
		1. Vastu									
		2. Sustainable Architecture									
		3. Intelligent Buildings									
		4. Housing									

SUSTAINABLE ARCHITECTURE:

- 1) Introduction to the ideas, issues and concepts of sustainable Architecture, global environment and the built environment, principles of environmentally and ecologically supportive architecture
- 2) Study of sustainable architecture, use of energy, materials, health and global environment as related to the construction and operation of buildings
- 3) Sustainable and conservation practices -water conservation, sewerage treatment, solid waste treatment, economics and management
- 4) Low energy design, hybrid systems, modelling and simulation of energy systems, integration of PV and wind systems in the building,
- 5) wind solar and other non conventional energy systems, solar thermal applications for heating and cooling, electricity generation in buildings
- 6) Case studies on specific contemporary sustainable architecture.
- 7) Green Specification parameters, carbon credits.
- 8) Introduction to ECBC, GRIHA, LEEDS, etc., simulation techniques and their applications.

NOTE : The Sessional will be oriented towards live case studies and modelling

INTELLIGENT BUILDINGS:

- 1) Introduction & Origins of the Intelligent Building Concept:
 - a. Definition and characteristics of Intelligent Buildings, A brief history of the Development of I.B. Concept through recent times highlighting.
 - b. Automated buildings (1981-1985)
 - c. Responsive buildings (1986-1991)
 - d. Effective Buildings (1992-1997)
- 2) Study of Concepts of Building Management (facility management), Effective Space Management, Business management and the various models of Building Intelligence.

MADHAV INSTITUTE OF TECHNOLOGY & SCIENCE, GWALIOR – 474005

(An Autonomous Institute under rajivGandhiProudyogikiVishwavidyalaya, Bhopal)

CBCS SCHEME OF EXAMINATION- BACHELOR OF ARCHITECTURE **WEF 2015**

- 3) Technology Evolution and the IT market place: Present technological context, Exploration of user IT systems, IT demands on building and services, Building Control systems, study of development of Computer Integrated Building from single function systems to integrated solutions.
- 4) Key Issues for Intelligent Buildings: Multiple activity settings, Generic analysis of space utilization, Models for shared space use. The development of briefing process including design activity and building element life- cycles, the match between organizational requirements and building technologies, A brief study related to Site issues, Shell issues, Skin issues, Building services and technology issues.
- 5) Managing the Building: Study and importance of facility management planning & operation techniques.
- 6) Intelligent Design & Construction: Client expectations, use of IT for effective communication of architectural ideas to clients, locating people and information, introduction to building efficiency studies with respect to life cycle costs.

NOTE: There will be study assignments given to students on various Units.

LIST OF TEXT AND REFERENCE BOOKS: A424 – ELECTIVE – I (INTELLEGEN BUILDINGS)

1. Payne, F. William, "Strategies for energy efficient Plants and intelligent buildings" Fairmont Press, USA, Distributor Prentice Hall India, New Delhi.

HOUSING-

Housing as a basic need, housing as an integral part of urban & rural development, housing problem and statistics, programme based policies. Qualitative and quantitative demands of housing, housing estimates. Housing survey techniques and standards, sources of data and information etc. Housing cooperative and financing agencies. Objectives and general principles of cooperatives, self-help housing, financing agencies and their functions etc. Introduction to methods and approaches to housing design. Study analysis and design of housing schemes.

S.No	Subject Code	Subject Name	Maximum Marks Allotted							Credit Allotted		Total credits
			Theory			Practical				Theory	Practical	
			End Sem	Mid Sem Test	Assignment/ Quiz	End Sem	Studio Work	Assignment/ Quiz				
7	AR607	Working Drawing	-	-	-	50	50				2	2

AIM: The aim of this subject is to understand the importance of working drawings, the methodologies, etc. for executing the drawing. This also requires standard mode of presentation of drawings with respect to Building Bye laws.

Course Content:

1. Introduction to various building components and precise purpose of set of working drawings. Study of each drawing with reference to specification & schedules of structure, services i.e. electrical, water supply, sanitation, air conditioning and communication.
2. Preparations of check list as guide for list of working drawings. Study of building bye-laws for various construction details & fire protection. Method of representing various contents & specific information in working drawings.
3. Preparation of municipal drawings and importance of working drawing as a legal document and tender document.
4. Preparation of municipal drawings and working drawing as a legal and tender document and submission drawing.
5. One set of working drawing of students own previous / current design.

Note: Sessional shall be in the form of full set of working drawing and design details of given building plan. The sessional marks will be based upon the portfolio submitted and internal viva. Studio programme integrated with A-221. Production of a set of detailed working drawings.

LIST OF TEXT AND REFERENCE BOOKS:

1. "Graphic standards".
2. "Time saver standards".
3. FRED A STITT, "Architects detail library", Van Nostrand Reinhold.
4. Working Details – by Boney

FOURTH YEAR SEVENTH SEMESTER

S.No	Subject Code	Subject Name	Maximum Marks Allotted								Total credits
			Theory			Practical			Credit Allotted		
			End Sem	Mid Sem Test	Assignment/ Quiz	End Sem	Studio Work	Assignment/ Quiz	Theory	Practical	
1	AR701	Architectural Design – VII	-	50	10	100	200	10	4	3	7

Aim: The aims of the course is to emphasize and evolve the methodology for architectural design with reference to the previous knowledge of functional aesthetics as well as present and future scenario of urban and rural development, their problems and prospects.

Course content:

- Design with application of principles and theory of urban design, urban and regional planning aspects and philosophies of contemporary architects.
- The attempt is towards developing ones own language and philosophy of architect on guide towards exploring alternative building forms for different activities which help in understanding the relationship of structure and possibilities in building forms.
- Design of cost effective, sustainable structures for various economic and social groups to solve problem of efficient housing in urban India, post disaster rehabilitation & earth quake resistant structures, etc
- Emphasis on consideration of advanced construction materials and techniques with RCC framed structure, Steel structure for large span buildings, and use of lightweight prefabricated panels and other etc
- Details of services like sanitary, water supply, electrical and mechanical, acoustics, fire fighting, parking etc
- Detailed Site planning of the scheme with the details of landscaping and site agglomeration
- Design under the framework of existing local zoning regulations and other relevant Building codes.

Design problems:

- Design of large housing schemes and neighborhood planning etc with emphasis on above parameters
- Design of multistoried commercial complex, specialized market, five star hotels, motels, shopping malls, multiplexes, etc
- Design of universities, institutional campus, multistoried office buildings, town planning schemes, public buildings, Computer centers, IT Parks, and other infrastructure
- Design of conference halls, science museums, sports complex etc
- Design of specialized hospitals/ college campus and other medical facilities

MADHAV INSTITUTE OF TECHNOLOGY & SCIENCE, GWALIOR – 474005

(An Autonomous Institute under rajivGandhiProudyogikiVishwavidyalaya, Bhopal)

CBCS SCHEME OF EXAMINATION- BACHELOR OF ARCHITECTURE **WEF 2015**

Design approach:

The literature survey & data collection is necessary. There should be regular site visits to buildings dealt in studio problems. Documentation should be done with the help of photographs, slides, video etc.

There should be minimum one time problem of 24 hrs. Duration apart from min. two regular design problems in the studio

Note: The sessionals will be in the form of drawings and models along with technical report for the design dealt with. The evaluation should be done in intermediate review consisting of internal and external experts. There should be regular site visits to the building types dealt in the studio problems of which audio-visual should be prepared.

Aim: The aim of the subject is to introduce the students about Execution of building component with their constructional details and presentation of working drawing.

Course content:

Aluminium:-

- Study of aluminium sections and their utility.
- Aluminium doors, windows, fix glazing, partitions, false ceiling and suspended floors for services etc.
- Curtain walls, glass block construction.
- Design details of different types of counters for various shops, banks, post offices, jewelers, general merchandise, bar counters etc. Show cases, shop fronts, canopies, built in & knock down furniture.
- Partitions & screens.
- Sound proof construction including various types of materials and construction details. Various interior and exterior surface treatments such as cladding, lining, rendering etc.

Study:-

- Study of advanced constructional technologies.

Note: i) There should be regular site visits to buildings under construction or constructed to explain the above topics. Use of audio-visuals should be stressed.

ii) Minimum 8 sheets shall be prepared out of which two may be in sketch form (scaled).

LIST OF TEXT AND REFERENCE BOOKS:

			End Sem	Mid Sem Test	Assignment/ Quiz	End Sem	Studio Work	Assignment/ Quiz	Theory	Practical	
3	AR703	Advanced Structure Design	50	20	10	-		-	3	-	3

AIM: The aim of the subject is to introduce the students about the fundamentals of stability of Modern structures in R. C. C. and various factors of R.C. C. structure designing.

Course Content:

- (1) Design of Flat Slab
- (2) Design of continuous and isolated footings
- (3) Design of combined footing :- types of combined footing, design of combined footing (rectangular and trapezoidal only)
- (4) Appropriate methods for an analysis for frames by portal method, cantilever method (horizontal forces only)
- (5) Pre stressed concrete:- pre stress and pre stressing methods, type and classification of pre stressing, losses of pre stressed
- (6) Specific constructional considerations for earthquake resistance structures, coastal areas.
- (7) Conceptual structural systems for high rise buildings such as verendeal trusses, shear wall etc.
- (8) Domes, shells, vaults, arches (all types) in masonry, R.C.C., timber.
- (9) Space frames, geodesic domes, Large span roofing, special areas, Gymnasium, Airports and Stadiums.
- (10) Modern construction systems such as lift slab, folded plates, tensile structures etc.

NOTE: i) I.S. code 456-2000, SP -16 is permitted in examination.

ii) Sessional work should include the analysis and design of simple elements along with the drawings using limit state method only for units from 1 to 3 and for rest only an idea along with sketches shall be taught to the students.

LIST OF TEXT AND REFERENCE BOOKS:

4	AR704	Project Management & Building Economics	50	20	10	-	-	-	3	-	3

AIM: This course deals with the entire gamut of activities concerned, with the implementation process of building works subsequent to the preparation of the construction schedule. The sequence shall begin with the framing of work priorities and progressively lead to concepts of scheduling, construction management and project planning and building economics.

COURSE OUTCOME: The student will be to understand and prepare work priorities and concepts of scheduling, construction management and project planning and building economics.

Course Contents:

SECTION-A: PROJECT MANAGEMENT:

- Introduction: Introduction to project management concepts, objectives, goals and different aspects of management, traditional management systems, Gantt's approach, bar charts, project programming, time estimate etc.
- Project programming, resource balancing, phasing of activities, programme scheduling, project control, reviewing, updating and monitoring, modern management concepts.
- Project assessment and project cost, job size, divisions of responsibilities, liaison with owners and their representatives, feasibility study, project report, construction financing facilities etc.
- Construction Management: Conditions of contract, their applications, quality and quantity controls, time and cash contract recording, checking and certifying with coordination of all building activities.
- Project Monitoring: C.P.M. , P.E.R.T. & other uni-dimensional techniques for project planning, scheduling and control.

SECTION-A: BUILDING ECONOMICS

1. Introduction: Broad features of Indian economy, economic significance, features in development plans, Macroeconomic concepts & their application, Money & Banking functions, factors of production such as land, labour, building industries and money and management etc.
2. Land Economics: Land as a limited resource, demand for land development and need for its conversation, public policies for land utilization and land development, theories of land values, land acts & problems in land acquisition & land development programme etc.
3. Building Economics: Building efficiency and cost reduction through planning, design of building components, use of new materials and Innovative construction etc. rent & other building acts, economics of high rise buildings etc.
Optimization of cost or affordable cost through various measures has become an important issue since prices escalate fast. The course aims to make aware about the issues/methods involved.

DISASTER MANAGEMENT & EARTHQUAKE RESISTANT STRUCTURES

Aim: The objective is to develop an understanding of disaster and its management at pre and post disaster conditions, knowledge gained through the study of history of various types of disaster and their management. It is seen as a course that addresses issues of disaster and their management.

Course content:

- 1) Types of disaster, meanings and related definitions.
- 2) Causes and effects of natural hazards.
- 3) Disaster profile of India.
- 4) Disaster preparedness and response and rehabilitation.
- 5) Roles and responsibilities of different agencies.

Note: Sessional will be in the form of report on the above topics and prepare a report for disaster management for a given hypothetical / real site/ building.

Architectural Conservation

This course intends to develop an understanding in architectural conservation. Meaning of architectural conservation, need and degrees of conservation; History of conservation in India and West, conservation charters. Role of archeological survey of India in conservation of India's cultural heritage listing and documentation, its importance and methods. Urban conservation, methodologies to be adopted for conservation management. Case studies in conservation related to adoptive reuse, building in context, preservation etc.

(An Autonomous Institute under rajivGandhiProudyogikiVishwavidyalaya, Bhopal)

CBCS SCHEME OF EXAMINATION- BACHELOR OF ARCHITECTURE **WEF 2015**

GIS & REMOTE SENSING

- 1) Basic remote sensing, platform, sensors, and introduction to sensors, basic principal & methods of photo interpretation and techniques of data collection through satellite data. Classification techniques using satellite data
- 2) Digital image processing, enhancement techniques in urban information extraction
- 3) Aerial photography as a tool for collection of data and preparation of maps, its application in planning and preparation for a project, orientation concept and methodology transformation and adjustment techniques.
- 4) Experiments in lab, Instruction for making overlays
- 5) Computation of photo scale
- 6) Orientation of a stereo pair under a mirror stereoscope
- 7) Recognition on aerial photograph of objects indicated on ground photographs
- 8) Detection of defined objects, Description and identification of objects
- 9) Use of auxiliary features for object identification
- 10) Systematic scanning of a photograph, and object identification
- 11) Identification of land use with a given classification
- 12) Monitoring urban changes, Mosaic preparation
- 13) Base map preparation & elementary data analysis using satellite data
- 14) Experiments in lab, Instruction for making overlays
- 15) Classification preparation
- 16) Interpretation & delineation of various land use on satellite data products
- 17) GIS techniques and their application in planning field

NOTE: Sessional work shall consist of term paper, small project formulation using satellite data and analytical report preparation through GIS, seminars

MADHAV INSTITUTE OF TECHNOLOGY & SCIENCE, GWALIOR – 474005

			End Sem	Mid Sem Test	Assignment/ Quiz	End Sem	Studio Work	Assignment/ Quiz	Theory	Practical	
7	AR706	Dissertation	-	-	-	50	50	-	--	3	3

AIM: Objective of subject Dissertation is to enlighten students on the fundamentals of Research methods before attempting final year Project Thesis.

Basics of research to be understood by the students are:

- Basic research principles and research methods.
- Report writing skills

Dissertation will be part of Design Project (A 511) to be further carried and completed in IX semester.

Course Content:

- First phase of dissertation allows students to identify the broad area / field of Architecture of their interest in which they may intend to do the research. This is to be done by studying and reproducing the brief of technical papers in the form of report review.
- Second phase allows the students to do the study of sample example of research already done by choosing the specific aspect / area relevant to broader field they have selected in first phase. This exercise involves the writing of report / review of book / journal dedicated to that specific aspect or area. This review writing is aimed to understand the method of collecting data (survey methods), analysis of data (statistics and mathematical formulas), drawing inferences and conclusion as attempted by the author of the book.
- Third phase is the writing of detailed dissertation report. Students are expected to choose their own topic of research by referring the area / field already identified in other two phases.

NOTE: Sessionals will be submitted in the form of review reports and Dissertation report.

LIST OF TEXT AND REFERENCE BOOKS:

Instruction Manuals on report writing.

			Theory			Practical			Credit Allotted		
			End Sem	Mid Sem Test	Assignment/ Quiz	End Sem	Studio Work	Assignment/ Quiz	Theory	Practical	
1	AR801	Thesis	-	-	-	150	400	-	-	14	14

AIM: All the four years of learning architectural design and allied subjects culminate in design thesis project to motivate a student in investigative attitude individual methodology, thus to train in handling projects independently. The Architectural Thesis is the culmination of the development of the student's knowledge, attitudes and skills over the course of studies in architecture. It is an occasion for exercising conscious choices in the field, based on the student's personal abilities and inclinations, and for testing out his commitment.

Course Content:

Thesis Project:

Each student will select a subject of an architectural interest in consultation with the committee appointed by the Head / Principal of the Dept. /Institution. The subject will have to be approved at the beginning of the eighth semester. The evolution of the thesis project will be continuous and the student will have to give at least three seminars / submissions before the final submission. The thesis project shall be submitted in the form of bound report, drawings, models etc. in a manner as stipulated in THESIS MANUAL on the date prescribed by the Department.

The student, in consultation with the faculty, is expected to demonstrate through an imaginative approach, his expertise in effecting positive changes in our built environment.

Note: Architecture work programme and Architecture thesis manual shall be supplied by the department.

LIST OF TEXT AND REFERENCE BOOKS:

1. "Planning by E. & O.E". Liffé book Ltd., London.
2. D.E. CHIRAIRA & CALLENDAR, "Times Saver Standard for Building Types".
3. RUDOLF HERGE, "Nuferts Architects Data", Cross By Lockwod & Sons Ltd.
4. EDWARD D. MILLS, "Planning the Architects Hand Book".
5. National Building Code.
6. Thesis manual: SOA Publications (for private circulation only)
7. Instruction Manuals on report writing.
8. Relevant Books as per topic

FOURTH YEAR EIGHT SEMESTER

S.No	Subject Code	Subject Name	Maximum Marks Allotted								Total credits
			Theory			Practical			Credit Allotted		
			End Sem	Mid Sem Test	Assignment/ Quiz	End Sem	Studio Work	Assignment/ Quiz	Theory	Practical	
2	AR802	Urban Design	50	20	10	50	50	10	3	1	4

Aim: The objective is to develop an understanding of Urban Design through their evolution in history and it being an integral part of the architecture at bigger level. It is seen as a course that addresses issues of urban environment and sustainability. The studio will also look at the further development of the first term architectural design project in urban peripheries context to understand the overall impact of architecture.

COURSE OUTCOME: The student will be able to understand and design projects at urban level and understand the overall impact of architecture.

Course content:

- Definition of Urban Design, scope of urban design in Indian context and its integration with urban planning.
- Historical development and approaches to Urban Design, spatial design, classical, functional, ornamental etc. space orders.
- Urban form and its elements, visual order of forms, sequence, scale, visual space dynamics. Various surveys needed to document visual aspects of environments.
- Urban design concepts of Doxiadis, Sarinen, Kelvin Linch, Le Corbusier and others.
- Urban structure and design rational inter- relationship economic activities, public organization, communication systems. Urban conservation and land use structure.
- Urban renewal and Gentrification.
- Review and designing of urban renewal and redevelopment projects for old and new towns.

Note: Sessional will be in the form of drawings and reports on the study on any area, identification of the problem areas and proposals in the form of drawings for the same.

LIST OF TEXT AND REFERENCE BOOKS:

1. GALLION "Urban Pattern", CBS Publishers & Distributors.
2. S. PAUL D., "Urban Design and Architecture".
3. PETER KATZ, "The new Urbanism", McGraw Hill.
4. ZURICH GOLDERTAL, "Space Time and Architecture", Printed in U.S.A.
5. GORDEN CULLEN, "Town Scape".
6. BACON, EDMUND N., "Design of Cities", Thames.

LIST OF TEXT AND REFERENCE BOOKS: AR-424 ELECTIVE – I (INTERIOR DESIGN)

- T.S.S. for Interior design.
- AHMED A. KASUR, “Interior Design”, Iqura Pub.
- JOHN CULLEN, “The lighting handbook” Pelham Books.

Product Design: Course Topics

- Product Design Cycle
- Identification of Customer Needs and Market Research Essentials
- Concept Generation
- Technology and Market Assessment
- Introduction to Industrial Design and Human Factors
- Estimation of Manufacturing Costs
- Introduction to Business Plans
- Introduction to Intellectual Property and the Patent Process

Reference Textbooks:

- Product Design and Development by Karl T. Ulrich and Steven D. Eppinger, 5th Edition 2011
- The Art of the Start by Guy Kawaski, 2004

Film/Set Design

- 1) Introduction and literature case study of various types of ‘stage’.
- 2) Introduction to different forms of dramatics and the requirement of set design suitable to various forms eg. Historical, mythological, social plays to experimental theatre.
- 3) Live case study of different performing art theaters and its presentation of various aspects.
- 4) Lecture and interaction with same stage artiste.
- 5) Thought process and design process of set design.
- 6) Types of sets, box stage, revolving or sliding stage and symbolic stage craft.
- 7) Designing, Execution, erection and dismantling, transformational sets, materials etc.

ARCHITECTURAL JOURNALISM

- 1) Journalism in general
- 2) Theories of journalism
- 3) Techniques and processes
