

B. Arch. Scheme Structure & Semester-Wise Credit Distribution (Under Flexible Curriculum)**General Definition:**

Category Code	Course category
L	Lecture
T	Tutorial
P/ST	Practical / Studio
DC	Departmental(Professional) Core
BSAE	Building Science & Applied Engineering
DE	Departmental(Professional) Elective
PAEC	Professional Ability Enhancement Course
SEC	Skill Enhancement Course
MAC	Mandatory Audit Course

Definition of Credit:

As per Council of Architecture (CoA) Recommendation

1Lecture period/ hour	1 Credit
2Lab/ Workshop/ Studio Exercise Periods/ Hours	1 Credit
1 Design Studio/ Construction Studio/ Project/ Thesis Period/ Hour	1.5 Credit

Credit Requirements & Guidelines for MOOCs

- As per the recommendation and Council of Architecture (CoA), Provision 260 credits have been made to pass the B. Architecture course of five Years.
- Note: In partial fulfillment of the flexible curriculum, a mandate provision to earn credits through E-Learning (NPTEL/MOOC etc.) based Departmental Core/Elective (DC/DE) has been introduced.
- Up to 52 credits out of total 260 credits for B. Architecture students can be earned through SWAYAM /NPTEL / MOOC platform based learning for the award of UG degree in Architecture
- The guidelines regarding “credit transfer from MOOCs” by All India Council of Technical Education (AICTE) and the affiliating university, i.e RGPV Bhopal, as issued from time to time will be binding on the institute.
- The list of courses which the students can opt from the SWAYAM /NPTEL / MOOC platform against DE courses in the scheme will be displayed on the website well in advance, (in November & June) so that students can select the courses of their choice. Each such Course must be of minimum 2 credits.
- For the courses opted under MOOC, the equivalent credit weightage will be given to the students, for the credits earned in online examination on SWAYAM/NPTEL platform and other similar platforms as approved by the authorized bodies (BoS, AC etc) , in the credit plan of the program w.e.f. 2017-18 admitted batch onwards.

MADHAV INSTITUTE OF TECHNOLOGY & SCIENCE, GWALIOR
(A Govt. Aided UGC Autonomous Institute Affiliated to RGPV, Bhopal)
Proposed Structure of Bachelor of Architecture (B.Arch.) program

Category Code	Course Category	Weightage in terms of credits as per CoA norms (2017 regulations)	No of courses	Total credits	Weightage in terms of credits achieved
DC	Departmental(Professional) Core	45%	20	124	48%
BSAE	Building Science & Applied Engineering	20%	14	55	21%
DE	Departmental(Professional) Elective	10%	8	23	9%
PAEC	Professional Ability Enhancement Course	15%	7	36	14%
SEC	Skill Enhancement Course	5%	12	18	7%
NEC	Novel engaging course	-	4	4	1%
TOTAL		100%	65	260	100%
MC	Mandatory Audit Course	5%	4	8	3 %

MCQ: Multiple Choice Question

AO: Assignment + Oral

OB: Open Book

PP: Pen Paper

#compulsory registration for one online course using SWAYAM/NPTEL/ MOOC, evaluation through attendance, assignments and presentation

 *subjects which are of more theoretical in nature

**subjects which are of more designing/algorithmic/computational in nature

***subjects which are of partially computational/design /programming nature (i.e. conceptual building part can be covered in online mode + computing /design part in offline mode or for MOOC based courses, the mentoring slot can be treated as offline mode delivery of partial contents to make the teaching learning “Blended”)

[§]Proficiency in course/subject – includes the weightage towards ability/ skill/ competence /knowledge level /expertise attained /attendance etc. in that particular course/subject

BACHELOR OF ARCHITECTURE

SYLLABUS

(I-X Semester)
Batch 2020 Onwards

DEPARTMENT OF ARCHITECTURE & PLANNING

First Year First Semester

1. Architecture Design – I (Code - 210112)

Objectives –

The course aims to obtain the fundamentals of design – elements and principles that govern the aesthetic aspects of design, experimental understanding of graphic elements and compositions in 2D / 3D, experimental understanding of colours, textures and compositions. Experimental understanding of form building, experimental understanding of design.

S. No.	Subject Cod	Subject Name	Catego ry	Maximum Marks Allotted							Total Mark s	CT HRS	Contact Periods per week			Total Credi ts	Mode of Exam	Mode of Teaching (Offline/ Online)
				Theory Slot				Practical Slot					L	T	P			
				End Term Evaluation		Continuous Evaluation		End Sem. Exam	Continuous Evaluation									
				End Sem.	Proficiency in subject/ course	Mid Sem.	Quiz/ Assign ment /Session al		Lab work & Sessional	Skill based mini project								
1.	210112	Architectural Design – I	DC-1	100	20	20	20	50	30	10	250	7	2	3	2*(1.5)	8	AO	Offline**

UNIT-1 GRAPHIC ELEMENTS, COMPOSITIONS & COLOURS – 2D

Impart elements and principles of design theory with sample exercises supported by illustrative PowerPoint presentations. Exercises: Dots, lines, shapes & forms, hatching patterns, 2D compositions with geometric & organic shapes and Impart colour theory with sample exercises supported by illustrative PowerPoint presentations, colour compositions on 2d compositions, textures replacing colors.

UNIT-2 3-D COMPOSITIONS / COLOUR & TEXTURE APPLICATIONS

Texture portfolio, 3D compositions with geometric & organic forms (model), Color compositions on 3D compositions (model), Texture applications & material compositions (model)

UNIT-3 2-D & 3-D ABSTRACTIONS

2-D image abstraction (colour, black/white, grey tone/mono colour, textures), 3-D image abstraction (colour, black/white, grey tone/mono colour, texture), 3-D model abstraction (colour)

UNIT-4 FORM BUILDING (MODELS)

Make a vivid PowerPoint presentation / video presentation on form building models with ample samples.

Exercises: 3-D sculpture exercises (additive & subtractive forms – solids & voids), Space frame model using a linear module (space creation), Origami models (space creation + solids & voids), Life scale models (group)

UNIT-5 PRODUCT DESIGN

Make a vivid PowerPoint presentation on product design with emphasis on user, purpose, material & form.

Exercises: Small scale product design, Life scale furniture design (group), 3-D model abstraction (colour).

COs & LOs for Architecture Design – I

Overall Course Outcome: The course aims to obtain the fundamentals of design – elements and principles that govern the aesthetic aspects of design, experimental understanding on graphic elements and compositions in 2D /3D, experimental understanding of colors, textures and compositions. Experimental understanding of form building, experimental understanding of design.

CO1	Students will be able to develop graphical understanding of visuals.	LO1	Illustrate the elements and composition of Design.
		LO2	Apply principle of design/additive & subtractive form (using 2d/ 3d compositions)
		LO3	Illustrate the color theory principles using color compositions & texture
		LO4	Evaluate the geometric & organic forms (2D & 3D in building)
		LO5	Develop analytical thinking towards spatial analyses of visual culture in 2-Dimensions.
CO2	Students will be able to develop understanding towards application of color and texture.	LO1	Illustrate the elements and composition of design in 3-D.
		LO2	Apply principle of design/additive & subtractive form (using 2d/ 3d compositions)
		LO3	Illustrate the color theory principles using color compositions & texture
		LO4	Evaluate the geometric & organic forms (2D & 3D in building)
		LO5	Elaborate analytical thinking towards spatial analyses of visual culture in 3D.
CO3	Students will be able to illustrate geometric and organic forms.	LO1	Identify the elements and principle of design theory
		LO2	Associate various graphical elements
		LO3	Illustrate the color theory principles using color compositions & texture
		LO4	Distinguish the geometric & organic forms (2D & 3D in building)
		LO5	Elaborate analytical thinking towards spatial analyses of visual culture
CO4	Students will be able to create building forms through model making.	LO1	Identify the elements and principle of design theory
		LO2	Apply principle of design/additive & subtractive form (using 2d/ 3d compositions)
		LO3	Illustrate the color theory principles using color compositions & texture
		LO4	Categorize the geometric & organic forms (2D & 3D in building)
		LO5	Develop analytical thinking towards spatial analyses of visual culture
CO5	Students will be able to design products with emphasis on user, purpose, material & form.	LO1	Demonstrate the elements and principle of design theory
		LO2	Associate various graphical elements
		LO3	Illustrate the color theory principles using color compositions & texture
		LO4	Examine the geometric & organic forms (2D & 3D in building)
		LO5	Create analytical thinking towards spatial analyses of visual culture

Note: Five questions shall be asked. All questions may have equal or varied weightage in end semester exams.

2. Building Materials (Code -210113)

Objectives –

The course aims to obtain various materials and systems, their properties and applications, develop a fundamental understanding of the relationship of materiality to construction systems and techniques, the intrinsic relationship of building materials to structural systems and environmental performance.

S. No.	Subject Cod	Subject Name	Category	Maximum Marks Allotted							Total Marks	CT HRS	Contact Periods per week			Total Credits	Mode of Exam	Mode of Teaching (Offline/ Online)
				Theory Slot				Practical Slot										
				End Term Evaluation		Continuous Evaluation		End Sem. Exam	Continuous Evaluation				L	T	P			
End Sem.	Proficiency in subject/ course	Mid Sem.	Quiz/ Assignment /Sessional	Lab work & Sessional	Skill based mini project													
2.	210113	Building Materials	BSAE-1	50	10	20	20	-	-	-	100	3	2	1	-	3	PP	Blended* (2/1)

UNIT-1 INTRODUCTION TO PRIMARY BUILDING MATERIALS

Historical evolution of building materials and construction methods. Clay and clay products (bricks, tiles), stones, timber, etc.

UNIT-2 BAMBOO & TIMBER

Timber types, qualities, and defects in timber seasoning. Processed materials - plywood, laminates, fiberboards, lightweight boards, panels & timber products. Bamboo as plant classification, species, geographical distribution, Anatomy of Bamboo, Properties, strength, processing, harvesting, working of Bamboo tools – Treatment and preservation of Bamboo and uses of Bamboo. Termite protection, sewage protection, fire protection materials of special needs.

UNIT-3 CEMENT AND OTHER RELATED MATERIALS.

Composition of cement, properties & various types of cement and their uses. Lime, sand, aggregate & mortar.

Special functional needs and categories of building materials abrasives, adhesives, asbestos, asphalt, bitumen, cork, electrical insulators, fuels, gypsum and heat insulation materials, lubricants, rubber sheets, roof coverings, and solders, sound absorb materials, tar and turpentine.

UNIT-4 GLASS

Classification of glass, types of glass, physical properties and uses of glass in building industries, a special variety of glass and architectural glass.

UNIT-5 PROPRIETARY BUILDING MATERIALS & OTHERS

Proprietary building materials: - Paints, Varnishes, distempers wallpaper, floor coverings, tiles, vinyl's, polyesters, fittings, furnishing materials for interiors & exteriors polymers, plastics resins and advanced surface finishes for interior and exterior. Industrial, agricultural and mineral wastes and their utilization as building materials: Fly ash, blast furnace slag, calcium carbonate, lime kiln rejects, by-product, gypsum, red mud, throw-away packages, rice husk, sawdust, wooden chips, choir waste, wood wool, tailings etc. their application in components of different types of buildings.

Note: Assignments should be in the form of small reports, market surveys, seminars and notes on above- mentioned topics. The works of CBRI, NBO, HUDCO, and other related institutions are referred to and discussed.

COs & LOs for Building Material

Overall Course Outcome: The course aims to obtain various materials and systems, their properties and applications, develop a fundamental understanding of the relationship of materiality to construction systems and techniques, the intrinsic relationship of building materials to structural systems and environmental performance.

CO1	Students will be able to understand the use of appropriate materials for building and construction.	LO1	Learn about different construction materials
		LO2	Understand the composition, properties and uses of various building materials.
		LO3	Develop a fundamental understanding it's application in building works.
		LO4	Analyze the building materials and its influence on prevailing architectural styles
		LO5	Integrate the market survey of different types of material
CO2	Students will be able to understand the detailing of building material and its applicability.	LO1	Learn Types of timber and it's processed materials.
		LO2	Illustrate specific use of materials and ascertain their application
		LO3	Understand the defects and treatment in timber seasoning.
		LO4	Develop an understanding of techniques used for it's application.
		LO5	Integrate the market survey of different types of material
CO3	Student will be able to select appropriate building materials based on properties, suitability, and it's application	LO1	Remember various types of building materials and their special functional needs.
		LO2	Understand their applicability, uses and their limitations
		LO3	Analyze their properties for their effective use in building construction works.
		LO4	finalize specific building materials for different types of buildings
		LO5	Integrate the market survey of different types of material
CO4	Students will be able to understand the structural component and glazing methods and how to make fenestrations delicate with it's appropriate usage.	LO1	Understand the different types of glass in the building industry.
		LO2	Identify suitable types of glass for use in field or Architecture.
		LO3	Develop understanding of its physical properties and varieties in buildings.
		LO4	Analyze specific use of glass and it's application techniques.
		LO5	Integrate the market survey of different types of material
CO5	Students will be able to deal with effective budgeting which will reduce the cost of construction through use of locally available materials along with improved skills and technology without sacrificing the strength, performance and life of the structure.	LO1	Learn Low cost Construction Techniques.
		LO2	Analyze building materials and its influence on prevailing architectural styles
		LO3	finalize specific building materials for different types of buildings
		LO4	Consider local material and its application techniques for low cost construction
		LO5	Integrate the market survey of different types of material

TEXT BOOKS:

1. S.C. RANGWALA, " Engineering Materials" Published 2012
2. S.P. ARORA & BINDRA, "Building Construction" Published Dec 2010

REFERENCE BOOKS:

1. Advances in Building Materials and Construction, CBRI.
2. Specification Yearbook

Objectives –

The course aims to obtain presentation skills, visual expression and representation, imaginative thinking and creativity through a hands on working with various mediums and materials, grammar of art by involving them in a series of free hand exercises both indoor and outdoor to understand form, proportion, scale, etc., exercises that look at graphic and abstract representations of art, concepts and fundamentals of Architectural Drawing, language of architecture & buildings as two dimensional and three dimensional representations.

S. No.	Subject Cod	Subject Name	Category	Maximum Marks Allotted							Total Marks	CT HRS	Contact Periods per week			Total Credits	Mode of Exam	Mode of Teaching (Offline/ Online)
				Theory Slot				Practical Slot					L	T	P			
				End Term Evaluation		Continuous Evaluation		End Sem. Exam	Continuous Evaluation									
				End Sem.	Proficiency in subject/ course	Mid Sem.	Quiz/ Assignment /Sessional		Lab work & Sessional	Skill based mini project								
3.	210114	Graphics – I	DC- 2	50	10	20	20	50	50	-	200	7	2	3	2	6	AO	Blended ** (4/2)

UNIT-1 INTRODUCTION TO DRAWING

- Introduction to drawing instruments and their use
- Lettering and Dimensioning: Introduction to architectural lettering, styles, proportion and scale, Methods of dimensioning
- Lines: different types of lines, their thickness and applications in architectural drawing.
- Scale: Architectural Metric scale, necessity of scaled drawing, selection of scale while preparing architectural drawing.

UNIT-2 GEOMETRICAL DRAWING & ORTHOGRAPHIC PROJECTION

- Introduction to plane geometry: Construction and development of planar surface–square, rectangle, polygon etc.
- Construction of conic sections: Ellipse, parabola and hyperbola
- Introduction to orthographic projection: Representation of geometric solids in terms of plan, elevation and side elevation in first angle projection – exercise on simple solids.
- Conversion of solids to orthographic projection and vice versa.

UNIT-3 ISOMETRIC VIEW & AXONOMETRIC VIEW

- Isometric view: Isometric view of solids, Isometric application in building–buildings with different shape and different types of roofs to include pitched roof, hipped roof, flat roof, vault, cone, dome etc

UNIT-4 BUILDING ELEMENTS AND BUILDING COMPONENTS

- Building Elements: Techniques of representing building elements such as doors, windows, steps, chajja, porch, canopy, balcony, parapet, foundation, walls, roofs, column, staircase, difference of levels, furniture fittings such as hand wash basins, WC pans, traps etc. on drawings in plan, elevation and section.
- Material Indications: Symbolic representation of building materials as specified by Indian Standard Code of practice.
- Building components: Components of a simple residential building.

UNIT-5 ISOMETRIC VIEW & AXONOMETRIC VIEW OF BUILDINGS

- Isometric view: Exterior view of a simple residential building showing all building components.
- Axonometric view: Axonometric view of a room interior showing all interior components.

COs & LOs for Graphics I			
Overall Course Outcome: Students will be able to develop, draw simple and complex objects in various types of views and will be able to visualize and draw buildings in different views.			
CO1	Students will be able to draw the elements of design and apply them in their drawings.	LO1	Learn various drawing instruments and their use.
		LO2	Understand the lettering and dimensioning technique.
		LO3	Apply the techniques by using lines type, letters, dimensioning and scale in drawing.
		LO4	Analyze the necessity of scaled proportionate and properly illustrated drawing.
		LO5	Draw compositions using all elements.
CO2	Students will be able to draw planar surface / conic sections in orthographic projections.	LO1	Study the construction and development of planar surfaces, conic and orthographic projection.
		LO2	Understand use of planar surfaces, conic and orthographic projection.
		LO3	Construct various geometrical shapes.
		LO4	Interpret and visualization of geometrical shapes in different views & angles.
		LO5	Draw compositions showcasing various objects in conic sections, orthographic projections.
CO3	Students will be able to draw solids and building elements in isometric projection.	LO1	Study the construction and development of solids and building roof elements.
		LO2	Understand the isometric projections.
		LO3	Develop solids and building roof elements in isometric projection.
		LO4	Visualization of geometric solids and building roof elements.
		LO5	Draw compositions of geometric solids and building roof elements in isometric projections.
CO4	Students will be able to draw plans, elevations and sections.	LO1	Learn various building elements, components and materials.
		LO2	Understand use of building elements, components and materials
		LO3	Illustrate the representation techniques of building elements, components and materials.
		LO4	Analyze all representations and symbols in buildings.
		LO5	Draw plans, elevations and sections using all building elements, components and materials.
CO5	Students will be able to draw interior and exterior views.	LO1	Learn about axonometric and isometric views of complex objects.
		LO2	Understand use of axonometric and isometric views for exteriors and interiors of buildings.
		LO3	Illustrate interiors, exterior elements.
		LO4	Draw an isometric view of the exterior of the building using all building components.
		LO5	Draw an axonometric view of interiors of rooms using building components.

UNIT-1 FORCE & EQUILIBRIUM

Statics of a particle, composition and resolution of forces, moment of a force, parallel forces, couples, general conditions of equilibrium.

UNIT-2 GRAVITY AND MOMENT OF INERTIA

Center of gravity and moment of inertia of composition and cut out sections, parallel and Perpendicular axes theorem, stability of equilibrium.

UNIT-3 STRESS & STRAIN

Simple stresses and strains, direct stresses, compound stresses.

UNIT-4 LOADS

Shear force and bending moments for strained beams subjected to concentrated load and Distributed loadings (Simply supported and cantilever only) support reactions.

UNIT-5 STRESS IN BEAMS

Stress in beams: Direct, bending and shearing stress in beams.

Note: Assignment work should include design and analysis of simple elements as stated above with drawings.

COs & LOs for Structure - I			
Overall Course Outcome: Students will be able to analyze simple structural behaviour using principles of structural mechanics, bending moment and shear force diagrams.			
CO1	Students will be able to understand the behaviour of forces and various principles of strength of materials.	LO1	Learn statics of a particle, composition and resolution of forces, moment of a force, parallel forces, couples, general conditions of equilibrium.
		LO2	Understand the composition, resolution and types of forces, general conditions of equilibrium.
CO2	Students will be able to understand relationship between the bending to the material property and geometry	LO1	Learn centre of gravity and moment of inertia of composition and cut out sections.
		LO2	Understand parallel and Perpendicular axes theorem, stability of equilibrium
CO3	Students will be able to calculate stresses and strains.	LO1	Learn simple stress and strain.
		LO2	Understand direct and compound stress.
		LO3	Calculate direct and compound stress and strain
CO4	Students will be able to apply shear force and bending moments for strained beams subjected to concentrated load and Distributed loadings.	LO1	Learn shear force and bending moment.
		LO2	Understand Shear force and bending moments subjected to concentrated load.
		LO3	Apply shear force and bending moments for strained beams subjected to concentrated load and Distributed loadings (Simply supported and cantilever only) support reactions.
CO5	Students will be able to calculate the level of stress in beams.	LO1	Learn various stresses in beam.
		LO2	Understand direct, bending and shearing stress in beams.
		LO3	Calculate the various levels of stress in beams.

UNIT-1 RIVER VALLEY CIVILIZATIONS OF INDIA

Prehistoric civilization, Neolithic & Paleolithic. Indus Valley Civilization: culture and pattern of settlement. Vedic culture - Vedic village and rudimentary forms of bamboo and wooden construction - Aryan civilization - origin of early Hinduism.

UNIT-2 BUDDHIST ARCHITECTURE

Origins of Buddhism and Jainism, Evolution of Buddhist Architecture and its salient features- Examples – Ashokan Pillar at Sarnath and Sanchi stupa. Chaitya hall and Vihara - Buddhist rock cut architecture Examples - Chaitya hall at Karli, Viharas at Nasik.

UNIT-3 EGYPTIAN ARCHITECTURE

Study of the influences & architectural character of ancient Egypt with relevant examples of Tomb & Temple structures (Cult and Mortuary temples), Mastaba – development and typical components of Pyramids – Complex of Zoser, Pyramid of Cheops and Cephren.

UNIT-4 WEST ASIATIC ARCHITECTURE

Study of Mesopotamian architecture, Urbanization in the Fertile Crescent – Sumerian, Babylonian, Assyrian and Persian (with examples of Ziggurat, Sargon palace & Palace of Persepolis). Mayan Civilization- Ceremonial platforms, palaces, pyramids and temples.

UNIT-5 INTRODUCTION TO SOUTH EAST ASIAN AND EAST ASIAN ARCHITECTURE

Study of prominent architectural character of south Asian countries. Study of relevant examples like Angkor Wat Cambodia. Introduction to Chinese architecture and typical examples of Pagoda, Pylons, Great Wall of China, temples, etc. Introduction to Japanese architecture, its characteristic features and typical examples: Pagoda, temples, monasteries, tea houses etc.

COs & LOs for HOA – I

Overall Course Outcome: Students will be able to **develop** an appreciation of varied cultures and the resulting architectural productions that are unique in time and place & suitable to the lifestyle of its people.

CO1	Students will be able to apply concepts and architectural expressions in their own design.	LO1	Remember basic concepts regarding the historical and architectural development in ancient civilization.
		LO2	Observe diverse artistic and architectural expressions with regard to the ancient civilizations.
		LO3	Illustrate visual and verbal vocabularies of architecture of ancient civilizations.
		LO4	Evaluate architectural forms and space with reference to architecture of ancient civilizations.
		LO5	Reproduce with help of sketches/visuals (softwares)/3D (models) of various architectural forms and styles of ancient civilizations.
CO2	Students will be able to apply elements of Buddhist architecture in their own design.	LO1	Understand basic concepts regarding the historical and architectural development in buildings in Buddhist Architecture.
		LO2	Identify diverse artistic and architectural expressions with regard to the Buddhist Architecture.
		LO3	Illustrate visual and verbal vocabularies of Buddhist Architecture.
		LO4	Analyse architectural forms and space with reference to Buddhist Architecture.
		LO5	Replicate with help of sketches/visuals (softwares)/3D (models) of various architectural forms and styles of Buddhist Architecture.
CO3	Studying this, students will be able to apply elements of Egyptian architecture in their own design.	LO1	Understand the architectural characters of the Ancient Egyptian buildings.
		LO2	Identify development and typical components of Egyptian pyramids.
		LO3	Illustrate visual and verbal vocabularies of Egyptian Architecture.
		LO4	Analyse architectural forms and space with reference to Tomb, Mastaba, Temples, etc. in Egyptian architecture.
		LO5	Replicate with help of sketches/visuals (softwares)/3D (models) of various architectural forms and styles of Egyptian Architecture.
CO4	Studying this, students will be able to apply elements and concepts of West Asiatic Architecture in their own design.	LO1	Remember basic concepts regarding the historical and architectural development in ancient civilization of Mesopotamian, Sumerian, Babylonian, Assyrian & Persian.
		LO2	Identify diverse artistic and architectural expressions with regard to these civilizations
		LO3	Illustrate visual and verbal vocabularies of each of Ziggurats, Palaces, Temples, Ceremonial platforms, Pyramids, etc.
		LO4	Analyse architectural forms and space with reference to West Asiatic Architecture.
		LO5	Replicate with help of sketches, visuals (softwares) and 3D (models) of various architectural forms and styles of West Asiatic Architecture.
CO5	Studying this, students will be able to apply elements of South East & East Asian architecture in their own design.	LO1	Understand basic concepts regarding the historical and architectural development in buildings in South East & East Asian Architecture.
		LO2	Identify prominent architectural character of the South East & East Asian Architecture with help of typical examples of Pagoda, Pylons, Temples, Monasteries, etc.
		LO3	Illustrate visual and verbal vocabularies of South East & East Asian Architecture.
		LO4	Analyse architectural forms and space with reference to South East & East Asian Architecture.
		LO5	Replicate with help of sketches, visuals (softwares) and 3D (models) of various architectural forms and styles of South East & East Asian Architecture.

TEXT BOOKS:

1. SATISH GROVER, "The Architecture of Indian (Buddhist & Hindu)"
2. A VOLWANSEN, "Living Architecture (Indian)", Oxford & IBH London
3. Pier Luigi Nervi, General Editor, "History of World Architecture – Series"

REFERENCE BOOKS:

1. PERCY BROWN, "Indian Architecture (Buddhist & Hindu), Taraporewala & Sons, Bombay. 2nd Edition
2. CHRISTOPHER TADGILL, "History of Architecture in India", Phaidon Press.
3. History Of Architecture by Sir Bannister Fletcher 20th edition
4. The Story Of Architecture by Patrick Nuttgens 2nd Edition
5. Space, Time And Architecture by Siegfried Gideon 5th Edition

6. Workshop – I (Code –210117)

Objectives –

The course aims to obtain the ability to appreciate the three dimensional implications of design and to introduce the students to the techniques of model making, basics of rendering, presentation skills & model making with various materials.

S. No.	Subject Code	Subject Name	Category	Maximum Marks Allotted							Total Marks	CT HRS	Contact Periods per week			Total Credits	Mode of Exam	Mode of Teaching (Offline/Online)
				Theory Slot				Practical Slot					L	T	P			
				End Term Evaluation		Continuous Evaluation		End Sem. Exam	Continuous Evaluation									
6.	210117	Workshop – I	SEC -1	-		-	-	20	20	10	50	4	-	-	4	2	SO	Offline**

UNIT-1 VISUAL ART

General characteristics of visual art/Fundamentals of visual art: Space, Form, size, Shape, Line, Color, Tone values, Perspective, Design and aesthetic organization of Visual elements in art object (Composition).The use of two and three dimensions in visual art. Tactile quality in art. Environment and art. Perceptual and conceptual aspects in art. Use of various kinds of papers in art making.

Exercise: Art Installation using above techniques.

UNIT-2 CARPENTRY & FOUNDRY

Introduction to the carpentry tools, processes, joints and wood working machines. Preparation of various carpentry joints, fixing of plywood, Blackboards, commercial boards and their application in furniture. Models in appropriate materials for understanding of joinery in wooden construction. Introduction, type of patterns, pattern making, preparation of moulds and moulding equipment details.

Exercise: Construction of Joints and basic Furniture.

UNIT-3 DEVELOPMENT OF SURFACES

Development of simple and composite forms using paper, Thermocol, wire, Wax, acrylic, sheets and similar materials. Introduction to metallic sections, joinery tools, joinery processes and working with them. Bonds in masonry based on the programme of building construction to make the various forms of masonry structures. Mixing of concrete, preparation of various objects.

Exercise: Surface development examples using different materials and creating joints in masonry structures using above techniques.

UNIT-4 FABRICATION

Introduction to welding equipment, processes and its applications.

Exercise: Create an Art installation from metal pieces by welding them.

UNIT-5 PAINTING & POLISHING

Classification of paints, varnishes ingredients of paints, painting methods-brush, spray, hot spray etc.

Exercise: Murals and wall paintings using above techniques.

COs & LOs for Workshop I

Overall Course Outcome: Students will be able to develop, draw simple and complex models in various materials using different techniques.

CO1	Students will be able to create visual art installations.	LO1	Learn various visual art typologies and kinds of paper in art making.
		LO2	Understand the fundamentals of visual art.
		LO3	Analyse the perceptual and conceptual aspects of visual art
		LO4	Compose an art installation using the above knowledge.
CO2	Students will be able to Construct various joints and models in different materials.	LO1	Learn the tools, joints and machineries used in carpentry.
		LO2	Understand different materials and their appropriate use.
		LO3	Construct various joints and models in wood, ply board, etc.
CO3	Students will be able to build moulds and joints for model making.	LO1	Learn various patterns in foundry.
		LO2	Understand the pattern making, moulding and making moulds.
		LO3	Build a mould and foundry joints using different materials.
CO4	Students will be able to construct models out of metal.	LO1	Learn about welding and its process.
		LO2	Understand the welding equipment and their application.
		LO3	Weld a model or an abstract using the different processes and equipment.
CO5	Students will be able to draw murals and paint.	LO1	Learn about various types of paints and ingredients in paints.
		LO2	Understand use of varnishes, etc. and methods of painting.
		LO3	Draw murals with the use of various paints, varnishes, and methods of painting.
		LO4	Integrate the above learned materials and techniques in creating their design models in further studies

7. Professional Communication (Code – 210117)

Objectives –

The course aims to obtain communication skills in English by developing their listening, speaking, reading and writing skills, speaking skills with specific reference to prospective/actual clients, suppliers, business partners and colleagues, reading ability of journals, research articles etc & develop their writing skills especially writing project proposals and reports.

S. No.	Subject Cod	Subject Name	Catego ry	Maximum Marks Allotted							Total Mark s	CT HRS	Contact Periods per week			Total Credits	Mode of Exam	Mode of Teaching (Offline/ Online)
				Theory Slot				Practical Slot					L	T	P			
				End Term Evaluation		Continuous Evaluation		End Sem. Exam	Continuous Evaluation									
				End Sem.	Proficiency in subject/ course	Mid Sem.	Quiz/ Assignment /Sessional		Lab work & Sessional	Skill based mini project								
7.	210118	Professional Communication	SEC -2	50	10	20	20	-	-	-	100	2	1	1	-	2	PP	Blended * (1/1)

Unit -1 Introduction to Language & Linguistics

An Introduction to Linguistics, IPA, English Phonetic Symbols/Sign & Sounds, Place & Manner of Articulation.

Unit -2 Communication

Communication: Approaches, Elements, Types, Process, Models; Management Communication (Levels of Communication) and Grapevine Communication, Verbal and Nonverbal Communication; Barriers to Communication; Johari Communication Window.

Unit-3 Application of Linguistic Ability

1. Listening: Factors Affecting Listening and Improving Listening.
2. Speaking: Making Speeches, Presentation, Group Discussion, Meeting, Interview, Debate.

Unit-4 Grammar & Vocabulary:

Grammar: Parts of Speech, Subject-verb Agreement, Active and Passive Voice, conditional sentences. Vocabulary: Using the dictionary and thesaurus, word formation, prefix & suffix, idioms, phrasal verbs.

Unit-5 Report Writing:

Reading Comprehension: Stories, Passages, Poetry and Scientific Text

Writing: Essentials of good writing, Technical Descriptions of Simple Engineering Objects; Formal (Application, Email, CV, Résumé, Memo, Report writing)

*Material for story and prose is to be selected by concerned teacher in class.

COs & LOs for Professional Communication			
Overall Course Outcome: Students will be able to develop the ability to write and communicate professionally in the language			
CO1	Students will be able to speak effectively.	LO1	Learn linguistics, IPA and English phonetics, etc.
		LO2	Understand the place and manner of articulation.
		LO3	Analyse the perceptual and conceptual aspects of speaking.
		LO4	Speak clearly, effectively and appropriately in a public forum to a variety of audiences and purposes
		LO5	Prepare and deliver oral presentations and arguments acceptable within the Engineering Profession Effectively
CO2	Students will be able to communicate their design and ideas.	LO1	Learn the communication approaches, elements, types and process.
		LO2	Study Various types of communication.
		LO3	Practice Various communication types and skills in life.
		LO4	Demonstrate knowledge and comprehension of major text and traditions in language as well as its social, cultural and historic context
CO3	Students will be able to learn the techniques to speak publically.	LO1	Learn various factors affecting listening.
		LO2	Comprehend to improve listening.
		LO3	Learn to make speeches and presentations.
		LO4	Apply the qualities and techniques learnt to make speeches, debate, interviews, etc.
		LO5	Read a variety of text critically and analytically so as to demonstrate in writing and / or speech the interpretations of those texts
CO4	Students will be able to construct models out of metal.	LO1	Learn Various grammatical aspects of writing and speaking the language.
		LO2	Expand the vocabulary.
		LO3	Practice To use the techniques in explaining Design.
		LO4	Interpret text written in English assessing the result in written and oral arguments using appropriate material for support
CO5	Students will be able to write reports explaining their design and later on papers.	LO1	Learn about report writing and its process.
		LO2	Understand the techniques and essentials of report writing.
		LO3	Draft Formal Application, mail, CV, Résumé, Memo, Report for design, etc.
		LO4	Implement professional work habits, including those necessary for effective collaboration and cooperation with others

First Year Second Semester

1. Architecture Design – II (Code – 210211)

Objective –

The course aims to obtain or learn the basic principles of space making, the forms of building through intensive design studio practice.

S. No.	Subject Cod	Subject Name	Catego ry	Maximum Marks Allotted							Total Mark s	CT HRS	Contact Periods per week			Total Credi ts	Mode of Exam	Mode of Teaching (Offline/ Online)
				Theory Slot				Practical Slot					L	T	P			
				End Term Evaluation		Continuous Evaluation		End Sem. Exam	Continuous Evaluation									
1.	210211	Architectural Design – II	DC- 4	100	20	20	20	50	30	10	250	7	2	3	2*(1.5)	8	AO	Offline**

PROCESS:

- Fragment the pre design process and help students build formats/templates for analysis. Guide to derive architectural design data through various studies
- Guide to program and to understand the causes for architectural spaces Guide to understand context & its influences
- Guide to learn and experiment the design process
- Guide to conceptualize the design/evolution of architecture Guide to document the design project

Note: Minimum four design problems shall be introduced in the semester out of which, one major problem, one small problem and two shall be time bound problems. Learning the basic principles of space making and form building through intensive design studio practice.

PROJECT 1(Prototype): SINGLE SPACE DESIGN

Enlighten the student on the design project overview & the design process to be followed through relevant presentations.

Present an analytical discourse on an identical architectural design project covering

- Architectural elements & relevant architectural terms
- Space planning (response to user & purpose with logic & application of standards)
- Material, form & structure
- Aesthetics & visual perceptions

PROJECT 2(Prototype): SMALL SCALE MULTI-SPACE DESIGN

Enlighten the student on the design project overview & the design process to be followed through relevant presentations.

Present an analytical discourse on an identical architectural design project covering

- Architectural, elements, spaces & terms
- Noted projects & architects
- Space planning (response to user & purpose with logic & application of standards)
- Site planning (contextual response, response to the natural environment, response to views + general site planning guidelines)
- Material, form & structure
- Aesthetics & visual perceptions.

PROJECT 3 & 4(Prototype): Time bound Problems of 6 hours to 48 hours.

COs & LOs for Architecture Design – II

Overall Course Outcome: The course aims to obtain or learn the basic principles of space making, the forms of building through intensive design studio practice.

CO1	Students will be able to discover Architectural elements & relevant architectural terms in response to Space planning and Understanding the Material, form & structure as well as Aesthetics & visual perceptions.	LO1	Interpret architectural design fundamentals (Relationship between people to build forms & built forms to environment)
		LO2	Summarize different functional spaces and their space requirements
		LO3	Identify human standards of design based on ergonomics
		LO4	Analyze pre-design process, design process & conceptualization stages in design
		LO5	Design objects based on the concept of space and form by modifying and evaluating an existing space. Express their designs through communication skills – verbal, script & graphics.
CO2	Students will be able to design project overview & the design process to be followed through relevant presentations with appropriate use of Architectural, elements, spaces & terms by understanding noted projects & architects as well as Space planning.	LO1	Interpret architectural design fundamentals (Relationship between people to build forms & built forms to environment)
		LO2	Summarize different functional spaces and their space requirements
		LO3	Identify human standards of design based on ergonomics
		LO4	Analyze pre-design process, design process & conceptualization stages in design
		LO5	Design objects based on the concept of space and form by modifying and evaluating an existing space.
CO3	As a result of completing Time bound Problems of 6 hours to 48 hours students will be able to maximize the potential of designing within the time frame.	LO1	Understand the application of the architectural design process for small scale projects of human habitat
		LO2	Transform the human behavioural needs into architectural program requirements
		LO3	Analyse the information on context and the human-space relationship
		LO4	Compose the architectural spaces in a design project in a given time frame.
		LO5	Communicate architectural drawings with the help of various mediums in given time frame

6. Space Planning Basics - Mark Karlen 2016

Note: Two small design problems shall be given in the End Semester Examination. 6 hours examination.

2. Building Construction – I (Code – 210212)

Objective –

The course aims to obtain knowledge of basic building components and doors, windows, different types of materials and their use in construction, the different materials & technology available & their application, the various types of roofing and its materials.

S. No.	Subject Cod	Subject Name	Catego ry	Maximum Marks Allotted							Total Mark s	CT HRS	Contact Periods per week			Total Credits	Mode of Exam	Mode of Teaching (Offline/ Online)
				Theory Slot				Practical Slot					L	T	P			
				End Term Evaluation		Continuous Evaluation		End Sem. Exam	Continuous Evaluation									
				End Sem.	Proficiency in subject/ course	Mid Sem.	Quiz/ Assignment /Sessional		Lab work & Sessional	Skill based mini project								
2.	210212	Building Construction -I	BSAE-3	50	10	20	20	20	20	10	150	5	2	1	2*(1.5)	6	PP	Blended** (3/3)

UNIT-1 LOW-COST CONSTRUCTION

- Introduction to Low-cost construction techniques and materials with combinations of mud and terra – cotta.
- Foundation and walls in stabilized mud-rammed earth and compact earth blocks

UNIT-2 INTRODUCTION OF BASIC BUILDING COMPONENTS

- Cross-section of a G+1 building to understand foundation, plinth beam, flooring, sill, lintel, slabs, parapet & weathering course
- Foundation: typical types of foundation in stone, brick & RCC. Timbering of trenches, tools, plants, and equipment for excavation.

UNIT-3 WALL

- Walls: Types of bricks and stone and their uses.
- Brick: definition, and types of bond: English, Flemish & rat trap bond for one brick and half thick wall for corners and T-Junctions, Garden wall bond & ornamental bond.
- Stone: Types of stone masonry (random rubble and ashlar).
- Piers and Quoins.

UNIT -4 INTRODUCTION TO OPENINGS

- Doors: Braced, panel, flush doors, carved entrance doors, and partially glazed doors.
- Windows: Casement window, bay window, and French window.
- Ventilators: Louvered Top hung ventilator.
- Arches in brick and stone: flat, segmental, semi-circular and pointed, plastering and pointing.
- Lintels and sills: In brick and stone.

UNIT-5 ROOFS

- Simple configurations and details of various forms of roofs: Flat, sloped, pyramids and dome.

COs & LOs for Building Construction – I

Overall Course Outcome: The course aims to obtain knowledge of basic building components and doors, windows, different types of materials and their use in construction, the different materials & technology available & their application, the various types of roofing and its materials.

CO1	Students will be able to deal with effective budgeting which will reduce the cost of construction through use of locally available materials along with improved skills and technology without sacrificing the strength, performance and life of the structure.	LO1	Learn Low cost Construction Techniques.
		LO2	Understand the material and construction techniques through site visit and market surveys
		LO3	Develop a fundamental understanding of the relationship of materiality to construction systems and techniques
		LO4	Analyze The detail of materials with different combinations in buildings.
		LO5	Produce construction detail of foundation and walls in mud-rammed earth and compact earth blocks.
CO2	Students will be able to depict materials and see the parts of buildings that are not seen otherwise.	LO1	Learn the Building cross section to understand various components in sub- structure and super- structure.
		LO2	Understand the need of various components in building.
		LO3	Develop a fundamental understanding of types of foundation in a building with different materials.
		LO4	Analyze the details of foundation with respect to soil type.
		LO5	Produce details of foundations in Stone, Brick and RCC.
CO3	Students will be able to understand the importance of walls in building, how they give security, divide available space of building to fulfil basic requirements and also safeguard humans from heat and cold.	LO1	Learn types of bricks and stones and their uses in building.
		LO2	Understand the difference between various types of bonds.
		LO3	Analyze types of stone masonry.
		LO4	Understand the details of piers and quoins
		LO5	Produce construction details of walls and piers.
CO4	Students will be able to choose the appropriate building components with material suitability in his/her designs.	LO1	Understand the different types of doors, windows, ventilators, arches etc.
		LO2	Identify suitable material required for the construction of doors, windows, ventilator, arches etc.
		LO3	Classify the components based on their arrangements, method or manner of construction, working operations and material.
		LO4	Analyze the differences between the types of door, windows, etc.
		LO5	Produce the drawings of types of doors, windows, ventilators, etc
CO5	Students will be able to use a suitable roof for their projects.	LO1	Understand Various forms of roofs
		LO2	Identify Types of roofs which include flat, sloped, pyramids, and domes
		LO3	Analyze the difference between the types of roofs.
		LO4	Produce the drawings of types of roofs.

Note: Total five questions shall be asked. Each question will consist of two parts, one of which will be of 7 marks (which shall be compulsory) and another with 3 marks (which shall be optional).

3. Graphics – II (Code – 210213)

Objectives –

The course aims to obtain the skill of representation in advanced drawing techniques, perspective, sciography and Measured Drawing.

S. No.	Subject Cod	Subject Name	Category	Maximum Marks Allotted							Total Marks	CT HRS	Contact Periods per week			Total Credits	Mode of Exam	Mode of Teaching (Offline/ Online)
				Theory Slot				Practical Slot					L	T	P			
				End Term Evaluation		Continuous Evaluation		End Sem. Exam	Continuous Evaluation									
				End Sem.	Proficiency in subject/ course	Mid Sem.	Quiz/ Assignment /Sessional		Lab work & Sessional	Skill based mini project								
3.	210213	Graphics – II	DC- 5	50	10	20	20	20	20	10	150	4	1	1	2	3	AO	Offline**

UNIT-1 ELEMENTS AND PRINCIPLES OF PERSPECTIVE DRAWING

- Anatomy of perspective drawing (Picture Plane, Centre line of vision, Eye Level, Height Line, Vanishing Points, Cone of Vision, Station Point, Horizon line, Ground line etc)
- Types of perspective drawing (one point, two point, three point)
- Introduction to methods of perspective drawing (Direct method , Approximate method, perspective grid)

UNIT-2 TWO POINT PERSPECTIVE VIEW OF BUILDINGS

- Construction of Two point perspective grid.
- Exercise on two point exterior perspectives of simple objects and their combination
- Exercise on Two point Perspective of building Interior by Direct projection Method / Approximate Method.
- Exercise on Two point Perspective of building exterior by direct projection Method / Approximate Method.
- Exercise on Sectional perspective

UNIT-3 ONE POINT INTERIOR PERSPECTIVE

- Construction of One point perspective grid
- Exercise on two point exterior perspectives of simple objects and their combination
- Exercise on One point Interior view of any room viz Bed Room, Kitchen, Drawing room etc. by direct projection Method / Approximate Method.

UNIT-4 SCIOGRAPHY

- Principles of Shades and shadows (Techniques of drawing shades and shadows of lines, planes, solids and architectural Building Elements)
- Exercise on Shade and shadow of typical building on Elevation and Site Plan
- Exercise on Shades and Shadows in perspective.

UNIT-5 MEASURED DRAWING

- Introduction to techniques on measurements of buildings, drawing and presentation
- Measured drawing of single storied building(s) :To measure and draw the Ground Floor Plan along with plot boundaries, four side elevations, two sections, block plan, site plan of existing single storied building (maximum of 100.0 sq. m. Plinth area).
- Exercises to include application of shade and shadow in site plan, elevation and exterior perspective.

COs & LOs for Graphics-II

Overall Course Outcome: The students will be able to create drawings in perspectives for exteriors and interior along with shades and shadows. Students also learn to understand and develop measured drawing for a small residential space.

CO1	Students will be able to construct the perspective drawings of different types and using different methods.	LO1	Learn the principles of perspective drawing
		LO2	Understand the types and terminology of perspective drawing
		LO3	Analyse the steps for making a one point and two point perspective
		LO4	Construct the perspective drawing for simple geometric objects
		LO5	Exercise the steps for making perspective drawings for combinations of simple geometric objects
CO2	Students will be able to construct two point perspective drawings for simple objects, its combinations, interior and exteriors of simple buildings	LO1	Study the construction and development of two point perspective grid
		LO2	Understand the steps to develop two point perspectives from various levels, in interior and exterior building views.
		LO3	Compare the two methods of perspective drawing : direct method and approximate method
		LO4	Exercise the two point perspective of building interior and building exterior
		LO5	Exercise the two point perspective in sectional view.
CO3	Students will be able to Construct one point perspective drawings for simple objects, its combinations and various interior spaces	LO1	Study the construction and development of one point perspective grid
		LO2	Understand the steps to develop one point perspectives in interior spaces
		LO3	Visualise the one point perspective drawing of interior spaces at various levels
		LO4	Exercise the one point perspective of a kitchen/bathroom interior
		LO5	Exercise the one point perspective of a bedroom/ living room interior.
CO4	Students will be able to develop shades and shadows in 2D and 3D drawings	LO1	Learn the terminologies of sciography and principles of shade and shadow in architectural graphics
		LO2	Understand techniques of drawing shades and shadows of simples shapes
		LO3	Visualise shade and shadow for various building elements in 2D and 3D
		LO4	Exercise shade and shadow for typical building on elevation, and site plan
		LO5	Exercise shade and shadow for typical building in perspective drawing
CO5	Students will be able to create plans, elevation sections for the same	LO1	Learn the significance of measured drawing in architecture
		LO2	Understand the measured drawing techniques for plans, elevation, site plan etc
		LO3	Visualise and draw the sketch design of measured building
		LO4	Create architectural drawings(plan, sections, four elevations, site plan) for the measured ground floor of the given building
		LO5	Exercise shade and shadow for the building elevation, site plan, and perspective drawing of the measured building

4. Structure – II (Code – 210214)

Objectives –

The course aims to obtain basic knowledge & overview of structural systems used in buildings, the structural form and the evolution of structural design knowledge, from Gothic cathedrals to long span structural systems, simple structural behavior.

S. No.	Subject Cod	Subject Name	Category	Maximum Marks Allotted							Total Marks	CT HRS	Contact Periods per week			Total Credits	Mode of Exam	Mode of Teaching (Offline/ Online)
				Theory Slot				Practical Slot					L	T	P

				End Sem.	Proficiency in subject/ course	Mid Sem.	Quiz/ Assignment /Sessional		Lab work & Sessional	Skill based mini project								
4.	210214	Structure II	BSAE-4	50	10	20	20	-	-	-	100	3	2	1	-	3	PP	Offline***

UNIT-1 OVERVIEW OF VARIOUS TYPES OF STRUCTURAL SYSTEMS IN ARCHITECTURE

Simple RCC frame system used for small span buildings – vaults & domes of various spans – types of trusses & their application for industrial buildings – various configurations in rcc roof slab – RCC folded plate roofing systems – Various types of shell structures – Space frames in steel used for large spans – Tensile structural systems – Suitable examples for all these structural systems.

UNIT-2 BASIC STRUCTURAL CONCEPTS

Various types of loads in buildings – compression and tension in structures – Effect of temperature & settlement on buildings – properties of structural materials such as steel, concrete, RCC, wood, brick & stone – Evolution of the concept of span from architectural history: Temples in Egypt, Greece, South India, Indo- Aryan etc – Vaults & domes in historical buildings: Domes in Pantheon & Hagia Sophia, Vaults during Romanesque, Gothic & Mughal period .

UNIT-3 REINFORCED CEMENT CONCRETE STRUCTURES

Simply spanned RCC slabs & load bearing walls – one way & two way RCC slabs – coffer slab, grid beam slab in RCC – vault, dome, pitched roof, hipped roof in RCC -simple RCC frame structural system up to 5 floors – their application with suitable examples. Concept & various configurations of the folded slab roof – Concept of thin shells – simply curved & doubly curved shells, interpenetrating cylindrical shells, hyperbolic paraboloids, Hypars etc.

UNIT-4 STEEL STRUCTURAL SYSTEMS

Simple steel truss - members in tension & compression – various types of trusses – Warren, Pratt, Fink, Howe, Bowstring, mansard etc – girders & trusses in saw tooth roof configuration, Steel frame domes – Fuller, Geodesic, Schwedler dome configurations - Concept of Space frames: various types, single, double & triple layered tubular steel space frames & their use as long span structural system – Concept of tensile roofing system – saddle roof, mast supported, Arch supported, Point supported & their combinations – tensegrity roof structures.

UNIT-5 STRUCTURAL MECHANICS

Composition and Resolution of Forces – concept of stress / strain, young's modulus, typical stress strain curve for ductile & rigid materials, Hooke's law – Theory of Bending Moment & Shear force – their application in buildings for various loads & support conditions (Simply supported, Cantilevered, continuous etc). Simple problems on the above mentioned.

COs & LOs for Structure - II			
Overall Course Outcome: Students will be able to identify various structural systems and will be able to analyze simple structural behaviour using bending moment and shear force diagrams in buildings.			
CO1	Students will be able to understand the various types of structural systems in architecture	LO1	Learn about simple RCC frame systems, trusses, etc.
		LO2	Understand use of RCC shell structure, space frames and tensile structure.
CO2	Students will be able to understand types of loads in buildings and properties of different materials used in structure.	LO1	Learn various types of loads in buildings
		LO2	Understand compression and tension in structures and properties of various structural materials.
CO3	Students will be able to examine different reinforced cement concrete structures	LO1	Study about simply spanned RCC slabs & load bearing walls.
		LO2	Understand one way& two-way RCC slabs, coffer slab, grid beam slab in RCC, vault, dome, pitched roof, hipped roof in RCC.
		LO3	Examine different RCC slabs used in building.
CO4	Students will be able to analyze various steel structural systems.	LO1	Learn about a simple steel truss system.
		LO2	Understand the concept and use of various types of truss, Steel frame domes and space frames.
		LO3	Identifying various steel structural systems.
		LO4	Analyzing simple steel truss system, one way& two-way RCC slabs, coffer slab, grid beam slab in RCC, vault, dome, pitched roof, hipped roof in RCC.
CO5	Students will be able to solve problems on structural mechanics.	LO1	Learn about composition and resolution of forces
		LO2	Understand the concept of stress/strain, young's modulus, typical stress strain curve for ductile & rigid materials, Hooke's Law and theory of Bending Moment & Shear force.
		LO3	Solve problems on stress/strain, young's modulus, typical stress strain curve for ductile & rigid materials, Hooke law and Bending Moment & Shear force.

5. History of Architecture- II (Code – 210215)

Objectives –

The course aims to obtain knowledge of evolution with regarding to Indian architecture, in India as this is an integrated expression of art, culture, vernacular material and techniques of the place, designs those are rooted in this country and suitable to the lifestyle of its people, varied culture and the resulting architectural productions which are unique in time and place.

UNIT-1 EVOLUTION OF HINDU TEMPLE ARCHITECTURE:

Hindu forms of worship – Origin and evolution of temple form (Nagar, Dravida & Vesara) - meaning, symbolism, ritual and social importance of temple, categories of temple, and elements of temple architecture.

UNIT-2 NORTHERN INDIAN TEMPLES:

Early shrines of the Gupta Period. Their salient features. Salient features of Nagara Style Temple Architecture. Examples of Orissa style - Lingaraja temple at Bhubaneswar & Sun temple at Konark - Example of Madhya style – KandariyaMahadev temple at Khajuraho - Example of Gujarat style - Surya Temple at Modhera.- Example of Maru-gurjara style – Ambaji Mata Temple, Udaipur, Example of Jain style temple- Dilwara temple, Mt. Abu. Examples of North & North East (Kashmir, Uttarakhand, etc.)

UNIT-3 DRAVIDIAN STYLE TEMPLES:

Brief history of South India - relation between Bhakti period and temple architecture - Temple Complexes & Towns (Madurai, Srirangam), Dravidian Order (evolution of Dravidian orders under pallavas, cholas and pandyas), Gopurams and Rock cut productions.

Examples: Early shrines of the Chalukyan periods, Tigawa temple - Ladh Khan and Durga temple, Aihole - Papanatha, Virupaksha temples, Pattadakal- Rock cut productions under Pallavas, Shore temple and five rathas at Mahabalipuram, Kailasanatha temple, Ellora. Example of Chola style - Brihadeeswara temple at Tanjore - Example of Pandyan style - Meenakshiamman temple, Hoysala architecture: Belur and Halebid. and Kailasanathar temple at Kanchipuram.

UNIT – 4 INDO - ISLAMIC ARCHITECTURE

Introduction to Islamic culture worldwide, Classification of Islamic architecture in India, Mughal Architecture in India. Religious (Maqbara, Masjid, Idgah, etc.) and Secular typologies (Sarai, Rauza, etc.) of Islamic architecture. Features of an Indian mosque, concept of squinch arches, and its variations. Imperial style. Provincial styles. Characteristics of Mughal architecture, planning, dome construction, materials. Development of the Mughal style under different rulers

Examples under imperial style - Qutub Complex, Qutubminar and Alai Darwaza at Delhi - Tomb of Ghiasuddin Tughlaq, Lodi garden at Delhi. Characteristics of the provincial styles in different regions through examples - Punjab style - Tomb of shah Rukni Alam, Bengal style - Chotasona masjid at Gaur, Gujarat style - Jami masjid at Ahmedabad, Deccan style –Gol gumbaz at Bijapur and Charminar at Hyderabad.

Examples of Mughul architecture under different rulers - Humayun- Humayun's Tomb at Delhi, Akbar- Fatehpur Sikhri. Shahjahan - The Taj Mahal, Agra - Red Fort at Delhi, etc.

UNIT – 5 FORTIFICATIONS AND PALATIAL ARCHITECTURE

Introduction to Fortifications, forts, Palaces across the country.

Examples of Forts – Salient features of forts like Gwalior Fort, Daulatabad Fort, Golconda Fort, etc.

Examples of palaces – Salient features of palaces like Mysore Palace, Padmanabha Palace, Umaid Bhawan, etc.

COs & LOs for HOA – II

Overall Course Outcome: Students will be able to **develop** an appreciation of varied cultures and the resulting architectural productions that are unique in time and place & suitable to the lifestyle of its people.

CO1	Students will be able to apply various temple architectural forms and architectural expressions in their own design.	LO1	Learn basic concepts of temple architecture of India.
		LO2	Understand diverse artistic and architectural expressions in Indian Temple Architecture and origin and evolution of it.
		LO3	Illustrate visual and verbal vocabularies of various categories of temple architecture of ancient India.
		LO4	Analyze temple architectural forms and space and its importance in Indian culture
		LO5	Reproduce with the help of sketches/visuals (softwares)/3D (models) of various architectural forms and styles of temple architecture of India.
CO2	Students will be able to apply the North Indian temple Architecture style and elements in their own design.	LO1	Learn basic concepts of North Indian temple architecture.
		LO2	Understand diverse artistic and architectural expressions in North Indian temple architecture through examples.
		LO3	Illustrate specific visual and verbal vocabularies of North Indian temple architecture.
		LO4	Analyze North Indian temple architectural forms and space and its meaning, symbolism, rituals & social importance in Indian culture.
		LO5	Reproduce with help of sketches/visuals (softwares)/3D (models) of various architectural forms and styles of North Indian temple architecture.
CO3	Students will be able to apply the South Indian temple Architecture style and elements in their own design.	LO1	Learn basic concepts of South Indian temple architecture.
		LO2	Understand diverse artistic and architectural expressions in South Indian temple architecture through examples.
		LO3	Illustrate specific visual and verbal vocabularies of South Indian temple architecture.
		LO4	Analyze South Indian temple architectural forms and space and its meaning, symbolism, rituals & social importance in Indian culture.
		LO5	Reproduce with help of sketches/visuals (softwares)/3D (models) of various architectural forms and styles of South Indian temple architecture.
CO4	Students will be able to apply elements and concepts of Islamic in their own design.	LO1	Remember basic concepts and division in Islamic culture & architecture
		LO2	Identify diverse artistic and architectural forms in religious spaces, Gateways, Minarets, Palaces, Tombs, etc.
		LO3	Illustrate visual and verbal vocabularies of each of religious spaces, Gateways, Minarets, Palaces, Tombs, etc. in Islamic Architecture.
		LO4	Analyze architectural forms and space with reference to various examples of buildings in Islamic Architecture.
		LO5	Replicate with help of sketches, visuals (softwares) and 3D (models) of various architectural forms and styles of Islamic Architecture.
CO5	Students will be able to apply elements of forts and palaces in their own design.	LO1	Understand the various typologies of forts and palaces in India
		LO2	Identify prominent architectural characters of forts & palaces in India.
		LO3	Illustrate visual and verbal vocabularies of forts & palaces in India.
		LO4	Analyze architectural forms and space with reference to forts & palaces in India.
		LO5	Replicate with help of sketches, visuals (softwares) and 3D (models) of various architectural forms and styles of forts & palaces in India.

6. Theory of Design (Code – 210216)

Objectives –

The course aims to obtain the theoretical aspects of design and understand how it could be manifested in architectural design, the ideologies from works of architects and planners, the design communication skills to enable to put forth the design ideas in graphics and literature.

S. No.	Subject Code	Subject Name	Category	Maximum Marks Allotted							Total Marks	CT HRS	Contact Periods per week			Total Credits	Mode of Exam	Mode of Teaching (Offline/ Online)
				Theory Slot				Practical Slot					L	T	P			
				End Term Evaluation		Continuous Evaluation		End Sem. Exam	Continuous Evaluation									
				End Sem.	Proficiency in subject/ course	Mid Sem.	Quiz/ Assignment /Sessional		Lab work & Sessional	Skill based mini project								
6.	210216	Theory of Design	DC- 7	50	10	20	20	-	-	-	100	2	2	-	-	2	pp	Blended* (2/1)

UNIT-1 PRIMARY ELEMENTS IN ARCHITECTURE

Geometry in Architecture - points, lines and shapes. Linear elements, planar elements and volumetric elements. Patterns in nature and building design. Order to chaos. Regularity and irregularity.

UNIT-2 FORM AND SPACE

Elements of spatial definition – form defining space - elevated base plane, depressed base plane-vertical and horizontal elements defining space -depth and density of space - spatial juxtaposition and interpenetration – spatial characteristics of elementary shapes - qualities of architectural space - degree of enclosure. Analysis of works of famous architects in India & abroad.

UNIT-3 ORDERING PRINCIPLES AND MEANING IN ARCHITECTURE

Ordering Principles-Axis -Symmetry -Hierarchy - Datum -Rhythm -Repetition -Transformation - Measure and balance – spaces on human scale - proportion -- Golden Section, Le modular, Fibonacci series – Renaissance Theories - anthromorphism and architecture - Figure and ground, positive and negative spaces.

UNIT-4 CONCEPTS IN ARCHITECTURAL DESIGN

Concept – types- Ideas and Intent in design - Intuitive, contextual, Iconic, Experiential, Symbolic, Modular. Ideologies and philosophies of architects'. Case Studies. Importance of graphics in architectural design. Study of site plans, city plans, conceptual drawings. Interpretation of architects' conceptual sketches and the respective buildings. Vernacular Architecture. Western & Indian Philosopher.

UNIT-5 RESPONSIVE AND RESPONSIBLE ARCHITECTURE

Phenomena of perception – looking, listening, feeling and moving through architecture –light and shade – Architecture as Making Frames -, Environmental-Energy based.

COs & LOs for Theory of Design

Overall Course Outcome: Students will be able to **develop** an appreciation of design principles and elements and the resulting theories in architectural fields that are unique in time and place.

CO1	Student will be able to Understand basic fundamental of design in natural and manmade environment	LO1	Relate various elements , spaces and design principles
		LO2	Categorize essential theoretical aspects in architectural studies
		LO3	Distinguish between regularity and irregularity
		LO4	Experiment patterns in design inspired from nature
CO2	Students will be able to Discuss best examples of built forms and situate them in the theoretical framework.	LO1	Define spatial elements of design to achieve good designs
		LO2	Learn spatial characteristics of shapes. spaces
		LO3	Analyze works of famous national and international architects
CO3	Student will be able to Understand the significance of aesthetics, history in architectural design.	LO1	Memorize aesthetic principles of design
		LO2	Journal about historical design concepts and theories
		LO3	Link human scale and proportion within the space
CO4	Students will be able to develop architectural thinking through past and present work to link design & theory.	LO1	Relate theories and ideologies of different architects in comparative mode
		LO2	Analyze Ideas from abstract thinking and implement them
		LO3	Judge Different types of architectural plans and drawings
		LO4	Interpret thoughts of architects through their sketches
CO5	Students will be able to Prioritize social responsibility for perfecting designs that improve the functions.	LO1	Relate human senses with architecture
		LO2	Experiment light and shadows in building form and design
		LO3	Adapt sustainable goals for designs
		LO4	Focus on ecological and humanitarian issues

7. Workshop – II (Code – 210217)

Objectives –

The course aims to obtain the ability to appreciate the three dimensional implications of design and to introduce the students to the techniques of model making, basics of rendering, presentation skills & model making with various materials.

S. No.	Subject Code	Subject Name	Category	Maximum Marks Allotted								Total Marks	CT HRS	Contact Periods per week			Total Credits	Mode of Exam	Mode of Teaching (Offline/ Online)
				Theory Slot				Practical Slot						L	T	P

				End Sem.	Proficiency in subject/ course	Mid Sem.	Quiz/ Assignment /Sessional		Lab work & Sessional	Skill based mini project									
7.	210217	Workshop – II	SEC- 3	-	-	-	-	20	20	10	50	4	-	-	4	2	-	Offline**	

UNIT-1 MODEL MAKING

Use of clay, Plaster of Paris, metal scrap, metal sheets, jute fibre etc. for study of forms through models. Making models of the various structural systems used in buildings like Space frames – using Match sticks, wires. Different forms of shell roofs using POP, Clay, Tensile structures using fabric, Origami Structures. Graphic's Models.

Exercise: Models of famous buildings out of above materials and techniques.

UNIT-2 MODEL MAKING WITH CNC

Use of a CNC machine in cutting boards. Different types of boards that are used. Working of CNC machine.

Exercise: Model Construction using CNC machine.

UNIT-3 INTRODUCTION TO ARCHITECTURAL MODEL MAKING AND BLOCK MODELLING

Introduction to concepts of model making and various materials used for model making Preparation of base for models using wood or boards. Introduction to block models of buildings (or 3D Compositions) involving the usage of various materials like Mount Boards, Clay etc. and the machines for cutting.

UNIT-4 DETAILED MODELLING

Making a detailed model which includes the representation of various building elements like Walls, Columns, Steps, Windows/glazing, Sunshades, using materials like Mount board, Snow-white board, and acrylic sheets. Representing various surface finishes like brick/stone representation, stucco finish etc. Various site elements– Contour representation, Roads/Pavements, Trees/Shrubs, Lawn, Water bodies, Street furniture, Fencing etc.

UNIT-5 PHOTOGRAPHY

Introduction to photography, use of camera, techniques in architectural photography.

COs & LOs for Workshop I

Overall Course Outcome: Students will be able to develop, draw simple and complex models in various materials using different techniques.

CO1	Students will be able to create a replica model.	LO1	Learn various materials used in model making.
		LO2	Understand the fundamentals structures and stabilization of structures.
		LO4	Replicate a Model of a building using the materials and techniques learned.
CO2	Students will be able to Construct models using a CNC machine.	LO1	Learn the mechanics of CNC machines.
		LO2	Understand different materials and their appropriate use in CNC machines.
		LO3	Construct a model using a CNC machine.
CO3	Students will be able to build architectural blocks and building models.	LO1	Learn various types of architectural models and materials that can be used.
		LO2	Build an architectural model of a small-scale building.
CO4	Students will be able to construct detailed models.	LO1	Learn the details of various architectural elements.
		LO2	Understand the construction details of various architectural elements.
		LO3	Weld a model or an abstract using the different processes and equipment.
CO5	Students will be able to click professional architectural photographs	LO1	Learn about various photography skills and cameras.
		LO2	Understand use of cameras
		LO3	Identify techniques in architectural photography.
		LO4	Exercise the techniques learned in clicking architectural photographs.

SECOND YEAR THIRD SEMESTER

1. Architectural Design – III (Code – 210311)

Objectives –

The course aims to obtain knowledge of Architecture as responding to site conditions, the designing process, spaces and relationship of architecture with personal traits, information and choices such as occupation, life style, religion etc.

S. No.	Subject Cod	Subject Name	Category	Maximum Marks Allotted							Total Mark s	CT HRS	Contact Periods per week			Total Credi ts	Mode of Exam	Mode of Teaching (Offline/ Online)
				Theory Slot				Practical Slot					L	T	P

1.	210311	Architectural Design – III	DC- 8	100	20	20	20	50	30	10	250	6	2	2	2*(1.5)	7	AO	Offline**

PROJECT 1(Prototype): TOWNHOUSE / VILLA

Study of contemporary practices & design for townhouses and villas in urban areas, to sensitize the students towards life style, individual preferences, space – activity relationship and exploration of how material, color, texture and light affect the quality of spaces is the main focus. It is also intended as an exercise in massing & configuration of façade elements such as the balancing of solids & voids, adoption of a system of proportioning and elements of contemporary detailing. This design exercise will also attempt to involve the student in the built form / open space relationship & explore the connectivity between indoor & outdoor spaces.

PROJECT 2(Prototype): NURSERY / PRIMARY / SECONDARY SCHOOL

Case studies on contemporary trends in school design to know how various architects have responded to the design program, site conditions, student age group etc. The project aims to enlighten the student on how the school design responds to various education philosophy and grooming methods. The analysis of important functional aspects such as space adequacy, circulation in the built form and play areas, locating the various spaces according to functional adjacency and careful design of toilet areas is intended. The objective is to also optimize the variables of the physical environment such as thermal comfort, daylighting and noise control in design.

PROJECT 3 & 4(Prototype): Time bound Problems of 6 hours to 48 hours.

COs & LOs for Architectural Design – III

Overall Course Outcome: The course aims to obtain knowledge of Architecture as responding to site conditions, the designing process, spaces and relationship of architecture with personal traits, information and choices such as occupation, life style, religion etc.

CO1	Students will be able to design townhouses and villas	LO1	Identify spaces responding to site condition and personal issues such as occupation, lifestyle, religion etc.
		LO2	Map gathered information of visited physical setting
		LO3	Explore the integration of indoor and outdoor areas.
		LO4	Produce sketches, models and photographs for analysis and design.
		LO5	Analyze the materials, construction techniques and structural systems used in the elements of built forms.
CO2	Students will be able to design buildings related to education philosophy.	LO1	Develop sensitivity towards existing habitat spaces with its building elements
		LO2	Analyze how school designs respond to various education philosophy and grooming methods with help of case studies.
		LO3	Explore the integration of classroom spaces with outdoor play areas in school buildings.
		LO4	Produce sketches, models and photographs for analysis and design.
		LO5	Design school buildings that respond to a particular educational philosophy.
CO3/CO4	Students will be able to maximize the potential of their designing skills within the period.	LO1	Understand the application of the architectural design process for medium scale projects of human habitat
		LO2	Transform the human behavioural needs into architectural program requirements
		LO3	Analyze the information on context and the human-space relationship
		LO4	Compose the architectural spaces in a design project in a given period.
		LO5	Communicate architectural drawings with the help of various mediums in given period.

REFERENCES:

1. Time saver standards for building types, De Chiara and Callender, Mc Grawhill company.
2. Neufert Architect's data, Bousmaha Baiche & Nicholas Walliman, Blackwell science ltd.

Note: minimum four design problems shall be introduced in the semester out of which, one major problem, one small problem and two shall be time bound problems.

Note: One design problem shall be given in the End Semester Examination. 6X2 hours examination.

2. Building Construction – II (Code - 210312)

Objectives –

The course aims to obtain knowledge about doors, windows, different types of materials and their use in construction, the different waterproofing, damp proofing materials & technology available & their application, the vertical transportation designing & detailing.

S. No.	Subject Cod	Subject Name	Category	Maximum Marks Allotted							Total Marks	CT HRS	Contact Periods per week			Total Credits	Mode of Exam	Mode of Teaching (Offline/ Online)
				Theory Slot				Practical Slot					L	T	P			
				End Term Evaluation		Continuous Evaluation		End Sem. Exam	Continuous Evaluation									
				End Sem.	Proficiency in subject/ course	Mid Sem.	Quiz/ Assignment /Sessional		Lab work & Sessional	Skill based mini project								
2.	210312	Building Construction -II	BSAE-	50	10	20	20	20	20	10	150	5	2	1	2*(1.5)	6	PP	Blended** (3/3)

UNIT-1 BUILDING MATERIALS

Ferrous and Non-Ferrous metals & Plastics

- Properties and uses: Aluminum, zinc, lead, copper.
- Properties and Architectural uses of plastics: Thermoplastics, thermosetting plastics and, Structural plastics – Reinforced plastics and Decorative laminates-plastic coatings, Adhesives, and sealants – Modifiers and Plasticizers – Fabrications of plastics.
- Primary plastic building products for walls, roof, and partitions.

UNIT- 2 DETAILS OF DOORS, WINDOWS & VENTILATORS

- Timber Doors and its Joints: Single, double-leaf, ledged braced & battened door, framed ledged braced battened door, Paneled door, flush door, and Composite door.
- Timbers Windows & ventilators: Casement(side hug & top hug), Sliding pivoted (horizontal and vertical) folding and bay windows, fixed light of different sizes and shapes.
- Combined doors and windows and ventilators.

UNIT-3 STAIRCASES AND LIFT

- Staircases: Types according to profile–straight flight, dog legged, quarter-turn half-turn, bifurcated, spiral & Helical.
- Lift: Vertical transportation. Types and details.

UNIT-4 DAMP PROOFING AND WATERPROOFING

- Damp proofing: Hot applied and cold-applied–Emulsified asphalt, Bentonite clay. Butyl rubber, silicones, Vinyl's, Epoxy resins and metallic waterproofing materials, their properties, and uses. Waterproofing: waterproofing membranes such as rag, asbestos, glass felt, plastic and synthetic rubber vinyl, butyl rubber, neoprene, polyvinyl chloride – prefabricated membranes sheet lead, asphalt their properties and uses.
- Application: Application of the above in the basement floor, swimming pool, and terraces.

UNIT-5 CLADDING SYSTEMS & FINISHES

- Types of Cladding systems – Stone, timber, weatherboard, Fiber cement, Brick, Vinyl, Metal (aluminum composite panels (ACP), Precast concrete cladding panel, Curtain wall, Rain screen wall system. Exterior insulation & Finishes.

COs & LOs for Building construction-II

Overall Course Outcome: Students will be able to **understand** the knowledge about doors, windows, different types of materials and their use in construction, the different waterproofing, damp proofing materials & technology available & their application, the vertical transportation designing & detailing.

CO1	Students will be able to understand the role of metal in structure technology .	LO1	Remember basic concepts metal, and its uses.
		LO2	Learn the properties of different metals.
		LO3	Understand its uses in the architecture industry.

		LO4	Analyze the types of Reinforced plastics and Decorative laminates-plastic coatings, Adhesives, and its uses.
		LO5	Evaluating its role for rooms, windows, roof lights, domes, gutters, and handrails..
CO2	Students will be able to demonstrate their understanding through application in design and detailing of doors, windows & ventilators.	LO1	Remember basic concepts regarding detailing of doors, windows & ventilators.
		LO2	Learn its types according to uses.
		LO3	Understand the detailing of doors, windows & ventilators.
		LO4	Analyze the various types of doors, windows & ventilators, their extensive uses in building construction.
		LO5	Draw all the elements of doors, windows & ventilators.
CO3	Students will be able to demonstrate their understanding through application in design and detailing of staircase & lifts.	LO1	Remember basic concepts regarding detailing of R.C.C staircases and masonry.
		LO2	Learn its types according to profile.
		LO3	Understand the detailing of staircases and Lift.
		LO4	Analyze the various types of staircases and masonry, their extensive uses in Building construction.
		LO5	Draw all the elements of staircases and lifts.
CO4	Students will be able to analyze damp proofing and waterproofing in the building with its application.	LO1	Learn basic concepts about damp roofing & waterproofing.
		LO2	Understand its various types of damp roofing.
		LO3	Apply it on a given live project.
		LO4	Analyze the market survey of different types of damp roofing & waterproofing material available in the market.
		LO5	Evaluating through case studies and drawings of selected building types.
CO5	Students will be able to analyze different cladding systems and finishes for the building.	LO1	Learn basic types of cladding material.
		LO2	Understand its uses on a project.
		LO3	Apply it on a given live project.
		LO4	Analyze the market survey of different types of cladding material available in the market.
		LO5	Evaluating through case studies and drawings of selected building types.

Note: Total five questions shall be asked. Each question will consist of two parts, one of which will be of 7 marks (which shall be compulsory) and another with 3 marks(which shall be optional).

3. Graphics –III (Code – 210313)

Objectives –

The course aims to obtain knowledge of various softwares used for drafting, 3D model making, rendering and presentation, such as AutoCAD, Revit, 3Ds MAX, Photoshop, CorelDraw, etc. according to the availability of experts.

S. No.	Subject Cod	Subject Name	Category	Maximum Marks Allotted							Total Marks	CT HRS	Contact Periods per week			Total Credits	Mode of Exam	Mode of Teaching (Offline/ Online)
				Theory Slot				Practical Slot					L	T	P			
				End Term Evaluation		Continuous Evaluation		End Sem. Exam	Continuous Evaluation									
				End Sem.	Proficiency in subject/ course	Mid Sem.	Quiz/ Assignment /Sessional		Lab work & Sessional	Skill based mini project								
3.	210313	Graphics -III	PAEC-1	-	-	-	-	20	20	10	50	6	-	-	6	3	SO	Offline**

UNIT-1 COMPUTER AS A DRAFTING TOOL

- Productivity tools in CAD, organization of layers for working drawings, use of blocks and symbols hatch patterns.
- Dimensioning systems extracting of areas from drawings, concept of paper space plotting the drawings

UNIT-2 COMPUTER AS A DESIGN TOOL

- Repetition of forms mirroring, coping and array, etc. calculation of areas, volumes.
- Creating and using templates, blocks, and symbols and using them in architectural drawings. - Managements of large drawing files.
- Working in a network environment-Security systems-converting drawing files into Internet compatible files.

UNIT-3 MEASUREMENT DRAWING WITH THE HELP OF CAD

- Exercise will be a group activity; to measure and draw the floor plan along with the plot boundaries, four side elevations, four sections and block plan, site plan of a large building or a settlement with the help of CAD.
- In addition to this drawing shall be prepared based on examples of buildings by giving a sketch design. Drawings shall be detailed enough to explain the complete design.

UNIT-4 VISUAL COMMUNICATION

- Photoshop: Creating and saving images, basic image editing, Photoshop toolbox and tools, using layers, special effects.
- 3-D Max/Sketchup: Creating simple models of buildings, basic editing, tools, effects, etc.

UNIT-5 INTRODUCTION TO RHINO

- Rhino: Creating and saving images, basic 3D development & parametric development.

COs & LOs for Graphics III

Overall Course Outcome: Students will be able to draft plans, elevations, sections, views and other details and render them to make them look professional.

CO1	Students will be able to apply basic commands in AutoCAD to draw objects.	LO1	Learn about computer-aided drawing.
		LO2	Understand the objects, blocks, symbols, hatch patterns in AutoCAD.
		LO3	Apply various tools in AutoCAD with reference to drawings.
		LO4	Draw objects using basic dimensioning, patterns, plotting, etc.
CO2	Students will be able to draw complex objects using complex commands in AutoCAD.	LO1	Learn various further complex commands in AutoCAD to design.
		LO2	Understand management of files, working in a network environment, etc.
		LO3	Design & Draw complex objects using commands learned.
CO3	Students will be able to draw measured drawings.	LO1	Learn the concept of measured drawing and details to be considered while doing measured drawing.
		LO2	Understand how AutoCAD can be used to measure drawings.
		LO3	Apply various commands of AutoCAD in measured drawings.
		LO4	Draw measured drawing of a building includes plans, elevations, sections etc.
CO4	Students will be able to use Photoshop to illustrate building plans, elevations, etc. professionally.	LO1	Learn various tools in Photoshop & 3D software.
		LO2	Understand use of commands in Photoshop & 3D software.
		LO3	Apply various commands to draw in Photoshop & 3D software.
		LO4	Draw components, complex composition, rendering of Plans, elevations, sections in Photoshop & 3D software.

Note: Exercises of measurement drawings may be clubbed with study tours.

4. Surveying and Leveling (Code – 210314)

Objectives –

The course aims to obtain knowledge of the basic process of land surveying and fundamentals of various types of surveys adopted in architecture and civil, use various surveying methods in practice, field survey and to prepare a layout for understanding.

S. No.	Subject Cod	Subject Name	Category	Maximum Marks Allotted							Total Marks	CT HRS	Contact Periods per week			Total Credits	Mode of Exam	Mode of Teaching (Offline/Online)
				Theory Slot				Practical Slot					L	T	P			
				End Term Evaluation		Continuous Evaluation		End Sem. Exam	Continuous Evaluation									
				End Sem.	Proficiency in subject/course	Mid Sem.	Quiz/Assignment/Sessional		Lab work & Sessional	Skill based mini project								
4.	210314	Surveying & Leveling	BSAE-	50	10	20	20	-	-		100	3	1	2	-	3	PP	Blended*** (2/1)

UNIT-1 SURVEYING

Aspects of surveying for the Architect. Surveying instruments classification by function. Useful data and formulae.

UNIT-2 SCALES

Scales-Plain scale, diagonal scale, comparative scale, shrunk scale, vernier scale.

UNIT-3 ACCURACY TEST AND INSTRUMENTS

Study, test, degree of accuracy, use and care of surveying instruments and accessories.

UNIT-4 SURVEY TECHNIQUES

Site survey techniques: Chain surveying, compass surveying, plain table, and theodolite.

UNIT-5 LEVELING AND CONTOURING

Basics of Leveling and contouring. Processes to level a highly undulated sites and contour a plain site.

Note: Class work and field work of the above subject should be oriented towards the layout of buildings. Students should also be taken to site visits for explaining the practical aspects of surveying.

COs & LOs for Surveying and Levelling

Overall Course Outcome: Students will be able to identify different survey techniques and will be able to use instruments used in survey to develop the layout of the building.

CO1	Students will be able to understand and apply surveying instruments and useful formulas used in surveying.	LO1	Learn various aspects of surveying for the Architect.
		LO2	Understand surveying instruments, useful data and formulae.
		LO3	Apply useful data and formula.
CO2	Students will be able to construct various scales used in surveying.	LO1	Study various scales used in surveying.
		LO2	Understand use of different scales.
		LO3	Construct various scales based on requirement.
CO3	Students will be able to apply surveying instruments for surveys.	LO1	Study use of surveying instruments and accessories.
		LO2	Understand the degree of accuracy of the surveying instrument.
		LO3	Apply surveying instruments and accessories used in different surveys.
CO4	Students will be able to apply site survey techniques and will learn how to make layout of buildings.	LO1	Learn different site survey techniques.
		LO2	Understand chain surveying, compass surveying, plain table, and theodolite.
		LO3	Apply different types of surveying for site surveys.
CO5	Students will be able to apply levelling and contouring on site surveys.	LO1	Learn about Levelling.
		LO2	Understand contouring.
		LO3	Develop Levelling and contouring on site survey.

5. History of Architecture-III (Code – 210315)

Objectives –

The course aims to obtain knowledge about the development of architecture in the ancient Europe and the culture and context which produced it such as climate, religion, social practices & the politics, the evolution of architectural form & space with reference to Technology, Style and Character using sketches as the principal method of learning - about the prehistoric world, Ancient Egypt, West Asia, Greece, Rome, Medieval times and Renaissance period.

				End Sem.	Proficiency in subject/ course	Mid Sem.	Quiz/ Assignment /Sessional		Lab work & Sessional	Skill based mini project								
5.	210315	History of Architecture-III	DC-9	50	10	20	20	-	-		100	3	2	1	-	3	PP	Blended* (2/1)

UNIT-1 GREEK ARCHITECTURE

Evolution of City states in Greece, the Hellenic & Hellenistic art & architecture, Evolution of the classical orders & the features of the Greek temple, the building of the Acropolis with one outstanding example of Doric (Parthenon), Ionic (Erechtheon) & Corinthian. Public architecture: Theatre of Epidauros and Agora, Optical illusions in Greek architecture.

UNIT-2 ROMAN ARCHITECTURE

Formation of Roman republic & Empire & influence of geology, culture & lifestyle. Roman architectural character using concrete, marble, travertine etc & masonry types used for walls. Tuscan & Composite orders, Roman forums and basilicas – methods of Vault & Dome construction with examples of Pantheon, Thermae of Caracalla, Colosseum, & Basilica of Constantine.

UNIT-3 EARLY CHRISTIAN & BYZANTINE ARCHITECTURE

Spread of Christianity, the evolution of early Christian Church form from the Roman basilica (St. Clemente), Centralized plan concept (St. San Vitale, Ravenna). The creation of eastern & western Roman Empire, the development of domes & pendentive, Byzantine architectural character with study of St. Sophia (Hagia Sophia) at Istanbul.

UNIT-4 ROMANESQUE & GOTHIC ARCHITECTURE

Romanesque period: Monastic orders & development of Craft and merchant guilds, Influences & architectural character of Romanesque churches in Italy (Pisa complex), France (Abbey Aux Hommes) and England (Tower of London) - Development of vaulting. Development of Gothic architecture in France, evolution of Gothic Cathedral & structural system using vaulting & flying buttress, the example of Notre dame cathedral at Paris.

UNIT-5 RENAISSANCE ARCHITECTURE IN EUROPE

Idea of rebirth and revival of classical architecture & the development of art & science. Italian renaissance character. Early renaissance & urban renaissance style and High renaissance period. Works of various artists and architects during the period (Andrea Palladio, Sir Christopher Wren, Michelangelo, Leonardo)

COs & LOs for HOA – III

Overall Course Outcome: Students will be able to **develop** an appreciation of various architectural movements and its chronology across the globe and the resulting architectural productions that are unique in time and place.

CO1	Students will be able to apply Greek architectural expressions in their own design.	LO1	Learn the evolution of Greek Dynasties & cities.
		LO2	Understand diverse artistic and architectural expressions in various periods of Greek Architecture.
		LO3	Illustrate visual and verbal vocabularies of Greek Architecture.
		LO4	Analyze Greek architectural forms and space through various examples.
		LO5	Reproduce with help of sketches/visuals (softwares)/3D (models) of various architectural forms and styles of Greek Architecture.
CO2	Students will be able to apply elements of Roman architecture in their own design.	LO1	Learn the evolution of Roman Empire, its cities and Architecture.
		LO2	Understand diverse artistic and architectural character in various parts of Roman Architecture.
		LO3	Illustrate visual and verbal vocabularies of Roman Architecture.
		LO4	Analyze Roman architectural forms and space through various examples.
		LO5	Reproduce with help of sketches/visuals (softwares)/3D (models) of various architectural forms and styles of Roman Architecture.
CO3	Students will be able to apply elements of Egyptian architecture in their own design.	LO1	Learn evolution of both Early Christian & Byzantine Architecture.
		LO2	Understand diverse artistic and architectural expressions in various periods of Early Christian & Byzantine Architecture.
		LO3	Illustrate visual and verbal vocabularies of Early Christian & Byzantine Architecture.
		LO4	Analyze Early Christian & Byzantine architectural forms and space through various examples.
		LO5	Reproduce with help of sketches/visuals (softwares)/3D (models) of various architectural forms and styles of Early Christian & Byzantine Architecture.
CO4	Students will be able to apply elements and concepts of West Asiatic Architecture in their own design.	LO1	Learn evolution of both Romanesque & Gothic Architecture.
		LO2	Understand diverse artistic and architectural expressions in various periods of Romanesque & Gothic Architecture.
		LO3	Illustrate visual and verbal vocabularies of Romanesque & Gothic Architecture.
		LO4	Analyze Romanesque & Gothic architectural forms and space through various examples.
		LO5	Reproduce with help of sketches/visuals (softwares)/3D (models) of various architectural forms and styles of Romanesque & Gothic Architecture.
CO5	Students will be able to apply elements of South East & East Asian architecture in their own design.	LO1	Learn the evolution of the Renaissance Architectural Movement.
		LO2	Understand diverse artistic and architectural expressions in various periods of Renaissance Architectural Movement.
		LO3	Illustrate visual and verbal vocabularies of Renaissance Architectural Movement.
		LO4	Analyze Renaissance Architectural Movement, its form and space through various examples.
		LO5	Reproduce with help of sketches/visuals (softwares)/3D (models) of various architectural forms and styles of Renaissance Architectural Movement.

6. Structures-III (Code – 210316)

Objectives –

The course aims to obtain understanding of the basic principles of limit state design in reinforced concrete structural systems and the interpretation of detail structural drawings for the purpose of construction, the structural behavior of RCC buildings from an architect's perspective and hence does not delve into the process of detailed structural analysis design which is the forte of the structural engineer.

S. No.	Subject Cod	Subject Name	Category	Maximum Marks Allotted							Total Mark s	CT HRS	Contact Periods per week			Total Credi ts	Mode of Exam	Mode of Teaching (Offline/ Online)
				Theory Slot				Practical Slot					L	T	P			
				End Term Evaluation		Continuous Evaluation		End Sem. Exam	Continuous Evaluation									
				End Sem.	Proficiency in subject/ course	Mid Sem.	Quiz/ Assign ment /Sessional		Lab work & Sessional	Skill based mini project								
6.	210316	Structure-III	BSAE- 7	50	10	20	20	-	-		100	3	2	1	-	3	pp	Offline***

UNIT- 1 FOUNDATIONS IN BUILDINGS

Soil load bearing capacity – concept of RCC spread footing - Types of R.C.C. foundation – Individual, Combined, Strip footings – Raft foundation (Theory only) – Eccentric footings with projection on one side only- the situations in which the various footings are used – friction pile foundation used in clayey soil (section & understanding of the principle)- pile foundation used in sandy soil & the pile foundation used in multi-storied buildings (section & principle only). Interpretation of typical structural details in foundation drawings .Site visits necessary for understanding the above.

UNIT – 2 ROOF SLABS & STAIRCASE

Exposure to the basic design concepts of Limit state method of design – recommendations in the code book - Classification of slabs – Estimation of loads – Design of one way, two way, circular and continuous slabs using SP – 16(Theory only). Interpretation of reinforcement details in a typical structural drawing for one way, two way slab & continuous slab. Understanding the reinforcement details for a RCC waist slab in dog legged staircase and for a folded slab staircase using typical structural drawings.

UNIT-3 BEAMS & LINTELS

Exposure to the basic design concepts - Estimation of loads on beams – Transfer of load from slab to beam – Understanding the design of simply supported beams, cantilevered & continuous beams using code coefficients & detailing using SP-16 for the design (Theory only). Steel detailing of beams for earthquake proofing (section only) – the function of plinth beam belt & continuous lintel belt –ring beam for RCC dome roof, typical reinforcement detail for waffle (coffer) slab (section only).Site visits to understand typical details in RCC slabs & beams.

UNIT - 4 COLUMNS

Understanding the estimation of loads on columns – Load transfer from slab and beam to columns. Structural behavior of Long and short columns –Distinction between rectangular and circular columns – Difference between columns subjected to uniaxial and those subjected to bi-axial bending. Knowledge about the design of columns using column interaction diagrams (Theory only) – Use of SP-16 for reinforcement detailing. Interpretation of typical structural drawing for columns & footings.

UNIT- 5 FLAT SLABS

Understanding the situations in which flat slabs are used - advantages of flat slab construction. Components of flat slab – Configuration of columns – Design of flat slab by direct design method as per BIS codes (Theory only). Site visit to understand flat slab construction.

COs & LOs for Structure - IV

Overall Course Outcome: Students will be able to design and interpret the structural systems for all reinforced concrete structures using the limit state design method for structural analysis.

CO1	To interpret the structural design process and analyse design of RCC foundations for the purpose construction	LO1	Learn the principles of structural design process for RCC foundations
		LO2	Classify the types of foundations, soil capacity and loads in design of foundations
		LO3	Outline the features of IS code provisions regarding limit state method for designing RCC foundations
		LO4	Interpret the typical structural details in foundation design
		LO5	Asses the working of structural details through site visit
CO2	To analyse the structural design details and reinforcement of RCC slabs and staircase for the purpose of construction	LO1	Learn the principles of structural design method for Slabs and staircase
		LO2	Identify the types of RCC slabs and RCC staircases and their design considerations
		LO3	Outline the features of IS code provisions regarding limit state method for designing slabs and staircases foundations
		LO4	Interpret the typical structural and reinforcement details in slab (one way, two way, continuous) /staircase design , (waist slab, folded slab etc)
		LO5	Asses the working of reinforcement details through site visit
CO3	To interpret the load calculation for structural design of beams and lintel in RCC structure and analyse their structural design details for the purpose of construction	LO1	Learn the principles of structural design method for Beams and lintel
		LO2	Outline the features of IS code provisions regarding limit state method for designing beams and lintel in RCC structures
		LO3	Evaluate the load considerations for design of beams and lintel in RCC structures
		LO4	Interpret the typical structural details for beams in special conditions such as earthquake resistant buildings, plinth beam, ring beam, coffer slab etc
		LO5	Asses the working of structural details through site visit
CO4	To interpret the structural design of columns in RCC structure and the design details using column interaction diagram	LO1	Learn the principles of structural design method for column in RCC structure
		LO2	Outline the features of IS code provisions regarding limit state method for designing columns in RCC structures
		LO3	Evaluate the load considerations, transfer of load and their structural behaviour for design of columns in RCC structure
		LO4	Interpret the typical structural details for column and the difference between various columns using column interaction diagram
		LO5	Asses the working of structural details through site visit
CO5	To interpret the design of flat slab and their structural details	LO1	Learn the principles of structural design method for Flat slab
		LO2	Outline the features of IS code provisions regarding limit state method for designing beams and lintel in RCC structures
		LO3	Evaluate the need of flat slab in structures and their component and design consideration
		LO4	Interpret the typical structural details for flat slab
		LO5	Asses the working of structural details through site visit

8. Biology for Architects (Code – 210310)

Objective – The course aims to obtain understanding of the basic principles of biomimicry, and use of biomimicry in architecture, relation of biomimicry to building, skin and introduce students to principles of sustainability.

S. No.	Subject Cod	Subject Name	Category	Maximum Marks Allotted							Total Marks	CT HRS	Contact Periods per week			Total Credits	Mode of Exam	Mode of Teaching (Offline/ Online)
				Theory Slot				Practical Slot					L	T	P			
				End Term Evaluation		Continuous Evaluation		End Sem. Exam	Continuous Evaluation									
				End Sem.	Proficiency in subject/ course	Mid Sem.	Quiz/ Assignment /Sessional		Lab work & Sessional	Skill based mini project								
8.	210310	iology for Architect	MAC-1	50	10	20	20	-	-	-	100	2	2	-	-	Grade	PP	Blended* (2/1)

UNIT 1 INTRODUCTION TO BIOMIMICRY

History of biomimicry, Biomimetic, Bionics, various types of Biomimicry. Concept of Biomimicry Approaches to Biomimicry. Principles and levels of Biomimicry.

UNIT 2 NATURAL PATTERNS & BIOMIMICRY

Various patterns in nature, Understanding Biomimicry: theory and case studies, building elements as cells in biology, Patterns of Biophilia.

Exercise: Observe and sketch interesting natural patterns in nature. Using one pattern as inspiration, digitally draw the basic element and tessellate it using arrays (linear, polar) and grids (rectangular, triangular, hexagonal, etc.), creating variations similar to those observed in nature.

UNIT 3 SKIN: 3D PATTERNS & BIOMIMICRY

3D Patterns, use of 3D patterns in biomimicry, the impact of use of biomimicry on reducing the buildings energy consumption, buildings interaction with the environment.

Exercise: Develop 3D modeling skills by sculpting surfaces and wrapping patterns that adjust to varying conditions around the building.

UNIT 4 SUSTAINABILITY IN ARCHITECTURE

History, theory and types. Impact of the built environment on nature. Process of making construction process and maintenance of a building sustainable.

UNIT 5 INTEGRATING BIOLOGY IN DESIGN

Application of Biology in the design process along with design exercise to realize the process of discovering biological inspiration and its application.

COs & LOs for Biology for Architects			
Overall Course Outcome: Students will be able to understand the biological behaviour and inspiration for designing buildings and their methods of designing.			
CO1	Students will be able to Define basic elements and principles of biomimicry approaches	LO1	Understand elements of nature for the purpose of problem solving
		LO2	Memorize the historical concepts of biomimicry
		LO3	Relate concepts of biomimetic with built environment
		LO4	Learn principles of biomimicry
		LO5	Express in the form of presentations, concepts and approaches to biomimicry
CO2	Students will be able to Analyse natural environment and surrounding to achieve biomimicry in architecture	LO1	Relate cell as in science to the built form
		LO2	Appraise movements, stillness & patterns in nature
		LO3	Summarize established theories and concept like biophilia, prospect and refuge and more
		LO4	Observe natural elements as an inspiration for designs and composition
		LO5	Compose of basic natural element in digital or manual formats
CO3	Students will be able to Experiment three dimensional patterns to achieve low energy consumption in buildings	LO1	Link the three dimensional spaces, patterns with biomimetic architecture
		LO2	Integrate use of biomimicry for energy efficiency of buildings
		LO3	Validate with study of case examples for relationship between building and environment
		LO4	Stimulate textures, patterns inspired from nature, on and around built forms
CO4	Students will be able to Apply theories and concepts of sustainability to built form and surroundings	LO1	Define sustainability in each field incorporating architecture studies
		LO2	Understand the design philosophy behind the history of sustainable architecture
		LO3	Infer from various environmental impact assessment reports
		LO4	Programme building that are sustainable and have ease of construction
CO5	Students will be able to Design in and around the built structures, without harming our ecosystem	LO1	Learn of designing comfortable spaces
		LO2	Apply different strategies to achieve sustainable goals
		LO3	Play with locally available material according to site and design development
		LO4	Build a methodology to integrate biology in design

SECOND YEAR FOURTH SEMESTER

1. Architectural Design – IV (Code – 210413)

Objectives –

The course aims to obtain knowledge of Architecture as responding to Social issues such as community, Culture, religion, politics etc, designing for special groups such as the villagers, elderly, and the handicapped.

S. No.	Subject Cod	Subject Name	Category	Maximum Marks Allotted							Total Marks	CT HRS	Contact Periods per week			Total Credits	Mode of Exam	Mode of Teaching (Offline/ Online)
				Theory Slot				Practical Slot					L	T	P			
				End Term Evaluation		Continuous Evaluation		End Sem. Exam	Continuous Evaluation									
				End Sem.	Proficiency in subject/ course	Mid Sem.	Quiz/ Assignment /Sessional		Lab work & Sessional	Skill based mini project								
1.	210413	Architectural Design – IV	DC- 10	100	20	20	20	50	30	10	250	6	2	2	2*(1.5)	7	AO	Offline**

PROJECT 1(Prototype): VILLAGE SURVEY & RURAL HOUSING

Study of the physical, socio economic and cultural aspects of a selected village by conducting various surveys to understand the settlement pattern, housing stock and amenities that are existing or required – To understand the linkages between Occupation, Social structure and Religious beliefs and its physical manifestation in the form of the settlement – Identification of a suitable Design intervention that would improve the quality of life – Ex. Design of housing prototypes for a particular community / occupation using rural building materials & cost effective technology. Design exercise may include the design of any facility required such as Primary health center / Community hall / Farm training center, etc.

PROJECT 2(Prototype): DESIGN OF COMMUNITY FACILITIES

Community facilities –Design of Community hall, Nursing home, Youth hostel, Old age home etc., encourage the student to explore concepts of an agglomeration of simple spaces with particular emphasis on the special needs of elderly, handicapped etc. It also focuses on the bioclimatic approach to the design of the building envelope i.e. articulation of openings, choice of materials for roof & walls of different orientations etc. Concepts integrating the use of passive, active & hybrid solar technologies with the design proposals are encouraged.

PROJECT 3 (Prototype): Time bound Problems of 6 hours to 48 hours.

COs & LOs for Architectural Design – IV (Code –210401)

Overall Course Outcome: The course aims to obtain knowledge of Architecture as responding to Social issues such as community, culture, religion, politics etc, designing for special groups such as the villagers, elderly, and the handicapped.

CO1	Students will be able to analyze data collected with relevance to the project by identification of a suitable design intervention that would improve the quality of life.	LO1	Explain the Settlement pattern in village and socio-cultural, geographic and economic aspects that shape the built environment.
		LO2	Analyse design of any rural settlement that evolved organically over a period.
		LO3	Analyse housing typology, locally available materials, artisanship and integration of landscape with the built environment.
		LO4	Explore concepts of agglomeration of simple spaces with particular emphasis on the special needs of elderly, handicapped, etc.
		LO5	Develop presentation of concepts through 2D and 3D presentation including sketches and models.
CO2	Students will be able to explore concepts and agglomeration of simple spaces with particular emphasis on the special needs of elderly, handicapped, etc.	LO1	Demonstrate the learning of the previous study.
		LO2	Collect data from standards, case studies and site visits for the current project.
		LO3	Analyse data collected with relevance to the current project
		LO4	Integrate learning from other allied subjects to the design proposal
		LO5	Complete the architectural project with all given requirements for the given project.
CO3/CO4	Students will be able to maximize the potential of designing within the period.	LO1	Understand the application of the architectural design process for adequate scale projects of human habitat
		LO2	Transform the human behavioural needs into architectural program requirements
		LO3	Analyse the information on context and the human-space relationship
		LO4	Compose the architectural spaces in a design project in a given period.
		LO5	Communicate architectural drawings with the help of various mediums in a given period.

5. New Metric Handbook – Patricia Tutt and David Adler – The Architectural Press.

Note: Design exercises that explore Architecture as responding to Social issues such as community, culture, religion, politics etc. Students familiarize themselves with designing for special groups such as the villagers, elderly, and the handicapped.

Note: One design problem shall be given in the End Semester Examination. 6X2 hours examination.

2. Building Construction – III (Code – 210414)

Objectives –

The course aims to obtain knowledge of the preparation of concrete, construction methods, special concrete and concreting methods, the properties and its use in foundation, beams and slabs, various exterior finishes and advanced structural systems.

S. No.	Subject Cod	Subject Name	Category	Maximum Marks Allotted							Total Marks	CT HRS	Contact Periods per week			Total Credits	Mode of Exam	Mode of Teaching (Offline/ Online)
				Theory Slot				Practical Slot					L	T	P			
				End Term Evaluation		Continuous Evaluation		End Sem. Exam	Continuous Evaluation									
				End Sem.	Proficiency in subject/ course	Mid Sem.	Quiz/ Assignment /Sessional		Lab work & Sessional	Skill based mini project								
2.	210414	Building Construction –III	BSAE-	50	10	20	20	50	30	20	200	5	2	1	2*(1.5)	6	PP	2.

UNIT-1 BUILDING MATERIALS

Concrete: Various types of cement concrete, its properties, and uses. Proportioning of concrete, grading of aggregates, water-cement ratio, and workability of concrete, Estimating yield concreting. Formwork for concreting, mixing, transporting and placing, consolidating and curing of concrete. Types of Special concrete and concreting method, concrete block and its uses. Glass: Curtain walls & glass block construction

UNIT -2 RCC FOUNDATION

Introduction to RCC framed structures, concrete foundation: Types of footing – Isolated, combined, continuous, strip raft & piles. Pile foundation: Definition, functions, and Design factors. Tool equipment and plants for piling. Precast pile – timber, concrete, and steel Friction pile and bearing pile bore pile. Cast in situ & Steel and Concrete, Pile Cap

UNIT-3 BEAMS AND SLABS

Concrete slabs: One-way, two ways, continuous & cantilever. Detailing of Slabs: One-way slabs, 2-way slab, continuous, flat slab. Concrete beams: Singly reinforced, doubly reinforced, cantilever & continuous beams. R.C.C: Column, beams, slabs, lintel, chajja, staircase, canopy, coffer slab & pergola.

UNIT-4 RETAINING WALL, EXPANSION JOINTS, AND

Detailing of R.C.C. retaining wall. Expansion Joints: Walls, roofs, and flooring. Detailing of apertures (lintels, sunshades, arches). Study of Various types of precast concrete blocks, their extensive uses in Building construction. Exercises of the above through case studies and drawings of selected building types.

UNIT-5 CLADDING SYSTEMS & FINISHES

- Types of Cladding systems – Stone, timber, weatherboard, Fiber cement, Brick, Vinyl, Metal (aluminum composite panels (ACP), Precast concrete cladding panel, Curtain wall, Rain screen wall system. Exterior insulation & Finishes.

COs & LOs for Building Construction –III

Overall Course Outcome: Students will be able to **understand** the preparation of concrete, construction methods, special concrete and concreting methods, the properties and its use in foundation, beams and slabs, various exterior finishes and advanced structural systems.

CO1	Students will be able to understand the role of concrete in structure technology .	LO1	Remember basic concepts: Various types of cement concrete, its properties, and uses.
		LO2	Learn the proportioning of concrete, grading of aggregates, water-cement ratio, and workability of concrete,
		LO3	Understand the estimating yield concreting. Formwork for concreting, mixing, transporting and placing, consolidating and curing of concrete.
		LO4	Analyze the types of Special concrete and concreting method, concrete block and its uses.
		LO5	Evaluating role of concrete on site investigations, layout, site organization.
CO2	Students will be able to understand the technicality behind the foundation of a structure and its type.	LO1	Learn basic concepts regarding RCC framed structures, concrete foundations.
		LO2	Understand the types of footing – Isolated, combined, continuous, strip raft & piles.
		LO3	Apply the techniques of foundation on site investigations, layout, site organization.
		LO4	Analyze the types of footing – Isolated, combined, continuous, strip raft & piles on a project.
		LO5	Draw all the elements of footing and its type.
CO3	Students will be able to analyse different types of slab and its different types on a structure.	LO1	Learn basic concepts concrete slabs in a structure.
		LO2	Understand the detailing of Slabs and its type - One-way slabs, 2-way slab, continuous, flat slab.
		LO3	Apply the detailing of Slabs on site investigations, layout, and site organization.
		LO4	Analyze the types of slabs one-way slabs, 2-way slab, continuous, flat slab on a project.
		LO5	Draw all the elements of slab and its type.
CO4	Students will be able to demonstrate their understanding through application in working drawing of basements ,retaining wall expansion joints.	LO1	Remember basic concepts regarding detailing of R.C.C. retaining wall..
		LO2	Learn the expansion Joints: Walls, roofs, and flooring..
		LO3	Understand the detailing of apertures (lintels, sunshades, arches).
		LO4	Analyze the various types of precast concrete blocks, their extensive uses in Building construction.
		LO5	Evaluating through case studies and drawings of selected building types.
CO5	Students will be able to analyse different finishing material in a project	LO1	Learn basic types of cladding material.
		LO2	Understand its uses on a project.
		LO3	Apply it on a given live project.
		LO4	Analyze the market survey of different types of cladding material available in the market.
		LO5	Evaluating through case studies and drawings of selected building types.

Note: Total five questions shall be asked. Each question will consist of two parts, one of which will be of 7 marks (which shall be compulsory) and another with 3 marks(which shall be optional).

3. Building Services-I (Water supply & Sanitation) (Code – 210415)

Objectives –

The course aims to obtain knowledge of water supply and waste water management, in residential units, small campus, and commercial buildings, plumbing layouts for various building typology, and best practices for Solid waste management.

S. No.	Subject Cod	Subject Name	Category	Maximum Marks Allotted							Total Marks	CT HRS	Contact Periods per week			Total Credits	Mode of Exam	Mode of Teaching (Offline/ Online)

				End Sem.	Proficiency in subject/course	Mid Sem.	Quiz/ Assignment /Sessional		Lab work & Sessional	Skill based mini project								
3.	210415	Building Services-I (Water Supply & Sanitation)	BSAE-	50	10	20	20	-	-		100	3	2	1	-	3	PP	Offline***

UNIT-1 WATER SUPPLY

Sources of water supply – Water Quality - Water requirements for different types of buildings and for town, simple method of removal of impurities, pit. System of supply - continuous and intermittent supply, sump, overhead tanks, pumps, distribution pipes, cold water and hot water supply for single and multi-storied buildings. Pipes sizes, types – GI, CPVC, Copper, Cast Iron (CI) Pipes, Steel Pipes, Asbestos Cement (AC) Pipe, Concrete Pipes fittings, valves, and types of taps.

Rainwater harvesting to include roof top harvesting, type of spouts, sizes of rainwater pipes and typical detail of a water harvesting. Surface water runoff

UNIT-2 DRAINAGE AND SEWAGE DISPOSAL

Recycling/Reuse of Wastewater, Systems of drainage – separate, combined and partially separate system, surface drainage, sizes and construction, system of plumbing - single stack, one pipe system, one pipe partially ventilating system and two pipe system.

House drainage – principles, traps-floor trap, multi-trap, gully trap, grease and oil trap, Anti Siphonage pipe, Types of fixtures and materials, Arrangements of fixtures in a bathroom. Design of Septic tank, Treatment and disposal of septic tank effluents – Design of soak pit and dispersion trench, Biological filter, up flow anaerobic reactors

Sewage treatment technologies: Activated sludge process, Membrane bioreactors, packaged treatment plants, Root zone treatment system, Decentralized Wastewater Treatment Systems (DEWATS), Soil Bio technology

UNIT-3 SOLID WASTE DISPOSAL

Solid waste management: Generation of Solid waste, Collection & Transportation of solid waste to the secondary/ locality storage/community bins, Storage of solid waste at locality level, Transport of solid waste to dumping sites and treatment plants, Treatment and Dumping of Solid Waste, Methods of Disposal of solid waste

Approaches to Solid Waste Management: Waste minimization / reduction at source, recycling, waste processing (with recovery of resources and energy), waste transformation (without recovery of resources) and disposal on land.

UNIT-4 EMERGING PROCESSING TECHNOLOGIES

Emerging processing technologies : Vermicomposting, Biogas from MSW, Pyrolysis (including plasma arc technology), refuse derived fuel, Bioreactor landfill - Biomethanation plant at koyambedu, wholesale vegetable market Chennai, Door-to-door collection, transportation and waste processing services by Exnora Green pammal.

UNIT-5 PLUMBING LAYOUT OF SIMPLE BUILDINGS

Designing of toilet blocks in residential and public buildings, showing complete details of fittings and plumbing required for water supply and drainage.

Designing and preparing a complete water supply and drainage layout of an academic Architectural design project, with all required calculations.

COs & LOs for BUILDING SERVICES-I

Overall Course Outcome: The overall aim of the course is to introduce students to the various water supply and sanitation systems in building of various scales and also to make them understand plumbing layouts, knowledge of plumbing and sanitation fixtures and their sustainable applications in buildings.

CO1	Students will be able to identify the significance of water supply in urban and rural areas, its methods and requirements.	LO1	Define the need of water supply and water requirements in different types of buildings.
		LO2	Observe the methods of water supply in metropolitan areas, methods of rainwater harvesting in buildings.
		LO3	Identify the types of apparatus required for water supply, sizes, availability, capacity and energy required to install water supply systems in a building.
		LO4	Evaluate the sustainable methods in the process.
CO2	Students will be able to develop the understanding of drainage systems in buildings and its application	LO1	Define the types of sanitary wastes generated in various types of building and methods of disposal,
		LO2	Observe the types of drainage systems, and methods of recycling various types of wastes (dry or wet)
		LO3	Identify the types of apparatus required for drainage and sanitation fixtures, sizes, availability, capacity and energy required to install drainage systems in a building.
		LO4	Evaluate the requirements of septic tanks, waste water recycling systems
CO3	Students will be able to analyse the significance of solid waste management in cities and their sustainable methods	LO1	Define the types of solid wastes generated in various types of buildings
		LO2	Observe the methods of waste segregation, their classification and methods of disposal.
		LO3	Identify process of waste at city level, locality and approaches to waste management
		LO4	Analyse sustainable methods of waste management in cities.
CO4	Students will be able to evaluate the sustainable methods of processing solid waste and strategies for waste management at city level	LO1	Compare the existing trends in waste recycling and waste disposal in cities
		LO2	Analyse the significance of vermin composting, biogas, recycling units etc. and their application
		LO3	Evaluate the strategies for waste management at metropolitan level through case studies
CO5	Students will be able to compare and develop the plumbing layout of various types of building.	LO1	Evaluate the plumbing layout of any existing building
		LO2	Evaluate the drainage layout of any existing building
		LO3	Prepare the sanitation and plumbing layout for buildings of various scales

4. History of Architecture-IV (Code- 210416)

Objectives –

The course aims to obtain knowledge of Design philosophies of colonial, post independent and contemporary architecture in Indian context, modern design philosophies in the evolution of innovative architectural forms and designs, the effect of industrial revolution on architecture.

S. No.	Subject Code	Subject Name	Category	Maximum Marks Allotted							Total Marks	CT HRS	Contact Periods per week			Total Credits	Mode of Exam	Mode of Teaching (Offline/ Online)
				Theory Slot				Practical Slot					L	T	P			
				End Term Evaluation		Continuous Evaluation		End Sem. Exam	Continuous Evaluation									
				End Sem.	Proficiency in subject/ course	Mid Sem.	Quiz/ Assignment /Sessional		Lab work & Sessional	Skill based mini project								
4.	210416	History of Architecture-IV	DC- 11	50	10	20	20	-	-		100	3	2	1	-	3	PP	Blended* (2/1)

UNIT-1 INDUSTRIAL REVOLUTION

Impact of the Industrial Revolution on Architectural practices. Transformation from iron to steel and the demand for a new Architecture.

UNIT -2 MODERNISM

Context of Origin; Characteristics; Key Movements – Arts and Crafts, Constructivism, Bauhaus, Expressionism, International Style, Minimalism, Brutalism. Works of notable conforming Architects: Frank Lloyd Wright, Ludwig Mies van der Rohe, Le Corbusier, Walter Gropius, Oscar Niemeyer and Alvar Aalto.

UNIT-3 DECONSTRUCTIVISM

Origin and influences breaking away from Modernism and Postmodernism, Deconstructivist philosophy. Influence on Architectural practice; Works of notable conforming Architects: Frank Gehry, Daniel Libeskind, Rem Koolhaas, Peter Eisenman, Coop Himmelb(l)au, and Bernard Tschumi.

UNIT-4 NEO-MODERNISM AND OTHER POST-POST MODERN REACTIONS

Origin and Characteristics, Other associated movements: Metamodernism, Re-modernism, Neo-futurism, Neo- Historicism. Works of Richard Meier, Charles Gwathmey, I.M. Pei, Tadao Ando, ZahaHadid, and Santiago Calatrava.

UNIT-5 COLONIAL, POST COLONIAL CONTEMPORARY INDIAN ARCHITECTURE

Architecture in colonial India and post independence, Indo-Saracenic Architecture, Modernism and Works of notable contemporary Architects.

COs & LOs for HOA – IV

Overall Course Outcome: Students will be able to **develop** an appreciation of various architectural movements, revolutions & styles across the globe, its chronology, typology and the resulting architectural forms that are unique in time and place.

CO1	Students will be able to apply Industrial revolution architectural expressions in their own design.	LO1	Learn the evolution of the Industrial revolution and its relation with architecture.
		LO2	Understand diverse artistic and architectural expressions in various periods of Industrial revolution.
		LO3	Illustrate visual and verbal vocabularies of Industrial revolution.
		LO4	Analyze Industrial revolution forms and space through various examples.
		LO5	Reproduce with help of sketches/visuals (softwares)/3D (models) of various architectural forms and styles of Industrial revolution.
CO2	Students will be able to apply elements of modernism style in Architecture in their own design.	LO1	Learn evolution of modernism style in Architecture.
		LO2	Understand diverse artistic and architectural character in modernism style in Architecture.
		LO3	Illustrate visual and verbal vocabularies of modernism style in Architecture.
		LO4	Analyze modernism style in architecture through forms and space and various examples.
		LO5	Reproduce with help of sketches/visuals (softwares)/3D (models) of various architectural forms of modernism style in Architecture.
CO3	Students will be able to apply elements of Deconstructivist style in Architecture in their own design.	LO1	Learn evolution of Deconstructivist style in Architecture.
		LO2	Understand diverse artistic and architectural character in De-constructivism style in Architecture.
		LO3	Illustrate visual and verbal vocabularies of De-constructivism style in Architecture.
		LO4	Analyze De-constructivism style in Architecture through forms and space and various examples.
		LO5	Reproduce with help of sketches/visuals (softwares)/3D (models) of various architectural forms of De-constructivism style in Architecture.
CO4	Students will be able to apply elements and concepts of Neo-modernism & Postmodernism reactions in Architecture in their own design.	LO1	Learn evolution of Neo-modernism & Postmodernism reactions in Architecture.
		LO2	Understand diverse artistic and architectural character in Neo-modernism & Postmodernism reactions in Architecture.
		LO3	Illustrate visual and verbal vocabularies of Neo-modernism & Postmodernism reactions in Architecture.
		LO4	Analyze Neo-modernism & Postmodernism reactions in architecture through forms and space and various examples.
		LO5	Reproduce with help of sketches/visuals (softwares)/3D (models) of various forms of Neo-modernism & Postmodernism reactions in Architecture.
CO5	Students will be able to apply elements of Colonial, Post-Colonial & Contemporary style in Indian Architecture in their own design.	LO1	Learn evolution of Colonial, Post-Colonial & Contemporary style in Indian Architecture.
		LO2	Understand diverse artistic and architectural character in Colonial, Post-Colonial & Contemporary style in Indian Architecture.
		LO3	Illustrate visual and verbal vocabularies of Colonial, Post-Colonial & Contemporary style in Indian Architecture.
		LO4	Analyze Colonial, Post-Colonial & Contemporary style in Indian Architecture through forms and space and various examples.
		LO5	Reproduce with help of sketches/visuals (softwares)/3D (models) of various architectural Colonial, Post-Colonial & Contemporary style in Indian Architecture.

5. Structures-IV (Code – 210417)

Objectives –

The course aims to obtain knowledge about the structural behavior of various types of steel structural systems those are commonly employed in the building construction industry presently, methods those are used to design a steel structural system for a specific condition & loading. Interpretation of structural detail drawings in the site is also intended.

S. No.	Subject Cod	Subject Name	Category	Maximum Marks Allotted							Total Marks	CT HRS	Contact Periods per week			Total Credits	Mode of Exam	Mode of Teaching (Offline/ Online)
				Theory Slot				Practical Slot					L	T	P			
				End Term Evaluation		Continuous Evaluation		End Sem. Exam	Continuous Evaluation									
				End Sem.	Proficiency in subject/ course	Mid Sem.	Quiz/ Assignment /Sessional		Lab work & Sessional	Skill based mini project

UNIT- 1 PROPERTIES OF STEEL SECTIONS & TYPES OF CONNECTIONS

Introduction Properties of Indian standard rolled steel section – Use of IS 800 and steel tables – Permissible stresses in tension, compression and shear. Connections: Welded and bolted connections – Types of failure – Design of welded and bolted connections for members subjected to axial forces. Site visit to a steel fabrication unit.

UNIT-2 TENSION AND COMPRESSION MEMBERS

Steel structures – Identification of tension and compression members in trusses & girders– Understanding the process of design of single angle and double angle sections in tension– understanding the method to design compression members – signify change of Slenderness ratio– Design of simple and compound sections (Theory only) – Design of lacings and battens.

UNIT -3 STEEL BEAMS

Identification of principal & secondary beams in a structural system - Allowable stresses in Principal beams, General specifications for steel beams, Understanding the design process for simply supported & cantilevered beams – Comprehending the design of laterally supported beams.(Simple problems).

UNIT-4 STEEL TRUSSES & GIRDERS

Study of the various types of roof trusses & where a particular truss can be used – Selection of trusses according to the span – Estimation of gravity loads and wind loads on roof – Use of BIS and book SP-38 in analyzing and design of trusses – gusseted plate connections (Theory Only).

UNIT-5 INTRODUCTION TO LONG SPAN STEEL STRUCTURAL SYSTEMS

Space frame structural system in tubular steel – various types of connectors – single / double & triple grid space frames and the span for which they can be employed – various types of space frame configurations. Tensile structural systems using steel cables – Examples of space frame & tensile structural systems.

COs & LOs for Structure - III

Overall Course Outcome: Students will be able to understand the structural behaviour of steel in construction of buildings and their methods of designing.

CO1	Student will be able to understand the behaviour of steel in construction, its forms and use in different structures	LO1	Learn the common properties of structural steel
		LO2	Identify the types of stresses in steel construction
		LO3	Outline the features of IS code provisions regarding use of steel in construction
		LO4	Evaluate the details for welded connections in steel construction and types of failures in design of steel structure
		LO5	Asses the working of structural details through site visit
CO2	Student will be able to understand the methods of designing angle sections, single and compound sections, compression members, lacings and battens	LO1	Identify the types of tension and compression members in steel trusses and girders
		LO2	Analyse the methods of designing angle sections in tension members, compression members and design of lacing and battens
		LO3	Outline the features of IS code provisions for designing with steel members
		LO4	Interpret the working details of tension and compression members in steel construction
		LO5	Asses the working of design through site visit
CO3	Student will be able to comprehend the design of principle and secondary beams in steel construction	LO1	Learn the principle and secondary beams in structural systems
		LO2	Outline the general specifications for steel beams
		LO3	Evaluate the load considerations for design of beams and lintel in RCC structures
		LO4	Interpret the design process for cantilever and simply supported beams in steel construction and design of laterally supported beams through solving simple problems
		LO5	Asses the working of structural details through site visit
CO4	Student will be able to comprehend the types, selection, estimation of load and designing of steel trusses and girders for construction	LO1	Understand the use of steel girders and its types
		LO2	Analyse selection of trusses on the basis of span of roof
		LO3	Outline the features of IS code provisions for design of trusses
		LO4	Evaluate the various loads and typical structural details for design of steel trusses and girders along with load considerations
		LO5	Asses the working of structural details through site visit
CO5	Student will be able to learn about the use of steel in construction of various long span structures	LO1	Classify the types of long span structural systems in steel
		LO2	Identify the connectors in space frame structures and types of space frame configurations
		LO3	Evaluate the applications of space frame structures and tensile structures through examples
		LO4	Interpret the typical structural details for tubular steel and steel cables
		LO5	Asses the working of structural details through site visit

6. Elective – I ECOLOGY & ENVIRONMENT (210421) & SOCIETY, CULTURE & ARCHITECTURE (210422)

Objectives –

The course aims to obtain knowledge about ecology, society, culture, environment, the use of ecology, etc. in architecture design and site planning.

S. No.	Subject Cod	Subject Name	Category	Maximum Marks Allotted							Total Marks	CT HRS	Contact Periods per week			Total Credits	Mode of Exam	Mode of Teaching (Offline/ Online)
				Theory Slot				Practical Slot					L	T	P

6.	-	ELECTIVE –I	DE- 1	50	10	20	20	-	-		100	4	2	-	2	3	PP	Blended* (2/1)

(i) ECOLOGY & ENVIRONMENT (210421)

UNIT-1 INTRODUCTION TO THE STUDY OF ECOLOGY & ENVIRONMENT

Introduction, Structure and Function: Introduction to ecology, its meaning and growing importance in daily life. Basic terms used in ecology and their meanings. Fundamental concepts of ecology. Ecology – Environment relationship. Concept of spaceship as earth. Structure and function of eco- system, Eco- system equilibrium, natural cycles, ecological footprint, climate change

UNIT-2 RELATIONSHIP WITH NATURE:

Man's relationship with nature in the present: Industrial activities, urbanization, deforestation, mining and similar incursions on nature for technological progress. Environmental impacts of these activities. The ecological crisis.

UNIT-3 IMPORTANCE OF ECOLOGY

Importance of Ecology: Relevance and growing importance of ecology in a highly urbanized and technological world with reference to dwindling resources, increasing demands and advancing technology. Adaptation of life- styles, and adoption of alternate technologies to harmonize with the natural environment. Discussion on alternatives available. Guiding environmental principles

UNIT-4 ECOLOGICAL APPLICATIONS TO ARCHITECTURE AND PLANNING

Ecological applications to Architecture and Planning. Preserving and improving human settlement in harmony with nature. Conservation of natural resources for improving the quality of life on earth and attempting to ensure its continuity for the future of humanity. Eco cities, eco- communities and eco buildings: Archeology.

Designing settlements and other man-made eco- systems. Ecological and environmental cities for a sustainable future.

UNIT-5 ECOLOGY AND ENVIRONMENT FOR SUSTAINABLE FUTURE.

Eco building materials and construction – Biomimicry, Low impact construction and recyclable products and embodied energy. Life cycle analysis. Energy sources-Renewable and non- renewable energy.

COs & LOs for Ecology & Environment

Overall Course Outcome: The basic objective of this course is to develop the student's understanding towards the importance of ecological studies and environmental protection from rapidly growing anthropogenic activities. This course would let the students explore various architectural techniques in mitigating environmental degradation and achieving sustainable living.

CO1	Students will be able to summarize elementary knowledge to earth's natural environment	LO1	Define basic terms used in Ecology and Environmental Science.
		LO2	Outline the relationship between Ecology and Environment.
		LO3	Analyze the concept of Spaceship as Earth with the context of existing scenarios.
		LO4	Conclude the various factors impacting environmental degradation, climate change, carbon footprint, etc.
CO2	Students will be able to highlight emerging human activities creating serious environmental degradation.	LO1	List various human activities since industrialization till date impacting nature.
		LO2	Demonstrate impact of such activities with the help of suitable case examples
		LO3	Analyze the relationship between man and its natural surroundings, focusing on negative impacts of manmade activities on the environment.
		LO4	Evaluate the need of environmental protection and economic activities
CO3	Students will be able to relate urban ecology with sustainable technologies.	LO1	Define ecology in terms of growing urbanization and technological advancement
		LO2	Summarize the need of alternative technologies to harmonize nature.
		LO3	Develop environmental sensitivity
		LO4	Examine application of available alternatives
CO4	Students will be able to perceive the role of an architect/planner in sustainable development	LO1	Recall harmony with nature in order to preserve and improve human settlement
		LO2	Illustrate the application of ecology by explaining man-made ecosystem and re/designing settlements
		LO3	Apply various practical applications of ecology in the field of architecture and planning
		LO4	Inspect the terms- Eco cities, eco- communities and eco buildings for sustainable future
CO5	Students will be able to adapt various green/sustainable architectural techniques in one of the student's design problem	LO1	List various eco-building materials and construction techniques
		LO2	Design with innovative methods by using sustainable materials/techniques to reduce the impacts of construction and urbanization.

3. Introduction to Ecology by Kurmundi
4. Review Our Dying Planet by Sarala Devi
5. Ecological Crisis: Reading for Survival by G. A. Love & R.M. Love

(ii) SOCIETY, CULTURE & ARCHITECTURE (210422)

UNIT-1 CULTURE

Fundamentals of sociology and its relationship to architecture. Culture and social identity with reference to architecture. Fundamentals of society, culture and politics with reference to architectural history. Forms of social organization in history. Various definitions of culture and civilizations

UNIT-2 ARCHITECTURAL TRADITIONS

Cosmological models and architectural form. Articulation of people and built environments. House form and communication. Asian traditions in architecture. Concept of vernacular Architecture

UNIT-3 SOCIETY AND CIVILISATION

Architecture and its context. Social and cultural aspects of building practices. Architecture-expression of power. Architecture as an agent of change. Architecture as an identity

UNIT-4 INDIGENIZATION AND CULTURAL CHANGE

Transformations and changes in forms of historical architecture. Localization and globalization –cases and examples. Loss of architectural identity and role of culture

UNIT-5 ARCHITECTURAL REJUVENATION

Definition of Renewal, transformation, redevelopment, rejuvenation in architectural context and basic concepts

COs & LOs for Society, Culture And Architecture (210412)

Overall Course Outcome: The course aims to obtain knowledge about society, culture, environment, etc. in architecture design and site planning.

CO1	Students will be able to relate sociology with architecture and planning	LO1	Define various cultures and civilizations
		LO2	Explain fundamentals of society, culture and politics with reference to architectural history
		LO3	Discover forms of historical social organization
		LO4	Identify relationship of sociology and architecture
CO2	Students will be able to inspect basics of traditional architecture	LO1	Define different architectural forms and models
		LO2	Illustrate the supremacy of people on their neighboring built environment
		LO3	Inspect the influence of asian tradition on its architectural style
		LO4	Analyze the concept of traditional architecture
CO3	Students will be able to illustrate the site specific nature of architectural design	LO1	Recall architecture and its context
		LO2	Outline social and cultural aspects of building practices
		LO3	Determine architecture as an powerful agent to bring changes in society and culture
		LO4	Conclude architecture as an identity of a place/site
CO4	Students will be able to distinguish cultural change and indigenous architectural practices	LO1	Illustrate transformation of architectural form over a period
		LO2	Analyze globalization and localization with the help of suitable examples
		LO3	Interpret the role of culture and its impact on architectural identify
CO5	Students will be able to apply rejuvenation in architecture	LO1	Define basic terms of architectural rejuvenation
		LO2	Categorize concept of renewal, transformation, redevelopment, rejuvenation in architectural context

PROJECT I: MATERIAL STUDIO

Studio project: Cultural Center / Multiplex with mall. The cultural center project exposes the student to the design issues such as effects by manipulating day light in the art gallery space, designing for clear sight lines and sound in the auditorium space & optimizing day light for reading in the library space. The additional challenge is to create spaces for fine arts & performing arts by creating artistic expressions with building materials such as brick, concrete etc. The multiplex project expects the student to the design issues involved in entertainment spaces such as cinema halls and the challenges in creating commercial spaces such as food courts, shops, gaming parlours etc. Moreover, it exposes the student to contemporary materials such as steel, aluminum & glass.

PROJECT II: HEALTHCARE BUILDINGS

Hospitals and Nursing homes are a special category of buildings where functional aspects such as planning, building services & the creation of a sterile environment become important design issues. This project aims to familiarize the student with the design of critical health care spaces such as operation theatres, diagnostic facilities, outpatient department and inpatient rooms. The modern trends in hospital design challenge the architect to create world class ambience.

PROJECT 3 (Prototype): Time bound Problems of 6 hours to 48 hours.

COs & LOs for Architectural Design – V (210501)

Overall Course Outcome: The course aims to obtain knowledge Architecture as a design response to the culture of a place, artistic expressions with common building materials such as brick, concrete, steel & glass, building components using the same building material, designing various services and spaces required specifically for a particular use.

CO's	The course should enable the student to:	LO1	Analyze the culture of a place – building types such as the cultural center comprising of spaces such as the art gallery, auditorium for performing arts, library etc.
		LO2	Identify the various common building materials such as brick, concrete, steel & glass.
		LO3	Examine the same building material through Material studio.
		LO4	Illustrate with materials to find suitable artistic & commercial expressions and the learning of design methods for healthcare buildings.

	National and international level through books, literatures and websites. • Develop design ideas and create them.	LO5	Design commercial buildings integrating entertainment spaces, where the student is given exposure to the finer aspects of auditorium design.
		LO6	Express the design with drawings and model to support the concept.

2. Building Construction –IV (Code – 210515)

Objectives –

The course aims to obtain knowledge of detail the various materials used in construction, various advanced structural components, modern masonry units, and its components, types of insulation and temporary structures.

S. No.	Subject Cod	Subject Name	Category	Maximum Marks Allotted							Total Marks	CT HRS	Contact Periods per week			Total Credits	Mode of Exam	Mode of Teaching (Offline/ Online)

2.	210515	Building Construction –IV	BSAE-11	50	10	20	20	20	20	10	150	5	2	1	2*(1.5)	6	PP	Blended*** (3/3)

UNIT-1 BUILDING MATERIALS –IV

- Steel: Properties and uses of cast iron, wrought iron, pig iron, and steel.
- Market forms of steel: Structural steel, stainless steel, steel alloys – properties and uses.

UNIT -2 STEEL

- Steel trusses – Sawtooth roof truss with north light glazing, simple trusses in steel, and types of connections – to foundations, steel stanchion, and beams.
- Space frames:-Single, double & triple-layered tubular space frames, Gates: collapsible gate, entrance gate, rolling shutter.
- Steel components: Steel doors, (hinged, fixed sliding, sliding & folding & Revolving door. steel windows (casement window & sliding window) Steel stairs (dog-legged, spiral stair) steel handrails and balustrade grill designs for windows, **main gate design.**

UNIT-3 WALL & FLOOR

- Wall: Modern masonry units - Fly ash brick, Aerated concrete blocks, Hollow concrete blocks & Hollow clay blocks
- Floor finishes– Indian patent stone (IPS), Terrazzo flooring, Granolithic flooring stone flooring, Resilient flooring & Carpeting.

UNIT-4 PARTITIONS & FALSE CEILING:

- Simple paneled and glazed partitions: Timber, Glass, Aluminium & PVC.
- False ceiling: False ceiling of interior spaces using wood panels, glass, Thermacol, gypsum board, plaster of Paris, aluminum strips & perforated metal sheets.
- Jam casing, skirting, molding, architrave & pelmet

UNIT-5 THERMAL INSULATION AND ACOUSTICS INSULATION

- Thermal insulation: vapor barriers and rigid insulations, blanket, poured and reflective insulation– properties and uses of spun glass foamed glass, cork, vegetable fibers Gypsum plaster of Paris, hydride gypsum properties and their uses.
- Acoustics insulation: porous, baffle and perforated materials such as Acoustic plastic, Acoustic tiles, wood, partition board, fiberboard, cork, quilts and mats – their properties and uses – current developments. Applications of the above insulations in seminar hall, theatre, and cold storage.

COs & LOs for Building Construction – IV (210502)

Overall Course Outcome: The course aims to obtain knowledge of detail the various materials used in construction, various advanced structural components, modern masonry units, and its components, types of insulation and temporary structures.			
CO1	As a result of studying properties and uses of cast iron, wrought iron, pig iron and steel, student will be able to understand market forms of steel in depth.	LO1	Learn Properties and used of cast iron, wrought iron, pig iron and steel.
		LO2	Understand the material and construction techniques through site visit and market surveys
		LO3	Develop a fundamental understanding of the relationship of materiality to construction systems and techniques
		LO4	Analyze The detail of materials with different combinations in buildings.
		LO5	Produce construction detail of Steel sections and connections.
CO2	As a result of studying about steel, student will be able to understand the components of steel used in building in various forms with respect to the design.	LO1	Learn the terminology of trusses, frames and other steel components in building.
		LO2	Understand the need of various types of trusses and frames in building.
		LO3	Develop a fundamental understanding of types of trusses and frames in steel in a building.
		LO4	Analyze the details of various trusses and frames in building.
		LO5	Produce details of various trusses, frames, doors and windows.
CO3	As a result of studying about modern masonry units and floor finishes, student will be able to make use of these details in building construction.	LO1	Learn types modern masonry units and floor finishes.
		LO2	Understand the difference between the materials used for modern masonry units and floor finishes.
		LO3	Analyze types of masonry units and floor finishes.
		LO4	Understand the details of the above.
		LO5	Produce construction details of walls with modern masonry units and floor finishes.
CO4	As a result of Studying about false ceiling, student will be able to understand how wires can be concealed, sound proofing and energy efficiency.	LO1	Understand simple panelled, glazed partitions and false ceiling.
		LO2	Identify suitable material required for the construction of doors, windows, ventilator, arches etc.
		LO3	Classify the components based on their arrangements, method or manner of construction.
		LO4	Design interior wall panelling and suspended ceiling detail drawings
		LO5	Produce the drawings of simple panelled and glazed partitions.
CO5	As a result of studying about thermal and acoustics insulation, student will be able to make use of various material wrt to building type.	LO1	Understand thermal insulation and acoustics insulation.
		LO2	Identify methods in which thermal and acoustics can be achieved.
		LO3	Classify the components and terminology.
		LO4	Summarize thermal insulation techniques, acoustical treatment details for different spaces.

Note: Total five questions shall be asked. Each question will consist of two parts, one of which will be of 7 marks (which shall be compulsory) and another with 3 marks(which shall be optional).

3. Building Services-II (Electrical & Mechanical) (Code – 210516)

Objectives –

The course aims to obtain knowledge of various services in a building such as electrical, illumination, etc., an understanding of layouts of electrical, plumbing, AC ducts, lighting, etc., Air conditioning system and its working.

S. No.	Subject Cod	Subject Name	Category	Maximum Marks Allotted							Total Marks	CT HRS	Contact Periods per week			Total Credits	Mode of Exam	Mode of Teaching (Offline/ Online)
				Theory Slot				Practical Slot					L	T	P			
				End Term Evaluation		Continuous Evaluation		End Sem. Exam	Continuous Evaluation									
				End Sem.	Proficiency in subject/ course	Mid Sem.	Quiz/ Assignment /Sessional		Lab work & Sessional	Skill based mini project								
3.	210516	Building Services-II (Electrical & Mechanical)	BSAE-12	50	10	20	20	-	-		100	3	2	1	-	3	PP	Blended* (2/1)

UNIT-1 ELECTRICAL SERVICES

Electrical systems – Basic of electricity – single/Three phase supply , Electrical installations in buildings – Types of wires, Wiring systems and their choice, planning electrical wiring for building – Main and distribution boards, HT transformers, electrical panel rooms, cable trenches, controls, Circuits, fuses, main switch box, meter box, circuit breakers. Uninterrupted power supply, inverters, protective devices in electrical installation – Earthing for safety – Types of earthing – ISI Specifications, Lighting protection Electrical installations in various building types, Residential bungalow, apartments, commercial recreational buildings and factory buildings etc. Market survey of Electrical materials and electrical appliances.

UNIT-2 ILLUMINATION AND LIGHTING DESIGN

Principles of Illumination: Basics of Lighting Technology and Terminology, Classification of lighting–Artificial light sources. Systems of lighting such as direct, indirect, diffused etc.,

Design of modern lighting: Lighting for stores, offices, schools, hospitals and house lighting. Elementary idea of special features required and minimum level of illumination required for physically handicapped and elderly in building types. Seeing light: learn about vision and perception, color, and - understanding shade and shadow Light fixture :Controlling light, luminaire optics and distributions - introduction to light fixture materialsand construction, and components Light in Architecture and the Psychology of Light,

Lighting Design Concepts, Lighting in terms of energy efficiency, ergonomic aspects and aesthetic aspects. Light a surface: Horizontal and vertical - present various approaches and techniques - finding lightfixtures. For a Task - present various approaches and techniques, simple lighting effects.

Calculating Light: learn light metrics and calculation methods - review energy and the environment Lighting calculations Lighting Design :Residential lighting, Office and Corporate Lighting, Hospitality Lighting Design, Health Care/Institutional Lighting Design, Lighting for Stores, Lighting Common Spaces

UNIT-3 AIR CONDITIONING

Components of an air-conditioning system & their function-Refrigeration cycle, different systems of AC, window, split, small standalone unit, and air cooled direct expansion system used for auditorium spaces, chill water systems with air handling units, estimating the cooling load of different spaces in a building with simple calculation, duct lay out for both types of systems. Intelligent building systems in air conditioning, Sick building syndrome, effect of pollutants, improving air quality in air-conditioned buildings.

UNIT-4 PUMPS AND MACHINERIES

Pumps: Different types of Pumps, working, applications. Water pumps, sewage pumps, Centrifugal, Reciprocating pump, turbine (diagrams & functioning only)

Compressors: Different types of Compressors and their applications.

Lifts And Escalators : Elevators (Lifts) and escalators–Brief history-types of Elevators like traction, Hydraulic etc., Double-decker, sky lobby, lift lobby, lift interiors etc., Definition and components Elevatoring a building: environmental considerations i.e., location in building, serving floors, grouping, size, shape of passenger car, door arrangement etc., Service requirements: Quality of service, quantity of service, time, passenger handling capacity, space and physical requirements, machine room spaces and its typical layout Escalators – Definition, Application. Location and arrangement in buildings. Space requirement, Conveyor belts-movement of passengers and goods

UNIT-5 ELECTRICAL AND AC DUCT LAYOUT OF SIMPLE BUILDINGS

Fixtures and accessories used in electrical installation –Preparing an electrical layout for part of design project, with simple load calculations. Design consideration for AC plant location and size. Ac ducting layout for an office building, shopping complex etc.

COs & LOs for BUILDING SERVICES-II			
Overall Course Outcome: The overall aim of the course is to introduce students to the various electrical and mechanical systems in building of various scales and also to make them understand electric layouts, fixtures and their sustainable applications in buildings.			
C O 1	To understand the basics of electric supply in buildings, guidelines for electric installations and safety measures	LO1	Understand the principles of electricity, installation and safety in electricity supply
		LO2	Observe the methods of electricity supply in metropolitan areas, methods of wiring and earthing etc
		LO3	Analyse the guidelines for electric installations in various buildings
		LO4	Survey on electric materials and appliances.
C O 2	To learn the application of lighting design principles in design and evaluate lighting requirements using light metrics	LO1	Understand the principles of lighting design, classification and systems of lighting in buildings.
		LO2	Observe the lighting design requirements for various buildings based on function, occupants and usage.
		LO3	Analyse the psychology of lighting design and concepts based on efficiency, ergonomics and aesthetics
		LO4	Survey on electric materials and appliances.
		LO5	Evaluate lighting requirement based on light metrics and calculations
C O 3	To evaluate the HVAC systems in buildings, their principles and methods of air conditioning	LO1	Define the principles of air conditioning in buildings, types and methods of air conditioning.
		LO2	Analyse air conditioning requirements in different types of enclosed spaces, load calculation and
		LO3	Identify various systems of air conditioning in buildings and their sustainable application
		LO4	Evaluate the effects of air conditioning such as sick building syndrome and pollutants.
C O 4	To understand the functioning of various mechanical systems and their installation in buildings	LO1	Understand the working of various mechanical systems in building, its classification, design considerations
		LO2	Analyse the environmental considerations and service requirements in installation of mechanical devices.
		LO3	Evaluate the space requirements, location and arrangement of mechanical devices in buildings
C O 5	To prepare electric layouts and HVAC	LO1	Evaluate the air conditioning layout of any existing building
		LO2	Evaluate the electrical layout of any existing building
		LO3	Prepare the electric layout for buildings of various scales

	layouts for large buildings	LO4	Prepare the air conditioning layout for large buildings
		LO5	Calculate the power load and cooling load for various buildings

- 4. Building Sciences & Energy Conservation (Code – 210517)**

Objectives –

The course aims to obtain knowledge of building sciences such as design methodology, resource optimization and innovative approaches to eco-design, the acclaimed sustainable buildings designed within the past decade, energy conservation through building design, designing an eco-building.

S. No.	Subject Code	Subject Name	Category	Maximum Marks Allotted							Total Marks	CT HRS	Contact Periods per week			Total Credits	Mode of Exam	Mode of Teaching (Offline/ Online)
				Theory Slot				Practical Slot					L	T	P			
				End Term Evaluation		Continuous Evaluation		End Sem. Exam	Continuous Evaluation									
				End Sem.	Proficiency in subject/ course	Mid Sem.	Quiz/ Assignment /Sessional		Lab work & Sessional	Skill based mini project								
4.	210517	Building Sciences & Energy Conservation	BSAE-1	50	10	20	20	-	-		100	3	2	1	-	3	PP	Blended* (2/1)

UNIT-1 CLIMATE & THERMAL COMFORT

Global climatic factors, elements of climate, classification & characteristics of tropical climates, site climate and Urban climate - Thermal balance of the human body, Thermal comfort indices – Effective temperature, CET, calculation of comfort zone & determination of overheated & under heated periods.

UNIT-2 SOLAR GEOMETRY & DESIGN OF SUNSHADING DEVICES

Apparent movement of the sun, sun path diagrams (solar chart) - Solar angles, Shadow angles, solar shading masks. etc - Exercises on plotting isopleths, transfer of isopleths to solar chart, fitting a shading mask over the overheated period & design of sun shading devices for different orientations.

UNIT-3 PRINCIPLES OF THERMAL DESIGN IN BUILDINGS

Thermal quantities – heat flow rate, conductivity (k-value) & resistivity, conductance through a multilayered body, surface conductance, transmittance – U value of different materials – convection, radiation, concept of sol-air temperature & solar gain factor - heat loss & heat gain. Periodic heat flow in building – time lag & decrement factor & its application in selection of appropriate materials for walls & roof. Effect of Insulation & cavity on time-lag.

UNIT-4 VENTILATION & DAY LIGHTING

Functions of ventilation – stack effect due to the thermal forces, wind velocity – wind rose diagram, wind pressure - Air movement through building & around buildings – factors affecting indoor air flow, wind shadow etc. - The nature of light, its transmission, reflection – colored light, the Munsell system
Photometric quantities – illumination, day lighting prediction – the daylight design graph.

UNIT-5 DESIGN FOR CLIMATIC TYPES

Building design & layout planning consideration for warm humid, hot dry, composite & tropical upland climates, climatic data sets – analysis – climate graph – the Mahoney tables & its recommended specification - Exercises on design of small Buildings for various climates.

COs & LOs for Building Sciences & Energy Conservation (210504)			
Overall Course Outcome: The basic objective of this course is to make students learn about human thermal comfort along with required construction techniques and designing strategies to achieve it. It would deal with the study of climate and its relation with the built environment.			
CO1	Label various climatic factors affecting human body	LO1	Define global climatic factors and elements
		LO2	Classify various climatic parameters on micro and macro level of site (tropical climates, site climates and urban climate)
		LO3	Examine thermal comfort indices for thermal balance in human body
		LO4	Identify overheated and under heated periods
CO2	Evaluate characteristics of building openings according to its orientation	LO1	Relate sun path and its dynamics to site planning and building designing
		LO2	Illustrate winter & summer solar angles per day for designing proper shading devices
		LO3	Experiment with heliodon device used to simulate the sun and shadow patterns that occur at various locations and times across the surface of the earth
		LO4	Analyze various aspects of solar geometry in building orientation
CO3	Assess various building materials in order to achieve thermal comfort inside a building	LO1	Define thermal quantities
		LO2	Outline U values of different building materials to identify their extent of thermal insulation
		LO3	Make use of dry bulb and wet bulb thermometers, rain gauge, etc.
		LO4	Determine appropriate materials for walls & roof according to periodic heat flow in building
CO4	Influence the integration natural elements as part of built environment	LO1	Illustrate stack effect for passive air movement throughout a building
		LO2	Analyze natural light transmission, day lighting penetration inside a building
		LO3	Make use of anemometers to identify wind direction and speed during site analysis
		LO4	Test stack effect and natural light transmission on any of the student's design problem
CO5	Adapt climate specific building design strategies in one of the student's design problem	LO1	Know all climatic zones exists and their climate data sets
		LO2	Categorize various building design & layout planning for different climatic conditions
		LO3	Adapt building design strategies of different climatic zones in one of the student's design

5.ELECTIVE- II

a. ARCHITECTURAL PHOTOGRAPHY & JOURNALISM (210521)

Objectives –

To provide the skills relevant to the practice of professional journalism, and to introduce students to the fundamentals of writing, explaining various strategies and their criticism.

S. No.	Subject Cod	Subject Name	Category	Maximum Marks Allotted							Total Marks	CT HRS	Contact Periods per week			Total Credits	Mode of Exam	Mode of Teaching (Offline/ Online)
				Theory Slot				Practical Slot					L	T	P			
				End Term Evaluation		Continuous Evaluation		End Sem. Exam	Continuous Evaluation									
				End Sem.	Proficiency in subject/ course	Mid Sem.	Quiz/ Assignment /Sessional		Lab work & Sessional	Skill based mini project								
5.	210521	Architectural Photography & Journalism	DE-2	50	10	20	20	-	-		100	3	2	1	-	3	PP	Blended* (2/1)

UNIT -1 INTRODUCTION TO ARCHITECTURAL PHOTOGRAPHY

General introduction to the art of photography; concept of color; concepts of lighting, distance, visual angle, frames; media. Technical definitions, types of lighting fixtures, types of flashes, controlling lighting levels with flash photography. Color rendering in photographic medium, color rendering in photographs under different lighting condition, lighting colors and its effect on a photograph, color filters in a camera. Exercise in lighting photography with artificial light and black and white photos.

UNIT-2 PHOTOGRAPHIC TECHNIQUES AND COMPOSITION

Equipment: cameras and lenses – techniques: film speed, exposure measurement, gray scale– photofinishing and editing digital images. Perspectives: Single Point, Two- Point, Three- Point and methods of correcting distortions – Lighting: External and Interior

UNIT-3 JOURNALISM

Introduction to journalism, key concepts and objectives of Journalism – Specialized journalism: with emphasis on architectural journalism - Journalism skills: research, reporting, writing, editing, criticism.

UNIT- 4 DISCUSSIONS AND ISSUES

Regional, National and International discussion forums, Changes in contemporary and historical design practices. Discussions on topics needed in an architectural journal and current issues - types of journals, works of key architectural journalists, Public Discourse on the Internet, Mass Media and Public Opinion – critique on selected pieces of journalism.

UNIT-5 FIELD PROGRAM

COs & LOs for Building Sciences & Energy Conservation (210504)			
Overall Course Outcome: The basic objective of this course is to make students learn about human thermal comfort along with required construction techniques and designing strategies to achieve it. It would deal with the study of climate and its relation with the built environment.			
CO1	Label various climatic factors affecting human body	LO1	Define global climatic factors and elements
		LO2	Classify various climatic parameters on micro and macro level of site (tropical climates, site climates and urban climate)
		LO3	Examine thermal comfort indices for thermal balance in human body
		LO4	Identify overheated and under heated periods
CO2	Evaluate characteristics of building openings according to its orientation	LO1	Relate sun path and its dynamics to site planning and building designing
		LO2	Illustrate winter & summer solar angles per day for designing proper shading devices
		LO3	Experiment with heliodon device used to simulate the sun and shadow patterns that occur at various locations and times across the surface of the earth
		LO4	Analyze various aspects of solar geometry in building orientation
CO3	Assess various building materials in order to achieve thermal comfort inside a building	LO1	Define thermal quantities
		LO2	Outline U values of different building materials to identify their extent of thermal insulation
		LO3	Make use of dry bulb and wet bulb thermometers, rain gauge, etc.
		LO4	Determine appropriate materials for walls & roof according to periodic heat flow in building
CO4	Influence the integration natural elements as part of built environment	LO1	Illustrate stack effect for passive air movement throughout a building
		LO2	Analyze natural light transmission, day lighting penetration inside a building
		LO3	Make use of anemometers to identify wind direction and speed during site analysis
		LO4	Test stack effect and natural light transmission on any of the student's design problem
CO5	Adapt climate specific building design strategies in one of the student's design problem	LO1	Know all climatic zones exists and their climate data sets
		LO2	Categorize various building design & layout planning for different climatic conditions
		LO3	Adapt building design strategies of different climatic zones in one of the student's design

b. VERNACULAR ARCHITECTURE (210522)

Objectives -

Introduce traditions of building structures for habitation, made without the intervention of professional architects. Anticipated Learning

S. No.	Subject Code	Subject Name	Category	Maximum Marks Allotted							Total Marks	CT HRS	Contact Periods per week			Total Credits	Mode of Exam	Mode of Teaching (Offline/ Online)
				Theory Slot				Practical Slot					L	T	P			
				End Term Evaluation		Continuous Evaluation		End Sem. Exam	Continuous Evaluation									
				End Sem.	Proficiency in subject/ course	Mid Sem.	Quiz/ Assignment /Sessional		Lab work & Sessional	Skill based mini project								
5.	210522	Vernacular Architecture	DE-2	50	10	20	20	-	-		100	3	2	1	-	3	PP	Blended* (2/1)

Unit 1: Introduction to the field of Vernacular Architecture Defining and differentiating vernacular architecture from contemporary architecture, Scope of Vernacular Architecture in Indian Context , Factors Influencing Vernacular Architecture, Building Material and Construction Techniques in Indian Vernacular Architecture, Vernacular Architecture in 21st Century

Unit2: Vernacular Architecture of Rajasthan Local Community rural Houses and havelis from Rajasthan, Shekhawati Haveli of Rajasthan, Construction techniques and materials of the region.

UNIT 3: Vernacular Architecture of Gujarat, Sociology and Planning, Woodwork Details of Gujarat, and Construction techniques and materials of the region.

UNIT 4: Vernacular Architecture of East and North their settlement pattern and Construction techniques and materials of the region.

UNIT 5: Vernacular Architecture of the South Regional topography, local climate, variation in settlement pattern and architecture in different parts of the region and construction techniques and materials of the region.

COs & LOs for Building Sciences & Energy Conservation (210504)

Overall Course Outcome: The basic objective of this course is to make students learn about human thermal comfort along with required construction techniques and designing strategies to achieve it. It would deal with the study of climate and its relation with the built environment.

CO1		LO1	Define global climatic factors and elements
-----	--	-----	---

	Label various climatic factors affecting human body	LO2	Classify various climatic parameters on micro and macro level of site (tropical climates, site climates and urban climate)
		LO3	Examine thermal comfort indices for thermal balance in human body
		LO4	Identify overheated and under heated periods
CO2	Evaluate characteristics of building openings according to its orientation	LO1	Relate sun path and its dynamics to site planning and building designing
		LO2	Illustrate winter & summer solar angles per day for designing proper shading devices
		LO3	Experiment with heliodon device used to simulate the sun and shadow patterns that occur at various locations and times across the surface of the earth
		LO4	Analyze various aspects of solar geometry in building orientation
CO3	Assess various building materials in order to achieve thermal comfort inside a building	LO1	Define thermal quantities
		LO2	Outline U values of different building materials to identify their extent of thermal insulation
		LO3	Make use of dry bulb and wet bulb thermometers, rain gauge, etc.
		LO4	Determine appropriate materials for walls & roof according to periodic heat flow in building
CO4	Influence the integration natural elements as part of built environment	LO1	Illustrate stack effect for passive air movement throughout a building
		LO2	Analyze natural light transmission, day lighting penetration inside a building
		LO3	Make use of anemometers to identify wind direction and speed during site analysis
		LO4	Test stack effect and natural light transmission on any of the student's design problem
CO5	Adapt climate specific building design strategies in one of the student's design problem	LO1	Know all climatic zones exists and their climate data sets
		LO2	Categorize various building design & layout planning for different climatic conditions
		LO3	Adapt building design strategies of different climatic zones in one of the student's design

c. BASICS OF WEB DEVELOPMENT (210523)

Objectives -

Gaining foundational knowledge in web development, HTML, CSS, and JavaScript to enhance digital design skills and employability in architectural firms with a focus on online platforms and interactive web-based projects.

S. No.	Subject Code	Subject Name	Category	Maximum Marks Allotted							Total Marks	CT HRS	Contact Periods per week			Total Credits	Mode of Exam	Mode of Teaching (Offline/Online)
				Theory Slot				Practical Slot					L	T	P			
				End Term Evaluation		Continuous Evaluation		End Sem. Exam	Continuous Evaluation									
				End Sem.	Proficiency in subject/course	Mid Sem.	Quiz/Assignment /Sessional		Lab work & Sessional	Skill based mini project								
5.	210523	Basics of Web Development	DE-2	50	10	20	20	-	-		100	3	2	1	-	3	PP	Blended* (2/1)

Unit 1: Introduction to Web Development

- Understanding the basics of websites and the internet
- Exploring the role of HTML and CSS in web development
- Creating a simple webpage using HTML and CSS

Unit2: Introduction to JavaScript

- Introduction to JavaScript and its role in web development
- Basic JavaScript syntax and variables
- Adding interactivity to webpages using JavaScript

UNIT 3: Responsive Web Design

- Understanding the concept of responsive web design
- Creating responsive layouts using CSS media queries
- Implementing responsive design principles in web development

UNIT 4: Introduction to Front-End Frameworks

- Overview of popular front-end frameworks (e.g., Bootstrap, Foundation)
- Utilizing pre-built components and grid systems in web development
- Creating responsive and visually appealing websites using front-end frameworks

UNIT 5: Introduction to Web Hosting and Deployment

- Understanding web hosting and domain registration
- Deploying a website to a web server
- Testing and optimizing the performance of a website

COs & LOs for Building Sciences & Energy Conservation (210504)

Overall Course Outcome: The basic objective of this course is to make students learn about human thermal comfort along with required construction techniques and designing strategies to achieve it. It would deal with the study of climate and its relation with the built environment.

CO1	Compare different web development frameworks and their advantages.	LO1	Recall the key steps involved in the web development process.
		LO2	Explain the roles and functions of web browsers in rendering web pages.
		LO3	Organize and manage files and project structure for effective web development.
		LO4	Compare different web development frameworks and their advantages.
CO2	Construct hyperlinks, images, and multimedia elements within HTML documents.	LO1	Recognize and apply HTML tags, elements, and attributes to structure web content.
		LO2	Construct hyperlinks, images, and multimedia elements within HTML documents.
CO3	Apply color, backgrounds, and typography to enhance web design.	LO1	Implement CSS syntax and selectors to style HTML elements.
		LO2	Apply color, backgrounds, and typography to enhance web design.
CO4	Modify the Document Object Model (DOM)	LO1	Utilize JavaScript syntax and variables to create interactive web elements.
		LO2	Modify the Document Object Model (DOM) using JavaScript functions and events.

	using JavaScript functions and events.		
CO5	Deploy a website to a web server and optimize its performance for efficient web publishing.	LO1	Develop responsive web designs that adapt to different devices and screen sizes.
		LO2	Deploy a website to a web server and optimize its performance for efficient web publishing.

9. Disaster management – 100005

OBJECTIVE -The objective of the subject is to introduce the students about reduce or avoid the potential losses from hazards, assure prompt and appropriate assistance to the victims of a disaster, and achieve a rapid and effective recovery.

S. No.	Subject Code	Subject Name	Category	Maximum Marks Allotted							Total Marks	CT HRS	Contact Periods per week			Total Credits	Mode of Exam	Mode of Teaching (Offline/ Online)
				Theory Slot				Practical Slot					L	T	P			
				End Term Evaluation		Continuous Evaluation		End Sem. Exam	Continuous Evaluation									
				End Sem.	Proficiency in subject/ course	Mid Sem.	Quiz/ Assignment /Sessional		Lab work & Sessional	Skill based mini project								
7.	1000005	Disaster management	MAC-3	50	10	20	20	-	-	-	100	2	2	-	-	Grade	SO	Online

UNIT- 1 NATURAL HAZARDS AND DISASTER MANAGEMENT

Understanding the Concepts and definitions of Disaster, Hazard, Vulnerability, Risk, Capacity – Disaster and Development, Disaster management and Disaster Management cycle Understanding the Causes and effects of natural calamities - floods, tropical cyclones, landslides, heat waves & Tsunami. Institutional and Financial Mechanism National Policy on Disaster Management, National Guidelines and Plans on Disaster Management; Role of Government (local, state and national), Non-Government and Inter-Governmental Agencies

UNIT- 2 ELEMENTARY SEISMOLOGY, EARTHQUAKE EFFECT AND SEISMIC DESIGN PRINCIPLES

Major Historic Earthquakes in the World, earthquake hazard map of India, Causes of Earthquakes: Elastic Rebound theory, Continental Drift and Plate Tectonics, Types of Plate Boundaries, types Of faults, seismic waves – classification of body waves and surface waves, magnitude, intensity, epicenter and energy release, Introduction to Seismic zones, Need for Seismic Zonation, Types of Zonation and Seismic Zonation scales

Earthquake Effects:- On ground, soil rupture, liquefaction and landslides, Behaviors of various types of buildings, lifelines and collapse patterns, Behavior of Non Structural Elements like services, fixtures, mountings etc., Social & Economic Consequences of earthquakes

Concept of seismic design, stiffness, strength, period, ductility, damping, hysteric energy dissipation, center of mass, center of rigidity, torsion, design eccentricities, Seismic effects related to building configuration. Plan & vertical irregularities, Ductility based design: Design of energy absorbing devices, Seismic base isolation and seismic active control.

UNIT- 3 EARTHQUAKE RESISTANT CONSTRUCTION DETAILS AND DESIGN GUIDELINES

Various Types and construction details of Foundations, soil stabilization, retaining walls, plinth fill, flooring, walls, openings, roofs, terraces, parapets, boundary walls, underground and overhead tanks, staircases and isolation of structures. Local practices: traditional regional responses.

Design guidelines for disaster resistant construction at appropriate situations - Engineering, architectural, landscape & planning solutions for floods, tropical cyclones & Tsunami

UNIT- 4 REHABILITATION AND RECONSTRUCTION

Concept of Rehabilitation and Reconstruction, Types of Rehabilitation, Architecture at Risk, Guiding Principles of Rehabilitation and Reconstruction, Different Case Examples of Post Disaster Recovery in and Around India. Problem Areas in Disaster Recovery, Inter-linkages between Recovery and Development.

UNIT- 5 FIRE SAFETY, RESISTANCE & HAZARD MANAGEMENT IN BUILDINGS

Fire, Causes of Fire and Spread of Fire, Fire Fighting, Protection and Fire Resistance, Equipments and Methods of Fighting Fire, Code of Fire Safety, Fire Regulations, Combustibility of Materials. Structural material and Fire Resistance, Planning and Design of Fire Escape Routes and Elements, Wet Risers, Sprinklers, Smoke Detectors, Fire Dampers, Fire Doors & Water Curtains etc.

COs & LOs for Disaster management (100007)			
Overall Course Outcome: The basic objective of this course is to introduce the students about reducing and avoiding the potential losses from hazards, assure prompt and appropriate assistance to the victims of a disaster, and achieve a rapid and effective recovery.			
CO1	Define disaster management and its implementation	LO1	Define hazard, disaster, vulnerability and capacity building
		LO2	Classify causes and effects of natural calamities
		LO3	Examine the disaster management processes
		LO4	Identify the role of various institutions in disaster management
CO2	Summarise the cause of the earthquake and various seismic zones.	LO1	List major Historic Earthquakes in the World
		LO2	Illustrate the cause of earthquake and basic terminologies
		LO3	Analyse the concepts of response spectrum
		LO4	Determine the use of different Seismological Instruments
CO3	Identify physical aspect affecting design principles	LO1	Recall the physical effects of Earthquake
		LO2	Outline the behavior of Non Structural Elements and Social & Economic Consequences of earthquakes

	at different seismic locations	LO3	Illustrate building configuration based on seismic characteristics of the sites
		LO4	Perceive seismic design principles
CO4	Perceive different construction techniques to make structure earthquake resistant	LO1	Recall building elements where seismic risk reduction intervention could be done
		LO2	Summarize the construction details and various types of building elements specific to earthquake resistance
		LO3	Appraise local and traditional earthquake response practices
CO5	Conclude existing design guidelines as solution to adverse impact of disasters	LO1	Infer case studies of disaster management - earthquake, cyclone, landslides, floods, tsunamis, droughts, etc
		LO2	Categorize design guidelines for disaster resistant construction at appropriate situations

THIRD YEAR SIXTH SEMESTER

Architectural Design – VI (Code – 210601) Objectives –

The course aims to obtain knowledge of Architecture as a design response to Technology, hospitality industry in the first project & requires the student, large scale building with Innovation & experimentations.

S. No.	Subject Cod	Subject Name	Category	Maximum Marks Allotted							Total Marks	CT HRS	Contact Periods per week			Total Credits	Mode of Exam	Mode of Teaching (Offline/ Online)
				Theory Slot				Practical Slot					L	T	P			
				End Term Evaluation		Continuous Evaluation		End Sem. Exam	Continuous Evaluation									
				End Sem.	Proficiency in subject/course	Mid Sem.	Quiz/ Assignment /Sessional		Lab work & Sessional	Skill based mini project								
1.	210612	Architectural Design VI	DC- 13	100	20	20	20	50	30	10	250	7	2	3	2*(1.5)	8	AO	Offline**

PROJECT I: DESIGN FOR HOSPITALITY INDUSTRY

The project requires the understanding of the special nature and functioning of the hotel industry and to respond with suitable concepts of space planning, circulation, interior design, materials and lighting. Example: Hotels- Business, resort, heritage, boutique etc. The

student needs to concentrate on site planning, space planning, circulation, services and the various aspects of interior design such as furniture, flooring, ceiling, lighting etc. Students get exposure to the difference between a business hotel & a resort as well as the special needs of heritage and Boutique hotels. Exercises in interior space visualization using computer software is attempted.

PROJECT II: URBAN INFRASTRUCTURE PROJECTS

Contemporary transportation terminals and stadiums are large buildings with multiple entries & exits dealing with large crowds and having multiple levels with large spans, complex services & demanding environmental conditions. Function, convenience and security will become the basic design parameters. Example - Bus terminal / Railway station / Indoor sports complex / Aquatic complex etc. This studio challenges the designer to come up with a feasible structural solution after undertaking a study of large span structural systems. Moreover planning for transport terminals requires understanding of safety norms & to design sport facilities understanding of optimum environmental parameters is the requisite.

COs & LOs for Architectural Design – VI (210601)

Overall Course Outcome: The course aims to obtain knowledge of Architecture as a design response to Technology, hospitality industry in the first project & requires the student, large scale building with Innovation & experimentations.

CO 1, 2, 3, 4, 5	The course should enable the student to: Train the student to gather knowledge on the given design project based on books / literature and websites. Make the student understand the complexity, functioning and salient features of the design project through organizing field visit, train them to document and present the findings. Develop design ideas and create them.	LO1	Summarize basic concept of spatial planning of different types of buildings such as Hospitality and Infrastructure projects
		LO2	Apply large span structural systems in design
		LO3	Apply building bye laws in building design.
		LO4	Apply various essential services in complex buildings.
		LO5	Analyze the project with respect to various environmental parameters.
		LO6	Design Hospitality and Infrastructure projects

Note: One design problem shall be given in End Semester Examination. 6X3 hours examination.

2. Building Services-III (Acoustic & Fire Fighting) (Code – 210602)

Objectives –

The course aims to obtain knowledge of the basic principles of acoustics in buildings and their integration with architectural design, suitable materials in the design of auditoria and the method to achieve noise control in built spaces, firefighting services and design alteration for it, Layout of firefighting integrated system in building design.

S. No.	Subject Cod	Subject Name	Categor y	Maximum Marks Allotted							Total Mark s	CT HRS	Contact Periods per week			Total Credi ts	Mode of Exam	Mode of Teaching (Offline/ Online)			
				Theory Slot				Practical Slot					End Sem. Exam	Continuous Evaluation					L	T	P
				End Term Evaluation		Continuous Evaluation		Continuous Evaluation													
				End Sem.	Proficienc y in subject/ course	Mid Sem.	Quiz/ Assign ment /Session al	Lab work & Sessional	Skill based mini project												
2.	210613	Building Services III (Acoustic & Fire Fighting)	BSAE- 14	50	10	20	20	-	-		100	3	2	1	-	3	PP	Blended*** (2/2)			

UNIT-1 INTRODUCTION TO THE STUDY OF ACOUSTICS & SOUND TRANSMISSION, ABSORPTION, INSULATION

Acoustics-Definition, terms related to acoustics. Theory of sound: generation, propagation, transmission, reception of sound, sound waves, frequency, intensity wavelength, sound pressure, measurement of sound scales-decibel scale. Calculation of reverberation time using Sabine's formula, Recommended RT/Volume for different spaces. Acoustical defects-echoes, focusing of sound, dead spots, flutter echo. Room resonances, small enclosures, standing waves, proportioning of room dimensions. Room acoustic phenomena: Reflection (plane, concave and convex surfaces), diffusion, reverberation, absorption. Acoustical requirements of different types of building, sound absorption, absorption co-efficient and their measurements, Sound insulation, materials, STC ratings, sound isolation. Sound absorptive materials and their choices, absorption coefficients and their measurements, NRC value.

UNIT-2 NOISE CONTROL AND SOUND REINFORCEMENT & ACOUSTICS IN BUILDING DESIGN AND CONSTRUCTION

Sources and types of noise, characteristics and effect of noise impact on human beings/behavior, noise curves, transmission of noise – airborne and structure borne, transmission loss, Means of noise control- source (enclosures), path (Barriers and insulations) and receiver (personal controls). Measure of noise control for different constructions – construction details of cavity walls, composite walls, floating floor, wood-joint floors, plenum barriers.

Design: Site selection, shape, volume, treatment for interior surface, basic principles in designing open air theatres, cinemas, broadcasting studios, concert halls, class rooms, lecture halls, theatres – Auditorium.

Construction: Constructional detailing, relation to walls/ partition, floor / ceiling/ opening/ windows/ doors. Acoustical requirement of different types of buildings.

UNIT-3 FIRE FIGHTING SERVICES

Fire extinction / suppression technology: constituents of fire, methods of fire extinguishment, Extinguishing agents / media Fire suppression equipment & installations (active fire protection measures) : fire detection and alarm systems (automatic fire alarm systems), Heat Detectors, Smoke detectors, flame detectors, Choice / Selection of Fire Detectors

Hydrant systems / installations- stand post and Underground type of hydrants (Sluice Valve Type). Internal Hydrant Systems - Dry-riser system, Wet-riser system, Wet-riser-cum -down-comer system and Down-comer-system. Sprinkler system types. Early Suppression Fast Response Sprinklers (ESFR), water spray systems, automatic drencher systems.

UNIT-4 FIRE FIGHTING SYSTEMS & BUILDING NORMS

Extinguishing Systems - Foam, CO2 and Halon Fire System, first aid firefighting equipment: portable fire extinguishers and its types, graphic symbols for fire protection plans, fire protection - safety signs. Building fire hazards: Relationship of Building Fire Hazards with Life Safety, Hazards from Building Contents, Fire Load and Fire Effects, Exposure Hazard, Hazards from Interior Finish and services. Hazards in Buildings from Collapse, Explosion. Life hazards in buildings and means of escape / egress / exit : Factors affecting Life Safety of Occupants, Growth and Spread of Fire and Smoke, Design Considerations of Means of Exit, Exit Requirements, Lifts and Escalators as Means of Exit, Occupant load, capacities of exits, internal staircases, fire lifts, Firefighting Shafts, external stairs, horizontal exit, illumination of exits ,fire compartmentation, fire tower, refuge areas and ramps.

UNIT-5 FIRE FIGHTING LAYOUT OF BUILDINGS & DESIGN AND DETAILING FOR ACOUSTICS OF MULTIPURPOSE HALLS

Analyze a Fire fighting layout for a commercial building, Reflected ceiling plan of smoke detectors / sprinklers, etc. for a multistoried building.

Discuss and analyses fire accident case studies.

Case studies of acoustically designed and treated multipurpose halls. Onsite measurement with Sound measurement equipment's. Design of a multipurpose hall for optimum acoustics - drawings and construction details of acoustical treatment on walls, ceilings and floors.

COs & LOs for BUILDING SERVICES-III

Overall Course Outcome: The overall aim of the course is to introduce students to acoustical treatments in building and also to make them understand the significance of fire safety in buildings and its standard norms.

CO1	To understand the principles of sound and acoustical requirements of various buildings	LO1	Understand the theory of sound transmission in enclosed spaces
		LO2	Observe the properties of sound in enclosed space and phenomena of room acoustics
		LO3	Calculate the reverberation time using Sabine's formula and acoustical requirements
		LO4	Survey on acoustical materials and techniques
CO2	To analyse the methods of sound reinforcement and noise control methods in enclosed space	LO1	Define the principles of sound reinforcement and Noise, sources and types.
		LO2	Understand the behaviour of noise and means of noise control
		LO3	Analyse measures of noise control
		LO4	Evaluate design requirements for noise control and sound reinforcement in various enclosed spaces (theatres, lecture hall. Studio etc.)
		LO5	Develop construction details for acoustical treatment in enclosed spaces.
CO3	To learn the application of firefighting equipments in buildings	LO1	Understand the significance of firefighting services in building,
		LO2	Analyse the working and installation of firefighting equipment in buildings
		LO3	Analyse the application fire hydrant systems in buildings
		LO4	Evaluate the installation of sprinkler systems through examples from existing building applications.
CO4	To determine the significance of norms and standards in firefighting systems and its application	LO1	Learn the standards and norms for firefighting services
		LO2	Understand the relationship between fire hazard and life safety in buildings
		LO3	Analyse the application of these norms through existing case examples
		LO4	Evaluate the space requirements, location and arrangement of firefighting equipment in building.
CO5	To apply the principles of acoustics and firefighting systems in various building by developing construction details and layouts for the same	LO1	Evaluate the construction details for acoustical treatment of any existing building
		LO2	Evaluate design of an auditorium/theatre/studio etc for acoustical treatment through existing building examples
		LO3	Design a multipurpose hall for optimum acoustics
		LO4	Evaluate the application of firefighting services in existing buildings
		LO5	Design a layout for firefighting services for commercial/institutional buildings

3. Site Planning & Landscaping (Code – 210608)

Objectives –

The course aims to obtain understanding of environment, human interventions and its impacts on nature and knowledge about various measures of protecting it, various concepts, ideas and techniques prevalent in landscape architecture, concepts of site planning and effective measures of doing it, the historic development of landscaping and site planning to students.

S. No.	Subject Cod	Subject Name	Category	Maximum Marks Allotted							Total Marks	CT HRS	Contact Periods per week			Total Credits	Mode of Exam	Mode of Teaching (Offline/ Online)
				Theory Slot				Practical Slot					L	T	P			
				End Term Evaluation		Continuous Evaluation		End Sem. Exam	Continuous Evaluation									
				End Sem.	Proficiency in subject/ course	Mid Sem.	Quiz/ Assignment /Sessional		Lab work & Sessional	Skill based mini project								
3.	210614	Site Planning and Landscaping Architecture	DC- 14	50	10	20	20	-	-		100	3	2	1	-	3	PP	Blended* (2/1)

UNIT-1 INTRODUCTION & ELEMENTS OF LANDSCAPE ARCHITECTURE AND LANDSCAPE DESIGN

Introduction to landscape architecture, ecology, ecological balance, landscape conservation, reclamation and landscaping of derelict lands, environmental impact assessment. Elements of landscape – land elements, land form plants and planting, water, lighting etc. characteristics and classification of plant materials, basic principles of landscape design; Factors to be considered, Use and application of plant materials in landscape design, and other components involved

UNIT-2 HISTORY OF LANDSCAPE ARCHITECTURE & URBAN LANDSCAPE

Development of landscape design: Detailed study of selected examples from Eastern, Central and Western traditions; Ancient Heritage - Mesopotamia, Egypt, Greece, Rome; Western Civilization – Europe: Italy, France, and England; The middle-east - The Persian tradition and its far reaching influence Eastern Civilization: China and Japan Ancient and medieval period in India; Mughal and Rajput Landscapes and study of contemporary landscape architecture.

Basic principles and elements of Urban landscape, Significance of landscape in urban areas, introduction to street furniture, road landscaping, waterfront development, landscaping of residential areas, Industrial Landscaping.

UNIT-3 INTRODUCTION TO SITE ANALYSIS & SITE INFLUENCING FACTORS

Introduction to Site analysis, Importance of site analysis; interrelationship between nature and human interventions , thematic traditions in site design, history of site design as a source for precedent analysis

On site and off site factors; Analysis of natural, cultural and aesthetic factors; topography, hydrology, soils, landforms, vegetation, climate, microclimate. Influence of water bodies

UNIT-4 DESIGN OF LANDFORMS IN A SITE & SITE PLANNING PRINCIPLES AND TECHNIQUES

Contours - representation of landforms and landform design, interpolation of contours, slope analysis, uses and function. Grading - Symbols and grading and alignment of paths/roads, angle of repose and use of retaining walls. Grading terraces. Drainage - surface drainage, functional and aesthetic considerations. Site Zoning. Organization of vehicular and pedestrian circulation; parking; street widths; turning radii; street intersections; steps and ramps. Site planning considerations in relation to water systems, sewage disposal, outdoor electrical systems.

UNIT-5 SITE CHARACTERISTICS AND DESIGN REQUIREMENTS& LANDSCAPE EXERCISE

Landscape design of a neighborhood open space (area of 2000 to 3000 sq. meters)

Exploration of site planning options for residential, commercial, office, industrial and mixed-use projects; street network, civic space, and open space planning; emphasis on walkable, mixed-use, transit-oriented sustainable development

COs & LOs for Site planning & Landscaping Architecture			
Student will be able to apply different methods in landscape practice and incorporate site planning for a specific land use.			
CO1	Understanding role and importance of site planning in enhancing quality of building environment	LO1	Defining various parameters of site analysis and its importance
		LO2	Gathering past information site design, theories
		LO3	Summarizing on site and off site factors,
		LO4	Analysing different layers of site planning for better design process
		LO5	Programme a zoning plan for a given site
CO2	Learning about the interrelationship between nature and humans. Role of natural elements in environment	LO1	Defining environment terminologies such as ecological balance, eco system, etc.
		LO2	Extending the role of environment in construction
		LO3	Summarizing elements and principles of landscape
		LO4	Applying elements and plant material in design process
		LO5	Categorizing plant material & understand their benefits
CO3	Understanding the construction techniques of hardscape, contours, landforms and its application on site.	LO1	Expressing landform through contour lines
		LO2	Determining slope percentage
		LO3	Calculating various physical characteristics like grading, drainage pattern
		LO4	Reflecting knowledge on techniques of retaining walls, steps, ramps
		LO5	Managing to propose plan of water systems, electrical, disposal
CO4	Awareness about characteristic of various historical gardens and concepts of urban landscape in design	LO1	Understanding the design philosophy behind history of landscape
		LO2	Analysing characteristics & features garden styles of different eras
		LO3	Explaining various design elements of urban landscape
		LO4	Reflecting on different usage of landscaping according to site context
		LO5	Creating presentation on historical gardens and example of urban landscape
CO5	Application of different methods in landscape practice which incorporate site planning for a specific land use	LO1	Searching for a land for landscape development
		LO2	Exploring the site by site visits and available secondary data
		LO3	Applying the various site planning options to given site
		LO4	Criticizing and appraising the existing site and design
		LO5	Proposing a site plan with landscape features on given land

4 . Working Drawing (Code – 210604) Objectives –

The course aims to obtain understanding of standards and conventions used for preparation of architectural drawings to develop the skills of preparing various architectural drawings and details used for construction of buildings, drawings in sufficient details such that the contractor is able to construct a building as per the design, Graphical presentation of all the components of a building along with dimensioning and annotations, application of IS Codes, Conventions/ methods of preparing a working drawing along with tabulation of schedules of materials, finishes and hardware/ Linking up working drawings / specifications in an architectural project.

S. No.	Subject Cod	Subject Name	Category	Maximum Marks Allotted							Total Marks	CT HRS	Contact Periods per week			Total Credits	Mode of Exam	Mode of Teaching (Offline/ Online)

				End Sem.	Proficiency in subject/ course	Mid Sem.	Quiz/ Assignment /Sessional		Lab work & Sessional	Skill based mini project								
4.	210620	Working Drawing	PAEC-2	-	-	-	-	50	30	20	100	5	1	1	6	5	PP	Offline**

UNIT- 1 BUILDING DRAWING

Centre line plan, Foundation plan, Structural grid plan (in case of framed structures), Basement floor plan, Ground floor plan, Typical floor plan, All elevations, All sections: one at least through staircase and one through toilet, Terrace floor plan giving details of surface drawing etc.

UNIT- 2 SERVICES

Sanitation drawings showing fixtures etc, Electrical layout plan, typical wall profiles sections, detailed drawings of special rooms like kitchens, toilets, staircase etc.

UNIT- 3 SPECIFICATION

In addition to the above, students are expected to prepare a detailed clause by chance specifications for at least one of the 3 projects Specifications writing include the following aspects: Materials, Pre and post installation work., Test if any, Mode of measurements, Knowledge of manufacturers specifications as a database for writing specifications for the following materials, based on surveys:

UNIT- 4 MATERIALS

Glass Plywood and laminates Hardware Electrical wires and accessories Water supply and plumbing: fittings and fixtures flooring and cladding.

UNIT- 5 EXERCISE

One working drawing of a previous year architectural design project having load bearing structure with Minimum 150 sq. m. carpet area not exceeding 2 stories. Two details such as doors/windows/railings/kitchen etc.

COs & LOs for Working Drawing			
Overall Course Outcome: Students will be able to develop, draw various architectural drawings and details used for construction of buildings, drawings in sufficient details such that the contractor is able to construct a building as per the design.			
CO1	Student will able to understand the various building drawings.	LO1	Learn various building drawing use in working drawing.
		LO2	Understand the use of various building drawing.
		LO3	Apply various building drawing to own project.
		LO4	Analyze the necessity of various building drawing in architectural project.
		LO5	Draw various building drawing.
CO2	Student will be able to understand and draw various services plan used in architectural project.	LO1	Study the various services used in architectural project.
		LO2	Understand use of services in architectural project.
		LO3	Draw various services plan used in architectural project.
CO3	Student will able to understand and write various specification of material required during execution of a project.	LO1	Study the detailed specifications for Materials used Pre and post installation work in architectural project.
		LO2	Understand the need of specifications.
		LO3	Formulate detailed specifications for any architectural project.
CO4	Students will understand various materials, finishing material used in architectural project.	LO1	Learn various building materials used in architectural project.
		LO2	Understand use of materials in architectural project.
		LO3	Analyze the fitting of materials in project.
CO5	Students will be able to develop working drawing sets for load bearing and a frame structure architectural Design project.	LO1	Study about working drawing sets for load bearing and a frame structure architectural Design project.
		LO2	Understand use of working drawing sets for architectural project.
		LO3	Draw working drawing sets for load bearing and a frame structure architectural Design project.

Objectives –

The course aims to obtain knowledge of fundamental concepts and theories of Housing and apply them in their design projects, various types of Housing and its components, the vocabulary of interior design, interior and furniture design and design movements through history, components of interior space and treatment and finishes for the same, the various components of interior design like lighting, landscaping and furniture.

S. No.	Subject Cod	Subject Name	Categor y	Maximum Marks Allotted							Total Mark s	CT HRS	Contact Periods per week			Total Credi ts	Mode of Exam	Mode of Teaching (Offline/ Online)

				End Sem.	Proficienc y in subject/ course	Mid Sem.	Quiz/ Assign ment /Session al		Lab work & Sessional	Skill based mini project								
5.	210611	Housing (Elective - III)	DE- 1	50	10	20	20	-	-		100	3	1	2	2	3	PP	Blended* (2/1)

(i) HOUSING**UNIT- 1 INTRODUCTION TO HOUSING AND HOUSING ISSUES.**

Housing demand and need, Role of Government and public agencies in Housing development, National housing policy, comparison of housing policies and programmes of developed and developing country, Housing agencies, housing programmes and resources, Housing finance.

UNIT- 2 SOCIO ECONOMIC ASPECTS.

Social factors influencing Housing Design – identity, safety, convenience, access, amenities etc, economic factors -affordability and its relationship to house income, incremental housing concept, Slum Upgrading and sites and services schemes and reconstruction process.

UNIT- 3 HOUSING STANDARDS.

Different types of housing standards – spatial standards, safety standards, standards for amenities, Methodology of formulating standards, UD PFI – guide lines, standard and regulations – DCR – performance standards for housing, TCPO, New norms and amenities

UNIT- 4 MODERN TECHNIQUES IN HOUSING CONSTRUCTION.

Prefabrication techniques –modular house, panelized and precast homes, sustainable practices – zero energy home, eco housing, green homes - Teri – Griha and its rating system, Recent advancement in materials, Design guidelines, Environmental impact of Building materials, Environmental quality.

UNIT- 5 HOUSING DESIGN AND PROCESS.

Traditional housing, row housing, cluster housing – apartments and high-rise housing, gated community, Government housing – HUDCO financed project for economically weaker section, their Advantages and disadvantages. Methods and approaches to housing design. Various stages and tasks in project development – feasibility study, detailed study.

COs & LOs for Housing (210611)

Overall Course Outcome: The course aims to obtain knowledge of fundamental concepts and theories of Housing and apply them in their design projects, various types of Housing and its components, the vocabulary of interior design, interior and furniture design and design movements through history, components of interior space and treatment and finishes for the same, the various components of interior design like lighting, landscaping and furniture.

CO1	Understand the housing issues and importance of housing development	LO1	Relate housing demand & need with its availability
		LO2	Interpret the role of government and public agencies in housing development
		LO3	Analyse housing policies and programmes
		LO4	Define necessary resources and housing finance
CO2	Relate the socio-economic aspects of site with its housing characteristics	LO1	List social factors influencing Housing Design
		LO2	Demonstrate the relationship between affordability and household income
		LO3	Examine incremental housing concept
		LO4	Justify the need of slum rehabilitation
CO3	Identify various housing standards, guidelines, regulations, norms, amenities, etc.	LO1	Define different types of housing standards
		LO2	Outline the methodology of formulating standards
		LO3	Illustrate different housing guidelines, standard and regulations- URDPFI, DCR, TCPO, etc
CO4	Discover modern techniques for efficient and sustainable housing	LO1	Define modern construction techniques
		LO2	List sustainable practices and recent advancement building materials
		LO3	Appraise different green rating system specific to housing
		LO4	Summarise modern housing construction techniques in context of changing scenario and globalization
CO5	Categorise different housing design process as per desired requirements	LO1	Define types of housing
		LO2	Analyse housing project for economically weaker section
		LO4	Elaborate design process, stages, tasks, methods, approaches to different type of housing projects

(ii) DESIGN THINKING IN ARCHITECTURE

UNIT-1 Introduction

Introduction to Design thinking, who are clients, what is customer centric approach of Design, Customer Journey mapping, Brainstorming.

UNIT- 2 Perspectives of Design Thinking

Introduction Lenses for Design Thinking, Ecologically Sensitive Design Solutions, Empathetic Design Solutions, Community Solutions, Post COVID Considerations, Learning from Past, Technological Inputs, Universal Design

UNIT- 3 Tools for Design Thinking

Tools for design thinking, solutions of How to conduct a case study, to do survey, to do research in architecture, to frame the brief/problem, to strategize the brief.

UNIT – 4 Design Setups in Architecture

Introduction Setups in Architecture, Collaborations in Architecture, Scales of setups, Innovations in Business Strategies.

UNIT- 5 Communication, Elevator Pitch and Growth

Introduction Communication, Elevator Pitch and Growth, Branding, Building connections, people skills, Elevator Pitches, Use of Social Media and Website.

COs & LOs for Society, Culture And Architecture (210412)

Overall Course Outcome: The course aims to obtain knowledge about society, culture, environment, etc. in architecture design and site planning.

CO 1	Students will be able to relate sociology with architecture and planning	LO1	Define various cultures and civilizations
		LO2	Explain fundamentals of society, culture and politics with reference to architectural history
		LO3	Discover forms of historical social organization
		LO4	Identify relationship of sociology and architecture
CO 2	Students will be able to inspect basics of traditional architecture	LO1	Define different architectural forms and models
		LO2	Illustrate the supremacy of people on their neighboring built environment
		LO3	Inspect the influence of asian tradition on its architectural style
		LO4	Analyze the concept of traditional architecture
CO 3	Students will be able to illustrate the site specific nature of architectural design	LO1	Recall architecture and its context
		LO2	Outline social and cultural aspects of building practices
		LO3	Determine architecture as an powerful agent to bring changes in society and culture
		LO4	Conclude architecture as an identity of a place/site
CO 4	Students will be able to distinguish cultural change and indigenous architectural practices	LO1	Illustrate transformation of architectural form over a period
		LO2	Analyze globalization and localization with the help of suitable examples
		LO3	Interpret the role of culture and its impact on architectural identify
CO 5	Students will be able to apply rejuvenation in architecture	LO1	Define basic terms of architectural rejuvenation
		LO2	Categorize concept of renewal, transformation, redevelopment, rejuvenation in architectural context

UNIT – I: Introduction

Introduction to IPRs, Basic concepts and need for Intellectual Property – Meaning and practical aspects of Patents, Copyrights, Geographical Indications, IPR in India and Abroad. Nature of Intellectual Property, Industrial Property, technological Research, Inventions and Innovations – Important examples of IPR.

UNIT – II: Intellectual Property Rights

The IPR tool kit, Patents, the patenting process, Patent cooperation treaties: International Treaties and conventions on IPRs, TRIPS Agreement, PCT Agreement, Patent Act of India, Patent Amendment Act, Design Act, Trademark Act, Geographical Indication Act.

UNIT – III: Intellectual Property Protections

IPR of Living Species, protecting inventions in biotechnology, protections of traditional knowledge, biopiracy and documenting traditional knowledge, Digital Innovations and Developments as Knowledge Assets – IP Laws, Cyber Law and Digital Content Protection. Case studies: The basmati rice issue, revocations of turmeric patent, revocation of neem patent.

UNIT – IV: Exercising and Enforcing of Intellectual Property Rights

Rights of an IPR owner, licensing agreements, criteria for patent infringement. Case studies of patent infringement, IPR – a contract, unfair competitions and control, provisions in TRIPs,

UNIT- V: Role of Patents in Product Development & Commercialization

Recent changes in IPR laws impacting patents and copy

COs & LOs for Intellectual property Rights- (Code – 210707)

Overall Course Outcome: Students will be able to **understand** the basic concepts of Intellectual Property Rights and to develop expertise in the learners in IPR related issues and sensitize the learners with emerging issues in IPR and the rationale for the protection of IPR.

CO1	Students will be able to understand the importance of it in architectural services.	LO1	Remember basic concepts of Intellectual Property Rights and to develop expertise in the learners in IPR related issues
		LO2	Learn the practical aspects of Patents, Copyrights, Geographical Indications in the practice.
		LO3	Understand the IPR in India and Abroad. Nature of Intellectual Property, Industrial Property, technological as per norms.
		LO4	Analyze the research, inventions and innovations in IPR.
		LO5	Evaluating role of an IPR in comprehensive architectural services.
CO2	Students will be able to apply IPR in architectural services.	LO1	Remember basic IPR tool kit, Patents, the patenting process, Patent cooperation treaties among the parties.
		LO2	Learn the different legislation in IPR.
		LO3	Understand the different acts in IPR.
		LO4	Analyze the legislation and acts in architectural practices.
		LO5	Evaluating role of IPR legislation and acts in architectural services.
CO3	Students will be able to understand inventions in biotechnology, protections of traditional knowledge, biopiracy and documenting traditional knowledge.	LO1	Remember the IPR of Living Species, protecting inventions in biotechnology, protections of traditional knowledge.
		LO2	Understand bio piracy and documenting traditional knowledge, Digital Innovations.
		LO3	Learn various IP Laws, Cyber Law and Digital Content Protection.
		LO4	Analyze the case studies in IPR .
		LO5	Evaluating the case studies of IPR in architectural services.
CO4	Students will be able to understand the different legislations applicable to architects, in IPR.	LO1	Remember the Rights of an IPR owner, licensing agreements.
		LO2	Understand the criteria for patent infringement.
		LO3	Learn the role of licensing agreements in architectural service.
		LO4	Analyze the case studies of patent infringement.
		LO5	Evaluating the case studies of patent infringement in architectural services.
CO5	Students will be able to understand the running of an architect's office and applicable laws, rules and regulations, pitching for projects .	LO1	Remember basic recent changes in IPR laws impacting patents and copyrights.
		LO2	Understand the intellectual cooperation in the science and allied industry.
		LO3	Learn patentable and non-patentable research.
		LO4	Analyze the case studies of Patents in Product Development & Commercialization
		LO5	Evaluating the case studies of Patents in Product Development & Commercialization in architectural services.

FOURTH YEAR VII SEMESTER

1. Architectural Design VII (210711)

OBJECTIVE: The objective of the subject is to Understand design as a function of specific agenda of complex services, acoustics, building byelaws and structure and to understand design as a process: of problem identification, space analysis, formulation of requirements, evolution of design criteria and design, to incorporate elements of site planning and landscape in the design process, to prepare computer aided presentation drawings.

S. No.	Subject Code	Subject Name	Category	Maximum Marks Allotted							Total Marks	CT HRS	Contact Periods per week			Total Credits	Mode of Exam	Mode of Teaching (Offline/ Online)
				Theory Slot				Practical Slot					L	T	P			
				End Term Evaluation		Continuous Evaluation		End Sem. Exam	Continuous Evaluation									
				End Sem.	Proficiency in subject/ course	Mid Sem.	Quiz/ Assignment /Sessional		Lab work & Sessional	Skill based mini project								
1.	210711	Architectural Design VII	DC- 15	-	-		-	100	80	20	200	6	-	-	6*(1.5)	9	Offline*	AO

Problem -1

The range of design problems shall include projects of progressively increasing complexity. Exercises related to public buildings i.e. Commercial center, hospital, Study and incorporation of building bye-laws should be complete in this Sem.

Problem -2

The range of design problems shall include projects of progressively increasing complexity.

Exercises related to public buildings i.e. Auditorium, sports cinema, sports complex & educational buildings on sloping/ flat sites. Simultaneously, stress should be given on the interior treatment of small and large spaces. Freedom in design is to be given with preliminary introduction of importance and role of bye laws in building design.

Note: The sessional will be in the form of drawings and models along with technical report for the design dealt with. The evaluation should be done in intermediate review consisting of internal /external experts. There should be regular site visits to the building types dealt in the studio problems of which audio - visual should be prepared. The various aspects of the design problem shall be dealt with lectures, group discussions and library research so as to provide the necessary philosophical and attitudinal background to a rational design approach.

Overall Course Outcome: Understand design as a function of specific agenda of complex services, acoustics, building byelaws and structure, understand design as a process: of problem identification, space analysis, formulation of requirements, evolution of design criteria and design, incorporate elements of site planning and landscape in the design process, prepare computer aided presentation drawings.

CO 1, 2, 3, 4, 5	The course should enable the student to: ● Train the student to gather knowledge on the given design project based on books / literature and websites. ● Make the student understand the complexity, functioning and salient features of the design project through organizing field visit, train them to document and present the findings. ● Develop design ideas and create them.	LO1	Analyze and study, pre-design process, design process & conceptualization stages in design.
		LO2	Understand the materials and technology required to build the same.
		LO3	Understand the building byelaws and apply them to the project.
		LO4	Handle large scale buildings such as projects of progressively increasing complexity.
		LO5	Design the projects based on the concept of space and form, Innovate Visualization of projects using computer software is also acquired.

5. National Building Code

2. Adv Building Construction (210712)

OBJECTIVE: The objective of the subject is to introduce the students about the implementation of new technology concepts which are applied in field of advanced construction and also to study different methods of construction in the field of architecture.

S. No.	Subject Code	Subject Name	Category	Maximum Marks Allotted							Total Marks	CT HRS	Contact Periods per week			Total Credits	Mode of Exam	Mode of Teaching (Offline/ Online)
				Theory Slot				Practical Slot					L	T	P			
				End Term Evaluation		Continuous Evaluation		End Sem. Exam	Continuous Evaluation									
				End Sem.	Proficiency in subject/ course	Mid Sem.	Quiz/ Assignment /Sessional		Lab work & Sessional	Skill based mini project								
2.	210712	Adv Building Construction	DC- 16	50	10	20	20	20	20	10	150	4	2	-	2*(1.5)	5	Blended *** (3/2)	PP

UNIT-1 SPECIAL STRUCTURES

Definitions, Types – single, double & multilayered grids – two way & three way space grids, connectors, Grids – Domes - various forms - Geodesic domes, Suspended cable structures – types of cable network systems, shapes of cable suspended systems, examples of tensile membrane structures – types of pneumatic structures. Long Span bridges, Cables Structure.

UNIT- 2 ADVANCE CONSTRUCTION SYSTEM

Advance construction systems and techniques developed by research organization in India- Design and detailing of building materials and components developed by research organizations like CBRI, SERC, NBO & BMTPC.

UNIT- 3 PRE STRESSED CONCRETE

Introduction to pre stressed concrete – Pre stressed concrete materials – Methods of pre stressing - Comparison between RCC and pre stressed concrete.

UNIT- 4 TALL BUILDINGS

Tall buildings structural systems – Rigid frames – Braced frames – Shear wall – Buildings – Wall frame buildings – Tubular buildings – Tube-in tube buildings – Outrigger braced system – Brief outline of their behavior and their applicability for various heights of buildings.

UNIT- 5 SHELLS AND FOLDED PLATES

Basic concepts of Shells – Types –Relative merits and applicability.

Folded plates – Types – Comparison with shells – Applicability. Arches & its types

COs & LOs for Adv Building Construction (210712)			
Overall Course Outcome: Students will be able to understand about the implementation of new technology concepts which are applied in field of advanced construction and also to study different methods of construction in the field of architecture.			
CO1	CO1 – As a result of studying about of latest materials and building technologies, structural systems , students will be able to understand use of latest technologies in the construction industry with a fair idea of their environmental performance.	LO1	Remember basic concepts of single, double & multi-layered grids – two way & three way space grids, connectors.
		LO2	Learn about domes - various forms - Geodesic domes, Suspended cable structures
		LO3	Understand the types of cable network systems, shapes of cable suspended systems, examples of tensile membrane structures.
		LO4	Analyze the types of pneumatic structures. Long Span bridges, Cables Structure.
		LO5	Evaluating role of latest materials and building technologies on site investigations, layout, site organization.
CO2	CO2 – As a result of studying about different research organization in India , students will be able to understand the detailing of building materials	LO1	Remember advance construction systems and techniques developed by research organization in India
		LO2	Learn about design and detailing of building materials and components developed by research organizations
		LO3	Understand the methodology of working in research organizations.

	and components developed by these research organizations.	LO4	Analyze design and detailing of building materials and components developed by research organizations .
		LO5	Evaluating role of latest materials and building technologies developed by research organization on site investigations, layout, site organization.
CO3	CO3 – As a result of studying about Pre stressed concrete materials, students will be able to analyse the use of advanced building construction methods and innovative architectural detailing with new materials.	LO1	Learn basic concepts of pre stressed concrete & pre stressed concrete material.
		LO2	Understand the methods of pre stressing.
		LO3	Apply the pre stressed concrete material on site investigations, layout, site organization.
		LO4	Analyze the comparison between RCC and pre stressed concrete..
		LO5	Evaluating pre stressed concrete material. through case studies and drawings of selected building types.
CO4	CO4 – As a result of studying about construction details in tall building structure, students will be able to understand the different types of structural methodologies involve in tall building structure.	LO1	Remember basic concepts regarding tall buildings structural systems
		LO2	Learn the Rigid frames – Braced frames – Shear wall – Buildings – Wall frame buildings – Tubular buildings – Tube-in tube buildings – Outrigger braced system
		LO3	Understand their behavior and their applicability for various heights of buildings.
		LO4	Analyze their behavior in different location.
		LO5	Evaluating their applicability for various heights of buildings through case studies and drawings of selected building types.
CO5	CO5 – As a result of studying basic concepts of Shells structure, students will be able to analyze different shells and folded plates and tensile structure for the space coverage.	LO1	Remember basic concept of shell structure.
		LO2	Learn its types and applicability.
		LO3	Understand folded plates structure.
		LO4	Analyze types folded plates structure and its Comparison with shells
		LO5	Evaluating their applicability through case studies.

Note: Total five questions shall be asked. Each question will consist of two parts, one of which will be of 7 marks (which shall be compulsory) and another with 3 marks(which shall be optional).

3. Project Management & Building Economics (210713)

Objective – The course aims to obtain knowledge of Project planning and project scheduling and project controlling, Role of decision in project management, etc.

S. No.	Subject Code	Subject Name	Category	Maximum Marks Allotted							Total Marks	CT HRS	Contact Periods per week			Total Credits	Mode of Exam	Mode of Teaching (Offline/ Online)
				Theory Slot				Practical Slot					L	T	P			
				End Term Evaluation		Continuous Evaluation		End Sem. Exam	Continuous Evaluation									
				End Sem.	Proficiency in subject/ course	Mid Sem.	Quiz/ Assignment /Sessional		Lab work & Sessional	Skill based mini project								
3.	210713	Project Management & Building economics	PAEC-3	50	10	20	20	-	-		100	3	2	1	-	3	Offline**	PP

UNIT- 1 INTRODUCTION.

Project planning and project scheduling and project controlling, Role of decision in project management, Method of planning and programming, Human aspects of project management,. Work breakdown structure, Life cycle of a project, Disadvantages of traditional management system. Project management constructional organization, delegation of responsibilities, Role of an Architect, Engineer and Contractor.

UNIT- 2 ELEMENTS OF NETWORK & CPM AND PERT ANALYSIS

Event, Activity, Dummy, Network Rules, Graphical guidelines for network, Numbering of events. CPM network analysis & PERT time estimates, time computation & network analysis

UNIT- 3 PROJECT TIME REDUCTION AND OPTIMIZATION

Project cost, indirect cost, direct project cost, Slope of the direct cost curve, Total project cost & optimum duration, contracting the network for cost optimization, steps in cost-time optimization.

UNIT- 4 PROJECT UPDATING & RESOURCE ALLOCATION

When to update? Data required for updating, steps in the process of updating. Resource usage profile: Histogram, Resource smoothing and Resource leveling.

UNIT- 5 COMPUTERIZED PROJECT MANAGEMENT & PRACTICAL IMPLICATIONS

Introduction: creating a new project, building task. Creating resources and assessing costs, refining your project. Project tracking – understanding tracking, recording actual. Reporting on progress. Analyzing financial progress, Construction site practices, Inspection & quality control.

COs & LOs for Project Management & Building Economics (210713)				
Overall Course Outcome: Students will be able to understand construction industry practices and project management techniques needed for coordinating building projects professionally.				
CO1	CO1 – As a result of studying Project planning, project scheduling and project controlling, students will be able to understand the role of decision making in project management, method of planning and human aspects of project management	LO1	Remember basic concepts regarding the Project planning, project scheduling and project controlling.	
		LO2	Learn the role of decision making in project management, method of planning and human aspects of project management	
		LO3	Understand the work breakdown structure, Life cycle of a project and disadvantages of traditional management system.	
		LO4	Analyze project management constructional organization activities and delegation of responsibilities	
		LO5	Evaluating role of an Architect, Engineer and Contractor in building economics.	
CO2	CO2 – As a result of studying Event, Activity, Dummy, Network Rules, Graphical guidelines for network, Numbering of events., students will be able to understand the site investigations, layout, site organization, networking techniques, PERT/CPM, LOB, MS Project	LO1	Learn basic concepts regarding Event, Activity, Dummy, Network Rules, Graphical guidelines for network, Numbering of events	
		LO2	Understand the networking techniques, PERT/CPM, LOB, MS Project	
		LO3	Apply the networking techniques on site investigations, layout, site organization	
		LO4	Analyze the Event, Activity, Dummy, Network Rules, Numbering of events on a project.	
		LO5	Draw all the elements of PERT/CPM .	

CO3	CO3 – As a result of studying Resource management and value engineering-methods, students will be able to understand the material/ labour estimation, resource scheduling and levelling, construction equipment types and applications	LO1	Learn basic concepts regarding Project cost, indirect cost, direct project cost, Slope of the direct cost curve.
		LO2	Understand the total project cost & optimum duration, contracting the network for cost optimization, steps in cost-time optimization.
		LO3	Apply the cost optimization techniques on site investigations, layout, site organization
		LO4	Analyze the total project cost & optimum duration, contracting the network for cost optimization
		LO5	Evaluating cost optimization techniques on site investigations, layout, site organization
CO4	CO4 – As a result of studying to Compute the money values and demand forecasting., students will be able to understand the project updating and resource allocation on different steps of a project activities	LO1	Learn basic concepts regarding Project monitoring and cost control, manpower management, safety and labour issues.
		LO2	Understand the data required for updating, steps in the process of updating.
		LO3	Apply project monitoring and cost control, manpower management techniques on site investigations, layout, site organization
		LO4	Analyze the Resource usage profile: Histogram, Resource smoothing and Resource levelling.
		LO5	Evaluating project monitoring and cost control, manpower management techniques on site investigations, layout, site organization
CO5	CO5 – As a result of studying computerized project management and practical implication , students will be able to understand the on how to enhance the professional ability as an architect in a project	LO1	Learn basic concepts regarding new project, building task and creating resources and assessing costs.
		LO2	Understand the project tracking activities and to record the progress.
		LO3	Apply project tracking activities
		LO4	Analyze the financial progress.
		LO5	Evaluating construction site practices, Inspection & quality control.

4. Estimating and Costing & Specifications (210714)

OBJECTIVE- The objective of the subject is to introduce the students about the successful implementation of the project to know about the material required and cost to be incurred before starting a new project.

S. No.	Subject Code	Subject Name	Category	Maximum Marks Allotted							Total Marks	CT HRS	Contact Periods per week			Total Credits	Mode of Exam	Mode of Teaching (Offline/ Online)
				Theory Slot				Practical Slot					L	T	P			
				End Term Evaluation		Continuous Evaluation		End Sem. Exam	Continuous Evaluation									
				End Sem.	Proficiency in subject/ course	Mid Sem.	Quiz/ Assignment /Sessional		Lab work & Sessional	Skill based mini project								
4.	210714	Estimation, Costing & Specifications	PAEC-4	50	10	20	20	-	-		100	3	2	1	-	3	Blended ** (2/1)	PP

UNIT- 1 INTRODUCTION TO SPECIFICATION

Specification - Definition, purpose, procedure for writing specifications for the purpose of calling tenders, types of specification. General specifications for 1St, 2nd, 3rd and 4th Class buildings. Data base for writing specification.

UNIT- 2 SPECIFICATION FOR DIFFERENT ITEMS

Specifications for the following items – Bricks; sand; cement; coarse aggregate; water; reinforcement; storing and handling of materials; Earth work in foundation; PCC; RCC; First class brick work in cement mortar; half brick thick partition in cement mortar; reinforced brick work; DPC; glazed tiles in skirting and dado; cement plaster; joinery in wood, steel & aluminum; painting to walls –emulsion, enamel paint

; painting to joinery ; varnishing ; French polishing ; based on surveys and Current trends.

UNIT- 3 INTRODUCTION TO ESTIMATION

Estimation – definition; purpose; types of estimate; various methods of approximate estimate of buildings with Introduction of computer applications in estimation.

UNIT- 4 DETAILED ESTIMATE

Detailed estimate – data required, factors to be considered, methodology of preparation, abstract of estimate, contingencies, work-charged establishment, bill of quantities, different methods for estimating building works, methods of measurement of works. – With case studies.

UNIT- 5 RATE ANALYSIS

Rate analysis – definition; method of preparation; quantity and labor estimate for unit work; task or outturn work; rate analysis for: earth work, concrete works, first class brick work, reinforced brick work, cement plastering, DPC with cement mortar/ concrete, finishing (cement paint, distemper, acrylic emulsion, enamel paint) to walls & ceiling. Using the current market rates for the materials, labor, tools and equipment

COs & LOs for Estimation, Costing & Specifications (210714)			
Overall Course Outcome: Students will be able to calculate and estimate the costing of any building based on the material, measurements and specifications, etc.			
CO1	Studying specification, students will be able to identify various materials based on specification and apply the understanding generated in their own design.	LO1	Remember basic definitions in specification.
		LO2	Observe the purpose and types of specification
		LO3	Understand general specifications, classes of buildings and database for writing specification.
CO2	Studying this, students will be able to analyze and apply specifications of different material and tasks in	LO1	Understand specification of basic construction material for substructure and superstructure.
		LO2	Identify classes in brickwork.

	construction in their own design and profession._	LO3	Analyse specification for basic construction work such as Dado, joiner, painting, etc. based on surveys and current trends.
CO3	Studying this, students will be able to estimate the approximate and basic construction cost of a building and their own design._	LO1	Learn the definition, purpose and types of estimation in architecture.
		LO2	Identify various methods of approximate estimate of the building.
		LO3	Understand basic application of computer software in estimation.
		LO4	Apply the formulas learned into calculating basic estimate of a small-scale building.
CO4	Studying this, students will be able to do detailed estimate of the construction cost of a building and their own design and profession._	LO1	Learn the definition, different methods, purpose and data required for preparation of detailed estimate of a building.
		LO2	Identify various methodologies for the preparation of detailed estimate of buildings.
		LO3	Understand abstract, contingencies and charge establishment, bill of quantities and methods of measurements, in estimation.
		LO4	Illustrate the different methods of detailed estimate with the help of case studies of buildings.
		LO5	Apply the methods learned into calculating detailed estimate of a small-scale building.
CO5	Studying this, students will be able to rate analysis for different construction works and apply them in their own design and profession._	LO1	Learn the definition and methods of preparation of rate analysis.
		LO2	Understand quantity and labor estimate, task or outturn work, etc.
		LO3	Analyse the rates for various construction work with different class of construction.
		LO4	Calculate the rate using the current market rates for the materials, labor, tools and equipments.

Opted from NPTEL platform (July- Dec 2023)

6. URBAN PLANNING (210717)

OBJECTIVES:

To expose the students to the history and development of planning, its relevance & application to modern day principles of town planning.

S. No.	Subject Code	Subject Name	Category	Maximum Marks Allotted							Total Marks	CT HRS	Contact Periods per week			Total Credits	Mode of Exam	Mode of Teaching (Offline/Online)
				Theory Slot				Practical Slot					L	T	P			
				End Term Evaluation		Continuous Evaluation		End Sem. Exam	Continuous Evaluation									
				End Sem.	Proficiency in subject/course	Mid Sem.	Quiz/Assignment /Sessional		Lab work & Sessional	Skill based mini project								
6.	210717	Urban Planning	DC	50	10	20	20	-	-		100	3	2	1	-	3	Blended * (2/1)	PP

UNIT- 1 PLANNING CONCEPTS

Role and contribution of the following towards contemporary town planning thought – Geddesian Triad and outlook Tower by Patrick Geddes, City Beautiful by Daniel Burnham, Garden city by Ebenezer Howard, Neighbourhood by C.A.Perry, Radburn by Henry Wright and Clarence Stein, Ekistics by CA Doxiadis, City for three million habitat, Radiant city and Chandigarh by Le Corbusier and F.L.Wright

UNIT- 2 CONTEMPORARY ISSUES IN URBAN AND REGIONAL PLANNING

Contemporary problems of settlements, Environmental impact of unplanned growth. Socio-economic aspects of urban housing and problems of slums, rationale of urban regulatory controls. Urban redevelopment and renewal, urban traffic and transportation planning

UNIT- 3 URBAN AND REGIONAL PLANNING

Influence of socio-economic factors in the development of human settlements, growth and decay of human settlements. Classification of settlements: Classification based on population, functions, locations, Municipal status. Town and its land uses, graphical representation and color coding of land use, character of a town, categories of a town, densities of a town, Principles, Advantages and types of Zoning. Scope and purpose of Perspective Plan, Regional Plan, Development Plan, Local Area Plan, Special Purpose Plan, Annual Plan, Project.

UNIT- 4 URBAN GOVERNANCE

Schemes, programs by government, Urban management including various schemes for small and medium towns by GOI. Human resource utilization- through schemes and use of PPP

UNIT- 5 EMERGING TRENDS IN URBAN AND REGIONAL PLANNING

New Urbanism, Smart growth, TOD, Form-Based Codes, Rural village, Transect Future of cities and cities of future - Sustainable cities, Intelligent cities, Liveable cities, Resilient cities, Smart Cities, Global city, Eco city, Compact city, Vertical urbanism, MediCity, Sports city.

COs & LOs for Urban And Regional Planning (210717)

Overall Course Outcome: Students will be able to identify various challenges of urban areas and suggest sustainable planning methods.

CO1	CO1 – Elaborate the dynamics of city and growth development.	LO1	Study the concept of urbanization and growth pattern.
		LO2	Explain the impact of cities' scale and complexity on National development.
		LO3	Identify the issues and challenges of Peri urban and fringe areas.
		LO4	Examine the physical and functional linkage between the city, fringe and periphery
		LO5	Determine the principal dimensions of urban transformation (economic, social, cultural, physical, environmental, and spatial) and the key interdependencies among these facets of urban change
CO2	CO2 – Student will be able to elaborate the role of socio-cultural aspects on growth patterns of city and neighbourhood communities	LO1	Define Gender Sensitive Planning, Inclusive Planning, Community Participation
		LO2	Infer various settlement policies for rural and urban settlements provided by National Commission on Urbanization and Rural Habitat Policy
		LO3	Identify social problems of slums and squatter settlements formed as a result of rapid urbanization and industrialization.
		LO4	Examine the impact of social transformation on social life, safety and security in rural and urban areas.
		LO5	Discuss the experiences from developing countries regarding settlement structure, growth and spatial distribution.

CO3	CO3 – Student will be able to propose sustainable measures of Planning for metro and mega cities.	LO1	Explain the concept of Urban Sustainability
		LO2	Identify the problems pertaining to urban expansion in metro and mega cities
		LO3	Examine the issues and problems of inner city.
		LO4	Determine various strategies to achieve inclusivity, equity, improved quality of life and sustainability in metro and mega cities.
		LO5	Discuss Transit-Oriented Development as an approach to sustainable development in metro and mega cities.
CO4	CO4 – Recommend effective tools and approach for Human Settlement Planning	LO1	Study various Urban Development policies and programs
		LO2	Outline the role of different agencies/bodies /authorities at different level
		LO3	Analyse policies, norms, byelaws and schemes in Indian context.
		LO4	Determine the success and failure of various schemes introduced at different levels
		LO5	Elaborate the concept of Human Settlement Planning
CO5	CO5 – Explain land and real estate development impact on Urban land policies, land use and environment.	LO1	Learn dynamics of Urban Land market.
		LO2	Summarize land management techniques
		LO3	Identify legal aspects of development and their impacts on real estate development.
		LO4	Analyse impact on Urban land policies, land use and environment.
		LO5	Perceive knowledge on various Environmental Legislations and policies.

FOURTH YEAR EIGHTH SEMESTER

1. Architectural Design VIII (210815)

Objectives –

The course aims to obtain knowledge of fundamental concepts and theories of Housing and apply them in their design projects, various types of Housing and its components, the vocabulary of urban design, its components. And utilizing it in design.

S. No.	Subject Cod	Subject Name	Categor y	Maximum Marks Allotted							Total Mark s	CT HRS	Contact Periods per week			Total Credi ts	Mode of Exam	Mode of Teaching (Offline/ Online)
				Theory Slot				Practical Slot					L	T	P			
				End Term Evaluation		Continuous Evaluation		End Sem. Exam	Continuous Evaluation									
				End Sem.	Proficiency in subject/ course	Mid Sem.	Quiz/ Assign ment /Sessional		Lab work & Sessional	Skill based mini project								
1.	210815	Architectural Design VIII	DC- 17	-	-	-	-	100	100	50	250	8	-	-	8*(1.5)	12	Offli ne**	-

PROJECT I: HOUSING

The various types of housing projects in a typical urban scenario can be taken with suitable design parameters that get established after conducting a rigorous study. Analysis of existing design trends & user preferences need to be ascertained. Awareness about special building byelaws applicable for Group housing schemes is essential. In addition to design issues such as security, accessibility, identity, social interaction, comfort, economy etc. that would be investigated. The application of Fractals in design can also be explored. Ex. Housing for the poor /Slum dwellers, Multi-storied apartments for Govt. / corporate employees, Multi-storied condominiums for the rich etc.

PROJECT II: URBAN DESIGN OR CONSERVATION

Urban design projects could deal with redevelopment of problem areas such as riverfronts, beach fronts, market areas, bazaars or commercial & residential districts that have reached dead end situation. It could also deal with emerging nodes of transportation with its surrounding areas, the design of city level open spaces such as parks, plazas etc. Alternatively, conservation strategies for heritage areas along with revitalization techniques can also be attempted. The projects thus undertaken as group work will have to ultimately contribute ideas for the improvement of the quality of the urban environment.

COs & LOs for Architectural Design – VI (210815)

Overall Course Outcome: The course aims to obtain knowledge of fundamental concepts and theories of Housing and apply them in their design projects, various types of Housing and its components, the vocabulary of urban design, its components. And utilizing it in design.

CO's	The course should enable the student to: - Familiarize with given topic of design by choosing appropriate case studies through visits and documentation. - Understand the resources available at National and international level through books, literatures and websites. - Develop design ideas and Incorporate them.	LO1	Formulate an intellectual position, explored through architectural design, which reconciles the development of a critical brief with spatial and functional criteria.
		LO2	Conceptualize a brief for a design project, which, through engagement with a series of contexts, seeks to provide a critique of the built environment by proposing alternative spatial, formal, organizational or material solutions.
		LO3	Synthesize a design solution, which combines appropriate architectural expression, cultural response and the fulfillment of the functional requirements of a brief.
		LO4	Produce appropriate drawings, models and other media of an architectural design which explore, test and express its qualities of space, form, organization and response to physical and other contexts.
		LO5	Integrate appropriate technologies concerning structure, materiality and services into the design proposal.
		LO6	Effectively communicate the design or designs through an exhibition incorporating drawings, models, texts and other appropriate media.

4. New Metric Handbook – Patricia Tutt and David Adler – The Architectural Press
5. Time saver standards for landscape architecture – Charles W.Harris – McGraw Hill

2. Urban Design (Code – 210816)

Objective –

The course aims to prepare the students to develop a holistic view of the city as a basis for designing the city/city components in the third dimension.

S. No.	Subject Cod	Subject Name	Category	Maximum Marks Allotted							Total Mark s	CT HRS	Contact Periods per week			Total Credi ts	Mode of Exam	Mode of Teaching (Offline/ Online)
				Theory Slot				Practical Slot					L	T	P			
				End Term Evaluation		Continuous Evaluation		End Sem. Exam	Continuous Evaluation									
				End Sem.	Proficiency in subject/ course	Mid Sem.	Quiz/ Assign ment /Sessional		Lab work & Sessional	Skill based mini project								
2.	210816	Urban Design	DC- 18	50	10	20	20	20	30		150	4	1	1	2	3	Blended* ** (3/1)	PP

UNIT- 1 INTRODUCTION

Emergence of urban design as a discipline, need for urban design, Elements of urban design(buildings, streets, public spaces, transports, other elements etc. Principles of urban design- creating form and spatial definition in articulation of urban design expression.

UNIT- 2 STUDY AND ANALYSIS OF URBAN SPACES IN HISTORY AND MODERN CONCEPTS IN URBAN DESIGN

A brief study and analysis of urban spaces in history-in the west(Greek, Roman, Medieval and Renaissance towns)and the east(in India-Vedic towns, temple towns, medieval and Islamic towns). Modern concepts in urban design. Study of Urban design theories of Gordon Cullen and Kevin Lynch. Relevance of historic concepts of urban design in the present context-Critical analysis of Indian cities & understanding the urban design projects of Singapore, China & United States.

UNIT- 3 BASIC PRINCIPLES & TECHNIQUES IN URBAN DESIGN

Components in urban design composition. Urban scale, mass and space, definition of urban fabric, visual surveys and their influence for urban design, various methods of conducting a visual survey. Definition and purpose of open spaces and their hierarchy in urban design-hierarchy of utility spaces for residential, commercial, recreational and industrial use. Special focus on streets-Expressive quality of built forms, spaces in public domain.

UNIT- 4 RENEWAL, RE-DEVELOPEMENT AND FORMULATING URBAN DESIGN

Definition and need for urban renewal and re-development, scope for urban renewal in India challenges and implementation methods of urban renewal for Indian historic towns and cities, impact of public participation. Analysis and formulation of urban design guidelines for new developments. National and international case studies for urban renewal.

UNIT- 5 URBAN DESIGN SURVEY AND PRESENTATION

Conducting an urban design survey of Conservation of historic cities, open-spaces, development of market spaces, transit oriented developments, water front development in India. Analysis of data. Formulating urban design guidelines for an area-practical problem solving, understanding various presentation techniques for urban design presentations.

COs & LOs for Urban Design 210816)

Overall Course Outcome: The course aims to obtain knowledge of fundamental concepts and theories of Housing and apply them in their design projects, various types of Housing and its components, the vocabulary of urban design, its components. And utilizing it in design.

CO1	Understanding the importance of general morphology of urban space	LO1	Defining Urban design as a requirement for public domain
		LO2	Summarizing various elements of the subject
		LO3	Journaling about public realm
		LO4	Building form and spatial definition
CO2	Understanding of fundamental concepts and theories of urban design	LO1	Retrieving concepts of the west and the east
		LO2	Categorizing urban spaces in history
		LO3	Synthesise general theoretical models by historians
		LO4	Assessing Urban forms of the history and contemporary reform
		LO5	Creating presentation of projects from different countries

CO3	Learning urban design techniques , components and survey methodology	LO1	Understanding components of urban design composition
		LO2	Examining methods of visual survey for analysis
		LO3	Demonstrating hierarchy of open spaces in urban design context
		LO4	Programming on streets and other public spaces
CO4	Developing the strategies that can be used to overcome urban issues	LO1	Defining urban renewal and urban re-development
		LO2	Finding scope in Indian historic towns and cities
		LO3	Analysing present documents by governments for new infrastructure and development
		LO4	Evaluating urban design guidelines and add new perspectives as required
		LO5	Presenting case examples related to urban re-development nationally and internationally
CO5	Produce a design process and a design solution to an urban design problem	LO1	Appraise a site by learnt survey methods
		LO2	Analyse secondary and primary information
		LO3	Research relevant developing urban design interventions
		LO4	Demonstrating abilities in team work and time management

3. Professional Practice & Ethics (210817)

Objective –

The course aims to obtain understanding of the moral values that ought to guide the Engineering profession, and to resolve the moral issues in the profession, and to justify the moral judgment concerning the profession.

S. No.	Subject Cod	Subject Name	Categor y	Maximum Marks Allotted							Total Mark s	CT HRS	Contact Periods per week			Total Credi ts	Mode of Exam	Mode of Teaching (Offline/ Online)
				Theory Slot				Practical Slot					L	T	P			
				End Term Evaluation		Continuous Evaluation		End Sem. Exam	Continuous Evaluation									
				End Sem.	Proficienc y in subject/ course	Mid Sem.	Quiz/ Assign ment /Session al		Lab work & Sessional	Skill based mini project								
3.	210817	Professional Practice & Ethics	PAEC- 5	50	10	20	20	-	-		100	3	2	1	-	3	Blended* ** (2/1)	PP

UNIT- 1 THE PROFESSIONAL ROLE OF AN ARCHITECT & SERVICES RENDERED

Architect's role in society, IIA code of conduct, salient features of architect's act 1972, the council of architecture – Architect's office and its management, elementary accountancy required for the same etc. Architectural services- conditions of agreement- scope of work, comprehensive architectural services and architectural competitions, conditions of engagement, remuneration, professional fees and charges as per IIA norms, - copy rights of drawings.

UNIT- 2 ARCHITECTURAL COMPETITIONS & LEGISLATIONS

Regulations governing the conduct of competitions, Types of competition (open & closed competitions), appointment & duties of Assessors, instructions to participants, award of premium. Role of development authorities & urban arts commissions, salient features of the DCR for CMA, important regulations in the MP Govt. Environmental acts & laws, special rules governing hill area development & coastal area management, Heritage act of India etc.

UNIT- 3 EASEMENTS& ARBITRATION

Easement Rights –Definition, characteristics of an easement, Natural Rights ,Various easement rights- Easement of support, Easement of light and air, Easement of right of way, Easement of eave projection, etc . Continuous and Discontinuous easements, extinction of easements, Modes of acquiring easement rights – Need for Arbitration, arbitration agreement, role of arbitrators, umpire etc, excepted matters, arbitral award.

UNIT- 4 TENDER & CONTRACT

Calling for Tenders, tender documents, open & closed tenders, various types such as item rate, lump sum, labour & demolition tenders, conditions of tender, submission, scrutiny, recommendations & award of contract. Conditions of contract, IIA form of contract, articles of agreement, certification of contractor's bills, defects liability. Earnest money deposit, security money deposit etc.

UNIT- 5 VALUATION& RENT

Valuation – purpose of valuation, types of valuation- book value – salvage value- scrap value depreciation- obsolescence- sinking fund- land valuation ,building valuation- mortgage and lease- Annuity- definition, Fixation of rent- out going- gross and net income – year's purchase- capital cost standard rent- market rent- economical rent.

COs & LOs for Professional Practice & Ethics (210817)

Overall Course Outcome: Students will be able to get down in the profession and practice ethically.

CO1	With the understanding of the professional role of an architect & services rendered, the students will be able to practice ethically.	LO1	Learn the Architects' role in the society.
		LO2	Relate IIA Code of Conduct & Architect's Act, 1972 with architectural practice.
		LO3	Understand the working of architecture firm, services, scope of work, conditions of agreement, professional fees, remuneration and other professional charges, etc.
		LO4	Comprehend copyrights of drawings and other issues related to it.
CO2		LO1	Learn the types of competitions and regulations governing it.

	Studying the regulations related to architectural competitions and legislations related to building construction, the students will be able to tackle the issues effectively.	LO2	Interpret role of development authorities, commissions and salient features of DCR for CMA
		LO3	Appreciate the rules and the acts applied for specific types of building construction by the state and central governments.
		LO4	Understand the various Acts such as Environment Act, special rules governing hill area development, coastal area management, Heritage act of India, etc.
CO3	With the understanding of easement and arbitration, the students will be able to work practically once they enter professional world.	LO1	Learn easement rights and the types of easement rights and easements.
		LO2	Construe the modes of acquiring easement rights.
		LO3	Appreciate the need of Arbitration and its role, agreements, umpire, excepted matters, awards, etc.
CO4	Studying the regulations tenders and contract, the students will be able to put tenders and frame contract effectively.	LO1	Learn the definition and types of tender in architecture and building construction.
		LO2	Interpret conditions of tender, submission and scrutiny.
		LO3	Recognize the rules and regulations related to contract, agreements and certification of contractors' bill.
		LO4	Understand the various types of money deposits.
CO5	Studying the valuation and rent system will help the students in their professional practice.	LO1	Learn the meaning, purpose and type of valuation in architecture and building construction.
		LO2	Summarize the mortgage, lease, annuity, etc.
		LO3	Understand the system of renting and types of rent.

4. Dissertation (210818)

Objective –

The course aims to obtain understanding of standards and conventions of doing dissertation. , to provide preliminary background information that puts the research in context and to clarify the focus of the study. The subject points out the value of research.

S. No.	Subject Cod	Subject Name	Category	Maximum Marks Allotted						Total Mark s	CT HRS	Contact Periods per week			Total Credi ts	Mode of Exam	Mode of Teaching (Offline/ Online)	
				Theory Slot				Practical Slot				L	T	P				
				End Term Evaluation		Continuous Evaluation		End Sem. Exam	Continuous Evaluation									
				End Sem.	Proficiency in subject/ course	Mid Sem.	Quiz/ Assign ment /Sessional		Lab work & Sessional									Skill based mini project
4.	210818	Dissertation	PAEC-6	-	-	-	20	30		50	4	-	-	4	2	Blended*** (2/2)	-	

PHASE-1

First phase of dissertation allows students to identify the broad area / field of Architecture of their interest in which they may intend to do the research. This is to be done by studying and reproducing the brief of technical papers in the form of report review.

PHASE-2

Second phase allows the students to do the study of sample example of research already done by choosing the specific aspect / area relevant to broader field they have selected in first phase. This exercise involves the writing of report / review of book / journal dedicated to that specific aspect or area. This review writing is aimed to understand the method of collecting data (survey methods), analysis of data (statistics and mathematical formulas), drawing inferences and conclusion as attempted by the author of the book.

PHASE-3

Third phase is the writing of detailed dissertation report. Students are expected to choose their own topic of research by referring the area / field already identified in other two phases.

NOTE: Sessionals will be submitted in the form of review reports and Dissertation report.

COs & LOs for Dissertation – VI (210818)

Overall Course Outcome: The course aims to obtain knowledge of fundamental concepts and theories and to develop research ideas and Incorporate them in writing, with understanding of research and professional and academic reports.

CO 1, 2, 3	The course should enable the student to: ● Familiarize with given topic of research by choosing appropriate case studies through visits and documentation. ● Understand the resources available at National and international level through books, literatures and websites. ● Develop research ideas and Incorporate them.	LO1	Understand the fundamentals of Research methods before attempting final year Project Thesis.
		LO2	Study and develop basic research principles and research methods.
		LO3	Develop a sustained and coherent argument on an agreed topic, supported by both secondary and primary sources
		LO4	Communicate the result of a systematic programme of research with clear identification of the topic, research issues, the context and the theoretical perspectives.
		LO5	Evaluate significant information sources referred to and draw coherent conclusions relevant to the topic and issues initially identified, from the observations, evidence and arguments presented.
		LO6	Develop the skill of report writing. Prepare a Dissertation report

LIST OF TEXT AND REFERENCE BOOKS:

Instruction Manuals on report writing

i) FURNITURE DESIGN

Objective – The course aims to obtain knowledge of the creation and evolution of objects, structures and systems at human scale that aim to improve the quality of life in the immediate living and working environment, while looking at sustainable and innovative use of diverse materials and processes. The course aims to obtain knowledge of how to plan, finance and manage urban areas. Structures supported by effective land markets, appropriate regulation, good public services, adequate public finance and transparent and accountable city level political systems.

UNIT-1 INTRODUCTION TO ERGONOMICS AND FURNITURE DESIGN

Introduction to importance of ergonomics for human being in man-made world, Gross human anatomy, Ergonomics for different age group and gender in relation object used in interior.

UNIT-2 HUMAN FACTORS AND FURNITURE DESIGN

Brief study of Anthropometrics –man –machine-environment, static and dynamic, Muscles and work physiology, Static and Dynamic work including maximum capacity , Furniture ergonomics for different age group and gender.

UNIT-3 ERGONOMIC FOR BUILT ENVIRONMENT

Built environment for the physically handicapped – Ramp, toilets and corridor design, Spatial Requirements for wheel chair movement-Design issues in the design of old age homes – Criteria to be considered when designing for the Visually handicapped.

UNIT-4 ENVIRONMENTAL ERGONOMICS

Study of Biomechanics, Environmental Condition including, thermal, illumination, noise and vibration, Bio transducers Environmental stress, Psycho Psychological aspects of design.

UNIT-5 ERGONOMICS FOR FURNITURE DESIGN

Study Of Furniture ergonomics for different space like, office , residential, children, Aged and Physically and visually handicapped user.

COs & LOs for Furniture Design			
Overall Course Outcome: The course aims to obtain knowledge of fundamental concepts and theories and to develop and design Furnitures.			
CO1	Developing a good understanding about furniture elements and design principles	LO1	Understanding furniture design process
		LO2	Understanding behaviour psychology and perception
		LO3	Discussing elements of evolution of creativity in furniture design
		LO4	Explaining basic design principle, multiple dimensions and concepts of furniture design
CO2	Understanding the intricacies of interior area coming up with the furniture requirements and its historical background	LO1	Remembering history of furniture in western context
		LO2	Relating interior space planning and its historical background with respect to furniture design
		LO3	Reflecting knowledge on furniture design eras and movements
		LO4	Reproduce with the help of illustrations, craft of various Indian Folk
CO3	Understanding of various elements of furniture design in contemporary context so that efficient design can be achieved	LO1	Identifying various furniture design elements
		LO2	Learning the ergonomics of furniture design
		LO3	Analysing the Universal Design Ideas
		LO4	Correlating the design for all nad built environment for physically handicapped with respect to furniture design
		LO5	Solution of furniture design issues in old age homes
CO4		LO1	Learn the study of biomechanics

	Elaborate concept of exterior furniture and landscaping elements	LO2	Judging effect of environment and psychological effects of furniture design
		LO3	Illustrating different furniture design for such places
CO5	Developing confidence to build furniture for according to usage	LO1	Associating human scale with furniture and given space
		LO2	Implementing furniture design for comfort and proper functioning
		LO3	Charting about material type for office, children, residence
		LO4	Experimenting with different materials for changing trends and lifestyles
		LO5	Create different furniture designs for different spaces

ii) SUSTAINABLE INTERVENTIONS IN HISTORIC BUILDINGS

Objective –

The course aims to obtain knowledge of the creation and evolution of Architectural Conservation in India as well as in western world. It aims to explore the methods of Documentation as well as analysis for Intervention. This course aims to develop an overall understanding of the process of Historic conservation and Preservation.

UNIT-1 INTRODUCTION TO HISTORIC BUILDINGS

- Definition of Historic Buildings.
- Definition of Heritage.
- Why Intervention? Justification.
- Concepts of Values, Significance, Authenticity and Integrity.
- Conservation. Ethics in Conservation.

UNIT-2 RESEARCH IN INTERVENTIONS & CRITICAL ANALYSIS OF HERITAGE COMPONENTS

- Importance of Research in Heritage Conservation.
- Sources of information like books, archival photographs and maps, folklores, mythology, oral tradition and memories.
- Understanding the Scales of various heritage components: Buildings, Areas, and Towns, Region (Local, National, and International).

UNIT-3 DOCUMENTATION & DEGREES OF INTERVENTION IN HISTORIC BUILDINGS AND MONUMENTS

- Introduction to Heritage Database and Surveys for conservation
- Listing and Inventories
- Measured Drawing: Techniques of Measurement, Drawing and Presentation
- Photographic Documentation
- Degrees - Prevention of deterioration, Preservation of the existing state, Consolidation of the fabric, Restoration, Rehabilitation, Reproduction, Reconstruction

UNIT-4 DECAY AND REMEDIES

- Introduction to Decay in Cultural property, Materials and Structural failures
- Internal and External environment of historic buildings
- Climatic causes of decay
- Botanical, biological and microbiological causes of decay
- Insects and other pests as causes of decay
- Man-made causes of decay

UNIT-5 WHAT IS SUSTAINABLE INTERVENTIONS & DESIGNING IN HISTORIC CONTEXT

- Sustainable Interventions & its steps.
- Concepts of: - Imitation, Inspiration, Innovation, Influence, Evolution, New Design.

COs & LOs for Furniture Design

Overall Course Outcome: The course aims to obtain knowledge of fundamental concepts and theories of Sustainable interventions which can be applied in historic buildings.

CO1	Students will be able to understand the basic terminology of the subject.	LO1	Understanding basics of historic buildings
		LO2	Understanding definitions of Heritage
		LO3	Discussing the need of Interventions
		LO4	Understanding the concept of values, significance, authenticity, integrity and ethics
CO2	Students will be able to identify the stylistic characteristics of architecture, theories and importance of research	LO1	Recalling importance of research in Heritage Conservation
		LO2	Relating the sources of information and research
		LO3	Reflecting knowledge on various heritage components
CO3	Students will be able to understand the documentation techniques and degrees of intervention	LO1	Identifying various ways of collecting heritage database
		LO2	Learning the types of surveys, listing and documentations
		LO3	Analysing the type suitable for certain type of heritage
		LO4	Correlating the degrees of intervention with the condition of the heritage
		LO5	Apply the knowledge in documenting and assessing a heritage

CO4	Students will be able to elaborate concept of & types of Decay in a building and their remedies.	LO1	Learn the different types of decays in heritage building and precinct
		LO2	Judging effect of the different types of decays in heritage building and precinct
		LO3	Illustrating of the different types of decays in heritage building and precinct in a heritage building and precinct
CO5	Students will be able to design in Historic Context keeping in mind the sustainable solutions	LO1	Associating sustainability with historic design concepts
		LO2	Implementing sustainability in interventions of heritage building and precinct
		LO3	Assessing and applying concepts of , Inspiration, Innovation, Influence, Evolution, New Design

(iii) ENVIRONMENT & ARCHITECTURE

Objective –

The course aims to obtain knowledge about Environmental studies and protection from rapid growing anthropogenic activities. Exploring various Architecture Techniques to mitigate them.

UNIT-1 INTRODUCTION TO THE STUDY OF ENVIRONMENT & URBAN DEVELOPMENT

Introduction, Concepts and Function: Introduction to environment, its meaning and growing importance in daily life. Built – Environment relationship.

UNIT-2 RELATIONSHIP BETWEEN ARCHITECTURE AND URBAN ENVIRONMENT

Role of Architects and Planners in Building Resilient Cities. Scope and Challenges in Indian Context.

UNIT-3 URBAN CHALLENGES

Urban Challenges to the Environment. Concepts like Waste management, Urban Heat Island Effect, Energy consumption, Climate change etc.

UNIT-4 GREEN RATING SYSTEMS IN ARCHITECTURE

Introduction to Green Rating Systems in India and Abroad. Criteria for listing under GRIHA LEAD, IGBC Etc

UNIT-5 ENVIRONMENTAL IMPACT ASSESSMENT

Introduction to Environmental Impact Assessment (EIA), Process including Scoping, Screening, Establishing Baseline conditions, Case examples.

COs & LOs for Environment & Architecture

Overall Course Outcome: The basic objective of this course is to develop the student's understanding towards the importance of ecological studies and environmental protection from rapidly growing anthropogenic activities. This course would let the students explore various architectural techniques in mitigating environmental degradation and achieving sustainable living.

CO1	Students will be able to summarize elementary knowledge to earth's natural environment and Urban Development	LO1	Define basic terms used in Environmental Study.
		LO2	Outline the relationship between built and Environment.
		LO3	Analyze the concept of Environmental studies.
		LO4	Conclude the various factors impacting environmental degradation, climate change, carbon footprint, relationship with human beings and built, Urban Development, etc.
CO2	Students will be able to highlight emerging human activities relating architecture & urban environment	LO1	List various human activities since industrialization till date impacting nature.
		LO2	Demonstrate impact of such activities with the help of suitable case examples
		LO3	Analyze the relationship between man and its natural surroundings, focusing on negative impacts of manmade activities on the environment.
		LO4	Evaluate the need of environmental protection and economic activities
CO3	Students will be able to relate urban ecology with its challenges.	LO1	Define ecology in terms of growing urbanization and technological advancement
		LO2	Summarize the need of alternative technologies to harmonize nature.
		LO3	Develop environmental sensitivity
		LO4	Examine application of available alternatives
CO4	Students will be able to perceive the role of green rating systems in architecture	LO1	Recollect the Green rating systems in India and abroad
		LO2	Exemplify the application Green rating systems in Architecture
		LO3	Relate various practical purpose of ecology and environment in the field of architecture and planning
		LO4	Apply the various Green rating systems
CO5	Students will be able to assess the Environmental Impact	LO1	List various factors of EIA and its process
		LO2	Assess the Environmental Impact over an area or specific region.

6. Elective- VII

OBJECTIVE-The objective of the subject is to introduce the students about the best teaching learning resources and programs initiated by the Government of India and designed to achieve the three cardinal principles of Education Policy viz., access, equity and quality. The course is opted from NPTEL platform in traditional mode. Elective- V
